Federal Register

Thursday
December 10, 1992

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

Rules and Regulations

Federal Register
Vol. 57, No. 238
Thursday, December 10, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF GOVERNMENT ETHICS

5 CFR Part 2638

RIN 3209–AA07

Executive Agency Ethics Training Programs; Amendments

AGENCY: Office of Government Ethics (OGE).

ACTION: Final rule; amendments.

SUMMARY: The Office of Government Ethics is issuing a final rule amending subpart G of 5 CFR part 2638 on Executive Agency Ethics Training Programs, which was published as a final rule last April. The Office of Government Ethics could not then include references in the training regulation to other rules that were not issued as final or interim at that time. The publication of the Standards of Ethical Conduct for Employees of the Executive Branch as a final rule and of the interim rule on Executive Branch Financial Disclosure, Qualified Trusts, and Certificates of Divestiture since then allows OGE to include references to these regulations within subpart G of this part. Moreover, in order to allow agencies sufficient time to complete the initial ethics orientation with the new standards, OGE is also extending the deadline for completion of the initial ethics orientation until February 3, 1993.

EFFECTIVE DATE: December 10, 1992.

FOR FURTHER INFORMATION CONTACT: Stuart C. Gilman or John C. Condray, Office of Government Ethics, telephone (202/FTS) 523–5757, FAX (202/FTS) 523–6325.

SUPPLEMENTARY INFORMATION: In accordance with section 301 of Executive Order 12674 of April 12, 1989, as amended by Executive Order 12731 of October 17, 1990, and consistent with its authority under the Ethics in Government Act, as amended, the Office of Government Ethics published the training regulation, subpart G of 5 CFR part 2638, as a final rule on April 7, 1992 (57 FR 11886–11891, as corrected at 57 FR 15219 (April 27, 1992)). As stated in the preamble to the final rule, procedures of the Office of the Federal Register prevent a final regulation from cross-referencing other regulations until the other regulations have also been published as final or interim rules. Although OGE would have liked to have cross-referenced both the new standards and the financial disclosure regulations in this training regulation when it was published last April, the decision was made to publish this regulation before the standards were finalized in order to allow executive branch agencies as much time as possible to plan their training programs. The April final rule preamble to this subpart G regulation indicated that, once the standards and the financial disclosure regulations were published in final or interim form, OGE would amend this regulation to cross-reference those regulations. As it turned out, in fact, OGE ended up separately publishing the financial disclosure regulation (57 FR 11800–11830) on April 7, 1992, the same day the training regulation was published. The financial disclosure regulation was subsequently corrected at 57 FR 21854–21855 (May 22, 1992). In addition, on August 7, 1992, OGE published the final Standards of Ethical Conduct for Employees of the Executive Branch (57 FR 35006–35067, as corrected at 57 FR 48557 (October 27, 1992) and 57 FR 52583 (November 4, 1992)). The Office of Government Ethics is therefore amending subpart G so that it cross-references both these regulations. As explained last April, because of the central importance of the new standards issued under Executive Order 12674, as amended, to employees' understanding of their ethical obligations, § 2638.703(a) of the training regulation is being revised to specifically include the standards, together with any supplemental regulation thereto of the concerned agency, among the items that must be provided as part of the initial ethics orientation. Section 2638.704(c) is also being revised; it will now include the standards (and any agency supplement regulation) as part of the minimum content of an agency's annual ethics training for covered employees. As stated in the April final rule preamble to this subpart G, the minimum content requirement does not require rote repetition each year of familiar material; inclusion of the standards is meant to be the starting point for annual training, not its sum total. A cross-reference to the financial disclosure regulation (and any agency supplement) is also being added to the definition of employees who are covered by the annual agency ethics training requirement, at § 2638.704(b)(4).

When OGE published subpart G of part 2638 last April, the deadline for agencies to complete the initial ethics orientation was January 2, 1993. At that time, it was expected that the standards would be published within the next three months, and that the January 2, 1993 timetable would give agencies six months to complete the orientation from the time of the publication of the standards as a final rule. The Office of Government Ethics indicated at that time that OGE would amend this requirement, contained in § 2638.703(a), if the publication date of the standards were delayed. Because the standards were published on August 7, four months after the April publication of the training regulation, OGE is extending the deadline for completion of the initial ethics orientation to February 3, 1993. This date will give agencies 180 days from the publication of the standards to complete the initial ethics orientation for current employees; it will also coincide with the effective date of the new executive branch standards.

Administrative Procedure Act

Pursuant to 5 U.S.C. 553 (b) and (d), as Director of the Office of Government Ethics, I find that good cause exists for waiving the general notice of proposed rulemaking and 30-day delay in effectiveness as to these revisions. The notice and delayed effective date are being waived because these amendments to the training regulation concern matters of agency organization, practice and procedure and because it is important to the working of executive branch agency ethics training programs that these revisions to the regulation go into effect as soon as possible. Further, these amendments reflect the changes OGE indicated it would make as previously announced when the final

rule was published in the **Federal Register** last April.

Executive Order 12291

As Director of the Office of Government Ethics, I have determined that this is not a major rule as defined under section 1(b) of Executive Order 12291, Federal Regulation.

Regulatory Flexibility Act

As Director of the Office of Government Ethics, I certify under the Regulatory Flexibility Act (5 U.S.C. chapter 6) that this regulation will not have a significant economic impact on a substantial number of small entities because it will affect only Federal executive branch agencies and employees.

Paperwork Reduction Act

The Paperwork Reduction Act (5 U.S.C. chapter 35) does not apply to this regulation because it does not contain information collection requirements that require the approval of the Office of Management and Budget.

List of Subjects in 5 CFR Part 2638

Administrative practice and procedure, Conflict of interests, Government employees, Reporting and recordkeeping requirements.

Approved: November 18, 1992.

Stephen D. Potts,

Director, Office of Government Ethics.

Accordingly, for the reasons set forth in the preamble, the Office of Government Ethics is amending part 2638 of subchapter B of chapter XVI of title 5 of the Code of Federal Regulations as follows:

PART 2638—[AMENDED]

1. The authority citation for 5 CFR part 2638 continues to read as follows:

Authority: 5 U.S.C. App. (Ethics in Government Act of 1978); E.O. 12674, 54 FR 15159, 3 CFR, 1989 Comp., p. 215, as modified by E.O. 12731, 55 FR 42547, 3 CFR, 1990 Comp., p. 306.

SUBPART G—EXECUTIVE REGENCY ETHICS TRAINING PROGRAM

2. Section 2638.703 is amended by revising paragraphs (a) and (b) to read as follows:

§ 2638.703 Initial agency ethics orientation.

(a) Each agency employee shall, on or before February 3, 1993, be provided:

(1) A copy of part I of Executive Order 12674, Principles of Ethical Conduct for Government Officers and Employees, dated April 12, 1989, as amended Executive Order 12731, 3 CFR, 1990 Comp., p. 306;

(2) A copy of part 2635 of this chapter, Standards of Ethical Conduct for Employees of the Executive Branch, and any supplemental regulation of the concerned agency;

(3) The names, titles, office addresses, and telephone numbers of the designated agency ethics official and other agency ethics officials available to answer questions regarding the employee's ethical responsibilities; and

(4) A minimum of one hour of official duty time for the purpose of permitting the employee to review the written materials furnished pursuant to this section. If the agency provides an ethics training course during official duty time, including annual ethics training provided under § 2638.704, or a nominee or other new entrant receives ethics training provided by the Office of Government Ethics or the White House Office, the period of official duty time set aside for individual review may be reduced by the time spent in training.

(b) Each new agency employee who enters on duty after May 7, 1992, shall, within 90 days of the date of his or her entrance on duty, or on or before February 3, 1993, whichever is later, be provided with the materials and time specified in paragraph (a) of this section.

* * * * *

3. Section 2638.704 is amended by revising paragraphs (b)(4) and (c)(1) to read as follows:

§ 2638.704 Annual agency ethics training.

* * * * *

(b) * * *

(4) Employees required to file confidential (nonpublic) financial disclosure reports under subpart I of part 2634 of this chapter and any supplemental regulation or addendum of the concerned agency;

* * * * *

(c) * * *

(1) A review of the employees' responsibilities under part I of Executive Order 12674, as amended, and the Standards of Ethical Conduct for Employees of the Executive Branch, part 2635 of this chapter, together with any agency's supplemental regulation. This review shall include examples that relate specifically to agency programs and operations and any ethics-related, agency-specific statute or regulatory restrictions of the particular agency; and

[Docket No. 92N-0007]

Medical Devices; Procedures for Premarket Notification, Premarket Approval, Classification, Performance Standards Establishment, Banning Devices, and Availability of Regulatory Hearings

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the medical device regulations governing procedures for premarket notification, premarket approval, classification, performance standards development, banning devices, and availability of regulatory hearings to conform these procedures to applicable provisions of the Safe Medical Devices Act of 1990 (the SMDA).

Its publication promotes clarity and certainty to regulated industry and thus fosters economic growth by correcting the provisions in FDA's existing regulations to conform them to the now-governing statutory provisions.

EFFECTIVE DATE: January 11, 1993.

ADDRESSES: Submit written comments and information to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joseph M. Sheehan, Center for Devices and Radiological Health (HFZ-84), Food and Drug Administration, 12720 Twinbrook Pkwy., Rockville, MD 20857, 301-443-4874.

SUPPLEMENTARY INFORMATION:

I. General

The SMDA (Pub. L. 101-629) prescribes changes to the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 301-394), as amended, that improve the regulation of medical devices and strengthen the Medical Device Amendments of 1976 which established a comprehensive framework for the regulation of medical devices. This rule implements certain amendments by the SMDA to sections 510, 513, 514, 515, and 516 of the act (21 U.S.C. 360, 360c, 360d, 360e, and 360f) by amending FDA's existing regulations under these sections. These

sections contain requirements for premarket notification, premarket approval, classification of medical devices, procedures for developing performance standards for medical devices, and procedures for banning devices. This rule also conforms FDA's lists of actions subject to regulatory hearings to conform them to the SMDA.

A. Amendments to 21 CFR Part 807—Establishment Registration and Device Listing for Manufacturers of Devices

New § 807.100 *FDA action on premarket notification* is being added to describe FDA's procedure for reviewing premarket notifications submitted pursuant to section 510(k) of the act and the criteria that will be applied in determining whether a device is substantially equivalent to a predicate device. These criteria were set forth in section 12 of the SMDA. Section 807.100 provides that a device will be found substantially equivalent to a predicate device if the device has the same intended use and technological characteristics as the predicate or, if it has different technological characteristics, the device does not raise different questions of safety and effectiveness than the predicate device and the performance data demonstrate equivalence.

This section also codifies in § 807.100 the requirement in section 12 of the SMDA that a device for which a premarket notification is pending may not be marketed until the applicant receives an order from FDA declaring the device to be substantially equivalent.

B. Amendment to 21 CFR Part 814—Premarket Approval of Medical Devices

Section 814.44 *Procedures for review of a PMA* (21 CFR 814.44) has been amended to incorporate the provisions in section 18 of the SMDA, which grant FDA discretion to determine whether or not to refer a premarket approval application (PMA) to an advisory panel when FDA finds that the information in the application substantially duplicates information which has previously been reviewed by a panel.

C. Amendments to 21 CFR Part 860—Medical Device Classification Procedures

Section 860.3 *Definitions* (21 CFR 860.3) has been amended to incorporate the new definition of class II from section 5 of the SMDA. Previously, a class II device was one for which class I controls were insufficient but for which a performance standard could be developed to provide reasonable assurance of safety and effectiveness. Under the SMDA, class II is no longer limited to devices for which a performance standard could be developed to provide reasonable assurance of safety and effectiveness. Class II devices are now defined as devices which may be regulated by "special controls." Special controls include, in addition to performance standards, controls such as postmarket surveillance, patient registries, guidelines, recommendations, and other appropriate actions deemed necessary by FDA. The agency will identify specific special controls that it determines are necessary to provide adequate assurance of safety and effectiveness for class II devices that are life-supporting or life-sustaining. Because class II devices are no longer exclusively regulated by performance standards, the definitions of class I and class III, which referred to "performance standards," also have been revised to reflect the new definition of a class II device.

Section 860.84 *Classification procedures for "old devices"* has been amended to permit the use of special controls, and not performance standards alone, in regulating class II devices.

Section 860.120 *General* allows FDA to initiate reclassification of a device classified into class III under sections 513(f) and 520(l) of the act (21 U.S.C. 360c(f) and 360j(l)) as provided in the SMDA.

Section 860.130 *General procedures under section 513(e) of the act* allows the Commissioner of Food and Drugs (the Commissioner) to initiate reclassification of a device from class III into class II or class I under section 513(e) of the act as amended by the SMDA if the agency determines that the controls provided for those classes provide reasonable assurance of the safety and effectiveness of the device.

Section 860.134 *Procedures for "new devices" under section 513(f) of the act and reclassification of certain devices* has been amended to codify FDA's discretionary authority, under section 18 of the SMDA, to refer reclassification petitions containing no deficiencies to classification panels for further review and recommendation.

D. Amendments to 21 CFR Part 861—Procedures for Performance Standards Development

Part 861 has been amended to incorporate the concept of special controls for class II devices and simplify the procedures for establishing performance standards for medical devices, as provided in the SMDA.

Section 861.1 *Purpose and scope* (21 CFR 861.1) is amended to provide that FDA may determine that a performance standard is an appropriate special control to provide reasonable assurance of the safety and effectiveness of the device.

Section 861.20 *Summary of standards establishment process* has been amended to change the requirement of publishing separate consecutive notices in the Federal Register to: (1) Request reclassification of a device, and (2) invite persons to submit existing standards as a proposed standard prior to initiating development of a performance standard. The amendment provides that FDA will publish a single notice of proposed rulemaking for the establishment, amendment, or revocation of a performance standard for a device. That notice will include appropriate justification for the proposed action, and will invite the public to submit requests for changes in classification or to submit existing performance standards for consideration. If, in response to the notice, FDA receives a request to change the classification of the device, FDA will not publish an order in the Federal Register, but will consult with the appropriate panel under § 860.125, and either deny the request or initiate a change in classification. The heading and text of § 861.20 are revised to reflect the "establishment" rather than "development" process for a performance standard.

Section 861.22 *Invitation for a standard* has been removed. FDA will determine the necessity of and appropriate method for development of a performance standard and will publish a notice in the Federal Register when this option is exercised. Sections 861.26, 861.28, and 861.32, which described the requirements for offers and acceptance of offers to develop a performance standard, have been removed, as has been the portion of § 861.30 that referred to offers to develop standards.

Section 861.36 *Effective dates* has been amended to allow FDA to declare a proposed regulation amending a standard to be effective upon publication without a prior formal hearing if the agency determines that doing so is in the interest of the public health. An amendment to § 861.38 *Standards advisory committees* allows FDA to determine whether or not a citizen petition, submitted in response to a proposed regulation to establish, amend, or revoke a performance standard, demonstrates good cause sufficient to justify referral of the

proposed action to an advisory committee.

E. Amendments to 21 CFR Part 895—Banned Devices

Section 895.20 *General* (21 CFR 895.20) and § 895.21 *Procedures for banning a device* have been amended to allow the Commissioner the option to initiate a proceeding to ban a device, based upon available data and information, without first consulting with a device panel and providing an opportunity for an informal hearing, as provided in section 18(d) of the SMDA.

Section 895.30 *Special effective date* has been amended as provided in the SMDA to allow the Commissioner to issue a proposed regulation banning a device, effective upon publication in the **Federal Register**, without providing an opportunity for an informal hearing under 21 CFR part 16 if the Commissioner finds that continued marketing of the device presents a substantial deception or an unreasonable and substantial risk of illness or injury.

F. Amendments to 21 CFR Part 16—Regulatory Hearing Before the Food and Drug Administration

FDA is revising the list of proceedings subject to part 16 (21 CFR part 16) found in § 16.1(b)(1), to conform the list to the SMDA. In the **Federal Register** of August 20, 1976 (41 FR 35282 at 35289), FDA interpreted the "informal hearing" provision of the Medical Device Amendments of 1976 as the "functional equivalent of FDA's regulatory hearing" (see part 16). Two provisions of the SMDA that increased FDA's postmarket control authority included opportunities for an informal hearing. Section 515(e)(3) of the act as amended by the SMDA authorizes FDA to temporarily suspend approval of a PMA if, after opportunity for an informal hearing, the agency determines that there is a reasonable probability that the continued distribution of a device under an approved application would cause serious, adverse health consequences or death. New section 518(e) of the act (21 U.S.C. 360h(e)) as amended by the SMDA authorizes FDA to issue a cease distribution and notification order and to amend the order to require a recall of a medical device intended for human use if, after opportunity for an informal nearing, the agency determines that there is a reasonable probability that the device would cause serious, adverse health consequences or death.

Therefore, FDA is amending § 16.1(b)(1) by adding sections 515(e)(3) and 518(e) of the act to the list of statutory provisions for which regulatory hearings under part 16 are available. When FDA issues separate regulations on procedures for temporary suspension of approval of a PMA or mandatory device recalls, the agency may modify the applicability of certain provisions to those specific procedures in part 16 to the extent needed to take into account statutory or other timeframes.

FDA is also deleting the statement in § 16.1(b)(1) which states that the part 16 procedures apply to "Section 514(g)(4)(B) of the act relating to an action to make a device performance standard effective upon publication." The SMDA amended section 514 of the act by redesignating subsection (g) as subsection (b) and by deleting the phrase "after affording all interested persons an opportunity for an informal hearing."

Similarly, FDA is deleting the statement in § 16.1(b)(1) which states that the part 16 procedures apply to "Section 520(l)(2) of the act relating to approval or denial of a petition to reclassify a class III devices that FDA previously had regarded as a new drug (see § 860.136)." The SMDA amended section 520(l)(2) of the act by deleting "and after affording the petitioner an opportunity for an informal hearing."

In addition, FDA is revising § 16.5 *Inapplicability and limited applicability*, to clarify that, although part 16 generally does not apply to recalls, this part, as a result of the SMDA, does apply to mandatory recalls of medical devices intended for human use.

II. Notice and Comment

This rule contains no new substantive provisions, but rather simply incorporates applicable requirements of the SMDA into existing medical device regulations. The Commissioner of Food and Drugs therefore finds good cause for issuing this rule without notice and comment because such a procedure is unnecessary, and delay in correcting agency regulations that no longer reflect the governing statutory provisions would be contrary to the public interest (5 U.S.C. 553(b)(3)(B)). In addition, because this rule pertains to agency procedure, it is exempt from the notice and comment requirements of section 553(b) of the Administrative Procedure Act (5 U.S.C. 553(b)(3)(A)). The agency is, nevertheless, inviting comments on the rule under § 10.40(e)(1) (21 CFR 10.40(e)(1)) of its regulations.

III. Environmental Impact

The agency has determined under 21 CFR 25.24(e)(2) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IV. Economic Impact

The agency has examined the economic impact of this rule and has determined that it does not require a regulatory impact analysis as specified in Executive Order 12291. The rule merely codifies applicable statutory requirements imposed by the SMDA. FDA believes that the cost imposed by these requirements is minimal. Therefore, the agency concludes that the rule is not a major rule as defined in Executive Order 12291. This final rule, published without a proposed rule, is exempt from the Regulatory Flexibility Act (Pub. L. 96–354). The rule does not impose any paperwork requirements.

V. Comments

Interested persons may, at any time, submit to the Dockets Management Branch (address above) written comments regarding this rule. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Comments will be considered to determine whether to amend or revoke this rule. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects

21 CFR Part 16

Administrative practice and procedure.

21 CFR Part 807

Confidential business information, Medical devices, Reporting and recordkeeping requirements.

21 CFR Part 814

Administrative practice and procedure, Confidential business information, Medical devices, Medical research, Reporting and recordkeeping requirements.

21 CFR Part 860

Administrative practice and procedure, Medical devices.

21 CFR Part 861

Administrative practice and procedure, Medical devices, Reporting and recordkeeping requirements.

21 CFR Part 895

Administrative practice and procedure, Labeling, Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 16, 807, 814, 860, 861, and 895 are amended as follows:

PART 16—REGULATORY HEARING BEFORE THE FOOD AND DRUG ADMINISTRATION

1. The authority citation for 21 CFR part 16 is revised to read as follows:

Authority: Secs. 201–903 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321–394); 21 U.S.C. 41–50, 141–149, 467f, 679, 821, 1034; secs. 2, 351, 361 of the Public Health Service Act (42 U.S.C. 201, 262, 264); secs. 2–12 of the Fair Packaging and Labeling Act (15 U.S.C. 1451–1461); 28 U.S.C. 2112.

2. Section 16.1 is amended by revising paragraph (b)(1) to read as follows:

§ 16.1 Scope.

* * * * *

(b) * * *

(1) Statutory provisions:

Section 304(g) of the act relating to the administrative detention of devices (see § 800.55(g) of this chapter).

Section 515(e)(1) of the act relating to the proposed withdrawal of approval of a device premarket approval application.

Section 515(e)(3) of the act relating to the temporary suspension of approval of a premarket approval application.

Section 515(f)(6) of the act relating to a proposed order revoking a device product development protocol or declaring a protocol not completed.

Section 515(f)(7) of the act relating to revocation of a notice of completion of a product development protocol.

Section 516 of the act relating to a proposed banned device regulations (see § 895.21(d) of this chapter).

Section 518(b) of the act relating to a determination that a device is subject to a repair, replacement, or refund order or that a correction plan, or revised correction plan, submitted by a manufacturer, importer, or distributor is inadequate.

Section 518(e) of the act relating to a cease distribution and notification order or mandatory recall order concerning a medical device for human use.

Section 520(f)(2)(D) of the act relating to exemptions or variances from device current good manufacturing practice requirements (see § 820.1(d)).

Section 520(g)(4) and (g)(5) of the act relating to disapproval and withdrawal of approval of an application from an investigational device exemption (see §§ 812.19(c), 812.30(c), 813.30(d), and 813.35(c) of this chapter).

* * * * *

3. Section 16.5 is amended by revising paragraph (a)(3) to read as follows:

§ 16.5 Inapplicability and limited applicability.

(a) * * *

(3) Factory inspections, recalls (except mandatory recalls of medical devices intended for human use), regulatory letters, and similar compliance activities related to law enforcement.

* * * * *

PART 807—ESTABLISHMENT REGISTRATION AND DEVICE LISTING FOR MANUFACTURERS OF DEVICES

4. The authority citation for 21 CFR part 807 continues to read as follows:

Authority: Secs. 301, 501, 502, 510, 513, 515, 519, 701, 704 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 331, 351, 352, 360, 360c, 360e, 360i, 371, 374).

5. New § 807.100 is added to subpart E to read as follows:

§ 807.100 FDA action on a premarket notification.

(a) After review of a premarket notification, FDA will:

(1) Issue an order declaring the device to be substantially equivalent to a legally marketed predicate device;

(2) Issue an order declaring the device to be not substantially equivalent to any legally marketed predicate device;

(3) Request additional information; or

(4) Advise the applicant that the premarket notification is not required.

Until the applicant receives an order declaring a device substantially equivalent, the applicant may not proceed to market the device.

(b) FDA will determine that a device is substantially equivalent to a predicate device using the following criteria:

(1) The device has the same intended use as the predicate device; and

(2) The device:

(i) Has the same technological characteristics as the predicate device; or

(ii)(A) Has different technological characteristics, such as a significant change in the materials, design, energy source, or other features of the device from those of the predicate device;

(B) The data submitted establishes that the device is substantially equivalent to the predicate device and contains information, including clinical data if deemed necessary by the Commissioner, that demonstrates that the device is as safe and as effective as a legally marketed device; and

(C) Does not raise different questions of safety and effectiveness than the predicate device.

(3) The predicate device has not been removed from the market at the initiative of the Commissioner of Food and Drugs or has not been determined to be misbranded or adulterated by a judicial order.

PART 814—PREMARKET APPROVAL OF MEDICAL DEVICES

6. The authority citation for 21 CFR part 814 continues to read as follows:

Authority: Secs. 501, 502, 503, 510, 513–520, 701, 702, 703, 704, 705, 706, 708, 801 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 352, 353, 360, 360c–360j, 371, 372, 373, 374, 375, 376, 379, 381).

7. Section 814.44 is amended by revising paragraph (a) to read as follows:

§ 814.44 Procedures for review of a PMA.

(a) FDA will begin substantive review of a PMA after the PMA is accepted for filing under § 814.42. FDA may refer the PMA to a panel on its own initiative, and will do so upon request of an applicant, unless FDA determines that the application substantially duplicates information previously reviewed by a panel. If FDA refers an application to a panel, FDA will forward the PMA, or relevant portions thereof, to each member of the appropriate FDA panel for review. During the review process, FDA may communicate with the applicant as set forth under § 814.37(b), or with a panel to respond to questions that may be posed by panel members or to provide additional information to the panel. FDA will maintain a record of all communications with the applicant and with the panel.

* * * * *

PART 860—MEDICAL DEVICE CLASSIFICATION PROCEDURES

8. The authority citation for 21 CFR part 860 continues to read as follows:

Authority: Secs. 513, 514, 515, 519, 520, 701, 704 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360c, 360d, 360e, 360i, 360j, 371, 374).

9. Section 860.3 is amended in paragraph (c)(1) by removing the phrase "a performance standard to provide such assurance, but which" and adding in its place "special controls to provide such assurance, but the device", and by revising paragraphs (c)(2) and (c)(3) to read as follows:

§ 860.3 Definitions.

* * * * *

(c) * * *

(2) *Class II* means the class of devices that is or eventually will be subject to special controls. A device is in class II if general controls alone are insufficient to provide reasonable assurance of its safety and effectiveness and there is sufficient information to establish special controls, including the

promulgation of performance standards, postmarket surveillance, patient registries, development and dissemination of guidelines (including guidelines for the submission of clinical data in premarket notification submissions in accordance with section 510(k) of the act), recommendations, and other appropriate actions as the Commissioner deems necessary to provide such assurance. For a device that is purported or represented to be for use in supporting or sustaining human life, the Commissioner shall examine and identify the special controls, if any, that are necessary to provide adequate assurance of safety and effectiveness and describe how such controls provide such assurance.

(3) *Class III* means the class of devices for which premarket approval is or will be required in accordance with section 515 of the act. A device is in class III if insufficient information exists to determine that general controls are sufficient to provide reasonable assurance of its safety and effectiveness or that application of special controls described in paragraph (c)(2) of this section would provide such assurance and if, in addition, the device is life-supporting or life-sustaining, or for a use which is of substantial importance in preventing impairment of human health, or if the device presents a potential unreasonable risk of illness or injury.

* * * * *

§ 860.84 [Amended]

10. Section 860.84 *Classification procedures for "old devices"* is amended in paragraph (a) by removing the parenthetical phrase "(performance standards)" and adding in its place "(special controls)".

11. Section 860.120 is amended in paragraph (c) by adding a sentence at the end of the paragraph to read as follows:

§ 860.120 General.

* * * * *

(c) * * * The Commissioner may initiate the reclassification of a device classified into class III under sections 513(f) and 520(l) of the act.

* * * * *

12. Section 860.130 is amended in paragraphs (e) and (f) by removing the words "performance standard" and adding in their place "special control", by redesignating paragraphs (c) through (f) as paragraphs (d) through (g), and by adding a new paragraph (c) to read as follows:

§ 860.130 General procedures under section 513(a) of the act.

* * * * *

(c) By regulation promulgated under this section, the Commissioner may change the classification from class III into:

(1) Class II if the Commissioner determines that special controls in addition to general controls would provide reasonable assurance of the safety and effectiveness of the device and there is sufficient information to establish special controls to provide assurance; or

(2) Class I if the Commissioner determines that general controls would provide reasonable assurance of the safety and effectiveness of the device.

* * * * *

13. Section 860.134 is amended by revising the section heading, the introductory text of paragraph (a), and paragraph (b)(3) to read as follows:

§ 860.134 Procedures for "new devices" under section 513(f) of the act and reclassification of certain devices.

(a) Section 513(f)(2) of the act applies to proceedings for reclassification of a device currently in class III by operation of section 513(f)(1) of the act. This category includes any device that is to be first introduced or delivered for introduction into interstate commerce for commercial distribution after May 28, 1976, unless:

* * * * *

(b) * * *

(3) After determining that the petition contains no deficiencies precluding a decision on it, the Commissioner may for good cause shown refer the petition to the appropriate classification panel for its review and recommendation whether to approve or deny the petition.

* * * * *

PART 861—PROCEDURES FOR PERFORMANCE STANDARDS DEVELOPMENT

14. The authority citation for 21 CFR part 861 is revised to read as follows:

Authority: Secs. 501, 502, 513, 514, 530–542, 701, 704 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 351, 352, 360c, 360d, 360gg–360ss, 371, 374); secs. 351, 361 of the Public Health Service Act (42 U.S.C. 262, 264).

15. Section 861.1 is amended by revising paragraphs (a) and (b) to read as follows:

§ 861.1 Purpose and scope.

(a) This part implements section 514 of the Federal Food, Drug, and Cosmetic Act (the act) with respect to the establishment, amendment, and revocation of performance standards applicable to devices intended for human use.

(b) The Food and Drug Administration may determine that a performance standard, as described under special controls for class II devices in § 860.7(b) of this chapter, is necessary to provide reasonable assurance of the safety and effectiveness of the device. Performance standards may be established for:

(1) A class II device;

(2) A class III device which, upon the effective date of the standard, is reclassified into class II; and

(3) A class III device, as a condition to premarket approval under section 515 of the act, to reduce or eliminate a risk or risks associated with such device.

* * * * *

16. Section 861.20 is revised to read as follows:

§ 861.20 Summary of standards establishment process.

The procedure by which a performance standard for a device may be established, amended, or revoked is as follows:

(a) The Food and Drug Administration (FDA) will publish in the **Federal Register** a notice of proposed rulemaking for the establishment, amendment, or revocation of any performance standard for a device.

(1) A notice of proposed rulemaking for the establishment or amendment of a performance standard for a device will:

(i) Set forth a finding, with supporting justification, that the performance standard is appropriate and necessary to provide reasonable assurance of the safety and effectiveness of the device;

(ii) Set forth proposed findings with respect to the risk of illness or injury that the performance standard is intended to reduce or eliminate;

(iii) Invite interested persons to submit to the Food and Drug Administration, within 30 days of the publication of the notice, requests for changes in the classification of the device pursuant to § 860.132 of this chapter, based on new information relevant to the classification; and

(iv) Invite interested persons to submit an existing performance standard for the device, including a draft or proposed performance standard, for consideration by the Commissioner of Food and Drugs.

(2) A notice of proposed rulemaking for the revocation of a performance standard will set forth a finding, with supporting justification, that the performance standard is no longer

necessary to provide reasonable assurance of the safety and effectiveness of a device.

(b) A notice under this section will provide for a comment period of not less than 60 days.

(c) If, after publication of a notice under paragraph (a) of this section, FDA receives a request to change the classification of the device, FDA will, within 60 days of the publication of the notice and after consultation with the appropriate panel under § 860.125 of this chapter, either deny the request or give notice of its intent to initiate a change in the classification under § 860.130.

(d) If FDA initiates a rulemaking proceeding under paragraph (a) of this section, FDA will:

(1) Complete the proceeding and establish the performance standard for the device in accordance with this part and § 10.40 of this chapter; or

(2) Terminate the proceeding by publishing in the **Federal Register** a notice announcing such termination and the reasons therefor and, unless the proceeding is terminated because the device is a banned device, initiate a proceeding in accordance with section 513(e) of the act to reclassify the device; or

(3) Take other appropriate action.

§ 861.22 [Removed]

17. Section 861.22 *Invitation for a standard* is removed from subpart B.

18. Section 861.24 is amended by revising the introductory text of paragraph (a) and paragraph (b) to read as follows:

§ 861.24 Existing standard as a proposed standard.

(a) The Food and Drug Administration may accept an existing standard or a proposed or draft standard if it includes:

* * * * *

(b) The Food and Drug Administration will publish a notice in the **Federal Register** stating either that it has accepted, or accepted with modification, as a proposed standard, an existing standard or one that has been developed, or that an existing standard is not acceptable, together with the reasons therefor.

§ 861.26 [Removed]

19. Section 861.26 *Offer to develop a proposed standard* is removed from subpart B.

§ 861.28 [Removed]

20. Section 861.28 *Acceptance of offer to develop a standard* is removed from subpart B.

21. Section 861.30 is revised to read as follows:

§ 861.30 Development of standards.

The Food and Drug Administration (FDA), while engaged in the development of a proposed standard under this section will:

(a) Support its proposed performance standard by such test data or other documents or materials as may reasonably be required;

(b) Provide interested persons an opportunity to participate in the development of the standard by accepting comments and, where appropriate, holding public meetings on issues relating to development of the standard. Notice of the opportunity to participate in the development of the standard will be furnished in a manner reasonably calculated to reach the majority of persons interested in the development of the standard. This requirement shall be satisfied by publishing such a notice in the **Federal Register**. Whenever it is appropriate, FDA will use the **Federal Register** to make announcements about the standard development process of standard developers other than Federal agencies.

(c) Maintain records disclosing the course of development of the proposed standard, the comments and other information submitted by a person in connection with such development (including comments and information regarding the need for a standard), and such other information as may be required to evaluate the standard.

§ 861.32 [Removed]

22. Section 861.32 *Contribution by the Food and Drug Administration to the costs of developing a proposed standard* is removed from subpart B.

§ 861.36 [Amended]

23. Section 861.36 *Effective dates* is amended in paragraph (c) by removing the words ", after affording interested persons an opportunity for an informal hearing conducted in accordance with Part 16 of this chapter,".

24. Section 861.38 is amended by revising paragraph (b)(2) to read as follows:

§ 861.38 Standards advisory committees.

* * * * *

(b) * * *

(2) Requested by an interested person, in the form of a citizen petition in accordance with § 10.30 of this chapter, which is made within the period provided for comment on the proposed regulation and which demonstrates good cause for referral.

* * * * *

PART 895—BANNED DEVICES

25. The authority citation for 21 CFR part 895 continues to read as follows:

Authority: Secs. 502, 516, 518, 519, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 352, 360f, 360h, 360i, 371).

§ 895.20 [Amended]

26. Section 895.20 *General* is amended by removing the words "and after consultation with the appropriate device panel,".

27. Section 895.21 is amended by revising paragraphs (b), (d)(4), and (d)(8) to read as follows:

§ 895.21 Procedures for banning a device.

* * * * *

(b) Before initiating a proceeding to make a device a banned device, the Commissioner of Food and Drugs (the Commissioner) may consult with the panel established under section 513 of the act that has expertise with respect to the type of device under consideration. The consultation with the panel may occur at a regular or specially scheduled panel meeting or may be accomplished by correspondence or telephone conversation with panel members. The Commissioner may request that the panel submit in writing any advice on the device under consideration. The Commissioner will record in written memoranda any oral communications with a panel or its members.

* * * * *

(d) * * *

(4) The consultation with the panel, if any, under paragraph (b) of this section.

* * * * *

(8) Any other data and information that the Commissioner believes are pertinent to the proceeding. The notice will afford all interested persons an opportunity to submit written comments within 30 days after the date of publication of the proposed regulation. All nonconfidential information upon which the proposed finding is based, including the recommendations of the panel, will be available for public review in the Dockets Management Branch, Food and Drug Administration.

* * * * *

§ 895.30 [Amended]

28. Section 895.30 *Special effective date* is amended in paragraph (c) by removing the words "and will provide an opportunity for an informal hearing in accordance with Part 16 of this

chapter", and in paragraph (d) by removing the words "the hearing, if any, and after".

Dated: December 1, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160-01-F

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 170

[CGD 89-037]

RIN 2115-AD33

Stability Design and Operational Regulations

AGENCY: Coast Guard, DOT.

ACTION: Final rule; delay of effective date.

SUMMARY: The Coast Guard announces a delay of the effective date of 46 CFR 170.210 in the stability design and operational regulations published on September 11, 1992 at 57 FR 41812. These regulations become effective on December 10, 1992. The effective date of this section is being delayed indefinitely to allow further investigation of the costs associated with the performance of the periodic lightweight survey requirements in 46 CFR 170.210.

EFFECTIVE DATE: As of December 10, 1992, the effective date of 46 CFR 170.210 in the final rule published at 57 FR 41812 is delayed indefinitely.

FOR FURTHER INFORMATION CONTACT: Ms. P.L. Carrigan, Marine Technical and Hazardous Materials Division, (202) 267-2988.

SUPPLEMENTARY INFORMATION:

Drafting Information

The principal persons involved in the drafting of this notice are Ms. Patricia L. Carrigan, Project Manager, Office of Marine Safety, Security and Environmental Protection and LT Ralph L. Hetzel, Project Counsel, Office of Chief Counsel.

Regulatory History

On February 13, 1990, the Coast Guard published a notice of proposed rulemaking entitled Stability Design and Operational Regulations in the **Federal Register** (55 FR 5120).

During the NPRM 60-day comment period, the Coast Guard received 28 letters commenting on the proposal. A public hearing was requested in only one of the comment letters and the Coast Guard decided that a public hearing was not necessary because the concerns addressed in this letter were resolved in the final rule. Only four of the 28 letters received included comments on specific costs associated with performance of the proposed periodic lightweight surveys. Two of the cost estimates were associated with small passenger vessels, one addressed offshore supply vessels and the final one addressed an ocean-going cargo ship. Where applicable, the economic assessment for the proposal was adjusted in answer to these comments.

On September 11, 1992, the Coast Guard published a final rule entitled Stability Design and Operational Regulations in the **Federal Register** (57 FR 41812).

Reason for Delay of Effective Date

Following publication of the final rule, five letters have been sent to the Coast Guard questioning the cost and applicability of the periodic lightweight surveys in 46 CFR 170.210 to mobile offshore drilling units (MODUs) and small passenger vessels. These issues, as related to MODUs, were again raised during the National Offshore Safety Advisory Committee meeting on December 1, 1992, at New Orleans, LA.

As a result of the information received, the Coast Guard has decided to delay the effective date of 46 CFR 170.210. A notice to request the submission of specific information and comments on the issues will be published in the **Federal Register** in the near future. After further investigation of this issue, the Coast Guard expects to publish either a supplemental notice of proposed rulemaking or a new effective date for this section.

Dated: December 8, 1992.

R.C. North,

Captain, U.S. Coast Guard, Acting Chief, Office of Marine Safety, Security and Environmental Protection.

BILLING CODE 4910-14-M

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 80-9; Notice 6]

RIN 2127-AA12

Federal Motor Vehicle Safety Standards; Lamps, Reflective Devices, and Associated Equipment

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT

ACTION: Final rule.

SUMMARY: This notice requires that trailers which have an overall width of 80 inches or more and a GVWR of more than 10,000 pounds, except trailers manufactured exclusively for use as offices or dwellings, be equipped on the sides and rear with means for increasing their conspicuity. This will enhance the likelihood of their detection at night and under other conditions of reduced visibility. Trailer manufacturers will be given a choice of installing either retroreflective sheeting or reflex reflectors. Under the rule, manufacturers of retroreflective sheeting or reflectors will certify compliance of their product with Standard No. 108, whether for use as original or as replacement equipment. NHTSA estimates that the incidence of accidents involving trailers struck in the side or rear by other vehicles could be reduced 15 percent by enhancing conspicuity as required by this rule.

DATES: The effective date for the final rule is December 1, 1993. Petitions for reconsideration of the rule must be received not later than 30 days after the rule is published in the **Federal Register.**

ADDRESSES: Petitions for reconsideration should refer to Docket 80-9; Notice 6, and be submitted to: Administrator, Docket Section, room 5109, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590 (Docket hours are from 9:30 a.m. to 4 p.m.)

FOR FURTHER INFORMATION CONTACT: Patrick Boyd, Office of Rulemaking (202-366-6346).

SUPPLEMENTARY INFORMATION: On December 4, 1991, NHTSA published a notice of proposed rulemaking (NPRM) addressed to making large trailers more visible on the road (56 FR 63474). The NPRM represented a tentative and partial solution to a safety problem that has concerned NHTSA for some years: The need to reduce the incidence and severity of collisions with large trailers during conditions of darkness or reduced visibility. As early as May 27, 1980, the agency showed its interest in enhanced conspicuity as a possible solution. NHTSA issued an ANPRM (45 FR 35405) requesting comments on methods to reduce such collisions by improving the conspicuity of large commercial vehicles. Forty-two comments were received, most of which favored the concept.

NHTSA Fleet Study

Between 1980 and 1985, the agency conducted a fleet study in which retroreflective material was placed on truck-van trailer combinations in a manner designed to increase their

conspicuity. The treatment of trailers consisted of outlining the rear perimeter, and delineating the lower side. No reflectorized mud flaps were used. The contractor concluded that truck-trailer combinations equipped with this material were involved in 15 percent fewer crashes (in which a trailer was struck in the side or rear) than combinations lacking the material.

1987 Request for Comments

The agency published a Notice of Request for Comments on September 18, 1987 (52 FR 35345) concerning the use of reflective material to increase the conspicuity of large trucks and trailers. The Notice recited the results of the fleet study and sought comments on the test results as well as the experiences others may have had with the use of reflective material to enhance conspicuity. Thirty-seven comments were received, most agreeing that an effectiveness of 15 percent could be expected when all large vehicles were so equipped with reflective material.

The Motor Carrier Safety Act of 1990

In response to the NHTSA fleet study, Congress included in the Motor Carrier Safety Act of 1990 (Sec. 15, Pub. L. 101–500) a provision directing the Secretary of Transportation "to initiate a rulemaking proceeding on the need to adopt methods for making trucks or any category of trucks more visible to motorists * * *" not later than February 3, 1991, and to complete the rulemaking proceeding not later than November 3, 1992.

The 1991 NPRM

NHTSA regards its 1991 NPRM, which is part of a rulemaking proceeding begun before the enactment of the Motor Carrier Safety Act of 1990, as responsive to the directive in that Act, and this notice as the completion of the rulemaking proceeding mandated by Congress. Under the NPRM, heavy trailers would be required to be equipped with means for increasing their conspicuity because the agency tentatively concluded that this would be an effective method to reduce the incidence and severity of these crashes. The proposal did not apply to large trucks without trailers, since NHTSA's FARS (Fatal Accident Reporting System) accident data for 1989 indicated a much lower rate of conspicuity-related accidents for large trucks alone than for large truck-trailer combinations. The reader is referred to the NPRM for a further discussion of the data.

Eighty-three comments were received in response to the NPRM, representing the views of manufacturers of vehicles, lamps, reflectors, and retroreflective sheeting; commercial and private fleet operators; the Teamsters union; States; insurance companies; and citizens. A Summary of Comments has been prepared and is available for inspection in the docket. Details of the NPRM, issues raised by the comments, and NHTSA's responses are discussed below. NHTSA has incorporated recommendations on modifications to the proposed retroreflective brightness values in a Supplementary Notice of Proposed Rulemaking (SNPRM) that is being prepared for publication. The SNPRM will also incorporate proposals regarding substitution of the retroreflective materials required by this notice for existing reflex reflectors.

Effectiveness of Conspicuity Treatment

There was near unanimity among the commenters that a retroreflective conspicuity treatment would prevent accidents and save lives. Most of the comments were directed towards the details of implementing conspicuity treatment rather than questioning its efficacy. The only commenter who questioned the possible effectiveness was UPS, principally because neither it nor its insurers were aware of any data concerning conspicuity-related accidents.

However, other commenters reported specific data on conspicuity-related accidents and their experiences with retroreflective treatments. American Inter-Fidelity Exchange, an insurer, began in August 1990 to require 3M diamond grade material on all insured platform trailers. In the 17-month period before August 1990, it had $2 million in claims with injuries and fatalities in conspicuity-related accidents. In the 18-month period subsequent to July 1990, it experienced no costs, no fatalities and few injuries in conspicuity-related accidents. The insured fleet numbered 3,500 flat bed trailers, and the miles traveled totalled 3.5 million. Landstar commented that it had retrofitted 6,500 trailers of a fleet of 9,000, and had experienced a 50 percent reduction in underride accidents, and a 90 percent reduction in the cost of an average underride accident claim. American Trucking Associations (ATA) reported on a program to assess the effectiveness of detectability where a conspicuity treatment was applied to 11,000 trailers. It found that the fleet experienced no conspicuity-related accidents in the year since the first application. The effectiveness of conspicuity treatment in daytime remains subject to question. While the agency is not assuming that there is a daytime benefit, it believes that the overall effectiveness of retroreflective conspicuity treatment is clearly demonstrated by the experience of these commenters.

Types of Trailers To Be Regulated

Since the various types of trailers differ from one another in their configuration, NHTSA tentatively concluded that the method of compliance that may be appropriate for one type may not be for another. For example, van-type trailers have distinct rectangular side and rear perimeters to which conspicuity enhancing materials could be easily applied, while tank-type, platform trailers, or others do not. In order to ensure that the requirements would be practicable for each type of trailer to which they apply, the agency developed and proposed definitions for four types of trailers: "Dump," "Flatbed," "Tank," and "Van." The requirements proposed for these types differed somewhat based on the differences in their configurations. Noting that these trailer types account for 95 percent of the miles traveled by heavy commercial trailers, NHTSA sought comment on whether, for the sake of practicability, the remaining 5 percent of trailers (those not fitting any of the four proposed definitions) should be excluded from compliance with the conspicuity treatment requirements. Additionally, NHTSA sought comment on the practicability of applying conspicuity treatment to car carriers, heavy haulers, and intermodal trailers.

Twenty-four general commenters wanted the final rule to include all commercial trailers without exceptions. They argued that it is preferable to allow sufficient latitude in the spacing and location of reflective materials that would facilitate compliance by all trailer types, than to exclude some specific type on the basis of practicability.

However, a number of other commenters requested that specific trailer types be excluded from the final rule. These trailer types were container chassis, automobile transporter, side-loading beverage, garbage, shiny aluminum, stainless van, and house and recreational.

NHTSA considered each of these trailer types. Container chassis trailers, and garbage trailers designed for carrying containers are motor vehicles, for purposes of the lighting standards of NHTSA and the Federal Highway Administration (FHWA). The sides of these types of trailers are easily visible, even if low. Thus, the agency sees no reason to exclude container chassis trailers or garbage container trailers from the final rule. Similarly,

reflectorization of frame members appears to be a practical solution for trailers with bodies routinely covered by tarps, such as some platform trailers.

Some commenters called for marking of containers because a container mounted on a container chassis resembles a van trailer. However, a commenter representing the container industry pointed out that the marking of containers is subject to international treaty and that containers equipped with conspicuity material would be illegal to transport in some countries. Accordingly, NHTSA has chosen not to require marking of containers.

Commenters recommending an exclusion for car transporters pointed out that the transporter side rails may be lower than 15 inches and that the vehicles transported are equipped with side and rear reflex reflectors. However, the reflectors on cars being transported on the carrier would not provide the trailer with either a recognizable pattern or a sufficient return of light to satisfy the intent of the rule. NHTSA has chosen to allow greater flexibility in the minimum mounting height of retroreflective materials so that the side rails of such vehicles may be equipped with conspicuity materials, if there is no practical alternative.

With respect to side loading beverage trailers, the rationale for exclusion appears to be based on the need to mount retroreflective materials low enough to clear the doors. NHTSA believes that the minimum mounting height adopted by this rule will be low enough to clear the doors, but, in any event, neither the NPRM nor the final rule prohibit application of conspicuity treatment to doors.

Finally, the agency has considered the request to exclude travel and house trailers. NHTSA long ago relinquished jurisdiction over mobile homes as trailers to the Department of Housing and Urban Development. However, the agency does regulate travel trailers. They are low mileage vehicles that are generally parked off-road at night, either on private property or trailer parks. NHTSA has concluded that to exclude this type of large trailer from the conspicuity requirement would not have an adverse effect upon safety. Accordingly, S5.7 will specify that the rule applies to all large trailers except those that are designed exclusively for living or office use.

The National Marine Manufacturers Association commented that it does not consider its small-boat industry to be affected by this rulemaking action because boats weighing 10,000 pounds or more are normally carried by commercial rather than recreational trailers. This is not always the case. Boats weighing less than 10,000 pounds may be carried by recreational trailers with GVWRs over 10,000 pounds. Any boat trailer whose GVWR exceeds 10,000 pounds will be subject to this rule, whether the trailer is commercial or recreational.

There were also recommendations that trucks and truck tractors be required to have conspicuity treatments. NHTSA restricted the NPRM to trailers to assure its cost effectiveness, because it appeared that the vast majority of fatal accidents in which trucks are struck at night involve tractor trailer combinations. The argument for including truck tractors is that they are not required to be equipped with rear mounted turn signals or rear identification lamps, and their tail/stop lamps are closer together than on other vehicles. Hence, from the rear at least, they are not a conspicuous presence on the road at night. Preliminary information available from FARS and General Estimates System (GES) indicate that there is a far higher accident involvement rate at night for tractors than for trucks. The foregoing suggests that a rear conspicuity treatment for truck tractors may provide safety benefits. The agency is considering the issue for possible inclusion in a future rulemaking.

Manufacturer Choice of Type of Retroreflective Materials

NHTSA tentatively decided in the NPRM that manufacturers of heavy trailers should be required to equip them with one of two proposed types of retroreflective materials. Compliance would be achieved using either retroreflective sheeting, or an array of reflex reflectors which reflects the same amount of light as the retroreflective sheeting. Commenters supported the option. As explained below, the final rule allows manufacturers the choice of using retroreflective sheeting or reflex reflectors.

Performance and Location of Retroreflective Materials

NHTSA proposed, as alternatives, two sets of requirements regarding pattern, color and location for placing retroreflective sheeting on the side and rear of trailers. One alternative was the pattern tested in the fleet study, and the other was a modification of the pattern that was expected to increase visibility of the trailer side. Each alternative used about the same amount of retroreflective sheeting, so that cost was not an issue. However, the second alternative distributed it in a way that was more generally applicable to all trailers, avoided setting higher standards for van trailers, and promoted uniformity of appearance. Under either alternative, the material would not be required to be affixed to discontinuous surfaces on the trailer body, and on items such as door hinges, and lamp bodies. While the agency proposed two specific configurations of conspicuity treatment, it specifically sought comment on whether variations of these alternatives would be more appropriate for a final rule, or whether there were other patterns more appropriate for conspicuity that should be proposed before a final rule was adopted. NHTSA also asked that commenters discuss the cost-effectiveness of each pattern, and provide support for their comments. The agency anticipated that the final rule would specify only one pattern, and not allow alternative treatments. Associated issues on which NHTSA requested comment were the appropriate level of retroreflective performance of the sheeting, the appropriate amount of sheeting used, whether the sheeting should be patterned, and the appropriate location of the sheeting, with respect to each of the alternatives.

Configuration of Retroreflective Sheeting

For its proposed Alternative 1, the agency chose a variation of the scheme used in the NHTSA fleet study. Alternative 1 consisted of a 2-inch wide strip of retroreflective tape in alternating red and white rectangles delineating the lower side rails and outlining the rear perimeter of the trailer. The white rectangles would be 7 to 9 inches long, and the adjacent red rectangles would be 2 to 4 inches longer than the white rectangles. The material would be installed on the perimeter of the rear of van trailers, and on as much of the rear perimeter of other trailers as practicable. The material would also be installed horizontally on each side to indicate the length of the trailer. The length of the material mounted on the side inclusive of interruptions for discontinuous surfaces would be within 3 feet of the full length of the trailer. Allowing for interruptions due to trailer design, the total length of the individual horizontal strips provided would not be less than 85 percent of the length of the material were there no interruptions. The mounting height of the horizontal side strips would be restricted to the same height as other retroreflective devices currently required by Standard No. 108; the center would be not less than 15 inches above the road surface; and the upper edge not more than 60 inches above it. In the NPRM, NHTSA noted

that, because of their configuration, van trailers can best benefit from this type of treatment. The large, flat surfaces of van trailers give the observer a better basis for judgment of size, shape, and distance compared with a flat bed trailer having only a thin side or rear frame.

Alternative 2 redistributed the conspicuity materials by placing more on the sides of the trailers and using only a partial outline on the rear. In NHTSA's view, this approach would provide better depth perception to the drivers of vehicles approaching the trailer from the sides and create a more standardized treatment across trailer categories without requiring the use of more conspicuity materials. In addition, this approach would avoid "penalizing" van trailers which, because of their large and flat surfaces, would require, under Alternative 1, a greater use of reflective materials than other trailer types. Alternative 2 would provide slightly better side recognition distance than Alternative 1, and identical rear recognition distance, as demonstrated by laboratory and field results from an ongoing University of Michigan Transportation Research Institute (UMTRI) research for NHTSA (Contract No. DTNH22–90–C–07017). Under both Alternative 1 and Alternative 2, red and white material would be required to be installed horizontally on each side to indicate the length of the trailer. However, on the rear, the only red and white material required by Alternative 2 would be at the base of the perimeter, rather than the entire perimeter as required by Alternative 1. In addition, Alternative 2 would require two vertical white strips 12 inches high and 2 inches wide, to indicate the width of the trailer, located within 12 inches of its full width. Similarly, two vertical white strips would be located on the side, as close to the front and rear as practicable, to indicate the full length of the trailer. In addition, the upper corners of the rear and both sides would be required to be marked with two intersecting pieces of white reflective sheeting, each 12 inches by 2 inches. On the rectangular sides and rear of a van trailer, the white strips, along with the red and white base strips, would mark the bottom and four corners of the sides and rear. However, under Alternative 2, the white strips could also be applied to trailers of irregular shape because they would not be required to form a continuous perimeter. White strips of sheeting would also be added to the vertical members of the rear underride protection equipment. Finally, white sheeting 36 inches long and not less than 2 inches high would be installed horizontally at the top center of the trailer sides.

After consideration of the comments, and for the reasons set forth below, NHTSA has decided to adopt the side conspicuity configuration of Alternative 1, and a rear conspicuity configuration similar to Alternative 2.

Alternative 1 was preferred by the U.S. Postal Service and Peterson Manufacturing. Alternative 2 was the choice of the National Private Truck Council, Idaho State Police, National Automobile Dealers Association, New Jersey Motor Vehicle Administration, Minnesota Department of Transportation, Wolf Technical Services, Dr. Rudolf Mortimer, Insurance Institute for Highway Safety, and Advocates for Highway & Auto Safety. Other commenters suggested combining elements of the two Alternatives. Many commenters desired discontinuous side striping to reduce material expense, to accommodate irregular surfaces and to simplify repair.

NHTSA believes that an effective configuration must identify the vehicle unambiguously as a trailer, and allow an estimate of its size and the closing distance to it. Given the decision to include all large trailers (except house trailers), practicability concerns require that the rule have enough flexibility to be applied to all trailers. The reduced detail of a more flexible rule creates a greater dependence on the common sense of trailer manufacturers to use materials in an effective way. The present widespread voluntary use of conspicuity materials well adapted to the structures of various types of trailers gives the agency confidence that a more flexible rule will be effective.

It is for this reason that NHTSA has chosen the side conspicuity treatment of Alternative 1 and a rear treatment similar to Alternative 2. The use of broken side stripes, with at least 50 percent of the length of the trailer covered, will make it practicable for ribbed trailers, and trailers with sides partially obscured by equipment, to conform. Under the rule, the distribution of spaces and material must be as uniform as practicable and indicate the full length and width of the trailer, but they may be arranged to fit the structure of the trailer. The colors must be placed in alternating sequence with no more than two-thirds of the material in one color.

Flexibility in the vertical location of stripes is necessary to allow lowboys, car carriers, and some tank trailers to comply. In order to promote uniformity without excluding trailer types, the stripes should be located for maximum visibility, thus the rule requires that they be as close as practicable to 4 feet above the road surface (the lower edge of the body of the great majority of trailers is about 4 feet above the road). Material may be placed on trailer doors. NHTSA recognizes that the location for maximum visibility on certain trailers may be the trailer frame.

The rear treatment of Alternative 2 is a good basis for a universal requirement. However, the treatment element for the underride device was the subject of both positive and negative comment. Objections were based on the potential for frequent damage that would cause trailers in use to fail inspections by the FHWA. NHTSA has observed that the horizontal bar of the underride device is less subject to docking impacts than the vertical bars because it is below most dock surfaces (and under a NHTSA proposal would be even lower). Therefore, the final rule requires retroreflective material to be applied to the horizontal device, instead of the vertical ones as proposed. NHTSA believes that the original conspicuity material should have a long useful life on a large number of trailers, especially if it is applied to a recessed surface. However, NHTSA recognizes that routine damage, as a practical matter, may be unavoidable for some trailers as a consequence of their particular use. Therefore, the FHWA will consider the exclusion of conspicuity treatment from the rear underride device in any future rulemaking concerning trailer conspicuity requirements for vehicles subject to 49 CFR part 393 *Parts and Accessories Necessary for Safe Operation*, and 49 CFR part 396 *Inspection and Maintenance*.

The rule requires conspicuity treatment of the upper corners where they exist. For example, platform trailers are required by the Motor Carrier Safety regulations (49 CFR 393.106) to have a front bulkhead, which can carry the upper corner treatment. The rear stripe of material will be continuous across the rear. To harmonize with Motor Carrier Safety regulations (49 CFR 323.26), a 3-inch spacing between white material and rear lamps is required (but red material may be used adjacent to lamps to create a full width stripe).

The UMTRI study specifically supports the rear treatment of Alternative 2 that has been chosen (see Figure 6.1(B) of its research report as cited in the NPRM). UMTRI found comparable detection distances between vehicles using a partial and a full rear outline, and recommended the partial outline as adequate for the task.

Although NHTSA's standards cannot apply to vehicles in use, NHTSA believes that the safety benefits of

conspicuity treatment are so demonstrable that fleet owners will wish to retrofit their trailers with conspicuity treatment. NHTSA recommends that they employ a treatment that corresponds with the requirements of the final rule. Several commenters believe that retrofit would be encouraged if NHTSA allowed two 1-inch strips of material as an alternative to one 2-inch strip. The final rule affords the manufacturer this option.

Performance of Retroreflective Sheeting

The NPRM proposed a set of tests to evaluate retroreflective sheeting. These tests would be conducted in accordance with ASTM D 4956–90, *Standard Specification for Retroreflective Sheeting for Traffic Control*. The ASTM Specification was chosen because NHTSA understood it to be the Specification that manufacturers of retroreflective sheeting were following as their current manufacturing practice. The tests that NHTSA proposed addressed retroreflective photometric performance, flexibility, adhesion, impact resistance, accelerated weathering, shrinkage, resistance to fungus, and specular gloss. Commenters were also asked to discuss the use of 2-inch-wide white material of a minimum 250 candela lux/square meter (for entrance angles of light up to 30 degrees) as compared with wider, but lower performance material or narrower, higher performance material. The notice proposed that material meeting the performance requirements (other than reflectivity) for Type V, defined as a super-high-intensity retroreflective sheeting, be used to enhance the conspicuity of trailers. It proposed minimum requirements for coefficients of retroreflective intensity from research in progress by UMTRI that were lower than those specified by ASTM for Type V material. The proposed values were shown to be adequate, and more closely represented the material fleet tested during the Vector study.

A principal issue that was raised by the comments was the brightness of the retroreflective material. Brightness is expressed in "specific intensity per unit area" or "SIA". SIA is specified at observation angles of 0.2 degree and 0.5 degree, and light entrance angles of –4 degrees and 30 degrees in both the ASTM specification and the NPRM. The NPRM required the same minimum performance at both entrance angles, a specification intended to simulate a viewing distance of 740 feet to a trailer angled at 30 degrees with respect to an approaching vehicle. Although commercially available retroreflective material easily exceeds the proposed minimum performance at –4 degrees, the lesser values proposed and adopted for that angle adequately meet the need for motor vehicle safety.

There were three questions raised about the brightness of the material: Whether the higher specification of the ASTM should be adopted; whether a system of wider stripes of material of lower brightness should be allowed; and whether a brightness should be specified at an entrance angle greater than 30 degrees.

Insurance Institute of Highway Safety (IIHS), Advocates for Highway & Auto Safety (Advocates), Reflexite, and Transportation Safety Equipment Institute (TSEI) supported the ASTM specification. IIHS justified its comment by pointing out that the UMTRI study measured sight distances in good weather using subjects in a car with clean headlamps and windshield. For this reason, the proposed material brightness should be increased to account for weather and car conditions. NHTSA disagrees with this argument. The values for brightness proposed are actually four times greater than the minimum brightness that UMTRI measured as adequate under good conditions specifically to accommodate weather, dirt, and other deleterious effects. Accordingly, NHTSA has decided not to adopt the higher ASTM specification.

UMTRI also indicated that wider stripes of lower performance material would be as effective as the proposed material as long as the amount of light reflected is preserved. Stimsonite and 3M recommended that the final rule allow wider material with equal specific intensity per linear foot as the proposed 2-inch material. Therefore, in the final rule, NHTSA is also allowing 3-inch and 4-inch wide materials as options. The three materials will be known respectively as DOT–C2, DOT–C3, and DOT–C4. These materials are believed to have the equivalent specific intensity per linear foot as those proposed and adopted for the 2-inch material. Figure 29 as adopted contains the SIA values for DOT–C3 and DOT–C4 materials at the same observation and entrance angles as the DOT–C2 materials.

Several commenters voiced a need for values at an entrance angle of 45 degrees, and NHTSA tentatively concurs. However, since the agency neither proposed a particular value nor even raised the general issue of a value for that entrance angle, NHTSA has included a proposed value in the SNPRM that NHTSA is issuing simultaneously with the final rule. It also proposes that the SIA value of 10 adopted for DOT–C2 red material at the 0.5 degree observation angle and entrance angles of –4 degrees and 30 degrees be increased from 10 to 15 in order to be more consistent with the performance specified at an observation angle of 0.2 degree.

The Rulemaking Analysis section of the NPRM stated that the average life of a trailer was believed to be 14 years, and that one application of the material should be sufficient for the life of a trailer. Yellow Freight and Anya Carrol disagreed. One cited the effects of chipping by stones, scrapes by tree limbs and by cleaning brushes. The other commented that loss of brightness will occur in the absence of frequent cleaning of the materials.

UMTRI investigated material that had been installed on fleets for at least 10 years, and found a moderate loss of brightness due to age, and a larger loss when the material was dirty. Material manufacturers routinely guarantee the retention of at least 50 percent of their original brightness for 7 years, while agreeing with UMTRI that the service life is much longer. NHTSA's proposed SIA values took into account the effect of age and dirt. Further, the agency made an effort to use industry standards in the belief that those standards represented the best engineering solutions of suppliers to the actual requirements of users. Thus, no change to the proposal is needed in response to considerations of durability or life of retroreflective materials. Further, as noted later, the FHWA will consider maintenance of the conspicuity treatment in any future rulemaking to adopt the conspicuity requirements in the Federal Motor Carrier Safety Regulations.

Comments on Dimensions and Color of Retroreflective Sheeting

With respect to retroreflective materials, NHTSA requested views on the proposed length and width of the red and white segments. NHTSA noted that it was not proposing to allow corporate logos as a substitute for the conspicuity materials. Typically, logos consist of material of low brightness, and they are not applied to the perimeters of a vehicle but are centered on the sides and rear. Logos may be used to supplement the conspicuity-enhancing materials that would be required, however.

With respect to the requirements of Alternative 1 and Alternative 2 regarding pattern, color and location, the agency sought comments on the likely relative effectiveness of each on van trailers, and on trailers other than van trailers.

With respect to Alternative 2, NHTSA asked for views on whether it would improve or detract from the side conspicuity of trailers as compared with Alternative 1, and whether the 12-inch long segments of white material contemplated should be increased to 18 inches (NHTSA estimated this would increase compliance costs about 8 percent).

NHTSA was also interested in comments on how to improve the conspicuity of platform trailers, and on the desirability of standardizing to the maximum extent possible the treatment of all trailers.

Very few commenters supported a red and white alternating combination pattern. ATA, Transamerica Leasing, and Robert Crail advocated white only; Motor Vehicle Manufacturers Association (MVMA) opposed white material on the rear as a violation of State laws and a source of possible masking of taillamps. Truck Trailer Manufacturing Association (TTMA), and United Parcel Service (UPS) opposed red on the sides. Rudolf Mortimer recommended red on the rear and yellow on the sides, while New Jersey suggested a side treatment of yellow and white.

The final rule requires only a single stripe of material on the side, and not a perimeter outline. Under this circumstance, the agency does not consider stripes of yellow or white, used alone or combined in alternating segments, as sufficiently distinct from common highway lane markings. Red and white were the colors used in the UMTRI study. NHTSA is confident that the public will quickly learn to associate the red/white stripe with trailers, and that the intuitive association of red with danger will reinforce the learning. Addressing MVMA's comment on the potential masking of stop and turn signal lamps by white retroreflective material, the rule requires a minimum spacing of three inches between white material and adjacent red lamps. This is an existing requirement of the Motor Carrier Safety Regulations of the FHWA. Data available to NHTSA does not indicate that the presence of red retroreflective material adjacent to a red lamp affects the perceptibility of the lamp.

UMTRI found that red and white segments of equal length (about 12 inches) were most effective in connoting dangers to viewers. The NPRM specified a somewhat different design in which the red segments were longer (11 to 12 inches) than the white (7 to 8 inches); this was based on the length of presently available commercial products. In the final rule, the specification for both segments is changed to 12±6 inches to accommodate both the UMTRI study and commercially available products, as well as to afford flexibility to the trailer manufacturer.

NHTSA understands that New Jersey presently requires retrofit of the sides of 53-foot trailers for the rearmost 5 feet in yellow and white material, and prohibits red and white material. As noted earlier, Standard No. 108 has no retroactive effect on trailers in use. However, under the preemption clause (15 U.S.C. 1392(d)), the new vehicle specifications of Standard No. 108 must be recognized by the States, and New Jersey will be unable to prohibit red and white material on the sides of large trailers manufactured on and after the effective date of this final rule. NHTSA therefore encourages New Jersey to review its requirement with a view towards allowing red and white material for retrofit, and thereby promoting uniformity of conspicuity treatment.

Reflex Reflectors

The NPRM proposed that a manufacturer have the choice of installing a system of reflex reflectors instead of retroreflective sheeting. Reflex reflectors that conform to SAE Standard J594f Reflex Reflectors, January 1977 (the current requirement in Standard No. 108), are rated in terms of the absolute amount of light reflected in proportion to the illumination striking them. The size of the reflector and the brightness of the material may be balanced to achieve the specified amount of reflected light. Retroreflective sheeting, however, is rated in terms of the reflected light per unit area, in proportion to the illumination. Typically, three reflex reflectors (either white or red, and independent of their size and shape) would provide the same reflected light as one foot of 2-inch DOT–C2 reflective sheeting of the same color. The array of reflectors that the agency believed equivalent to the proposed alternating white/red retroreflective material scheme was a group of two white reflectors alternating with a group of three red reflectors, the center of each reflector in a group being approximately 4 inches from the center of the next one in that group. For the elements of Alternative 2 that are all white, if the reflex reflector performance were as above, three white reflectors per foot would likely suffice. Although these reflectors would be required to conform to SAE J594f, they would also be required to meet the additional performance requirement of providing very high reflectivity over a range of entrance angles of light from 30 degrees left to 30 degrees right. The additional requirement ensured that the array of reflex reflectors would deliver the same minimum performance as the retroreflective sheeting. Reflex reflectors molded in bars, resembling the sheeting material, but narrower, were an obvious means of implementation to NHTSA. For a multiple-reflector bar, each segment conforming to SAE J594f would be labeled in order to indicate the number of reflectors per length of bar. NHTSA requested comments on this option, its likely relative effectiveness as an alternative to the use of retroreflective sheeting, and the likelihood of daytime conspicuity enhancement compared with that of sheeting.

Landstar and Wolf Technical Services argued that reflectors are more prone to damage than sheeting. Advocates claimed that the proposed array would be less bright than sheeting, while Grote argued exactly the opposite. NHTSA disagrees with Grote and Advocates. The agency's figures show for both sheeting and reflectors a value of 3.87 cd/lux per foot of white treatment. Grote mistakenly assumed that the values were based upon equal areas rather than on equal light return.

NHTSA recognizes that standards and durability differ between sheeting and reflectors, but it also recognizes that both products are apparently capable of providing the minimum safety performance necessary for vehicle conspicuity. The final rule allows the option as proposed, with a slight modification in the spacing requirement to allow arrays a range of alternating color lengths analogous to that permitted for sheeting, and to eliminate the minimum spacing because there is no corresponding maximum brightness for sheeting material. Further, as already noted, the Federal Highway Administration will conduct a separate rulemaking to address concerns about the maintenance of the conspicuity treatment required by this rulemaking.

Combination Conspicuity Systems

Because the retroreflective capabilities of the sheeting and reflectors specified by this standard are deemed equivalent, there appears to be no discernible reason why reflex reflectors meeting the new requirements may not be installed in lieu of retroreflective sheeting at any required location on the side or on the rear, should practicality or other conditions so dictate. Allowance of combination conspicuity systems will afford greater flexibility in complying with this rule.

Certification of Compliance of Retroreflective Materials

The responsibility for compliance with the performance requirements of the retroreflective sheeting or reflex reflectors used to comply with the conspicuity requirements rests upon the manufacturers of the sheeting or reflectors. Thus, manufacturers who are providing these materials to the trailer manufacturing industry and to replacement parts outlets will have to certify compliance with Standard No. 108, whether the materials are intended for use as original or replacement equipment. Such manufacturers must also file information in accordance with 49 CFR part 566, *Manufacturer Identification*, if they have not done so before.

Certification of the retroreflective materials will be mandatory. For the retroreflective sheeting, it will consist of the characters "DOT–C2", "DOT–C3", or "DOT–C4" to distinguish the materials from those conforming to Federal Specification L–S–300, September 7, 1965, which is presently permitted by paragraph S5.1.1.4.as an allowable alternative for side reflex reflectors. These reflectors may be marked "DOT" as an indication that they meet this earlier version of L–S–300. However, it should be noted that they may not meet ASTM D 4956–90, nor the conspicuity requirements of the final rule.

Each reflex reflector installed for the purpose of compliance with the conspicuity requirements will also be required to be marked with the letters DOT–C as a certification of compliance with the conspicuity requirements (reflectors conforming only to SAE J594f would continue to be marked DOT if their manufacturer chose that method of certification).

The spacing of the certification on retroreflective materials occasioned some comment. With respect to strips of all-white material, NHTSA proposed to require the DOT–C symbol to appear not less than every 12 inches. With respect to strips of alternating red and white material, the agency proposed that the DOT–C symbol appear on each red segment and each white segment. However, NHTSA requested comments on an alternative such as one requiring that the DOT–C symbol appear on one color alone, with a paragraph added to Standard No. 108 specifying that such certification shall also be a certification of the materials adjacent to it that are of a different color. NHTSA requested comments on whether individual segment marking would be practicable, or whether other methods may be used that have the desired legal result for certification of materials. In the view of the commenters, the NPRM's alternative suggestion of certification once per color cycle appeared to be the most reasonable solution. NHTSA is adopting this recommendation for materials of alternating colors. With respect to the white material used to mark the upper rear corners, certification will appear at least once every 12 inches.

Possible Elimination of Other Lighting Equipment

Some commenters believe that existing requirements for lamps and reflectors on large trailers should be modified when the conspicuity rule becomes effective. UPS suggested eliminating clearance lamps. TTMA argued that identification lamps and reflectors will no longer be needed. The American Petroleum Institute and ATA went further, recommending in addition to these, the elimination of all marker lamps. On the other hand, Grote and Trucklite opposed the elimination of any of the present lighting and reflecting equipment.

The agency is opposed to the elimination of any lamps, since the conspicuity treatment is intended to be a passive augmentation of the existing active lighting equipment. Safety depends on lamps being present and functioning in poor weather conditions, or when the transfer is dirtier than normal, conditions that work against the full effectiveness of reflected light.

However, rear and side reflex reflectors that are mounted at the same height as the conspicuity stripes could be considered redundant, even though amber side reflectors would be replaced with red and white conspicuity treatment. The agency is pursuing this matter further through the SNPRM that is being prepared for publication.

Shift to Expression of Measurements in Metric System Units

In implementation of the Department's policy to use the metric system where possible in rulemakings, the values that were proposed conventionally in the NPRM are adopted using metric units. For example, the strip of material whose width was 2 inches in the NPRM becomes one whose width is 50 mm in the final rule. This shift will result temporarily in Standard No. 108 using the conventional system of measurement in one section, and the metric system in another. However, eventually Standard No. 108 will be converted entirely to metric expression, in accordance with a NHTSA timetable.

Associated Rulemaking: Rear Underride Protection

The agency is also seeking to reduce the severity of accidents in which vehicles strike the rear ends of trailers through rulemaking regarding rear underride protection. To the extent that the number and severity of rear end crashes would be mitigated by enhancing conspicuity, the benefits of a rear underride rule might be lessened. Interested persons were advised to be aware of the relatedness of these two rulemaking actions in preparing their comments on each.

Related Rulemaking: Federal Highway Administration

The FHWA has worked with NHTSA to ensure that its standards are compatible with the Federal motor vehicle safety standards wherever possible. As part of this effort, the FHWA will continue to adopt the appropriate sections of NHTSA's standards into the Federal Motor Carrier Safety Regulations (FMCSRs). If amendments to 49 CFR parts 393, *Parts and Accessories Necessary for Safe Operation*, and 396, *Inspection Repair and Maintenance*, of the FMCSRs are necessary to ensure the continued presence and proper performance of conspicuity enhancements on large trailers, the FHWA will address the issue in a separate rulemaking.

This final rule does not have any retroactive effect. Under section 103(d) of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1392(d)), whenever a Federal motor vehicle safety standard is in effect, a state may not adopt or maintain a safety standard applicable to the same aspect of performance which is not identical to the Federal standard. Section 105 of the Act (15 U.S.C. 1394) sets forth a procedure for judicial review of final rules establishing, amending or revoking Federal motor vehicle safety standards. That section does not require submission of a petition for reconsideration or other administrative proceedings before parties may file suit in court.

Effective Date

Because of the relatively simple efforts that would be necessary to comply with the conspicuity requirements, and the fact that trailers are not modified on a model year basis, the agency proposed an effective date of the final rule that would be 12 months after publication of the final rule. Accordingly, the effective date of the final rule is December 1, 1993.

Rulemaking Analyses

Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

NHTSA has considered the impacts of this rulemaking action and has determined that although it is not major within the meaning of Executive Order 12291 "Federal Regulation," it is significant under Department of Transportation regulatory policies and procedures because it involves a matter of substantial Congressional and public interest. The rulemaking will not have an effect upon the economy in excess of $100 million a year. NHTSA estimates that the cost to equip all new trailers manufactured in a calendar year will be $17.3 million. This estimate will not be affected by the proportion of manufacturers which choose sheeting material versus reflex reflectors molded in bars as their means of compliance. The agency further estimates that once all trailers within the affected categories of trailers comply with the new requirements, 2,113 accidents will be prevented and 9,052 others will be mitigated annually. The resulting reduction in property damage will be $41.75 million. Thus, the cost of the conspicuity system will be offset by the savings in property damage alone. However, the expected prevention of injuries and fatalities is the reason that NHTSA is acting to improve the visibility of large trailers.

NHTSA estimates that the life of the average trailer is 14 years. Agency research indicates that the original application of conspicuity materials can be expected to perform during the entire life of the trailer. NHTSA has no studies allowing it to quantify a reduction in fatalities and injuries that would be expected from use of conspicuity material. However, it is reasonable to expect prevention of some 80 fatalities and 1,315 injuries if they were reduced in proportion to the expected reduction in accidents. There is no cost assigned to preventing those fatalities and injuries because the reduction of property damage alone is expected to exceed the cost of conspicuity materials and labor. The costs and benefits are calculated in 1992 dollars. A Regulatory Evaluation has been prepared and is available for examination by the public in the docket.

Regulatory Flexibility Act

The agency has also considered the effects of this rule in relation to the Regulatory Flexibility Act. I certify that this rule will not have a significant economic effect upon a substantial number of small entities. Although trailer manufacturers are generally small businesses within the meaning of the Regulatory Flexibility Act, the cost impact of complying with the regulation will not be significant. The agency estimates that compliance costs to the trailer buyer will average $102 per trailer to the consumer. As for manufacturers of retroreflective materials and reflex reflectors, NHTSA notes that retroreflective materials that conform to ASTM D 4956–90 Type V are presently being manufactured, and that the cost to add DOT certification symbols should be only about $.11 a trailer. Further, small organizations and governmental jurisdictions will not be significantly affected as the price of new trailers equipped with conspicuity treatment will not, as already noted above, be more than minimally impacted. Accordingly, no Regulatory Flexibility Analysis has been prepared.

Executive Order 12612 (Federalism)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612 on "Federalism." It has been determined that the rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

National Environmental Policy Act.

NHTSA has analyzed this rule for purposes of the National Environmental Policy Act. The rule will not have a significant effect upon the environment. Retroreflective material is non-toxic in nature. Further, the rule will not have an effect upon fuel consumption.

Paperwork Reduction Act

The labeling requirements associated with this rule have been submitted to the Office of Management and Budget for approval in accordance with 44 U.S.C. chapter 35. *Administration:* National Highway Traffic Safety Administration; Title: Labeling of reflective material for trailer conspicuity; *Need for Information:* Identification of reflective material as conforming to requirements; *Anticipated Use of Information:* Routine trailer inspection by Federal Highway Administration; *Frequency:* On occasion; *Burden Estimate:* 200 hours; *Respondents:* 2; FORM(S): None; *Average Burden Hours per Respondent:* 100; for further information contact: The Information Requirements Division, M–34, Office of the Secretary of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366–4735.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

In consideration of the foregoing, 49 CFR part 571 is amended as follows:

1. The authority citation for part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50

§ 571.108 [Amended]

a. Section 571.108 is amended as follows:

2. Section S3 *Application* is revised to read:

S3 *Application.* This standard applies to:

(a) Passenger cars, multipurpose passenger vehicles, trucks, buses, trailers (except pole trailers and trailer converter dollies), and motorcycles;

(b) Retroreflective sheeting and reflex reflectors manufactured to conform to S5.7 of this standard; and

(c) Lamps, reflective devices, and associated equipment for replacement of like equipment on vehicles to which this standard applies.

3. Sections S5.7, S5.7.1 and S5.7.2 are redesignated S5.8, S5.8.1 and S5.8.2, and a new section S5.7 is added to read:

S5.7 *Conspicuity Systems.* Each trailer of 80 or more inches overall width, and with a GVWR over 10,000 lbs., manufactured on or after December 1, 1993, except a trailer designed exclusively for living or office use, shall be equipped with either retroreflective sheeting that meets the requirements of S5.7.1, reflex reflectors that meet the requirements of S5.7.2, or a combination of retroreflective sheeting and reflex reflectors that meet the requirement of S5.7.3.

S5.7.1 *Retroreflective sheeting.* Each trailer to which S5.7 applies that does not conform to S5.7.2 or S5.7.3 shall be equipped with retroreflective sheeting that conforms to the requirements specified in S5.7.1.1 through S5.7.1.5.

S5.7.1.1 *Construction.* Retroreflective sheeting shall consist of a smooth, flat, transparent exterior film with retroeflective elements embedded or suspended beneath the film so as to form a non-exposed retroreflective optical system.

S5.7.1.2 *Performance requirements.* Retroreflective sheeting shall meet the requirements of ASTM D 4956–90, *Standard Specification for Retroreflective Sheeting for Traffic Control,* for Type V Sheeting, except for the photometric requirements, and shall meet the minimum photometric

performance requirements specified in Figure 29.

S5.7.1.3 *Sheeting pattern, dimensions, and relative coefficients of retroreflection.*

(a) Retroreflective sheeting shall be applied in a pattern of alternating white and red color segments to the side and rear of each trailer, and in white to the upper rear corners of each trailer, in the locations specified in S5.7.1.4, and illustrated in Figure 30.

(b) Except for a segment that is trimmed to clear obstructions, or lengthened to provide red sheeting near red lamps, each white or red segment shall have a length of 300 mm ± 150 mm.

(c) Neither white nor red sheeting shall represent more than two thirds of the aggregate of any continuous strip marking the width of a trailer, or any continuous or broken strip marking its length.

(d) Retroreflective sheeting shall have a width of 50 mm (Grade DOT–C2), 75 mm (Grade DOT–C3), or 100 mm (Grade DOT–C4).

(e) The coefficients for retroreflection of each segment of red or white sheeting shall be not less than the minimum values specified in Figure 29 of this standard for grades DOT–C2, DOT–C3, and DOT–C4.

S5.7.1.4 *Location.* (a) Retroreflective sheeting shall be applied to each trailer on the side and rear as specified below, but need not be applied to discontinuous surfaces such as outside ribs, stake post pickets on platform trailers, and external protruding beams, or to items of equipment such as door hinges and lamp bodies.

(b) The edge of white sheeting shall not be located closer than 75 mm to the edge of the luminous lens area of any lamp that is required by this standard.

(c) The edge of red sheeting shall not be located closer than 75 mm to the edge of the luminous lens area of any amber lamp that is required by this standard.

S5.7.1.4.1 *Rear.* Retroreflective sheeting shall be applied to the rear of each trailer as follows:

(a) Element 1: A horizontal strip of sheeting in alternating colors across the full width of the trailer as close to the extreme edges as practicable, and as close as practicable to 1.25 meters above the road surface.

(b) Element 2: Two pairs of white strips of sheeting, each pair consisting of strips 300 mm long of grade DOT–C2 (50 mm wide), DOT–C3 (75 mm wide), or DOT–C4 (100 mm wide), applied horizontally and vertically to the right and left upper contours of the body, as viewed from the rear, as close to the top of the trailer and as far apart as practicable.

(c) Element 3: A strip of sheeting in alternating colors across the full width of the horizontal member of the rear underride protection device.

S5.7.1.4.2 *Side.* Retroreflective sheeting shall be applied to each side of a trailer as follows:

(a) A horizontal strip of sheeting in alternating colors, originating and terminating as close to the front and rear ends as practicable, and as close as practicable to 1.25 m above the road surface except that, at the location chosen, the strip shall not be obscured in whole or in part by other motor vehicle equipment or trailer cargo. The strip need not be continuous as long as not less than half of the length of the trailer is covered and the spaces are distributed as evenly as practicable.

(b) If necessary to clear rivet heads or other similar obstructions, grade DOT–C2 retroreflective sheeting may be separated into two 25 mm wide strips of the same length and color, separated by a space of not more than 25 mm, and used in place of the retroreflective sheeting that would otherwise be applied.

S5.7.1.5 *Certification.* The letters DOT–C2, DOT–C3, or DOT–C4, as appropriate, constituting a certification that the retroreflective sheeting conforms to the requirements of S5.7.1.2, shall appear at least once on the exposed surface of each white or red segment of retroreflective sheeting, and at least once every 300 mm on retroreflective sheeting that is white only. The characters shall be not less than 3 mm high, and shall be permanently stamped, etched, molded, or printed in indelible ink.

S5.7.2 *Reflex Reflectors.* Each trailer to which S5.7 applies that does not conform to S5.7.1 or S5.7.3 shall be equipped with reflex reflectors in accordance with this section.

S5.7.2.1 (a) Each reflex reflector shall conform to SAE Standard J594f, *Reflex Reflectors*, January 1977.

(b) Each red reflex reflector shall also provide, at an observation angle of 0.2 degree, not less than 310 millicandelas/lux at any light entrance angle between 30 degrees left and 30 degrees right, including an entrance angle of 0 degree.

(c) Each white reflex reflector shall also provide, at an observation angle of 0.2 degree, not less than 1290 millicandelas/lux at any light entrance angle between 30 degrees left and 30 degrees right, including an entrance angle of 0 degree.

S5.7.2.2 Reflex reflectors shall be installed and located as specified below:

(a) In the same locations and in the same length in which retroreflective sheeting is required by S5.7.1.4 to be applied in alternating colors, reflex reflectors shall be installed in a repetitive pattern of two or three white reflex reflectors alternating with two or three red reflex reflectors, with the center of each reflector not more than 100 mm from the center of each adjacent reflector.

(b) In the same locations and in the same length in which white retroreflective sheeting is required by S5.7.1.4 to be installed, white reflex reflectors shall be installed, with the center of each white reflex reflector not more than 100 mm from the center of each adjacent reflector.

S5.7.2.3 *Certification.* The exposed surface of each reflex reflector shall be marked with the letters DOT–C which constitutes a certification that the reflector conforms to all applicable requirements of § 571.108 of this part. The certification shall be not less than 3 mm high, and permanently stamped, etched, molded or printed in indelible ink.

S5.7.3 *Combination of sheeting and reflectors.* Each trailer to which S5.7 applies that does not conform to S5.7.1 or S5.7.2, shall be equipped with retroreflective materials that meet the requirements of S5.7.1 except that reflex reflectors that meet the requirements of S5.7.2.1, and that are installed in accordance with S5.7.2.2, may be used instead of any corresponding element of retroreflective sheeting located as required by S5.7.1.4.

4. Table I is amended by adding the following at the end thereof:

Item	Multipurpose passenger vehicles, trucks, and buses	Trailers	Applicable SAE standards
•	•	•	•
Conspicuity	See S5.7	See S5.7	See S5.7

5. Table II is amended by adding the following after the requirements for "Intermediate side reflex reflectors":

Item	Multipurpose passenger vehicles, trucks, and buses	Trailers	Height above road surface
•	•	•	•
Conspicuity	See S5.7	See S5.7	See S5.7
•	•	•	•

6. Figure 29 is added as follows:

FIGURE 29—MINIMUM PHOTOMETRIC PERFORMANCE OF RETROREFLECTIVE SHEETING (CANDELA/LUX/SQUARE METER)

Entrance angle	Observation angle				Grade
	0.2 Degree		0.5 Degree		
	White	Red	White	Red	
-4 degrees	250	60	65	10	DOT-C2
30 degrees	250	60	65	10	DOT-C2
-4 degrees	165	40	43	10	DOT-C3
30 degrees	165	40	43	10	DOT-C3

Proposed Rules

Federal Register
Vol. 57, No. 238
Thursday, December 10, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1040

[Docket No. AO–225–A45; DA–92–10]

Milk in the Southern Michigan Marketing Area; Hearing on Proposed Amendments to Tentative Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of public hearing on proposed rulemaking.

SUMMARY: This hearing is being held to consider an industry proposal to amend the pricing provisions of the Southern Michigan Federal milk marketing order. The proposal would accommodate a multiple component pricing plan using values for protein and butterfat to adjust the value of milk used in Class II and Class III products and payments to producers. Protein prices to handlers and producers would be adjusted for somatic cell count levels.

DATES: The hearing will convene at 9 a.m. on February 17, 1993.

ADDRESSES: The hearing will be held at the Hyatt Regency Hotel, 18600 Michigan Avenue, Dearborn, Michigan 48126–9987, (313) 593–1234.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 720–2189.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of sections 556 and 557 of title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

Notice is hereby given of a public hearing to be held at the Hyatt Regency Hotel, 18600 Michigan Avenue, Dearborn, Michigan 48126–9987, (313) 593–1234 beginning at 9 a.m. local time, on February 17, 1993, with respect to proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Southern Michigan marketing area.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR part 900).

The purpose of the hearing is to receive evidence with respect to the economic and marketing conditions which relate to the proposed amendments, hereinafter set forth, and any appropriate modifications thereof, to the tentative marketing agreement and to the order.

The Department of Agriculture is committed to carrying out its statutory and regulatory mandates in a manner that best serves the public interest. Therefore, where legal discretion permits, the Department actively seeks to promulgate regulations that promote economic growth, create jobs, are minimally burdensome and are easy for the public to understand, use or comply with. In short, the Department is committed to issuing regulations that maximize net benefits to society and minimize costs imposed by those regulations. This principle is articulated in President Bush's January 28, 1992, memorandum to agency heads, and in Executive Orders 12291 and 12498. The Department applies this principle to the full extent possible, consistent with law.

In this regard, the Department believes that public input from all interested persons can be invaluable to ensuring that the final regulatory product is minimally burdensome and maximally efficient. Therefore, the Department specifically seeks comments and suggestions from the public regarding any less burdensome or more efficient alternative that would accomplish the purposes described in the proposals to be considered at the hearing.

Actions under the Federal milk order program are subject to the Regulatory Flexibility Act (Pub. L. 96–354). This Act seeks to ensure that, within the statutory authority of a program, the regulatory and information requirements are tailored to the size and nature of small businesses. For the purposes of the Act, a dairy farm is a "small business" if it has an annual gross revenue of less than $500,000, and a dairy products manufacturer is a "small business" if it has fewer than 500 employees. Most parties subject to a milk order are considered as a small business. Accordingly, interested parties are invited to present evidence on the probable regulatory and informational impact of the hearing proposals on small businesses. Also, parties may suggest modifications of these proposals for the purpose of tailoring their applicability to small businesses.

The amendments to the rules proposed herein have been reviewed under Executive Order 12778, Civil Justice Reform. They are not intended to have retroactive effect. If adopted, the proposed amendments would not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with these rules.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed on connection with the order is not in accordance with the law and requesting a modification of an order or to be exempted from the order. A handler is afforded the opportunity for a hearing on the petition. After a hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Interested parties who wish to introduce exhibits should provide the Presiding Officer at the hearing with 4 copies of such exhibits for the Official Record. Also, it would be helpful if additional copies are available for the use of other participants at the hearing.

List of Subjects in 7 CFR Part 1040

Milk marketing orders.

The authority citation for 7 CFR part 1040 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 1040—[AMENDED]

The proposed amendments, as set forth below, have not received the approval of the Secretary of Agriculture.

Proposed by Michigan Milk Producers Association

Proposal No. 1

Amend the following provisions of the Southern Michigan milk marketing order to accommodate a multiple component pricing plan by revising the following provisions to read as follows:

§ 1040.30 Reports of receipts and utilization.

(a) Each handler shall report the quantities, average monthly somatic cell count, butterfat and protein content of milk in:

(i) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(ii) Receipts of milk from handlers described in § 1040.9(c);

(iii) Receipts of bulk fluid milk products and bulk fluid cream products from other pool plants;

(iv) Receipts of other source milk;

(v) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1040.40(b)(1); and

(vi) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section.

(c) Each handler described in § 1040.9(b) and (c) shall report:

(i) The quantities, butterfat and protein content, and average monthly somatic cell count of milk received from producers.

(ii) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk and milk products in such manner as the market administrator may prescribe.

§ 1040.31 Payroll reports.

(a) * * *

(2) The total pounds of milk, protein and butterfat content received from such producer;

(3) The monthly average somatic cell count of milk for each such producer;

(4) The prices per pound, the gross amount due, the amount and nature of any deductions, and the net amount paid.

(b) Each handler operating a partially regulated distributing plant who elects to make payments pursuant to § 1040.76(b) shall report for each diary farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

§ 1040.50 Class and component prices.

Subject to the provisions of § 1040.52, the class and component prices for the month per hundredweight or per pound shall be as follows:

(a) *Class I differential price.* The Class I differential price shall be the difference between the Class I price and the basic formula price for the current month. The Class I price shall be the basic formula price for the second preceding month plus $1.75.

(b) *Class II differential price.* The Class II differential price shall be the difference between the Class II price calculated by the Director of the Dairy Division for the current month and the basic formula price for the current month.

The Class II price shall be the basic Class II formula price computed pursuant to § 1040.51(a) for the month plus the amount that the value computed pursuant to paragraph (b)(1) of this section exceeds the value computed pursuant to paragraph (b)(2) of this section, plus any amount by which the basic Class II formula price for the second preceding month, adjusted pursuant to paragraph (b)(1) and (b)(2) of this section was less than the basic formula price for the second preceding month.

(c) *Skim milk price.* The skim milk price per hundredweight shall be the current month's basic formula price adjusted to remove the value of 3.5 percent butterfat and rounded to the nearest whole cent. Such adjustment shall be computed by multiplying the butterfat differential pursuant to § 1040.74 by 35 and subtracting the result from the basic formula price.

(d) *Butterfat price.* The butterfat price per pound shall be a figure computed as follows:

(i) Multiply the butterfat differential pursuant to § 1040.74 by 10.

(ii) Divide the value obtained from the calculations of paragraph (c) of this section by 100; and

(iii) Add to the resulting amount from (d)(ii) to the butterfat differential computed in paragraph (d)(i) of this section. The sum thereof shall be the price per pound of all producer butterfat for the month.

(e) *Milk protein price.* The price per pound of protein will be computed as follows:

(i) Divide the skim milk price calculated pursuant to paragraph (c) of this section by the average protein content of the manufacturing grade milk used to establish the current month's basic formula price.

(f) *Class III price.* The Class III price shall be the basic formula price for the month.

§ 1040.53 Announcement of class and component prices.

The market administrator shall announce publicly on or before the fifth day of each month:

(a)(i) The Class I price for the next month.

(ii) The Class III price for the preceding month.

(iii) The price for butterfat, protein, and skim milk for the current month computed pursuant to § 1040.50(c), (d) and (e).

(b) On or before the 15th day of each month, the Class II price for the next month calculated pursuant to § 1040.50(b). § 1040.60 Computation of handler's obligation to the pool.

The market administrator shall compute an obligation to the pool each month for each handler with respect to each of his pool plants and for each handler described in § 1040.9(b) and (c) by adding the following values:

(a) The pounds of producer milk and producer milk received pursuant to § 1040.43(d) which is allocated to Class I pursuant to § 1040.44 multiplied by the Class I differential price adjusted pursuant to § 1040.52.

(b) The pounds of producer milk and producer milk received pursuant to § 1040.43(d) which is allocated to Class II pursuant to § 1040.44 multiplied by the Class II differential price.

(c) The skim pounds contained in producer milk and producer milk received pursuant to § 1040.43(d) which is allocated to Class I pursuant to § 1040.44 multiplied by the skim milk price.

(d) The butterfat pounds contained in producer milk and producer milk received pursuant to § 1040.43(d) allocated to all classes multiplied by the butterfat price.

(e) The protein pounds contained in producer milk and producer milk received pursuant to § 1040.43(d) which is allocated to Class II and Class III pursuant to § 1040.44 multiplied by the milk protein price.

(f) The value of the product pounds, skim milk, and butterfat in overage assigned to each class pursuant to § 1040.44(a)(14) and the corresponding

step of § 1040.44(b) and the value of the protein pounds associated with the skim milk subtracted from Class II and Class III pursuant to § 1040.44(a)(14), by multiplying the skim pounds by the percentage of protein in the handler's receipts of producer skim milk as follows:

(1) The hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1040.44(a)(14) and the corresponding step of § 1040.44(b), multiplied by the Class I differential price adjusted for location, plus the hundredweight of skim milk subtracted from Class I pursuant to § 1040.44(a)(14) multiplied by the skim milk price, plus the butterfat pounds of overage subtracted from class I pursuant to § 1040.44(b) multiplied by the butterfat price;

(2) The hundredweight of skim milk and butterfat subtracted from Class II pursuant to § 1040.44(a)(14) and the corresponding step of § 1040.44(b) multiplied by the Class II price differential, plus the protein pounds in skim milk subtracted from Class II pursuant to § 1040.44(a)(14) multiplied by the milk protein price, plus the pounds of butterfat subtracted from class II pursuant to § 1040.44(b)(14) multiplied by the butterfat price;

(3) The protein pounds in skim milk subtracted from Class III pursuant to § 1040.44(a)(14) multiplied by the milk protein price, plus the butterfat pounds subtracted from Class III pursuant to § 1040.44(b)(14) multiplied by the butterfat price;

(g) The value of the product pounds, skim milk and butterfat submitted from Class I or Class II pursuant to § 1040.44(a)(9) and the corresponding step of § 1040.44(b), and the value of the protein associated with the skim milk subtracted from Class II pursuant to § 1040.44(a)(9), by multiplying those skim pounds by the percentage of protein in the handler's receipts of producer skim milk as follows:

(1) The value of product pounds, skim milk and butterfat subtracted from Class II pursuant to § 1040.44(a)(9) and the corresponding step of § 1040.44(b) multiplied by the sum of the current month's Class I price differential adjusted for location, skim milk price and butterfat price, less the previous month's protein and butterfat prices;

(2) The value of hundredweight of skim milk and butterfat subtracted from Class II pursuant to § 1040.44(a)(9) and the corresponding step of § 1040.44(b) multiplied by the current month's Class II price differential plus the protein and butterfat value, less the Class III value of the milk at the previous month's protein and butterfat value;

(h) The value of the product pounds, skim milk and butterfat subtracted from Class I pursuant to § 1040.44(a)(7) (i) through (iv), and the corresponding steps of § 1040.44(b), excluding receipts of bulk fluid cream products from another order plant multiplied by the current month's Class I price differential, adjusted for location;

(i) The value of the product pounds, skim milk and butterfat subtracted from Class I pursuant to § 1040.44(a)(7) (v) and (vi) and the corresponding steps of § 1040.44(b) multiplied by the difference between the current month's Class I and Class II prices adjusted for the location of the transferor plants;

(j) The value of the product pounds, skim milk and butterfat subtracted from Class I pursuant to § 1040.44(a)(11) and the corresponding step of § 1040.44(b) multiplied by the current month's Class I price differential applicable at the location of the nearest unregulated supply plant for which an equivalent volume was received, excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated by a Federal Order is classified and priced as Class I and is not used as an offset for any other payment obligation under any order.

§ 1040.61 Computation of weighted average differential price.

For each month, the market administrator shall compute the weighted average differential value of all milk received from producers by:

(a) Combining into one total all values computed pursuant to § 1040.60, paragraphs (a) and (b) and (f) through (j) for all handlers who filed the reports prescribed by § 1040.30 for the month and who made the payments pursuant to § 1040.71 for the preceding month;

(b) Add the aggregate of the values of the location adjustment computed pursuant to § 1040.75(a)(i);

(c) Add an amount not less than one-half of the unobligated balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is calculated pursuant to § 1040.60(j);

(e) Subtract not less than 6 nor more than 7 cents per hundredweight. The result shall be the weighted average differential price.

§ 1040.62 Computation of producer protein price.

The protein price to be paid to all producers for the pounds of protein contained in their milk shall be computed by the market administrator each month as follows:

(a) Combine into one total the values computed pursuant to § 1040.60, paragraphs (c) and (e), for all handlers who filed the reports prescribed by § 1040.30 for the month and who made payments pursuant to § 1040.71 for the preceding month;

(b) Divide the resulting amount by total pounds of protein in producer milk; and

(c) Round to the nearest whole cent. The result is the producer protein price.

§ 1040.63 Uniform price.

A uniform price for producer milk containing 3.5 percent butterfat shall be computed by adding the weighted average differential price calculated pursuant to § 1040.61 to the Class III price for the current month.

§ 1040.64 Announcement of weighted average differential price, producer protein price, and uniform price.

The market administrator shall announce publicly on or before:

(a) The 5th day after the end of each month the butterfat differential for such month; and

(b) The 11th day after the end of each month the weighted average differential price calculated pursuant to § 1040.61, the producer protein price calculated pursuant to § 1040.62 and the uniform price calculated pursuant to § 1040.63.

§ 1040.65 Value of producer milk.

The value of producer milk shall be the sum of:

(a) The weighted average differential price computed pursuant to § 1040.61 and adjusted pursuant to § 1040.75 multiplied by the total hundredweight of producer milk received from the producer;

(b) The producer protein price computed pursuant to § 1040.62 multiplied by the total pounds of protein received from the producer.

(c) The butterfat price computed pursuant to § 1040.50(d) multiplied by the total pounds of butterfat received from the producer.

§ 1040.66 Computation of somatic cell count adjustment.

(a) The producer protein price shall be adjusted for the monthly average somatic cell count. The adjustment shall be the result of the multiplication of a yield factor and the monthly average cheese price which is then divided by the protein test pursuant to § 1040.50(e).

(b) The yield factors shall be:

0–100,000 scc	.25
100,001–200,000 scc	.15
200,001–300,000 scc	.10
300,001–500,000 scc	0
500,001–600,000 scc	–.05
600,001–700,000 scc	–.10
700,001–800,000 scc	–.15
800,001–900,000 scc	–.25
900,001+scc	–.40

(c) If no monthly average somatic cell count is available, no adjustment of the producer protein price shall be made.

(d) For purposes of this section, the cheese price shall be the monthly average price for 40 pound blocks of cheese traded on the National Cheese Exchange in Green Bay, Wisconsin.

§ 1040.71 Payments to the producer settlement fund.

(a) On or before the 13th day after the end of each month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1)(i) The total obligation of the handler for such month as determined pursuant to § 1040.60; or

(ii) In the case of a cooperative association which is a handler, the value, at the uniform price, of milk delivered to other handlers pursuant to § 1040.43(d).

(2) The sum of:

(i) The value of such handler's receipts of producer milk as specified in § 1040.65 excluding any applicable location adjustment pursuant to § 1040.75(a)(3); and

(ii) The value at the uniform price, computed pursuant to § 1040.63, applicable at the location of the plant from which other source milk is received and the value of which is computed pursuant to § 1040.60(j).

§ 1040.73 Payments to producers and to cooperative associations.

(a) Except as provided by paragraph (b) of this section, on or before the 15th day of each month, each handler (except a cooperative association) shall pay each producer for milk received from him during the preceding month, not less than the sum of money computed pursuant to §§ 1040.65 and 1040.66, less the payment pursuant to paragraph (d) of this section and any proper deductions authorized by the producer.

* * *

(b) * * *

(1) * * *

(ii) The total pounds of butterfat and protein contained in such milk and the average somatic cell count;

(c) On or before the 13th day after the end of each month, each handler shall pay a cooperative association, which is a handler with respect to milk received by him from a pool plant operated by such cooperative association, or by bulk tank delivery pursuant to § 1040.9(c), an amount not less than the value computed using the applicable weighted average differential price and component prices adjusted for the location of the transferee plant and average somatic cell count, multiplied by the total hundredweight of milk and pounds of butterfat and protein received by such handler from the cooperative association.

* * * * *

Proposal No. 2

Amend § 1040.85 by increasing the maximum allowable assessment for administration of the order from 2 to 4¢ per cwt.

Proposal No. 3

Amend § 1040.86 by increasing the maximum allowable deduction from producers for whom the market administrator performs marketing services from 5 to 7¢ per cwt.

Proposed by the Dairy Division, Agricultural Marketing Service

Proposal No. 4

Make such changes as may be necessary to make the entire marketing agreement and order conform with any amendments thereto that may result from this hearing.

Copies of this notice of hearing and the orders may be procured from the Market Administrator, Marvin A. Baumer, USDA—AMS—Dairy Division, 2684 W. Eleven Mile Road, Berkley, MI 48072, or from the Hearing Clerk, room 1083, South Building, United States Department of Agriculture, Washington, DC 20250, or may be inspected there.

Copies of the transcript of testimony taken at the hearing will not be available for distribution through the Hearing Clerk's Office. If you wish to purchase a copy, arrangements may be made with the reporter at the hearing.

From the time that a hearing notice is issued and until the issuance of a final decision in a proceeding, Department employees involved in the decisional process are prohibited from discussing the merits of the hearing issues on an ex parte basis with any person having an interest in the proceeding. For this particular proceeding, the prohibition applies to employees in the following organizational units:

Office of the Secretary of Agriculture
Office of the Administrator, Agricultural Marketing Service
Office of the General Counsel
Dairy Division, Agricultural Marketing Service (Washington office only)
Office of the Market Administrator, Southern Michigan Marketing Area

Procedural matters are not subject to the above prohibition and may be discussed at any time.

Dated: December 3, 1992.

Daniel Haley,

Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 92–ASO–19]

Proposed Revision of Control Zone and Transition Area, Dyersburg, TN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to revise the Dyersburg, TN Control Zone and Transition Area. A new standard instrument approach procedure (SIAP) has been developed to serve Runway 4 at the Dyersburg Municipal Airport based on the Dyersburg Non-directional Radio Beacon (NDB). This action would eliminate an arrival area extension to the control zone west of the airport which is no longer required while adding an arrival extension southwest of the airport for the planned NDB SIAP. Also, this proposal would enlarge the existing transition area in vicinity of the airport for instrument flight rules (IFR) aeronautical operations.

DATES: Comments must be received on or before January 28, 1993.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Docket No. 92–ASO–19, Manager, System Management Branch, ASO–530, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Assistant Chief Counsel for Southern Region, room 652, 3400 Norman Berry Drive, East Point, Georgia 30344; telephone (404) 763–7646.

FOR FURTHER INFORMATION CONTACT: A.P. Smith, Airspace Section, System Management Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 763–7646.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 92–ASO–19." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Assistant Chief Counsel for Southern Region, room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, System Management Branch (ASO–530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the Dyersburg, TN Control Zone and Transition Area. An NDB SIAP has been developed to serve Runway 4 at the Dyersburg Municipal Airport. This action would eliminate an arrival area extension to the control zone west of the airport which is no longer required while adding an arrival extension southwest of the airport to provide controlled airspace for the new NDB SIAP. Additionally, the transition area would be enlarged in vicinity of the airport to better contain IFR aeronautical operations. Control Zones and Transition areas are published in §§ 71.171 and 71.181, respectively, of FAA Order 7400.7A dated November 2, 1992, and effective November 27, 1992, which is incorporated by reference in 14 CFR 71.1. The coordinates for this airspace docket are based on North American Datum 83. The control zone and transition area listed in this document would be published subsequently in the order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones, Incorporation by reference, Transition areas.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7A, Compilation of Regulations, dated November 2, 1992, and effective November 27, 1992, is amended as follows:

Section 71.171 Designation of Control Zones

* * * * *

ASO TN CZ Dyersburg, TN

Dyersburg Municipal Airport, TN
(lat. 35°59'55" N, long. 89°24'22" W).

Dyersburg NDB (lat. 35°59'42" N, long. 89°24'21" W).

Within a 4.1-mile radius of Dyersburg Municipal Airport and within 2.5 miles each side of the Dyersburg NDB 231° bearing, extending from the 4.1-mile radius to 7 miles southwest of the NDB. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective dates and times will thereafter be continuously published in the Airport/Facility Directory.

* * * * *

Section 71.181 Designation of Transition Areas

* * * * *

ASO TN TA Dyersburg, TN

Dyersburg Municipal Airport, TN
(lat. 35°59'55" N, long. 89°24'22" W).

Dyersburg VORTAC (lat. 36°01'07" N, long. 89°19'04" W).

That airspace extending upward from 700 feet above the surface within a 7-mile radius of Dyersburg Municipal Airport and within 3.1 miles each side of the Dyersburg VORTAC 078° radial, extending from the 7-mile radius to 7 miles east of the VORTAC; excluding that airspace within the Dyersburg, TN Control Zone during the specific dates and times it is effective.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 34

Regulation of Hybrid Instruments

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rule, extension of comment period.

SUMMARY: On November 12, 1992, the Commodity Futures Trading Commission ("Commission") published in the Federal Register a notice of proposed rulemaking that would amend 17 CFR part 34 of the Commission's regulations 57 (FR 53618). These rules would exempt from CFTC regulation certain "hybrid" instruments that combine features similar to those of commodity option or futures contracts

with debt, depository or preferred equity interests. The comment period on the proposed rule is scheduled to expire on December 14, 1992.

The Commission has received a request for an extension of the comment period on behalf of three contract markets. In order to ensure that all interested parties have an opportunity to submit meaningful comments, the Commission has determined to extend the comment period.

DATES: Comments must be submitted by December 28, 1992.

ADDRESSES: Comments should be sent to the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581 and should make reference to "Regulation of Hybrid Instruments."

FOR FURTHER INFORMATION CONTACT: Gregory J. Kusserk, Industry Economist, or Barry Schachter, Financial Economist, Division of Economic Analysis. Telephone (202) 254-6990.

Issued in Washington, DC this 4th day of December, 1992, by the Commission.

Jean A. Webb,

Secretary of the Commission.

17 CFR Part 35

Exemption for Certain Swap Agreements

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On November 12, 1992, the Commodity Futures Trading Commission ("Commission") published in the **Federal Register** a notice of proposed rulemaking relating to a proposed exemption from the Commodity Exchange Act for certain swap agreements. 57 FR 53627. The applicable comment period expires on December 14, 1992. The Commission has received a request for an extension of the comment period on behalf of three contract markets. In order to ensure that all interested parties have an adequate opportunity to submit meaningful comments, the Commission has determined to extend the comment period.

DATES: Written comments must be received by the Commission by the close of business on December 28, 1992.

ADDRESSES: Comments should be sent to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Reference should be made to rules to exempt certain swap agreements.

FOR FURTHER INFORMATION CONTACT: Joanne T. Medero, General Counsel, Pat G. Nicolette, Deputy General Counsel, or David R. Merrill, Deputy General Counsel, Office of the General Counsel, Commodity Futures Trading Commission, 2033 K St., NW., Washington, DC 20581. Telephone: (202) 254-9880.

Issued in Washington, DC, this 4th day of December, 1992, by the Commission.

Jean A. Webb,

Secretary of the Commission.

RIN 1545-AQ61

Interest-Free Adjustments of Underpayments of Employment Taxes

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed amendments to the regulations on interest-free adjustments of underpayments of certain employment taxes. The existing regulations allow an interest-free adjustment only if a return is filed before the underpayment of tax is ascertained. The proposed amendments extend the existing rules to employers who did not file a return and pay the tax solely because they improperly failed to treat one or more individuals as employees. The proposed amendments will provide the public with guidance necessary to comply with the law. The proposed amendments will affect taxpayers who did not file certain employment tax returns and pay the tax solely because they improperly failed to treat one or more individuals as employees.

DATES: Written comments must be received by February 8, 1993. Requests to speak (with outlines of oral comments) at a public hearing scheduled for February 24, 1993, at 10 a.m., must be received by February 3, 1993.

ADDRESSES: Send all submissions to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attention: CC: CORP:T:R (EE-12-92), Washington, DC 20044.

The hearing will be held in room 3313, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Karin Loverud at (202) 622-6060 concerning the regulations; Michael Slaughter at (202) 622-6803 concerning the hearing (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Overview

This document contains proposed amendments to the Employment Tax Regulations (26 CFR part 31) under section 6205 of the Internal Revenue Code (Code). These amendments are proposed to clarify the regulation under section 6205 and are to be issued under the authority of sections 6205 and 7805

Under section 6205(a)(1) of the Code, if less than the correct amount of tax imposed under the Federal Insurance Contributions Act (FICA), the Railroad Retirement Tax Act (RRTA), or the income tax withholding provisions is paid with respect to any payment of wages or compensation, proper adjustments of both the tax and the deductible amount must be made, without interest, in such manner and at such times as the Secretary may by regulations prescribe.

The existing regulations describe the interest-free adjustment procedure only for situations in which a return is filed before the error is ascertained. Section 6205 of the Code applies primarily to Form 941, Employer's Quarterly Federal Tax Return, and Form CT-1, Employer's Annual Railroad Retirement and Unemployment Repayment Tax Return. Section 6205 also applies to other returns in the Form 941 family, such as Form 942, Employer's Quarterly Tax Return for Household Employees, Form 943, Employer's Annual Tax Return for Agricultural Employees. (Forms 941, 942, and 943 are used to report income tax withheld and FICA taxes; Form CT-1 is used to report RRTA taxes.)

The following scenario describes the typical operation of the interest-free adjustment procedure. An employer filed a Form 941 on July 31 for the second quarter of the year. The employer inadvertently failed to report $5,000 of an employee's wages. On October 20, while preparing Form 941 for the third quarter, the employer discovers the error. The procedures permit the employer to avoid interest on the tax on the $5,000 if the employer both corrects the error and pays the tax on or before the last day permitted for filing a return for the quarter in which

the error was discovered, in this scenario, January 31. The employer corrects the error by making an adjustment on line 9 of Form 941 for either the third quarter, which the employer is currently preparing, or the fourth quarter and attaching Form 941c, Supporting Statement to Correct Information. Currently, outside of the examination procedures, no other procedure exists for granting an interest-free adjustment.

The existing regulations also deal with the situation in which an employer discovers, before filing a return, that the employer failed to withhold income tax or the employee portion of the FICA taxes. Under the regulations, in this instance, the reporting and payment by the employer of the correct amount of tax do not qualify for an interest-free adjustment. Of course, in this instance, generally no interest is due because interest on the **under**payment of income and FICA taxes **required** to be withheld by an employer does not begin to run until the due date of the return for the period in which the withholding was required.

The existing regulations do not consider situations in which the employer failed to file a return solely because the employer erroneously believed that the employer had no employees. The proposed regulations deal with the situation in which the employer did not file Form 941 or Form CT–1 because the employer believed that individuals who performed services for the employer were performing services as independent contractors and not as employees. In this situation, the employer who filed no employment tax returns subsequently ascertains, pursuant to an examination, a private letter ruling, or otherwise, that the individuals should have been classified as employees and returns should have been filed. No procedure currently exists for avoiding interest in this circumstance.

Accordingly, the proposed amendments would add language to clarify that a payment can be made without interest in certain situations in which the error is ascertained before the appropriate return is filed. Procedurally, the employer would file an original return (either Form 941 or Form CT–1) for each period for which the employer erroneously failed to file a return. Employers would be instructed to write "Misclassified Employees" in the top margin of each return.

The proposed amendments would also allow an interest-free adjustment of amounts paid or assessed under section 3509 of the Code, which also pertains to situations in which an employer failed to treat an individual as an employee.

In addition to the new language pertaining to employers who failed to treat individuals as employees, the proposed regulations revise the existing regulations regarding errors ascertained both before and after a return is filed. The revised language is not intended to change the existing provisions; rather, it is intended to clarify and up-date the existing provisions. For instance, the Service currently has no procedure that would permit an employer to correct an underpayment by reporting the additional amount on a supplemental return. Therefore, all references to supplemental returns have been deleted. Also, where the rules pertaining to income tax withholding are intended to be the same as the rules pertaining to the FICA and the RRTA, language has been revised and added to remove any implication that the rules differ.

The proposed amendments are intended to apply to situations in which no return was filed solely because the employer improperly failed to treat its workers as employees and to situations in which the employer is assessed or pays an amount under section 3509. The proposed amendments also clarify that the income tax withholding rules apply only if the error is ascertained in the year in which the wages are paid and make other clarifying and conforming changes.

Reliance on These Proposed Regulations

Taxpayers may rely on these proposed amendments for guidance pending the issuance of final regulations. These amendments will generally be effective with respect to errors ascertained after December 31, 1991. If future regulations are more restrictive, such guidance will be applied without retroactive effect.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business. The collection of information requirements contained in sections 31.6205–1(a)(3) and 31.6205–1(b)(3)(iii) of these proposed regulations are unchanged from those contained in sections 31.6205–1(a)(3) and 31.6205–1(b)(2)(iii) of the existing final regulations and have been approved by the Office of Management and Budget (OMB) under control number 1545–0029.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments that are submitted timely (preferably an original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying.

A public hearing will be held on Wednesday, February 24, 1993, at 10 a.m., in room 3313, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) will apply to the public hearing.

Persons who have submitted written comments by February 8, 1993, and who also desire to present oral comments at the hearing on the proposed regulations, should submit, not later than February 3, 1993, a request to speak and an outline of the oral comments to be presented at the hearing stating the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by the questions from the panel for the government and answers thereto. Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building before 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these proposed regulations is Karin Loverud of the Office of the Associate Chief Counsel (Employee Benefits and Exempt Organizations), Internal Revenue Service. However, personnel from other offices of the Service and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 31

Employment taxes, Fishing vessels, Gambling, Income taxes, Penalties, Pensions, Railroad retirement, Reporting and recordkeeping requirements, Social security, Unemployment compensation.

Proposed Amendments to the Regulations

Accordingly, the proposed amendments to 26 CFR part 31 are as follows:

PART 31—EMPLOYMENT TAXES AND COLLECTION OF INCOME TAX AT SOURCE

Paragraph 1. The authority citation for part 31 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 31.6205–1 is amended by revising paragraphs (a)(3), (b) and (c), and adding paragraph (d) to read as follows:

§ 31.6205–1 Adjustments of underpayments.

(a) * * *

(3) Every return on which an underpayment is corrected pursuant to this section must have securely attached as a part thereof a statement explaining the correction, designating the return period in which the error was ascertained and the return period to which the error relates, and setting forth such other information as may be required by the regulations in this subpart and by the instructions relating to the return.

* * * * *

(b) *Federal Insurance Contributions Act and Railroad Retirement Tax Act*—(1) *Error ascertained before return is filed.* If an employer fails to collect any employee tax or collects less than the correct amount of employee tax from an employee with respect to wages, as defined in the Federal Insurance Contributions Act (FICA), or compensation, as defined in the Railroad Retirement Tax Act (RRTA), paid to the employee in any return period, and ascertains the error before filing the return on which the employee tax is required to be reported, the employer shall nevertheless report on the return and pay to the Internal Revenue Service the correct amount of the employee tax. The reporting and payment by the employer of the correct amount of the tax in accordance with this paragraph (b)(1) is not an adjustment within the meaning of this section. The following example illustrates the provisions of this paragraph (b)(1). On July 10, when *X* was preparing its employment tax return for the second quarter of the calendar year, *X* realized that it had failed to withhold sufficient tax under the FICA. When *X* files its return on July 31, *X* must report on its return and pay the correct amount of tax. There is no adjustment within the meaning of section 6205, because *X* reported on its return and paid to the Service the correct amount of tax.

(2) *Return not filed because of failure to treat individual as employee*—(i) *In general.* If an employer fails to file a return for a period solely because the employer improperly failed to treat any individuals as employees for the period (and, therefore, failed to pay any employer or employee tax under the FICA or the RRTA with respect to any payments to the employees), the employer shall nevertheless file a return for the period and report on the return and pay to the Service the correct amount of tax. The reporting and payment by the employer of the correct amount of tax for the period is an adjustment within the meaning of this section only if the return is filed and the tax is paid no later than the due date of a like return for the return period in which the error (i.e., nonpayment) was ascertained.

(ii) *Transitional rule for 1992.* For errors described in paragraph (b)(2)(i) of this section that are ascertained in 1992, the reporting and payment by the employer of the correct amount of the tax is an adjustment within the meaning of this section only if the return on which the underpayment is reported is filed on or before the due date of a return required to be filed for the period ending December 31, 1992.

(iii) *Effective date of paragraph (b)(2) of this section.* This paragraph (b)(2) is effective for errors ascertained after December 31, 1991.

(iv) *Examples.* The following examples illustrate this paragraph (b)(2):

Example 1. X improperly failed to treat *A* as an employee for 1991 and 1992. *X* had no other employees. Therefore, *X* did not pay any employer or employee tax under the FICA and did not file returns reporting the tax with respect to the wages *X* paid to *A*. *X* ascertained the error on August 20, 1992. With respect to the wages paid for periods before the error was ascertained, if, on or before February 1, 1993 (the due date of a return required to be filed for the period ending December 31, 1992), *X* both files the appropriate quarterly returns reporting the employer and employee tax and pays the tax, the reporting and payment is an interest-free adjustment for each quarter. If *X* files any of the quarterly returns after February 1, 1993, or pays the tax due on any of the quarterly returns after February 1, 1993, the reporting and payment is not an adjustment for that quarter (or quarters) within the meaning of this section. For rules relating to taxes on wages paid during the quarter in which the error was ascertained but before the date on which the error was ascertained (wages paid from July 1, 1992, to August 19, 1992, inclusive), see paragraph (b)(1) of this section.

Example 2. The facts are the same as in *Example 1*, except that *X* ascertains the error on January 20, 1993. With respect to the wages paid during 1992, if, on or before April 30, 1993 (the due date of a return required to be filed for the quarter in which the error was ascertained), *X* both files the appropriate quarterly returns reporting the employer and employee tax and pays the tax, the reporting and payment is an interest-free adjustment for each quarter. If *X* files any of the quarterly returns after April 30, 1993, or pays the tax due on any of the quarterly returns after April 30, 1993, the reporting and payment is not an adjustment for that quarter (or quarters) within the meaning of this section. For rules relating to taxes on wages paid during the quarter in which the error was ascertained but before the date on which the error was ascertained (wages paid from January 1, 1993, to January 19, 1993, inclusive), see paragraph (b)(1) of this section.

Example 3. R improperly failed to treat *A* as an employee for 1992 and 1993. *R* had no other employees during either year. Therefore, *R* did not pay any employer or employee tax under the RRTA and did not file returns reporting the tax with respect to the wages *R* paid to *A*. *R* ascertained the error on May 20, 1993, after *R* and *A* had terminated their relationship. With respect to the wages paid during 1992 and 1993, if, on or before February 28, 1994 (the due date of a return required to be filed for the period in which the error was ascertained), *R* files annual returns for 1992 and 1993 reporting the employer and employee tax and *R* pays the tax, the reporting and payment is an interest-free adjustment for each year. If *R* files either annual return after February 28, 1994, or pays the tax due on either annual return after February 28, 1994, the reporting and payment is not an adjustment for that year (or years) within the meaning of this section.

(3) *Error ascertained after return is filed*—(i) *In general.* If a return is filed, and if no employee tax, no employer tax, or less than the correct amount of either tax with respect to any payment to an employee of wages, as defined in the FICA, or compensation, as defined in the RRTA, is reported on the return and paid to the Service, the employer shall report the amount of the underpayment as an adjustment on a return filed on or before the day on which the return is required to be filed for the return period in which the error is ascertained. The amount of each underpayment reported as an adjustment shall be paid to the Service, without interest, no later than the date on which the return reporting the adjustment is required to be filed. If an adjustment is properly and timely reported, but the amount of the underpayment is not paid when due, interest will accrue from the due date of the return on which the adjustment is reported. See section 6601.

(ii) *Adjustment not reported timely.* If a return is filed, and if no employee tax, no employer tax, or less than the correct amount of either tax with respect to a payment to an employee of wages or compensation is reported on the return and paid to the Service, and the underpayment is not reported as an adjustment within the time prescribed by paragraph (b)(3)(i) of this section, the employer shall report the amount of the underpayment as an adjustment on the employer's next return. For interest accruing on amounts so reported, see section 6601.

(iii) *Amount reported on incorrect return.* If a return relating to tax under the FICA is filed although a return relating to tax under the RRTA was required to be filed, or vice versa, and if the amount reported on the return filed and paid to the Service was less than the amount that should have been reported on the return required to be filed, and the employer shall report the amount of the underpayment as an adjustment on an original return for the correct tax for the return period in which the payment of wages or compensation was made, accompanied by an explanation of the adjustment being reported. The reporting of the underpayment as an adjustment on an original return is an adjustment within the meaning of this section only if the return is filed on or before the day on which the return is required to be filed for the return period in which the error was ascertained. The amount of each underpayment reported as an adjustment on an original return shall be paid to the Service, without interest, no later than the date on which the return reporting the adjustment is required to be filed. If an adjustment is properly timely reported on an original return, but the amount of the underpayment is not timely paid, interest will accrue from the due date of the return on which the adjustment is reported. See section 6601.

(4) *Deductions from employee.* If an employer collects no employee tax or less than the correct amount of employee tax from an employee with respect to a payment of wages, as defined in the FICA, or compensation, as defined in the RRTA, the employer shall collect the amount of the undercollection by deducting the amount from remuneration of the employee, if the employee is under the employer's control when the error is ascertained. The employer may make deductions even if the remuneration, for any reason, is not wages or compensation. The employer shall report and pay the amount of an undercollection as provided in paragraph (b)(1), (2), or (3) of this section, whether or not the employer corrects the undercollection by deducting the amount from remuneration of the employee. If the employer fails to deduct the amount, the employee's obligation to the employer with respect to the undercollection is a matter for settlement between the employee and the employer. If any employer makes an erroneous collection of employee tax from two or more employees, a separate settlement must be made with respect to each employee. Thus, an overcollection of employee tax from one employee may not be used to offset an undercollection of employee tax from another employee.

(c) *Income tax required to be withheld from wages.* This paragraph applies only if the error is ascertained in the calendar year in which the wages are paid. No adjustment of income tax withholding is permitted to be made after the calendar year in which the wages are paid.

(1) *Error ascertained before return is filed.* If an employer fails to collect any income tax, or collects less than the correct amount of income tax, required under section 3402 to be withheld from wages, from an employee with respect to wages paid to the employee in any return period, and ascertains the error before filing the return on which the income tax is required to be reported, the employer shall nevertheless report on the return and pay to the Service the correct amount of the tax required to be withheld. The reporting and payment by the employer of the correct amount of the tax in accordance with this paragraph (c)(1) is not an adjustment within the meaning of this section. The following example illustrates the provisions of this paragraph (c)(1). On July 10, when *Y* was preparing its employment tax return for the second quarter of the calendar year, *Y* realized that it had failed to withhold sufficient income tax. When *Y* files its return on July 31, *Y* must report on its return and pay the correct amount of tax. There is no adjustment within the meaning of section 6205, because *Y* reported on its return and paid to the Service the correct amount of tax.

(2) *Return not filed because of failure to treat individual as employee*—(i) *In general.* If an employer fails to file a return for a period solely because the employer improperly failed to treat any individuals as employees for the period (and, therefore, failed to pay any income tax required under section 3402 to be withheld from wages paid to employees), the employer shall nevertheless file a return for the period and report on the return and pay to the Service the correct amount of tax. The reporting and payment by the employer of the correct amount of tax for the period is an adjustment within the meaning of this section only if the return is filed and the tax is paid no later than the due date of a like return for the return period in which the error (i.e., nonpayment) was ascertained.

(ii) *Transitional rule for 1992.* For errors described in paragraph (c)(2)(i) of this section that are ascertained in 1992 with respect to wages paid in 1992, the reporting and payment by the employer of the correct amount of the tax is an adjustment within the meaning of this section only if the return on which the underpayment is reported is filed on or before February 1, 1993 (the due date of a return required to be filed for the period ending December 31, 1992).

(iii) *Effective date of paragraph (c)(2) of this section.* This paragraph (c)(2) is effective for errors ascertained after December 31, 1991.

(iv) *Examples.* The following examples illustrate this paragraph (c)(2):

Example 1. Y improperly failed to treat *A* as an employee for 1991 and 1992. *Y* had no other employees. Therefore, *Y* did not pay any income tax required under section 3402 to be withheld from wages paid to an employee and did not file returns reporting the tax with respect to the wages *Y* paid to *A*. *Y* ascertained the error on August 20, 1992. The principles of this paragraph (c)(2) do not apply with respect to the wages paid during 1991, because the error was not ascertained on or before the last day of the calendar year in which the wages were paid. With respect to the wages paid for the two quarters during 1992 before the error was ascertained, if, on or before February 1, 1993 (the due date of a return required to be filed for the quarter ending December 31, 1992), *Y* both files the appropriate quarterly returns reporting the withheld income tax and pays the tax, the reporting and payment is an interest-free adjustment for each quarter. For rules relating to taxes on wages paid during the quarter in which the error was ascertained but before the date on which the error was ascertained (wages paid from July 1, 1992, to August 19, 1992, inclusive), see paragraph (c)(1) of this section.

Example 2. The facts are the same as in *Example 1*, except that *Y* discovers the error on January 20, 1993. The principles of this paragraph (c)(2) do not apply with respect to the wages paid during 1991 and 1992, because the error was not ascertained on or before the last day of the calendar year in which the wages were paid. For rules relating to taxes on wages paid during the quarter in which the error was ascertained but before the date on which the error was ascertained (wages paid from January 1, 1993, to January 19, 1993, inclusive), see paragraph (c)(1) of this section.

(3) *Error ascertained after return is filed*—(i) *In general.* If a return is filed for a return period, and if no income tax, or less than the correct amount of

income tax, required under section 3402 to be withheld from wages paid to an employee, is reported on the return and paid to the Service, the employer shall report the amount of the underpayment as an adjustment on a return for any subsequent return period in the calendar year in which the wages were paid. The reporting by the employer of the correct amount is an adjustment within the meaning of this section only if the return on which the underpayment is reported is filed on or before the due date of the return required to be filed for the period in which the error was ascertained (but no later than the due date of the return for the fourth quarter of the calendar year in which the error was ascertained).

(ii) *Adjustment not reported timely.* If a return is filed for a return period, and if no income tax or less than the correct amount of income tax, required under section 3402 to be withheld from wages paid to an employee, is reported on the return and paid to the Service, and the underpayment is not reported as an adjustment within the time prescribed by paragraph (c)(3)(i) of this section, the employer shall report the amount of the underpayment on the employer's next return (but no later than the due date of the return for the fourth quarter of the calendar year in which the error was ascertained).

(4) *Payment of amounts reported as underpayments*—(i) See § 31.3402(d)–1 for provisions relating to the employer's liability for an underpayment of tax where the employer is unable to show that the income tax against which the tax under section 3402 may be credited has been paid.

(ii) Except as provided in § 31.3402(d)–1, any amount reported as an adjustment within the meaning of this paragraph (c) shall be paid to the Service, without interest, at the time fixed for reporting the adjustment.

(iii) For interest accruing on amounts not paid when due, see section 6601.

(5) *Deductions from employee.* If an employer collects no income tax, or less than the correct amount of income tax, required under section 3402 to be withheld from wages, from an employee with respect to wages paid to the employee in a calendar year, the employer shall collect the amount of the undercollection on or before the last day of the year by deducting the amount from remuneration of the employee, if the employee is under the employer's control when the error is ascertained. The employer may make deductions even if the remuneration, for any reason, is not wages. If the employer ascertains the error in the same calendar year, the employer shall report and pay the amount of the undercollection as provided in paragraph (c)(1), (2), or (3) of this section, whether or not the employer corrects the undercollection by deducting the amount from remuneration of the employee. If the employer fails to deduct the amount, the employee's obligation to the employer with respect to the undercollection is a matter for settlement between the employee and the employer within the calendar year. If any employer makes an erroneous collection of income tax from two or more employees, a separate settlement must be made with respect to each employee. Thus, an overcollection of income tax from one employee may not be used to offset an undercollection of income tax from another employee. For provisions relating to the employer's liability for the tax, whether or not the employer collects it from the employee, see § 31.3403–1.

(d) *Amounts paid or assessed under section 3509.* Any amount paid or assessed under section 3509 is an adjustment without interest within the meaning of this section.

Shirley D. Peterson,

Commissioner of Internal Revenue.

[DoD 6010.8–R]

RIN 0720–AA15

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Reimbursement of Providers, Claims Filing, and Participating Provider Program

AGENCY: Office of the Secretary, DoD.

ACTION: Proposed rule.

SUMMARY: This document proposes to implement provisions of the Department of Defense Appropriations Act, 1993, section 9011, which limits increases in maximum allowable payments to physicians and other individual professional providers (including clinical laboratories), authorizes reductions in such amounts for overpriced procedures, and establishes limits on balance billing by providers. It also implements a provision of the National Defense Authorization Act for Fiscal Year 1992 that requires providers to file claims on behalf of CHAMPUS beneficiaries, builds into the CHAMPUS Regulation provisions that have been in effect for several years regarding the Participating Provider Program, and implements a new approach for CHAMPUS reimbursement of ambulatory surgery centers.

DATES: Comments must be received by January 11, 1993.

ADDRESSES: Office of the Civilian Health and Medical Program of the Uniformed Services (OCHAMPUS), Program Development Branch, Aurora, CO 80045–6900. For copies of the **Federal Register** containing this final rule, contact the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238.

The charge for the **Federal Register** is $4.50 for each issue payable by check or money order to the Superintendent of Documents.

FOR FURTHER INFORMATION CONTACT: Steve Lillie, Office of the Assistant Secretary of Defense (Health Affairs), telephone (703) 695–3350.

Questions regarding payment of specific claims under the CHAMPUS allowable charge method should be addressed to the appropriate CHAMPUS contractor.

I. Introduction and Background

A. Congressional Action

The Department of Defense Appropriations Act, 1993, Public Law 102–396, section 9011, that was signed on October 6, 1992 provides that none of the funds contained in this Act available for the Civilian Health and Medical Program of the Uniformed Services shall be available for payments to physicians and other authorized individual health care providers in excess of the amounts allowed in Fiscal Year 1992 for similar services, except that: (a) For services for which the Secretary of Defense determines an increase is justified by economic circumstances, the allowable amounts may be increased in accordance with appropriate economic index data similar to that used pursuant to title XVIII of the Social Security Act; and (b) for services the Secretary determines are overpriced based on allowable payments under title XVIII of the Social Security Act, the allowable amounts shall be reduced by not more than 15 percent (except that the reduction may be waived if the Secretary determines that it would impair adequate access to health care services for beneficiaries). The Secretary shall solicit public comment prior to promulgating regulations to implement this section. Such regulations shall include a limitation similar to that used

under title XVIII of the Social Security Act, on the extent to which a provider may bill a beneficiary an actual charge in excess of the allowable amount.

Section 9011 provides Congressional direction to reduce CHAMPUS payment limits for professional services towards the Medicare limits for similar services, and to proceed gradually by reducing each CHAMPUS payment limit by no more than 15 percent per year. Additionally, the provision requires that special consideration be given to beneficiary access to health care services as reductions in payment limits are undertaken. Lastly, limitations (similar to Medicare limitations) on balance billing of beneficiaries by nonparticipating providers are authorized.

The National Defense Authorization Act for Fiscal Year 1992, Public Law 102–190, section 716, added a new section 1106 to title 10 United States Code, "Submittal of Claims Under CHAMPUS". This section requires that each provider of services under CHAMPUS must submit claims on behalf of beneficiaries, provides authority to waive the claims filing requirement in cases where access may be impaired, and limits the period during which claims may be filed to one year following the date of service.

Another statutory provision pertinent to this proposed rule is 10 U.S.C. 1079(j)(2)(A), which allows CHAMPUS to reimburse institutional providers "to the extent practicable in accordance with the same reimbursement rules as apply to payments to providers of services of the same type under" Medicare. This authority was used in implementing the CHAMPUS DRG-Based Payment System in 1987, and other CHAMPUS reimbursement approaches for institutional providers. In this proposed rule, the authority is applied to another type of institutional provider, ambulatory surgery centers.

B. The Need for Reform of CHAMPUS Payment Methods

Over the past several years, at the direction of Congress, growth in CHAMPUS payment limits for physicians and other individual professional health care providers has been constrained, and late in 1991, reductions in payment limits for certain overpriced procedures were undertaken. Despite these measures, CHAMPUS professional payment limits remain about 43 percent higher than Medicare payment limits. Medicare is by far the largest payor for health services in the country, and as such its payment methodologies are carefully developed by the Executive Branch and Congress and subject to intense scrutiny by the public and by providers of health services. The product of this intensive activity represents the Federal government's best judgment on what constitutes a reasonable and appropriate payment method.

CHAMPUS, being structurally similar to Medicare and a considerably smaller program, neither attracts nor requires the same degree of attention in development of reimbursement methods. Thus, Congress has followed the prudent course of directing that CHAMPUS adopt or adapt Medicare reimbursement approaches when appropriate. In the case of payments to physicians and other individual providers, Congress directed in the Department of Defense Appropriation Act, 1993 that CHAMPUS payment limits be measured against Medicare payment limits to identify CHAMPUS payment limits that are too high; and those overpriced procedures be gradually reduced, without impairing adequate access to care. This proposed rule moves not only to implement a requirement of law, but also to advance an important policy objective. Requirements have been established for major reductions in the Defense Department budget, creating a need to at least moderate the rate of growth in DoD's health care budget. After years of study and deliberation, reasonable payment levels have been established by law for providers under the government's primary health care program, Medicare. CHAMPUS payments in excess of those reasonable levels are presumptively unnecessary and undesirable. Thus it is an important policy objective for DoD to undertake a gradual transition, without impairing access, to these fair and reasonable levels.

This policy objective is also advanced by the provisions of this proposed rule regarding payments for ambulatory surgery centers. CHAMPUS payment reforms for most inpatient hospital care, for most inpatient mental health care, and for physician reimbursements have shifted the basis away from billed charges and toward reimbursement based on the costs of providing services. One of the last remaining circumstances in which CHAMPUS reimburses care on the basis of billed charges is for ambulatory surgery centers. This proposed rule establishes a new approach featuring prospectively-determined pricing for ambulatory surgery center services.

For the most part, CHAMPUS pays for health care services on the basis of claims submitted after services are rendered, similar to the approach used by Medicare and throughout the health care industry. Medicare requires providers to file claims on behalf of beneficiaries, which increases efficiency of claims processing, because claims are more accurate and complete, and reduces paperwork burdens for beneficiaries. This proposed rule implements a statutory requirement in the National Defense Authorization Act for Fiscal Year 1992 that establishes a general obligation for both institutional and individual providers also to file CHAMPUS claims on behalf of beneficiaries.

C. Adapting the Medicare Fee Schedule Approach to CHAMPUS

In January 1992, Medicare implemented a new fee schedule for physician payments, based on a resource-based relative value scale (RBRVS). Rather than basing allowable payments for health care services on the historical charges submitted by providers, the approach uses the relative resource requirements of procedures as the basis for allowable payments. Each service is reimbursed based on its value, which is the sum of relative value units representing physician work, practice expenses, and the cost of professional liability insurance. Nationally uniform relative values are adjusted to localities according to published geographic practice cost indices, and a national conversion factor is used to convert total relative value units into dollar payment levels. Medicare is in transition from its former historical-charge-based payment approach to the Medicare Fee Schedule, with decreases in payment amounts limited to fifteen percent per year after 1992; the new approach will be fully implemented by fiscal year 1996.

The Medicare Fee Schedule is the culmination of long-term efforts to achieve a rational payment system for physicians, involving experts from inside and outside the government. A research team led by William Hsiao, PhD., of the Harvard University School of Public Health, produced a series of seminal reports on development and application of resource-based relative value scales for physician services. Additional substantial contributions to the development of the Medicare Fee Schedule were made by the Federally-sponsored Physician Payment Review Commission, the Urban Institute, and the Center for Health Economics Research. Thorough consideration of the theoretical and practical effects of implementing the Fee Schedule preceded its introduction in 1992.

In examining the Medicare Fee Schedule payment approach, we are encouraged that evidence to date

indicates that it will provide a reasonable basis for determining appropriate CHAMPUS payment limits, if we proceed prudently. Among the points that encourage us, monitoring of the Medicare system to date has uncovered no systematic evidence that implementation of the new approach has reduced access to care for Medicare beneficiaries. On the contrary, preliminary results of a Louis Harris & Associates poll commissioned by the Physician Payment Review Commission (PPRC) indicate that 92 percent of doctors with substantial Medicare practices still accept new Medicare patients. Further, of the eight percent that do not, most also had not done so the prior year, before the new payment system was implemented. The poll also indicated no significant shift in Medicare assignment rates. In addition to the poll, an initial PPRC study found access problems in only three limited geographical areas of the country, as evidenced by beneficiary access complaints to State Agencies on Aging, Congressional offices, HCFA carriers, and American Association of Retired Persons offices. Even in these three areas, it could not be ascertained that the new Medicare payment policies were the cause of the access problems.

The early experience of Medicare following implementation of the Medicare Fee Schedule mirrors the experience of CHAMPUS over the past several years. Although growth in CHAMPUS prevailing charge limits for physicians and other individual professional providers was constrained beginning in 1989, no adverse impact on access, as indicated by provider participation rates, has been observed. On the contrary, there has been a steady increase in the percentage of claims on which providers accept the CHAMPUS allowable amount as full payment—this "participation rate" was 67.8 percent in the first quarter of 1989, and rose to 81.8 percent by the second quarter of 1992. This suggests that the revisions to CHAMPUS payment policy to date have not adversely affected beneficiary access to care.

The fundamental soundness of the Medicare approach, the early indications that it is having minimal adverse effects, and recent CHAMPUS experience all suggest that adapting it to CHAMPUS can be accomplished without creating access problems, if we proceed carefully. Accordingly, we propose to phase in payment reductions, in line with Congressional guidance, and to provide ongoing controls on access to care. These protections will be based on analysis of data from each locality to provide maximum protection, and will include a special "fail-safe" mechanism in the form of a new provision for petitioning for relief in special circumstances. In addition, new emphasis will be placed on the Participating Provider Program, which will provide beneficiaries with increased access to providers who accept the CHAMPUS maximum allowable charge as full payment. Finally, new limits on balance billing by providers who do not accept assignment will provide an additional measure of financial protection for beneficiaries.

II. Provisions of the Proposed Rule

A. Payments to Physicians and Other Authorized Individual Professional Providers (revisions to § 199.14(g))

Pursuant to the Fiscal Year 1991 Department of Defense Appropriations Act, Public Law 101–511, section 8012, CHAMPUS published a final rule on September 6, 1991 (56 FR 44001), which established a process for identifying "overpriced procedures" and reducing the CHAMPUS maximum allowable charges for such procedures. Procedures targeted for reduction were those which exceeded 1.5 times the Medicare Fee Schedule amount. This target was based on a comparison of existing CHAMPUS payment limits to the new Medicare amounts. In the aggregate, CHAMPUS payment limits were about 1.5 times the Medicare amounts.

This proposed rule establishes a new standard for determining overpriced procedures for CHAMPUS, based on the Department of Defense Appropriations Act, 1993, section 9011. The new standard of comparison is the fully-phased-in Medicare Fee Schedule amount under Medicare. Thus, under the proposed rule, for procedures for which the CHAMPUS maximum allowable charge is above the fully phased in Medicare Fee Schedule amount, the CHAMPUS level will be reduced, unless the reduction is waived because of access considerations. The reduction will not exceed 15 percent, nor result in a CHAMPUS level below the Medicare level.

Simultaneous with implementing its reductions for overpriced procedures based on the FY 1991 statute, CHAMPUS implemented a process for determining prevailing charges on a national basis, with local economic adjustments (similar to the approach used by Medicare). This system replaced state-by-state prevailing charges with more precise locality-based maximum allowable charges. We have received sporadic reports of localities where the combined effect of the "overpriced procedure" reductions and the shift from state-based to locality-based payment limits was to reduce payments for some procedures by more than fifteen percent in some localities.

To respond to these concerns, the proposed rule establishes limitations on reductions in maximum allowable charges for localities. For any procedure with more than 50 annual claims in a locality, the cumulative reduction cannot exceed 15 percent per year in the locality. We propose to use the threshold of 50 claims per year involving that specific procedure in that locality to assure the statistical validity of the calculations and the practical relevance of this special step.

In order to protect beneficiaries and avoid impairing access to care, the proposed rule includes two separate mechanisms to assure adequate access to care. The first of these is an objective, statistical test; the second is a flexible method that will allow a case-by-case judgment of any special factors in any locality.

Under the first procedure, we will monitor the amount of balance billing of beneficiaries for all specific procedures (other than very infrequent procedures) in all localities. Balance billing refers to a provider billing a beneficiary for any amount above the CHAMPUS payment rate (not counting normal deductibles and cost sharing amounts). Again, we propose a threshold of 50 claims per year in a locality involving the particular procedure to assure the statistical validity of the test. In any case in which a reduction of the CHAMPUS payment level would have taken place based on the comparison to the Medicare level, the reduction will be waived if in the previous year the number of claims on which there was balance billing reaches 50 percent of all claims in that locality involving that procedure. In other words, as long as most claims for a procedure in a locality have no balance billing, we will have a basis to be reassured that beneficiaries have access to that procedure from providers who will accept the CHAMPUS payment level as payment in full. If the balance billing rate hits 50 percent, we would waive the reduction in payment amount to assure that access is not impaired. Our current expectation is that this will occur infrequently, but we propose this safeguard to assure both that we are fair to providers and that beneficiary access is not impaired.

Recognizing that no statistical test can take account of all possible circumstances, the proposed rule provides a second mechanism to assure adequate beneficiary access to care. This is to allow a waiver of a payment level reduction based on a determination by

the Director, OCHAMPUS that the reduction would impair access. This determination could be based on any relevant evidence, and can be made by the Director, OCHAMPUS on the Director's own initiative, or based on a petition from providers and beneficiaries for such a determination. Again, we expect that this mechanism will not be frequently needed, but it is incorporated into the proposed rule as a fail-safe method to assure adequate access.

B. Limitations on Balance Billing (§ 199.14(g)(1)(i)(D))

The Department of Defense Appropriations Act, 1993, section 9011 also directs that CHAMPUS include a limitation, similar to that under Medicare, on the extent to which a provider may bill a beneficiary an actual charge in excess of the allowable amount. This limitation on balance billing provides financial protection for beneficiaries by preventing excessively high billing by providers. The proposed rule established the CHAMPUS balance billing limit as the same percentage as that used in Medicare: 115 percent of the allowable charge. Failure by a provider to comply with this requirement is a basis for exclusion from the program. In order to provide flexibility to continue CHAMPUS benefits in special circumstances in which a beneficiary might feel strongly about using a particular provider, notwithstanding high fees, the proposed rule states that the limitation may be waived on a case-by-case basis if requested by a CHAMPUS beneficiary.

C. Filing of Claims by Providers (§ 199.6(a)(11))

The proposed rule implements a provision of the National Defense Authorization Act for Fiscal Year 1992 that requires providers to file claims on behalf of CHAMPUS beneficiaries and limits the claims filing period to one year following the date of service. Pursuant to 10 U.S.C. section 1106, the proposed rule generally requires all institutional and individual providers to file claims on behalf of beneficiaries. This requirement was modeled after a similar Medicare requirement. See S. Rept. No. 102–113, 92d Cong., 1st Sess., p. 232 (Senate Armed Services Committee). The proposed rule allows exceptions in certain circumstances. Blanket waivers of the requirement are established for providers outside the United States and Puerto Rico, and in double coverage cases. Waivers for particular categories of care in particular localities where the enforcement of the requirement would impair access may be granted through a determination by the Director, OCHAMPUS. A special petition process is established, similar to that established for waivers of CHAMPUS maximum allowable charge reductions.

We propose to implement the claims filing requirement in a manner similar to Medicare. This includes a prohibition on a provider imposing any administrative charge relating to the claim filing requirement and authority to reduce allowable payment amounts by ten percent (which may not be balance billed to the patient) for providers who fail to comply with the requirement or obtain a waiver.

The general deadline for filing claims of one year from the date the services were provided, established by the National Defense Authorization Act for Fiscal Year 1992, now appears at 10 U.S.C. section 1106. This is a change from current practice, which allows a claim to be filed up until the end of the calendar year following the year in which the services were provided. This new deadline, like the new provider claim filing requirements, is subject to waiver when necessary to ensure adequate access to health care services. This issue is addressed in proposed § 199.7(d).

D. Participating Provider Program (§ 199.6(a)(8)(iii))

Historically, individual providers have determined participation in CHAMPUS on a claim-by-claim basis. The proposed rule builds into the CHAMPUS regulation provisions that have been in effect for several years regarding the Participating Provider Program, in which providers may sign agreements to participate on all claims, agreeing to accept the CHAMPUS-determined allowable amount as payment in full for the service provided. This Participating Provider Program establishes a basic relationship among providers, CHAMPUS beneficiaries, and CHAMPUS. As such, it may be a building block for more extensive programs, entailing discounts, preferred provider arrangements, or other additional provisions to enhance services for CHAMPUS beneficiaries. The Participating Provider Program offers benefits to beneficiaries, in that they can be assured access to providers who will not balance the bill, and for providers, in that CHAMPUS beneficiaries will tend to seek out Participating Providers.

Beneficiaries will be assisted in locating Participating Providers by several resources. First, Health Benefits Advisors in military treatment facilities will have lists of Participating Providers. In many cases, this service will be supplemented by a Health Care Finder, often a telephone service center to aid beneficiaries. CHAMPUS Contractors will compile lists of Participating Providers to support this activity.

A significant incentive for providers to join the Participating Provider Program will be implemented in 1994. Similar to Medicare, CHAMPUS will institute a 5 percent differential for nonparticipating providers, so that their reimbursement will be only 95 percent of the rate allowable for Participating Providers. Coupled with the potential for increased volume of CHAMPUS business for Participating Providers, the differential will provide a strong basis for providers to join the program.

E. Ambulatory Surgery Center Reimbursement (§ 199.14(d))

The proposed rule addresses one of the last remaining circumstances in which CHAMPUS reimburses care on the basis of billed charges. Payment reforms have previously been adopted for most hospital care, for most inpatient mental health services and for physician reimbursements. Proposed § 199.14(d) puts into effect a prospective payment approach to reimbursement for facility charges for freestanding and hospital-based ambulatory surgery centers. This is being done under the authority of 10 U.S.C. section 1079(j)(2), which authorizes CHAMPUS to pay all institutional facility providers under payment methods similar to those implemented under Medicare. The proposed CHAMPUS system would establish nine group payment rates covering most ambulatory surgery cases. There will be two sets of these group payment rates, one for freestanding ambulatory surgical centers and one for hospital-based centers, each calculated with reference to the appropriate cost-to-charge ratio for that type of center.

In addition, proposed § 199.4(f)(3)(iii)(B) would establish for retirees, their dependents and survivors similar cost-sharing rules for ambulatory surgery cases as currently exist for hospital care covered by the DRG-based payment system. Under the proposed rule, these beneficiaries would pay the lesser of: 25% of the applicable group payment rate; or 25% of the billed charges. In most cases, 25% of the group rate under the new payment method will be less, but because there is some variation within a group, 25% of billed charges could be less in some cases. The rule would assure that the beneficiaries get the benefit of the new system when it is more advantageous, but will never be disadvantaged by it. Finally, it is

noted that this special cost-sharing rule does not apply to dependents of active duty, who are not required to pay a percentage cost share for ambulatory surgery. Rather, they pay the same nominal fee as is charged for inpatient care.

III. Regulatory Procedures

This is a proposed rule. Public comments are invited. All comments will be considered. A discussion of the major issues revised by public comments will be included with issuance of the final rule, anticipated approximately 30 days after the end of the comment period.

Executive Order 12291 requires that a regulatory impact analysis be performed for any major rule. A "major rule" is defined as one which would result in an annual effect on the economy of $100 million or more, or have other substantial impacts.

The Regulatory Flexibility Act (RFA) requires that each Federal agency prepare, and make available for public comment, a regulatory flexibility analysis when the agency issues a regulation which would have a significant impact on a substantial number of small entities.

This is not a major rule under the provisions of Executive Order 12291, because it will not have an impact on the economy of more than $100 million. This proposed rule would not have a significant impact on a substantial number of small entities.

This proposed rule imposes no additional information collection requirements on the public under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3511).

Accordingly, 32 CFR part 199 is proposed to be amended as follows:

PART 199—[AMENDED]

1. The authority citation for part 199 continues to read as follows:

Authority: 5 U.S.C. 301; 10 U.S.C. 1079, 1086.

2. Section 199.2(b) is proposed to be amended by adding in alphabetical order new definitions for "Assistant Secretary of Defense (Health Affairs)", "balance billing", and Director, OCHAMPUS", and by revising the definition of "participating provider", as follows:

§ 199.2 Definitions.

* * * * *

Assistant Secretary of Defense (Health Affairs). An authority of the Assistant Secretary of Defense (Health Affairs) includes any person designated by the Assistant Secretary to exercise the authority involved.

* * * * *

Balance billing. A provider seeking any payment, other than any payment relating to applicable deductible and cost sharing amounts, from a beneficiary for CHAMPUS covered services for any amount in excess of the applicable CHAMPUS allowable cost or charge.

* * * * *

Director, OCHAMPUS. An authority of the Director, OCHAMPUS includes any person designated by the Director, OCHAMPUS to exercise the authority involved.

* * * * *

Participating provider. A hospital or other authorized institutional provider, a physician or other authorized individual professional provider, or other authorized provider that furnished services or supplies to a CHAMPUS beneficiary and that submits a CHAMPUS claim form and accepts assignment of the CHAMPUS-determined allowable cost or charge as the total payment (even though less than the actual charge), whether paid for fully by the CHAMPUS allowance or requiring cost-sharing by the beneficiary (or sponsor). See § 199.6(a)(8) for more information on the Participating Provider Program.

* * * * *

3. Section 199.4 is proposed to be amended by redesignating the text of paragraph (f)(3)(iii) as paragraph (f)(3)(iii)(A), by adding a heading for newly designated paragraph (f)(3)(iii)(A), by adding a new paragraph (f)(3)(iii)(B), and by revising paragraph (f)(6)(i), as follows:

§ 199.4 Basic program benefits.

* * * * *

(f) *Beneficiary or sponsor liability*

* * * * *

(3) *Retirees, dependents of retirees, dependents of deceased active duty members, and dependents of deceased retirees.* * * *

(iii) *Outpatient cost-sharing.*

(A) *For services other than ambulatory surgery center services.*

* * *

(B) *For services subject to the ambulatory surgery payment method.* For services provided by freestanding or hospital based ambulatory surgery centers and subject to the payment method set forth in § 199.14(d), the cost share shall be the lesser of: 25% of the payment amount provided pursuant to § 199.14(d); or 25% of the center's billed charges.

* * * * *

(6) *Amounts over CHAMPUS-determined allowable costs or charges.*

* * *

(i) *Participating Providers.* There are several circumstances under which institutional and individual providers may be Participating Providers, either on a mandatory basis or a voluntary basis. See § 199.6(a)(8). A Participating Provider, whether participating for all claims or on a claim-by-claim basis, must accept the CHAMPUS-determined allowable amount as payment in full for the medical services or supplies provided, and to accept the amount paid by CHAMPUS or the CHAMPUS payment combined with the cost-sharing amount paid by or on behalf of the beneficiary as payment in full for the covered medical services or supplies. Therefore, when costs or charges are submitted on a participating basis, the patient is not obligated to pay any amounts disallowed as being over the CHAMPUS-determined allowable cost or charge for authorized services or supplies.

* * * * *

4. Section 199.6 is proposed to be amended by revising paragraph (a)(8), and by adding new paragraphs (a)(11) and (a)(12), as follows:

§ 199.6 Authorized providers.

(a) *General.* * * *

(8) *Participating Providers.*

(i) *In general.* A Participating Provider is an individual or institutional provider that has agreed to accept the CHAMPUS-determined allowable amount as payment in full for the medical services and supplies provided to the CHAMPUS beneficiary, and has agreed to accept the amount paid by CHAMPUS or the CHAMPUS payment combined with the cost sharing and deductible amounts paid by, or on behalf of, the beneficiary as full payment for the covered medical services or supplies. In addition, Participating Providers submit the appropriate claims forms to the appropriate CHAMPUS contractor on behalf of the beneficiary. There are several circumstances under which providers are Participating Providers.

(ii) *Mandatory participation.* Medicare-participating hospitals are required by law to be Participating Providers on all inpatient claims under CHAMPUS. Hospitals that are not Medicare-participating providers but are subject to the CHAMPUS DRG-based payment system or the CHAMPUS mental health payment system (see § 199.14(a)), must sign agreements to participate on all CHAMPUS inpatient claims in order to be authorized providers under CHAMPUS.

(iii) *Participating Provider Program.* (A) *In general.* An institutional provider not required to participate pursuant to paragraph (a)(8)(ii) of this section and any individual provider may become a Participating Provider by signing a Participating Provider agreement. In such an agreement, the provider agrees that all CHAMPUS claims filed during the time period covered by the agreement will be on a participating basis.

(B) *Agreement required.* Under the Participating Provider Program, the provider must sign an agreement or memorandum of understanding under which the provider agrees to become a Participating Provider. Such an agreement may be with the nearby military treatment facility, a CHAMPUS contractor, or other authorized official. Such agreement may include other provisions pertaining to the Participating Provider Program. The Director, OCHAMPUS shall establish a standard model agreement and other procedures to promote uniformity in the administration of the Participating Provider Program.

(C) *Relationship to other activities.* Participating Provider agreements may include other provisions, such as provisions regarding discounts (see § 199.14(i)) or other provisions in connection with the delivery and financing of health care services, as authorized by this part or other DoD Directives or Instructions. Participating Provider agreement provisions may also be incorporated into other types of agreements, such as preferred provider arrangements where such arrangements are established under CHAMPUS.

(iv) *Claim-by-claim participation.* Institutional and individual providers that are not participating providers pursuant to paragraphs (a)(8) (ii) or (iii) of this section may elect to participate on a claim-by-claim basis. They may do so by signing the appropriate space on the claims form and submitting it to the appropriate CHAMPUS contractor on behalf of the beneficiary.

* * * * *

(11) *Submittal of claims by provider required*—(i) *General rule.* Unless waived pursuant to paragraph (a)(11)(ii) of this section, every CHAMPUS-authorized institutional and individual provider is required to submit CHAMPUS claims to the appropriate CHAMPUS contractor on behalf of the beneficiary for all services and supplies. In addition, the provider may not impose any charge relating to completing and submitting the applicable claim form (or any other related information). (Although CHAMPUS encourages provider participation, paragraph (a)(11) of this section requires only the submission of claim forms by providers on behalf of beneficiaries; it does not require that providers accept assignment of beneficiaries' claims or become Participating Providers.)

(ii) *Waiver of claims submission requirement.* The requirement that providers submit claims on behalf of beneficiaries may be waived in the following circumstances:

(A) *General requirement for waiver.* The requirement that providers submit claims on behalf of beneficiaries may be waived by the Director, OCHAMPUS when the Director determines that the waiver is necessary in order to ensure adequate access for CHAMPUS beneficiaries to health care services. However, the requirement may not be waived for Participating Providers (see paragraph (a)(8) of this section).

(B) *Blanket waiver for providers outside the United States.* The requirement that providers submit claims is waived with respect to providers outside the United States (the United States includes Puerto Rico for this purpose).

(C) *Blanket waiver in double coverage cases.* The requirement that providers submit claims is waived in cases in which another insurance plan or program provides primary coverage for the services.

(D) *Waivers for particular categories of care.* The Director, OCHAMPUS may waive the requirement that providers submit claims if the Director determines that available evidence clearly shows that the requirement would impair adequate access. For this purpose, such evidence may include consideration of the number of providers in the locality who provide the affected services, the number of such providers who are CHAMPUS Participating Providers, the number of CHAMPUS beneficiaries in the area, and other relevant factors. Providers or beneficiaries in a locality may submit to the Director, OCHAMPUS a petition, together with appropriate documentation regarding relevant factors, for a determination that adequate access would be impaired. The Director, OCHAMPUS will consider and respond to all such petitions. The Director, OCHAMPUS may establish procedures for handling such petitions.

(E) *Case-by-case waivers.* On a case-by-case basis, the Director, OCHAMPUS may waive the provider's obligation to submit that claim if the Director determines that a waiver in that case is necessary in order to ensure adequate access for CHAMPUS beneficiaries to the health care services involved. Such case-by-case waivers may be requested by providers or beneficiaries pursuant to procedures established by the Director.

(iii) *Remedies for noncompliance.* (A) In any case in which a provider fails to submit a claim, or charges an administrative fee for filing a claim, in violation of the requirements of paragraph (a)(11) of this section, the amount that would otherwise be allowable for the claim shall be reduced by ten percent, unless the reduction is waived by the Director, OCHAMPUS based on special circumstances. The amount disallowed by such a reduction may not be billed to the patient (or the patient's sponsor or family).

(B) Repeated failures by a provider to comply with the requirements of paragraph (a)(11) of this section shall be grounds for exclusion from the program.

(12) *Balance billing limits.*

(i) *In general.* Individual providers who are not Participating Providers may not balance bill a beneficiary an amount which exceeds the applicable balance billing limit. The balance billing limit shall be the same percentage as the Medicare limiting charge percentage for nonparticipating physicians.

(ii) *Waiver.* The balance billing limit may be waived by the Director, OCHAMPUS on a case-by-case basis if requested by a CHAMPUS beneficiary.

(iii) *Compliance.* Failure to comply with the balance billing limit is a basis for exclusion from the program.

* * * * *

5. Section 199.7 is proposed to be amended by revising the introductory text of paragraph (d), paragraphs (d)(1), (d)(2)(i)(D), and (d)(2)(i)(E), as follows:

§ 199.7 Claims submission, review, and payment.

* * * * *

(d) *Claims filing deadline.* To be considered for benefits, all claims submitted for benefits must, except as provided in paragraph (d)(2) of this section, be filed with the appropriate CHAMPUS contractor no later than one year after the services are provided. Unless the requirement is waived, failure to file a claim within this deadline waives all rights to benefits for such services or supplies.

(1) *Claims returned for additional information.* When a claim is submitted initially within the claim filing time limit, but is returned in whole or in part for additional information to be considered for benefits, the returned claim, along with the requested information, must be resubmitted and received by the appropriate CHAMPUS contractor no later than the later of:

(i) One year after the services are provided; or

(ii) 90 days from the date the claim was returned to the provider or beneficiary.

(2) *Exception to claims filing deadline.*

* * * * *

(i) *Types of exception.*

* * * * *

(D) *Delays by other health insurance.* When not attributable to the beneficiary, delays in adjudication by other health insurance companies when double coverage coordination is required before the CHAMPUS benefit determination.

(E) *Other waiver authority.* The Director, OCHAMPUS may waive the claims filing deadline in other circumstances in which the Director determines that the waiver is necessary in order to ensure adequate access for CHAMPUS beneficiaries to health care services.

* * * * *

6. Section 199.14 is proposed to be amended by revising paragraph (d), by revising paragraphs (g)(1)(i), (g)(1)(ii)(A), (g)(1)(iii) introductory text, (g)(1)(iii)(A)(*1*), (g)(1)(iii)(B)(*1*), and (g)(1)(iv), by redesignating paragraph (g)(1)(viii) as paragraph (g)(1)(x) and revising newly redesignated paragraph (g)(1)(x), and by adding a new paragraph (g)(1)(viii), as follows:

§ 199.14 Provider reimbursement methods.

* * * * *

(d) *Payment of institutional facility costs for ambulatory surgery.*

(1) *In general.* CHAMPUS pays institutional facility costs for ambulatory surgery on the basis of prospectively determined amounts, as provided in paragraph (d) of this section. This payment method is similar to that used by the Medicare program for ambulatory surgical centers. This paragraph applies to payment for institutional charges for ambulatory surgery provided in hospitals and freestanding ambulatory surgical centers. It does not apply to professional services.

(2) *Payment in full.* The payment provided for under this paragraph is the payment in full for services covered by this paragraph. Facilities may not charge beneficiaries for amounts, if any, in excess of the payment amounts determined pursuant to this paragraph.

(3) *Calculation of standard payment rates.* Standard payment rates are calculated for groups of procedures under the following steps:

(i) *Step 1: Calculate a median standardized charge for each procedure.* For each ambulatory surgery procedure, a median standardized charge will be calculated on the basis of all ambulatory surgery charges nationally under CHAMPUS during a recent one-year base period. The steps in this calculation include calculating a per procedure charge for each facility, updating to 1992 by the Medicare inpatient hospital market basket rate, standardizing for local labor costs by reference to the same wage index and labor/non-labor-related cost ratio as applies to the facility under Medicare, weighting of each facility's per procedure standardized charge by the number of times each procedure was performed by the facility, and the determination of the per procedure median standardized charge for all facilities.

(ii) *Step 2: Apply cost-to-charge ratios.* The median standardized charge for each procedure will be multiplied by the Medicare cost-to-charge ratio for freestanding ambulatory surgery centers (FASCs) and the Medicare cost-to-charge ratio for hospital-based ambulatory surgery centers (HASCs), producing two sets of median standardized costs per procedure.

(iii) *Step 3: Grouping procedures.* For both the FASC and HASC sets of median standardized costs per procedure, procedures will then be grouped by their median per procedure cost using fixed dollar intervals, starting with $0 to $299 for group 1 and ending with $1,000 and above for the last group, with intermediate groups set on the basis of $100 fixed intervals. This will result in two sets of nine groups, one set of groups for FASCs and the other set of groups for HASCs.

(iv) *Step 4: Adjustments to groups.* The Director, OCHAMPUS may make adjustments to the groupings resulting from step 3 to account for any ambulatory surgery procedures for which there was insufficient data to allow a grouping or to correct for any anomalies resulting from data or statistical factors or other special factors that fairness requires be specially recognized. In making any such adjustments, the Director may take into consideration the placing of particular procedures in the ambulatory surgery groups under Medicare.

(v) *Step 5: Standard payment amount per group.* For both the FASC and HASC sets of groups, the standard payment amount for each group will be the median per procedure cost for the procedures in that group.

(vi) *Step 6: Actual payments.* Actual payment for a procedure will be the standard payment amount for the group which covers that procedure in that type of facility, adjusted for local labor costs by reference to the same labor/non-labor-related cost ratio and hospital wage index as used for Medicare.

(4) *Multiple procedures.* In cases in which authorized multiple procedures are performed during the same operative session, payment shall be based on 100 percent of the payment amount for procedure with the highest ASC payment amount, plus, for each other procedure performed during the session, 50 percent of its payment amount.

(5) *Annual updates.* The standard payment amounts will be updated annually by the same update factor as is used in the Medicare annual updates for ambulatory surgery center payments.

* * * * *

(g) *Reimbursement of individual health-care professionals and other non-institutional health-care providers.*

* * *

(1) *Allowable charge method.*

(i) *Introduction.*

(A) *In general.* The allowable charge method is the preferred and primary method for reimbursement of individual health care professionals and other non-institutional health care providers (covered by 10 U.S.C. 1079(h)(1)). The allowable charge for authorized care shall be the lowest of the billed charge, the prevailing charge level or the appropriate charge level.

(B) *CHAMPUS Maximum Allowable Charge.* Beginning in calendar year 1992, prevailing charge levels and appropriate charge levels will be calculated on a national level. There will then be calculated a national CHAMPUS Maximum Allowable Charge (CMAC) level for each procedure, which shall be the lesser of the national prevailing charge level or the national appropriate charge level. The national CMAC will then be adjusted for localities in accordance with paragraph (g)(1)(iv) of this section.

(C) *Differential for Participating Providers.* Beginning in calendar year 1994, there shall be a differential in national and local CMACs based on whether the provider is a participating provider or a nonparticipating provider. The differential shall be calculated so that the CMAC for nonparticipating providers is 95% of the CMAC for participating providers. To assure the effectiveness of the several phase-in and waiver provisions set forth in paragraphs (g)(1)(iii) and (g)(1)(iv) of this section, beginning in calendar year 1994, there will first be calculated the national and local CMACs for nonparticipating providers. For purposes of this calculation, the identification of overpriced procedures called for in paragraph (g)(1)(iii)(A) of this section and the calculation of

appropriate charge levels for such overpriced procedures called for in paragraph (g)(1)(iv)(B) of this section shall use as the Medicare fee component of the comparisons and calculations the fee level applicable to Medicare nonparticipating providers, which is 95% of the basic fee level. After nonparticipating provider local CMACs are calculated (including consideration of special phase-in rules and waiver rules in paragraph (g)(1)(iv) of this section), participating provider local CMACs will be calculated so that nonparticipating provider local CMACs are 95% of participating provider local CMACs. (For more information on the Participating Provider Program, see § 199.6(a)(8)).

(D) *Limits on balance billing by nonparticipating providers.* Nonparticipating providers may not balance bill a beneficiary an amount which exceeds the applicable balance billing limit. The balance billing limit shall be the same percentage as the Medicare limiting charge percentage for nonparticipating physicians. The balance billing limit may be waived by the Director, OCHAMPUS on a case-by-case basis if requested by the CHAMPUS beneficiary (or sponsor) involved.

(ii) *Prevailing charge level.*

(A) Beginning in calendar year 1992, the prevailing charge level shall be calculated on a national basis.

* * * * *

(iii) *Appropriate charge level.* Beginning in calendar year 1992, the appropriate charge level shall be calculated on a national basis. The appropriate charge level for each procedure is the product of the following two-step process.

(A) *Step 1: Procedures classified.*

* * *

(*1*) *Overpriced procedures.* These are the procedures for which the prior year's national appropriate charge level or national prevailing charge level, whichever is less, exceeds the fully phased-in Medicare fee. For any particular procedure for which comparable Medicare fee and CHAMPUS data are unavailable, but for which alternative data are available that the Director, OCHAMPUS (or designee) determines provide a reasonable approximation of relative value or price, the comparison may be based on such alternative data.

* * * * *

(B) *Step 2: Calculating appropriate charge levels.* * * *

(*1*) For overpriced procedures, the prior year's appropriate charge level for each procedure shall be reduced by the lesser of the percentage by which it exceeds the Medicare fee or fifteen percent.

* * * * *

(iv) *Calculating CHAMPUS Maximum Allowable Charge Levels for Localities.*

(A) *In general.* The national CHAMPUS Maximum Allowable Charge level for each procedure will be adjusted for localities using the same (or similar) geographical areas and the same geographic adjustment factors as are used for determining allowable charges under Medicare.

(B) *Special locality-based phase-in provision.*

(*1*) *In general.* Beginning with the recalculation of appropriate charge levels for calendar year 1993, the appropriate charge level in a locality will not be less than 72.25% of the appropriate charge level in effect for that locality on December 31, 1991. For recalculations of appropriate charge levels for calendar years after 1993, the appropriate charge level in a locality will not be less than 85% of the appropriate charge level in effect for that locality at the end of the prior calendar year.

(*2*) *Exception.* The special locality-based phase-in provision established by paragraph (g)(1)(iv)(B)(*1*) of this section shall not be applicable in the case of any procedure code for which there were not CHAMPUS claims in the locality accounting for at least 50 services.

(C) *Special locality-based waivers of reductions to assure adequate access to care.* Beginning with the recalculation of appropriate charge levels for calendar year 1993, in the case of any procedure classified as an overpriced procedure pursuant to paragraph (g)(1)(iii)(A)(*1*) of this section, a reduction in the appropriate charge level in a locality below the level in effect at the end of the previous calendar year that would otherwise occur pursuant to paragraphs (g)(1)(iii) and (g)(1)(iv) of this section may be waived pursuant to paragraph (g)(1)(iii)(C) of this section.

(*1*) *Waiver based on balanced billing rates.* Except as provided in paragraph (g)(1)(iv)(C)(*2*) of this section such a reduction will be waived if there has been excessive balance billing in the locality for the procedure involved. For this purpose, the extent of balance billing will be determined based on a review of all services under the procedure code involved in the prior year (or most recent period for which data are available). If the number of services for which balance billing was not required was less that 50 percent of all services provided, the Director will determine that there was excessive balance billing with respect to that procedure in that locality and will waive the reduction in the CMAC that would otherwise occur.

(*2*) *Exception.* As an exception to the paragraph (g)(1)(iv)(C)(*1*) of this section, the waiver required by that paragraph shall not be applicable in the case of any procedure code for which there was not CHAMPUS claims in the locality accounting for at least 50 services. A waiver may, however, be granted in such cases pursuant to paragraph (g)(1)(iv)(C)(*3*) of this section.

(*3*) *Waiver based on other evidence that adequate access to care would be impaired.* The Director, OCHAMPUS may have a reduction that would otherwise occur if the Director determines that available evidence clearly shows that the reduction would impair adequate access. For this purpose, such evidence may include consideration of the number of providers in the locality who provide the affected services, the number of such providers who are CHAMPUS Participating Providers, the number of CHAMPUS beneficiaries in the area, and other relevant factors. Providers or beneficiaries in a locality may submit to the Director, OCHAMPUS a petition, together with appropriate documentation regarding relevant factors, for a determination that adequate access would be impaired. The Director, OCHAMPUS will consider and respond to all such petitions. The Director, OCHAMPUS may establish procedures for handling such petitions.

* * * * *

(viii) *Clinical laboratory services.* The allowable charge for clinical diagnostic laboratory test services shall be calculated in the same manner as allowable charges for other individual health care providers are calculated pursuant to paragraphs (g)(1)(i) through (g)(1)(iv) of this section, with the following exceptions and clarifications.

(A) The calculation and national prevailing charge levels, national appropriate charge levels and national CMACs for laboratory service shall begin in calendar year 1993. For purposes of the 1993 calculation, the prior year's national appropriate charge level or national prevailing charge level shall be the level that does not exceed the amount equivalent to the 80th percentile of billed charges made for similar services during the period July 1, 1991 through June 30, 1992 (referred to in this paragraph (g)(1)(viii) of this section as the "base period").

(B) For purposes of comparison to Medicare allowable payment amounts pursuant to paragraph (g)(1)(iii) of this

section, the Medicare national laboratory payment limitation amounts shall be used.

(C) For purposes of establishing laboratory service local CMACs pursuant to paragraph (g)(1)(iv) of this section, the adjustment factor shall equal the ratio of the local average charge (standardized for the distribution of clinical laboratory services) to the national average charge for all clinical laboratory services during the base period.

(D) For purposes of a special locality-based phase-in provision similar to that established by paragraph (g)(1)(iv)(B) of this section, the appropriate charge level in a locality will not be less than 85% of the appropriate charge level in effect for that locality during the base period.

* * * * *

(x) A charge that exceeds the CHAMPUS Maximum Allowable Charge can be determined to be allowable only when unusual circumstances or medical complications justify the higher charge. The allowable charge may not exceed the billed charge under any circumstances.

Dated: December 7, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 21

RIN 2900-AF36

Veterans' Education; Increase in Rates Payable in the Educational Test Program

AGENCY: Department of Defense and Department of Veterans Affairs.

ACTION: Proposed regulations.

SUMMARY: The law provides that rates of subsistence allowance and educational assistance payable under the Educational Assistance Test Program shall be adjusted annually based upon the average actual cost of attendance at public institutions of higher education in the twelve-month period since the rates were last adjusted. After consultation with the Department of Education, the Department of Defense has concluded that these rates should be increased by 6 percent. The regulations dealing with these rates are adjusted accordingly.

DATES: Comments must be received on or before January 11, 1993. Comments will be available for public inspection until January 21, 1993.

ADDRESSES: Send written comments to: Secretary of Veterans Affairs (271A), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, room 170 of the above address between the hours of 8 a.m. to 4:30 p.m., Monday through Friday (except holidays) until January 21, 1993.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer, Assistant Director for Policy and Program Administration, Education Service, Veterans Benefits Administration, (202) 233-2092.

SUPPLEMENTARY INFORMATION: The law (10 U.S.C. 2145) provides that the Secretary of Defense shall adjust the amount of educational assistance which may be provided in any academic year under the Educational Assistance Test Program, and the amount of subsistence allowance authorized under that program. The adjustment is to be based upon the twelve-month increase in the average actual cost of attendance at public institutions of higher education. As required by law, the Department of Defense has consulted with the Department of Education and determined that these costs increased during the 1989-90 school year by 6 percent. This proposal adjusts 38 CFR 21.5820 and 21.5822 so that all rates which appear in them are based on an annual limit on educational assistance of $1969, and monthly payment of subsistence allowance for full-time students of $491.

It is proposed to make these increases effective October 1, 1990. Retroactive effect is warranted because these changes are liberalizing, and because they are interpretive rules which implement and construe the meaning of a law. Moreover, there is good cause for a retroactive effective date of October 1, 1990. Such a date facilitates implementation of 10 U.S.C. 2145 which requires annual adjustments in educational assistance.

VA (Department of Veterans Affairs) and the Department of Defense have determined that these amended regulations do not contain a major rule as that term is defined by E.O. 12291, entitled Federal Regulation. The regulations will not have a $100 million annual effect on the economy and will not cause a major increase in costs or prices for anyone. They will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Secretary of Veterans Affairs and the Secretary of Defense have certified that these amended regulations will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-612. Pursuant to 5 U.S.C. 605(b), the amended regulations, therefore, are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because the regulations affect only individuals. They will have no significant economic impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

There is no Catalog of Federal Domestic Assistance number for the program affected by these regulations.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs-education, Loan programs-education, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: December 18, 1991.

Edward J. Derwinski,

Secretary of Veterans Affairs.

Approved: June 17, 1992.

Robert M. Alexander,

Lieutenant General, USAF Deputy Assistant Secretary (Military Manpower & Personnel Policy) U.S. Department of Defense.

For the reasons set out in the preamble, 38 CFR part 21, subpart H is amended as set forth below.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

Subpart H—Educational Assistance Test Program

1. The authority citation for part 21, subpart H continues to read as follows:

Authority: 10 U.S.C. Ch. 107; Pub. 96-342.

2. In § 21.5820 paragraphs (b) introductory text, (b)(1)(ii) (A), (B) and (C) and (b)(2)(ii) (A), (B) and (C) are revised to read as follows:

§ 21.5820 Educational assistance.

* * * * *

(b) *Amount of educational assistance.* The amount of educational assistance may not exceed $1969 per standard academic year, adjusted annually by regulation.

(Authority: 10 U.S.C. 2143)

(1) * * *

(ii) * * *

(A) Multiplying the number of whole months in the enrollment period by $218.78 for a full-time student or by $109.39 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $7.29 for a full-time student or by $3.64 for a part-time student; and

(C) Adding the two results. If the enrollment period is as long or longer than a standard academic year, this amount will be decreased by 2¢ for a full-time student and decreased by 1¢ for a part-time student; and

(Authority: 10 U.S.C. 2143)

(2) * * *

(ii) * * *

(A) Multiplying the number of whole months in the enrollment period by $218.78 for a full-time student or by $109.39 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $7.29 for a full-time student or by $3.64 for a part-time student; and

(Authority: 10 U.S.C. 2143)

(C) Adding the two results. If the enrollment period is as long or longer than a standard academic year, this amount will be decreased by 2¢ for a full-time student and decreased by 1¢ for a part-time student; and

(Authority: 10 U.S.C. 2143)

* * * * *

3. In § 21.5822 paragraphs (b)(1) (i) and (ii), (b)(2) (i) and (ii) are revised to read as follows.

§ 21.5822 Subsistence allowance.

* * * * *

(b) Amount of subsistence allowance.

(1) * * *

(i) If a person is pursuing a course of instruction on a full-time basis, his or her subsistence allowance is $491 per month adjusted annually by regulation.

(ii) If a person is pursuing a course of instruction on other than a full-time basis, his or her subsistence allowance is $245.50 per month.

(Authority: 10 U.S.C. 2144)

* * * * *

(2) * * *

(i) VA shall determine the monthly rate of subsistence allowance payable to a person for a day during which he or she is pursuing a course of instruction full-time by dividing $491 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day.

(ii) VA shall determine the monthly rate of subsistence allowance payable to a person for a day during which he or she is pursuing a course of instruction on other than a full-time basis by dividing $245.50 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day.

(Authority: 10 U.S.C. 2144)

BILLING CODE 8320-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Chapter I

[CC Docket No. 92-77 FCC No. 92-465]

Billed Party Preference for 0+ InterLATA Calls

AGENCY: Federal Communications Commission.

ACTION: Request for supplemental comment.

SUMMARY: This action invites supplemental comment to assist the Commission in determining methods for compensating operator service providers who receive 0+ dialed proprietary card calls and who wish to transfer those calls to the card issuer for completion.

DATES: Comments must be filed on or before December 14, 1992, and reply comments on or before January 6, 1993.

ADDRESSES: Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Barbara Esbin, 202-632-6917.

SUPPLEMENTARY INFORMATION: On October 8, 1992 the Commission adopted a Report and Order and Request for Supplemental Comment (Report and Order in CC Docket 92-77, Phase I, FCC No. 92-465, released November 6, 1992. In the Report and Order, the Commission reviewed certain interexchange carrier (IXC) calling card practices in the first phase of its "billed party preference" (BPP) proceeding. In Phase I, the Commission considered the need to take immediate action in response to alleged competitive problems resulting from the use of AT&T proprietary calling cards with the 0+ form of access, pending its consideration of the costs and benefits of a BPP-routing methodology for 0+ dialed InterLATA calls. This Order seeks supplemental comment on possible methods for compensating operator service providers who continue to receive 0+ dialed proprietary card calls and who wish to transfer those calls to the card issuer for completion. The Order specifically seeks comment on how this transfer service is to be defined and provided, the network interconnection arrangements the service would require and related matters. The full text of the Commission's Order is available for public inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this Order may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452-1422, suite 640, 1990 M Street, NW., Washington, DC 20554.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Parts 217, 220

[FRA Docket No. RSOR-12; Notice No. 2]

RIN 2130-AA76

Railroad Operating Rules and Radio Standards and Procedures; Hearing and Extension of Comment Period

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of public hearing and extension of comment period.

SUMMARY: FRA announces a public hearing to consider issues regarding its proposal to remove requirements that railroads file their operating rules, radio rules, and other related documents with FRA and to substitute requirements that railroads maintain records of such documents and make them available to FRA representatives during regular business hours (57 FR 47603, October 19, 1992). This public hearing is necessitated by a request from an interested party that FRA provide an opportunity for oral comment in order to address these issues. The hearing will be held on December 14, 1992, in Washington, DC. FRA is also extending the NPRM comment period on this proposed rule from November 20, 1992 to December 21, 1992 in order to accommodate the public hearing and comments in response to issues raised at that hearing.

DATES: (1) Written comments must be received no later than December 21, 1992. Comments received after that date will be considered to the extent possible

without incurring additional expense or delay.

(2) The public hearing will held at 10 a.m. on December 14, 1992. Any person wishing to present oral testimony at the hearing is requested to notify the Docket Clerk at least five working days prior to the date of the hearing, by telephone or mail, and to submit three copies of the oral statement that he or she intends to make at the hearing.

ADDRESSES: (1) Written comments: Address written comments to the Docket Clerk, Office of Chief Counsel, FRA, 400 Seventh Street, SW., Washington, DC 20590. Comments should identify the docket number and must be submitted in triplicate. Persons wishing to receive confirmation of the receipt of their comments should include a self-addressed stamped postcard. The docket is in room 8201 of the Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. Written comments may be reviewed, both before and after the closing date for comments, between the hours of 8:30 a.m. and 5 p.m., Monday through Friday, except holidays.

(2) Public hearing: A public hearing will be held in room 2230, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. Persons desiring to testify at the hearing should notify the Docket Clerk by telephone at (202) 366–0628 or by writing to the Docket Clerk at the address above and should provide to the Docket Clerk three copies of the oral statement that he or she intends to make at the hearing no later than one day prior to the hearing.

FOR FURTHER INFORMATION CONTACT: Jon Kaplan, Trial Attorney, Office of Chief Counsel, FRA, 400 Seventh Street, SW., Washington, DC 20590 (telephone: (202) 366–0635) or James T. Schultz, Office of Safety, FRA, 400 Seventh Street, SW., Washington, DC 20590 (telephone: (202) 366–9178).

SUPPLEMENTARY INFORMATION: On October 19, 1992, FRA published a Notice of Proposed Rulemaking (NPRM) to amend its Railroad Operating Rules (49 CFR part 217) and Radio Standards and Procedures (49 CFR part 220). 57 FR 47,603 (1992). FRA proposed removing the requirement that railroads file their respective operating rules, radio rules, and other related documents with FRA in Washington, DC and substituting the requirement that railroads retain these records and make them available upon request for inspection by FRA personnel during regular business hours.

At the time the NPRM was published, FRA regarded the amendments proposed as minor procedural changes aimed at reducing the paperwork and mailing burden borne by the railroads. No substantive revisions are proposed in the NPRM, and it is assumed that most railroads already maintain copies of these documents. Therefore, in the interest of expediting the release of this rule in final, FRA elected to solicit written comments to the proposed rule while retaining the option to conduct a public hearing for oral comment upon the request by a member of the regulated community. An interested party has submitted such a request. Accordingly, FRA encourages all interested persons to attend and participate in the public hearing concerning the proposed amendments to the Railroad Operating Rules and Radio Standards and Procedures.

Please note that any person wishing to participate in the public hearing is requested to notify the Docket Clerk at the address and telephone number provided above so that FRA may arrange to accommodate all interested persons. Notice should be provided at least five working days prior to the date of the hearing.

In order to provide an opportunity for further public comment preceding and subsequent to the public hearing, FRA is extending the comment period in this docket through December 21, 1992.

Issued in Washington, DC on December 4, 1992.

Gilbert E. Carmichael,

Administrator, Federal Railroad Administration.

[FR Doc. 92–29974 Filed 12–9–92; 8.45 am]

BILLING CODE 4910–06–M

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 74–14; Notice 77]

RIN 2127–AE19

Federal Motor Vehicle Safety Standards; Occupant Crash Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to require the use of the Hybrid III test dummy for all compliance testing under Standard No. 208. At present, vehicle manufacturers are permitted to choose either the Hybrid III or the older Hybrid II test dummy for the certification of their vehicles under Standard No. 208. A requirement specifying the use of a single type of test dummy will permit greater comparability of test results among vehicles produced by different manufacturers, particularly those that now use different dummy types.

NHTSA has chosen to propose the Hybrid III test dummy as the single type of test dummy because the Hybrid III appears to be more representative of human responses in frontal crashes and because the Hybrid III allows the assessment of more types of potential injuries. Mandating the use of the Hybrid III test dummy will help ensure that all new vehicles are designed with the benefit of the most human-like test dummy available.

DATES: Comments on this proposal must be received by NHTSA no later than February 8, 1993. If adopted in a final rule, these proposed requirements would become effective on September 1, 1996.

ADDRESSES: Comments should refer to the docket and notice number shown at the top of this proposal, and be submitted to: NHTSA Docket Section, room 5109, 400 Seventh Street, SW., Washington, D.C. 20590. The docket section is open to the public from 9:30 am to 4:00 pm Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Stanley H. Backaitis, Office of Vehicle Safety Standards, NRM–10, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Mr. Backaitis can be reached by telephone at (202) 366–4912.

SUPPLEMENTARY INFORMATION:

Related Proposal

Elsewhere in the Proposed Rules section of today's edition of the **Federal Register**, NHTSA has published a proposal to substitute a neck injury criterion for the head injury criterion in all Standard No. 208 compliance tests during which the test dummy's head does not contact any vehicle surface other than the belt system. That proposal is closely related to this notice, because higher non-contact HIC's are obtained in identical crash environments with the Hybrid III dummy and its more flexible neck than with the older Hybrid II dummy and its stiffer, less human-like neck. Accordingly, it would be helpful if commenters would review and consider both this notice and that proposal as they prepare their comments on this notice.

Background

At present, Standard No. 208, Occupant Crash Protection (49 CFR 571.208) gives vehicle manufacturers the choice of using either of two dummy types in tests for compliance with the standard. One of the types is the older Hybrid II dummy. Specifications for the

Hybrid II test dummy have been incorporated in subpart B of 49 CFR part 572 since August 1, 1973. The Hybrid II test dummy represents the state of the art of human simulation of the early 1970's. It has been used in NHTSA compliance testing since that time.

For more than a decade, the Hybrid II test dummy was the only test dummy specified in NHTSA's regulations for use in Standard No. 208 compliance testing. However, on July 25, 1986 (51 FR 26688), NHTSA published a final rule allowing the use of a second type of test dummy in Standard No. 208 compliance testing. This newer test dummy was the Hybrid III test dummy, and the specifications for it appear in subpart E of 49 CFR part 572. The Hybrid III test dummy represents the state of the art of human simulation of the early 1980's, which, not surprisingly, represents an advance over the state of the art in the early 1970's. Among other noteworthy advances, the Hybrid III has a more humanlike seated posture, head, neck, chest, and lumbar spine designs that meet biofidelic impact response requirements, and the capability of monitoring almost four times as many injury-indicating parameters as compared with the Hybrid II dummy.

In the July 25, 1986 rule adopting the Hybrid III test dummy, the agency found that the two types of test dummies were essentially equivalent; i.e., when both types of test dummies were tested in identical vehicles that provided occupant protection with either safety belts or air bags, only minimal differences in test results were shown between the two types of dummies. The importance of equivalence is that vehicles which pass or fail Standard No. 208 using one type of dummy will achieve essentially the same result using the other type of dummy. Based on this finding of equivalence, the agency permitted the manufacturers to specify either type of dummy for Standard No. 208 compliance testing.

However, the agency prefers to specify that a single type of test dummy be used in compliance testing. This allows for better comparability of test results between vehicles, especially vehicles produced by different manufacturers, eliminates potential confusion on the part of test facilities and the public, and avoids needless costs by permitting dummy manufacturers and users to produce and purchase a single type of frontal crash test dummy.

Balanced against the agency's desire to have a single type of test dummy in compliance testing was the agency's desire to avoid imposing unnecessary costs on the vehicle manufacturers. When the agency changed the compliance test procedures in 1986 to replace the test dummy that had been specified for more than a decade (the Hybrid II) with a newer test dummy (the Hybrid III), the agency had to allow vehicle manufacturers sufficient time to respond to this change. That is, vehicle manufacturers had developed a data bank of crash test results for their vehicles using the older Hybrid II test dummy. This data bank is used in product development. It allows manufacturers to see the effect of modifications to features such as the crash pulse, interior design, or restraint system on the crash test results for current vehicle designs, using a particular type of test dummy. The vehicle manufacturers can then use this information as a general guide in designing future vehicles. However, should NHTSA adopt the newer Hybrid III dummy as the only type of dummy to be used in Standard No. 208 compliance testing, the data bank of Hybrid II crash test results becomes less valuable. Those manufacturers whose data bank consists primarily of Hybrid II results will need time to develop a new data bank of testing using the Hybrid III dummy.

Manufacturers currently using the Hybrid II test dummy could immediately change over to the use of the Hybrid III dummy for their long term projects, such as specific product development testing and general safety testing. Any differences in test results that show up as a result of using the different test dummy in these long term projects can be accommodated in the long term as a normal part of new product development, with little or no additional cost.

Such would not be the case, however, for short term projects, such as vehicles currently in production or planned to be introduced in the next model year or two that were developed based on the Hybrid II test dummy. At this time, the Hybrid III dummy is being used to certify vehicles produced by Chrysler, GM, Isuzu, Mitsubishi, Suzuki, Toyota, and Volvo. All other current vehicles are certified based on the Hybrid II dummy, although Ford has indicated that it plans to switch from the Hybrid II to the Hybrid III dummy for the design and development of its future passenger cars and subsequent certification testing for those cars. For those vehicles developed and certified using the Hybrid II dummy, a change in test dummies would require verification of continued compliance with Standard No. 208. In some cases, the change in test dummies could necessitate redesign of some of these vehicles to ensure continuing compliance. Any such redesign would have very high costs because of the short timeframe that would be available and the need to modify production techniques that are already in place.

NHTSA addressed this situation in the July 1986 final rule for the Hybrid III dummy by permitting the use of either test dummy in compliance testing for five years after publication of the final rule. At the end of that five year transition period, i.e., September 1, 1991, all compliance testing would be conducted only with the Hybrid III test dummy. NHTSA anticipated that all the vehicle manufacturers would immediately switch to the use of the Hybrid III test dummy for their product development testing and general safety testing as of July 1986. If this had been the case, all of today's production vehicles would have been developed using that dummy, and the costs of mandating the Hybrid III for compliance testing of those vehicles would have been minimal. However, this has not been the case.

Response to Petitions for Reconsideration of 1986 Rule

A number of parties filed petitions for reconsideration of the July 1986 rule mandating the exclusive use of the Hybrid III test dummy for Standard No. 208 compliance testing. These petitioners were generally concerned about the two inch chest deflection limit that was established for the Hybrid III dummy when used at any seating position equipped with any occupant protection system other than an air bag. NHTSA responded to these petitions in a March 17, 1988 rule (53 FR 8755). In that rule, the agency announced its concurrence with the petitioners' assertion that the available data were insufficient to adequately support the safety need for a two inch chest deflection limit for positions equipped with safety belts. Thus, in response to these petitions, the agency amended Standard No. 208 to establish a three inch limit on chest deflection for the Hybrid III dummy in seating positions equipped with either air bags or safety belts.

As an adjunct to this amendment to the chest deflection limit for the Hybrid III test dummy, the agency suspended the September 1, 1991 mandatory use date for he Hybrid III test dummy. The effect of this suspension was to permit vehicle manufacturers an indefinite continuation of the option to specify the use of either the Hybrid II or III test dummy in their Standard No. 208 certification testing and associated

compliance testing by the agency. NHTSA indicated that the reason for the suspension of the mandatory use date was to allow the agency to further explore the issue of the appropriate chest deflection limit to specify for the Hybrid III test dummy. See 53 FR 8755, at 8760–61; March 17, 1988.

Activities After the Response to the Petitions for Reconsideration

NHTSA promptly undertook a series of research activities designed to gather additional information on the subject of chest deflection as measured by the Hybrid III test dummy. Additionally, a number of sources outside the agency have provided NHTSA with test results pertaining to the subject of chest deflection. These sources include General Motors, Mercedes-Benz, Toyota, INRETS (a French government research and development group), and the Motor Industry Research Association (a British group). Copies of the testing and reseach reports describing the testing and research that have become available since March 1988, when NHTSA responded to the petitions for reconsideration, are available in NHTSA Docket No. 74–14; Notice 66. Interested persons are advised to examine those materials for more details on the results of the agency's testing and the testing conducted by other entities.

These activities and test results have indicated that any effort to establish a chest deflection limit of less than the currently-specified three inches will have to be supported by long-term research efforts. If the agency continues to follow the course of action announced in the 1988 response to the petitions for reconsideration, NHTSA would continue to link the mandatory use of the Hybrid III test dummy to the agency's efforts to establish a chest deflection limit at a level below three inches. Such a link would mean that mandatory use of the Hybrid III would be indefinitely postponed, at least until the long-term research on chest deflection has been completed and evaluated. However, the agency has tentatively concluded that an indefinite postponement of the exclusive use of the Hybrid III test dummy is not justified and not in the public interest for the reasons set forth below.

Proposal to Require Use of the Hybrid III Dummy in Standard No. 208 Compliance Testing

The optional use of either the Hybrid II or III test dummy for Standard No. 208 compliance testing has reconfirmed the agency's general preference for a single type of test dummy. As between the two types of test dummies, the Hybrid III test dummy exhibits responses that are consistently more human-like than those of the older Hybrid II test dummy. Using test dummies with enhanced biofidelity in NHTSA's compliance testing should provide a better evaluation of how well the vehicles will protect occupants while in use on the roads. This enhanced evaluation of occupant protection should, in turn, result in vehicles that offer better occupant protection. Thus, the interest in motor vehicle safety would appear better served by mandating the exclusive use of the Hybrid III test dummy in NHTSA compliance testing under Standard No. 208.

The desirability of specifying a single test dummy for Standard No. 208 compliance testing at this time has led the agency to reexamine the link it established between the mandatory use of the Hybrid III test dummy and the efforts to reduce the maximum permissible chest deflection to a level below the current three inches. If that link is not necessary, the agency would strongly prefer to designate the Hybrid III test dummy at this time as the sole dummy type for use in Standard No. 208 testing.

One important question is whether a chest deflection limit for the Hybrid III test dummy should be set at some level below three inches. At this time, the agency does not believe it is necessary to set the chest deflection limit for the Hybrid III at some lower level in order to realize benefits from the exclusive use of the Hybrid III dummy. The currently available data suggest that the three inch chest deflection limit is a practicable limit for assessing the effectiveness of both safety belts and air bags. A recently published SAE paper ("Hybrid III Sternal Deflection Associated with Thoracic Injury Severities of Occupants Restrained with Force Limiting Shoulder Belts," H. Mertz, J. Horsch, G. Horn, and R. Lowne, SAE 910812) documents how chest deflection, measured with the current single point deflection measurement system, correlates closely with injuries to belted occupants in real world crashes. That paper also shows that the load measured on the shoulder belt and the chest deflection have a very strong correlation. In other words, while the current chest deflection measurement technique and specific deflection limit may not be perfect simulations, they are good enough to correspond with both real world events and measurements during laboratory crash testing.

NHTSA's tentative conclusions about the current technique for measuring chest deflection and the current three inch chest deflection limit for the Hybrid III dummy should not be misunderstood. The agency acknowledges that the current chest deflection measurement system for the Hybrid III dummy is not a perfect indicant of thoracic injury risk to humans. The agency is currently investigating advanced chest deflection monitoring systems that could provide a better assessment of the risk of injury to the entire thoracic region, and will continue to do so. The agency will also continue to evaluate all available biomechanical data to better understand the mechanisms of thoracic injuries and to explore improved interpretation of chest deflection measurements as they relate to occupant injury potential. However, the agency believes that the current chest deflection measurement system is sufficiently reliable, repeatable, and practicable to meet all statutory criteria.

The agency wants to minimize any costs to manufacturers that would be associated with a new requirement specifying the Hybrid III as the exclusive test dummy for use in Standard No. 208 compliance testing, just as NHTSA wanted to minimize costs in the 1986 final rule that initially mandated the use of the Hybrid III test dummy. NHTSA sought to achieve this end in the 1986 final rule by providing a five year leadtime period during which either the Hybrid II or III test dummies could be used for compliance testing and then mandating the exclusive use of the Hybrid III dummy after the expiration of the five year period. The agency is proposing to adopt a similar leadtime period for mandatory use of the Hybrid III in this rule, by proposing that the mandatory use begin for vehicles manufactured on or after September 1, 1996.

This leadtime period was chosen to correspond with vehicle redesign cycles. The period up to September 1, 1996 will allow manufacturers that have developed and certified vehicles using the Hybrid II dummy to avoid the need to recertify using the Hybrid III dummy before the vehicles are redesigned on the normal product design and modification cycle. Substituting the Hybrid III dummy for the previously used Hybrid II dummy at the time of the normal redesign will not impose any additional testing costs or certification burdens on the vehicle manufacturers.

This proposed leadtime is slightly less than the five year leadtime period that was proposed previously for mandatory use of the Hybrid III dummy. The shorter leadtime proposed in this notice reflects the fact that the Hybrid III is a

better known dummy at this time than was the case in 1986, even for those manufacturers that have used the Hybrid II to develop and certify their vehicles.

Further, there is no compelling safety reason to specify the exclusive use of the Hybrid III dummy earlier than September 1, 1996. An earlier exclusive use of the Hybrid III dummy would not usher in earlier use of new safety equipment, nor would it lead to safety improvements being made earlier. Because of the absence of safety benefits and the potential for needless costs, NHTSA has tentatively concluded that there is good cause for proposing an effective date of September 1, 1996.

Manufacturers can further minimize costs by substituting the Hybrid III for the Hybrid II in any general agency research or other projects in which they are currently using the Hybrid II as a human surrogate. Of course, NHTSA has no authority to require the use of any type of dummy by manufacturers in any of their testing. However, the use of the Hybrid III for general safety research would give manufacturers more accurate indications of how their cars would fare in NHTSA's compliance testing using the Hybrid III dummy.

Another incentive for manufacturers to switch over to the use of the Hybrid III dummy in their testing generally is that vehicle manufacturers generally prefer to use the same test dummy as the agency uses for its research testing. Use of the same type of test dummy allows the manufacturers to better compare and evaluate their research and development test results with the agency's research and development test results. NHTSA has been using and will continue to use primarily the Hybrid III test dummy for its research projects on frontal crashes.

The public is asked to address the tentative agency conclusions regarding the desirability of specifying the Hybrid III as the only test dummy for use in Standard No. 208 compliance testing by the agency. Those commenters that disagree with these tentative conclusions are asked to provide specific details and quantified cost estimates to support and explain their disagreements. The agency also invites dummy manufacturers to comment and provide information about any minor technical changes that may be needed in the specifications for the Hybrid III dummy, because specified materials or measuring devices might not be any more commercially available or might have been modified, for instance. If any minor technical changes are requested in a comment, the commenter should document as thoroughly as possible the basis for the asserted need and also provide information on how the requested change would affect the impact response of the dummy.

This proposed rule would not have any retroactive effect. Under section 103(d) of the National Traffic and Motor Vehicle Safety Act (Safety Act; 15 U.S.C. 1392(d)), whenever a Federal motor vehicle safety standard is in effect, a State may not adopt or maintain a safety standard applicable to the same aspect of performance which is not identical to the Federal standard, except to the extent that the State requirement imposes a higher level of performance and applies only to vehicles procured for the State's use. Section 105 of the Safety Act (15 U.S.C. 1394) sets forth a procedure for judicial review of final rules establishing, amending or revoking Federal motor vehicle safety standards. That section does not require submission of a petition for reconsideration or other administrative proceedings before parties may file suit in court.

Rulemaking Analyses and Notices

Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

NHTSA has considered the costs and other impacts that would be associated with this proposal if it were adopted as a final rule. Based on that consideration, the agency has determined that this proposal is neither "major," within the meaning of Executive Order 12291, nor "significant," within the meaning of the Department of Transportation's regulatory policies and procedures. As explained above, the agency is proposing an effective date of September 1, 1996, so that manufacturers currently using the Hybrid II dummy to develop and certify some of their vehicles can switch to the use of the Hybrid III dummy as part of the normal design cycle. Since manufacturers have been switching to the use of the Hybrid III dummy in any case, this proposal should accelerate existing trends without imposing additional costs. It may be necessary for manufacturers that have been using the Hybrid II dummy to acquire new accelerometers for use in the Hybrid III dummy. Considering that accelerometers have a shelf life of well over five years, the cost increment per dummy for new accelerometers would be only $3,000 to $3,500. The agency believes these negligible costs would be the only costs associated with a final rule adopting this proposal. Accordingly, a full regulatory evaluation has not been prepared.

Regulatory Flexibility Act

NHTSA has also considered the effects of this regulatory action under the Regulatory Flexibility Act. I hereby certify that this proposal, if adopted as a final rule, would not have a significant economic impact on a substantial number of small entities. The choice of frontal crash dummy for use in vehicle certification and design affects motor vehicle manufacturers, few of which are small entities. As described above, there would be no significant economic impact on those vehicle manufacturers that are small entities. Further, since no price increases should be associated with this proposal, small organizations and small governmental entities should not be affected in their capacity as purchasers of new vehicles if this proposal were adopted in a final rule.

National Environmental Policy Act

NHTSA has analyzed this proposal for the purposes of the National Environmental Policy Act and determined that a final rule adopting this proposal would not have a significant impact on the quality of human life.

Executive Order 12612 (Federalism)

Finally, the agency has analyzed this proposal in accordance with the principles and criteria set forth in Executive Order 12612. NHTSA has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Request for Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21.) Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the

agency's confidential business information regulation. 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing, NHTSA proposes to amend 49 CFR Part 571 to read as follows:

PART 571—[AMENDED]

1. The authority citation for Part 571 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.208 [Amended]

1a. Section 571.208 would be amended as follows:

2. S5 of Standard No. 208 would be amended by using existing S5.1 through S5.3, inclusive, to read as follows:

S5. *Occupant crash protection requirements.*

S5.1 *Frontal barrier crash test.* Impact a vehicle traveling longitudinally forward at any speed, up to and including 30 mph, into a fixed collision barrier that is perpendicular to the line of travel of the vehicle, or at any angle up to 30 degrees in either direction from the perpendicular to the line of travel of the vehicle under the applicable conditions of S8. The test dummy specified in S8.1.8 placed at each front outboard designated seating position shall meet the injury criteria of S6.1, S6.2, S6.3, S6.4, and S6.5 of this standard.

S5.2 *Lateral moving barrier crash test.* Impact a vehicle laterally on either side by a barrier moving at 20 mph under the applicable conditions of S8. The test dummy specified in S8.1.8 positioned in the front outboard designated seating position adjacent to the impacted side shall meet the injury criteria of S6.2 and S6.3 of this standard.

S5.3 *Rollover.* Subject a vehicle to a rollover test in either lateral direction at 30 mph under the applicable conditions of S8 of this standard with a test dummy specified in S8.1.8 placed in the front outboard designated seating position on the vehicle's lower side as mounted on the test platform. The test dummy shall meet the injury criteria of S6.1 of this standard.

* * * * *

3. S6 of Standard No. 208 would be amended by removing existing S6.1 through S6.1.4, inclusive, and redesignating existing S6.2 through S6.2.5, inclusive, as S6.1. through S6.1.5.

4. S7 of Standard No. 208 would be amended by revising S7.1.3 and S7.4.3 through S7.4.5, inclusive, to read as follows:

S7. *Seat belt assembly requirements.*

* * * * *

S7.1.3 The weights and dimensions of the vehicle occupants referred to in this standard are as follows:

S7.1.3.—THE WEIGHTS AND DIMENSIONS OF THE VEHICLE OCCUPANTS REFERRED TO IN THIS STANDARD ARE AS FOLLOWS:

	50th-percentile 6-year old child	5th-percentile adult female	50th-percentile adult male	95th-percentile adult male
Weight	47.3 lbs.	102 lbs.	172.30 lbs. ± 2.40.	215 lbs.
Erect sitting height	25.4 in.	30.9 in.	34.8 in. ± .2	38 in.
Hip breadth (sitting)	8.4 in.	12.8 in.	14.7 in. ± .7	16.5 in.
Hip circumference (sitting)	23.9 in.	36.4 in.	41 in. ± 1.0	47.2 in.
Waist circumference (sitting)	20.8 in.	23.6 in.	33.5 in. ± .8	42.5 in.
Chest depth		7.5 in.	8.7 in. ± .8	10.5 in.
Chest circumference:				
(nipple)		30.5 in.		
(upper)		29.8 in.	38.8 in. ± .6	4.45 in.
(lower)		26.6 in.		

* * * * *

S7.4.3 *Belt contact force.* Except for manual or automatic seat belt assemblies that incorporate a webbing tension-relieving device, the upper torso webbing of any seat belt assembly shall not exert more than 0.7 pounds of contact force when measured normal to and one inch from the chest of an anthropomorphic test dummy, positioned in accordance with S10 of this standard in the seating position for which that seat belt assembly is provided, at the point where the centerline of the torso belt crosses the midsagittal line of the dummy's chest.

S7.4.4 *Latchplate access.* Any seat belt assembly latchplate that is located outboard of a front outboard seating position in accordance with S4.1.2 shall also be located within the outboard reach envelope of either the outboard arm or the inboard arm described in S10.7 and Figure 3 of this standard, when the latchplate is in its normal stowed position and any adjustable anchorages are adjusted to the manufacturer's nominal design position for a 50th percentile adult male occupant. There shall be sufficient clearance between the vehicle seat and the side of the vehicle interior to allow the test block defined in Figure 4 of this standard unhindered transit to the latchplate or buckle.

S7.4.5 *Retraction.* When tested under the conditions of S8.1.2 and S8.1.3, with anthropomorphic dummies whose arms have been removed and which are positioned in accordance with S10 of this standard in the front outboard seating positions and restrained by the belt systems for those positions, the torso and lap belt webbing of any of those seat belt systems shall automatically retract to a stowed position either when the adjacent vehicle door is in the open position and

the seat belt latchplate is released, or, at the option of the manufacturer, when the latchplate is released. That stowed position shall prevent any part of the webbing or hardware from being pinched when the adjacent vehicle door is closed. A belt system with a tension-relieving device in an open-bodied vehicle with no doors shall fully retract when the tension-relieving device is deactivated. For the purposes of these retraction requirements, outboard armrests, which are capable of being stowed, on vehicle seats shall be placed in their stowed position.

* * * * *

5. S8 of Standard No. 208 would be amended by revising S8.1.8 through S8.1.12.2, inclusive, to read as follows:

S8. *Test conditions.*

* * * * *

S8.1.8 The anthropomorphic test dummies used for evaluation of occupant protection systems manufactured pursuant to applicable portions of S4.1.2, S4.1.3, and S4.1.4 of this standard shall conform to the requirements of subpart E of part 572 of this chapter.

S8.1.9 Each test dummy is clothed in formfitting cotton stretch garments with short sleeves and midcalf length pants specified in drawings 78051–292 and 78051–293 incorporated by reference in part 572, subpart E of this chapter, respectively or their equivalents. A size 11EE shoe specified in drawings 78051–294 (left) and 78051–295 (right) incorporated by reference in Part 572, Subpart E of this chapter, or their equivalents is placed on each foot of the test dummy.

S8.1.10 Limb joints are set at 1g, barely restraining the weight of the limb when extended horizontally. Leg joints are adjusted with the torso in the supine position.

S8.1.11 Instrumentation does not affect the motion of the dummies during impact or rollover.

S8.1.12 The stabilized test temperature of the test dummy is at any temperature level between 69 degrees F and 72 degrees F, inclusive.

* * * * *

6. Standard No. 208 would be amended by removing existing S10 through S11.9, inclusive, and adding a new S10 through S10.9, to read as follows:

S10. *Test dummy positioning procedures.*

S10.1 *Head.* The transverse instrumentation platform of the head shall be level within ½ degree. To level the head of the test dummy, the following sequences must be followed. First, adjust the position of the H point within the limits set forth in S10.4.2.1 to level the transverse instrumentation platform of the head of the test dummy. If the transverse instrumentation platform of the head is still not level, then adjust the pelvic angle of the test dummy within the limits specified in S10.4.2.2 of this standard. If the transverse instrumentation platform of the head is still not level, then adjust the neck bracket of the dummy the minimum amount necessary from the non-adjusted "0" setting to ensure that the transverse instrumentation platform of the head is horizontal within ½ degree. The test dummy shall remain within the limits specified in S10.4.2.1 and S10.4.2.2 after any adjustment of the neck bracket.

S10.2 *Upper Arms.*

S10.2.1 The driver's upper arms shall be adjacent to the torso within the centerlines as close to a vertical plane as possible.

S10.2.2 The passenger's upper arms shall be in contact with the seat back and the sides of the torso.

S10.3 *Hands.*

S10.3.1 The palms of the driver test dummy shall be in contact with the outer part of the steering wheel rim at the rim's horizontal centerline. The thumbs shall be over the steering wheel rim and shall be lightly taped to the steering wheel rim so that if the hand of the test dummy is pushed upward by a force of not less than 2 pounds and not more than 5 pounds, the tape shall release the hand from the steering wheel rim.

S10.3.2 The palms of the passenger test dummy shall be in contact with the outside of the thigh. The little finger shall be in contact with the seat cushion.

S10.4 *Torso.*

S10.4.1 *Upper Torso.*

S10.4.1.1 In vehicles equipped with bench seats, the upper torso of the driver and passenger test dummies shall rest against the seat back. The midsagittal plane of the driver dummy shall be vertical and parallel to the vehicle's longitudinal centerline, and pass through the center of the steering wheel rim. The midsagittal plane of the passenger dummy shall be vertical and parallel to the vehicle's longitudinal centerline and the same distance from the vehicle's longitudinal centerline as the midsagittal plane of the driver dummy.

S10.4.1.2 In vehicles equipped with bucket seats, the upper torso of the driver and passenger test dummies shall rest against the seat back. The midsagittal plane of the driver and the passenger dummy shall be vertical and shall coincide with the longitudinal centerline of the bucket seat.

S10.4.2 *Lower Torso.*

S10.4.2.1 *Hi-point.* The H-points of the driver and passenger test dummies shall coincide within ½ inch in the vertical dimension and ½ inch in the horizontal dimension of a point ¼ inch below the position of the H-point determined by using the equipment and procedures specified in SAE J826 (APR 1980) except that the length of the lower leg and thigh segments of the H-point machine shall be adjusted to 16.3 and 15.8 inches, respectively, instead of the 50th percentile values specified in Table 1 of SAE J826.

S10.4.2.2 *Pelvic angle.* As determined using the pelvic angle gage (GM drawing 78051–532, incorporated by reference in Part 572, Subpart E of this chapter) which is inserted into the H-point gaging hole of the dummy, the angle measured from the horizontal on the three inch flat surface of the gage shall be 22½ degrees plus or minus 2½ degrees.

S10.5 *Legs.* The upper legs of the driver and passenger test dummies shall rest against the seat cushion to the extent permitted by placement of the feet. The initial distance between the outboard knee clevis flange surfaces shall be 10.6 inches. To the extent practicable, the left leg of the driver dummy and both legs of the passenger dummy shall be in vertical longitudinal planes. To the extent practicable, the right leg of the driver dummy shall be in a vertical plane. Final adjustment to accommodate the placement of feet in accordance with S10.6 for various passenger compartment configurations is permitted.

S10.6 *Feet.*

S10.6.1 *Driver's position.*

S10.6.1.1 Rest the right foot of the test dummy on the undepressed accelerator pedal with the rearmost point of the heel on the floor plan in the plane of the pedal. If the foot cannot be placed on the accelerator pedal, set it initially perpendicular to the lower leg and place it as far forward as possible in the direction of the pedal centerline with the rearmost point of the heel resting on the floor pan.

S10.6.1.2 Place the left foot on the toeboard with the rearmost point of the heel resting on the floor pan as close as possible to the point of intersection of the planes described by the toeboard and the floor pan and not on the wheelwell projection. If the foot cannot be positioned on the toeboard, set it initially perpendicular to the lower leg and place it as far forward as possible with the heel resting on the floor pan. If necessary to avoid contact with the

vehicle's brake or clutch pedal, rotate the test dummy's left foot about the lower leg. If there is still pedal interference, rotate the left leg outboard about the hip the minimum distance necessary to avoid the pedal interference. For vehicles with a foot rest that does not elevate the left foot above the level of the right foot, place the left foot on the foot rest so that the upper and lower leg centerlines fall in a vertical plane.

S10.6.2 *Passenger's position.*

S10.6.2.1 *Vehicles with a flat floor pan/toeboard.* Place the right and left feet on the vehicle's toeboard with the heels resting on the floor pan as close as possible to the intersection point with the toeboard. If the feet cannot be placed flat on the toeboard, set them perpendicular to the lower leg centerlines and place them as far forward as possible with the heels resting on the floor pan.

S10.6.2.2 *Vehicles with wheelhouse projections in passenger compartment.* Place the right and left feet in the well of the floor pan/toeboard and not on the wheelhouse projection. If the feet cannot be placed flat on the toeboard, initially set them perpendicular to the lower leg centerlines and then place them as far forward as possible with the heels resting on the floor pan.

S10.7 *Test dummy positioning for latchplate access.* The reach envelopes specified in S7.4.4 of this standard are obtained by positioning a test dummy in the driver's or passenger's seating position and adjusting that seating position to its forwardmost adjustment position. Attach the lines for the inboard and outboard arms to the test dummy as described in Figure 3 of this standard. Extend each line backward and outboard to generate the compliance arcs of the outboard reach envelope of the test dummy's arms.

S10.8 *Test dummy positioning for belt contact force.* To determine compliance with S7.4.3 of this standard, position the test dummy in the vehicle in accordance with S10.1 through S10.6 of this standard and adjust the seating position in accordance with S8.1.2 and S8.1.3 of this standard. Pull the belt webbing three inches from the test dummy's chest and release until the webbing is within one inch of the test dummy's chest and measure the belt contact force.

S10.9 *Manual belt adjustment for dynamic testing.* With the test dummy positioned in accordance with S10.1 through S10.6 of this standard and the seating position adjusted in accordance with S8.1.2 and S8.1.3 of this standard, place the Type 2 manual belt around the test dummy and fasten the latch. Remove all slack from the lap belt portion. Pull the upper torso webbing out of the retractor and allow it to retract; repeat this four times. Apply a 2 to 4 pound tension load to the lap belt. If the belt system is equipped with a tension-relieving device, introduce the maximum amount of slack into the upper torso belt that is recommended by the vehicle manufacturer in the vehicle's owner's manual. If the belt system is not equipped with a tension-relieving device, allow the excess webbing in the upper torso belt to be retracted by the retractive force of the retractor.

BILLING CODE 4910-59-M

49 CFR Parts 571 and 572

[Docket No. 74-14; Notice 76]

RIN 2127-AE34

Federal Motor Vehicle Safety Standards; Occupant Crash Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to change the injury criteria used to determine compliance with the occupant crash protection standard. One of the specified injury criteria is the *H*ead *I*njury *C*riterion, or HIC, which, as its name implies, was developed to assess the likelihood of head injuries. At present, one calculates a HIC in all crashes and the calculated HIC must be 1,000 or less. However, the available evidence indicates that belted occupants in frontal collisions are not at risk for a serious head injury when their heads do not contact any vehicle surface or component (identified as "non-contact crashes" throughout the rest of this document), but may be at risk for neck injury in those non-contact crashes.

In recognition of these differing risks, this notice proposes to substitute a neck injury criterion for the HIC in non-contact crashes. NHTSA believes that the new neck injury criterion will more accurately and more directly assess the likelihood of neck injuries in head non-contact crashes, instead of relying on HIC as an indirect indicator of potential injury risk. By substituting a neck injury criterion for HIC in non-contact crashes, the agency can ensure that its compliance tests more accurately assess a vehicle's ability to protect against injury to the cervical spine which could potentially occur to a belt-restrained occupant in those non-contact crashes.

DATES: *Comment closing date:* Comments on this notice must be received by NHTSA not later than February 8, 1993.

Proposed effective date: If adopted in a final rule, this substitution of a neck injury criterion for HIC in non-contact crashes would become effective on September 1 of the calendar year after the publication of the final rule. Vehicles manufactured before that date would be permitted, at the manufacturer's option, to comply with the neck injury criterion instead of calculating HIC in non-contact crashes.

ADDRESS: Comments should refer to the docket and notice numbers set forth in the heading of this notice and be submitted to: NHTSA Docket Section, room 5109, 400 Seventh Street, SW., Washington, DC 20590. The Docket Section is open to the public from 9:30 a.m. to 4 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Stanley H. Backaitis, Office of Vehicle Safety Standards, NRM-10, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Mr. Backaitis can be reached by telephone at (202) 366-4912.

SUPPLEMENTARY INFORMATION:

Related Proposal

Elsewhere in the Proposed Rules section of today's edition of the **Federal Register**, NHTSA has published a proposal to require the use of the Hybrid III test dummy in all Standard No. 208 compliance testing. That proposal is closely related to this notice, because higher non-contract HIC's are measured with the Hybrid III dummy and its more flexible neck than are measured with the older Hybrid II dummy and its stiffer neck. Accordingly, it would be helpful if commenters would review and consider both this notice and that proposal as they prepare their comments on this notice.

Background

Standard No. 208, Occupant Crash Protection (49 CFR 571.208) is intended to reduce the likelihood of occupant deaths and the likelihood and severity of occupant injuries. One of the means specified in the standard for achieving these ends in dynamic testing of vehicles. During dynamic testing, the vehicle must comply with specified injury criteria, as measured on a test dummy, when tested by this agency in a 30 miles per hour barrier crash test.

One of the specified injury criteria is the Head Injury Criterion, or HIC, which is currently calculated in all frontal crashes according to a specified formula and which may not exceed 1,000. The HIC was an outgrowth of the Gadd Severity Index, which in turn was developed from the Wayne State Tolerance Curve (WSTC). The WSTC was derived from a variety of experiments in which head-related injuries were produced by contact and non-contact events. Data on contact injuries from heads directly impacting rigid surfaces were used to develop that part of the WSTC curve dealing with the relationship between short duration, high magnitude accelerations and potential injuries. Susceptibility to non-contact head injuries were derived from high speed sled tests of human volunteers and also of animals. In these sled tests, the occupants were restrained by lap/shoulder belts. The data from these sled tests were used to develop that part of the Wayne State Tolerance Curve (WSTC) dealing with long duration, low magnitude accelerations and potential injuries.

Contact-based injuries, i.e., short duration, high magnitude accelerations, made up most of the data points that defined the WSTC. Although this does not mean that the curve cannot be used over its entire range for forecasting the threshold of injury, it does mean that the confidence in the forecast is much higher for those regions in which the data points provide a very clear definition of the curve, as is the case for direct contacts with short impact time durations. The confidence level is correspondingly lower for forecasts based upon those portions of the curve which are made up of only a few data points, which portions correspond to non-contact events.

Previous Rulemaking Actions Addressing HIC in Non-Contact Situations

Because of the substantially greater confidence in HIC's ability to predict injury thresholds in contact situations, the agency has previously examined whether HIC should be retained in non-contact situations. NHTSA first proposed to use HIC as an injury criterion in Standard No. 208 in a notice published March 16, 1972 (37 FR 5507). The agency proposed that HIC would be calculated over the entire crash duration and cover both contact and non-contact events. Several vehicle manufacturers commented that HIC should not be used in Standard No. 208, for several reasons. First, the manufacturers suggested that there were practicability concerns. That is, many of the existing safety belt systems either did not comply or only marginally complied with the proposed HIC injury criterion. Second, the manufacturers questioned the safety

need for the proposed HIC. This argument was that much of the head acceleration included in HIC calculations is attributable to the non-contact forces which the head experiences as it moves forward without striking anything in the vehicle. Real world crash data, it was argued, did not indicate that this type of head movement by lap/shoulder belted occupants in a crash was a serious injury-producing factor.

In the final rule initially adopting HIC in Standard No. 208, the agency stated, "The NHTSA recognizes the uncertainty concerning the significance of head movement by a shoulder-belted occupant whose head does not strike the forward part of the vehicle, although it considers the present evidence too scanty to be conclusive in either direction." 37 FR 12392; June 23, 1972. As a result, and because of the leadtime needed for vehicle manufacturers to achieve compliance, the agency temporarily amended Standard No. 208 to modify the HIC calculation method for vehicles manufactured before August 15, 1975. Under the terms of this amendment, for the purposes of calculating HIC for belted test dummies, the measurement of head acceleration would begin only at the moment at which the head struck some part of the vehicle other than the safety belt system. Vehicles manufactured on or after August 15, 1975 were to have the HIC calculated over the entire duration of the crash.

NHTSA then reexamined the subject of HIC in non-contact crashes in the wake of the 1984 reinstatement of the automatic crash protection requirements for passenger cars. In a notice published on April 12, 1985, NHTSA proposed two alternative methods to reduce the probability of injuries in non-contact crashes (50 FR 14589). The first alternative was to continue HIC calculations in contact crashes, but not in non-contact crashes. In non-contact crashes, new neck injury criteria would be calculated. If the older Hybrid II test dummy were involved in a non-contact crash, the triaxial accelerometer already mounted in the dummy's head would be used to measure the acceleration experienced by the dummy's head during the non-contact crash. Based on NHTSA's sled testing, the agency had determined that "in non-contact situations there is an excellent correlation between the forces directly measured on the neck and the inertial accelerations of the test dummy's head. This is because non-contact forces in the head (i.e., acceleration) can only be transmitted through the neck." 50 FR 14591–14592; April 12, 1985. If the newer Hybrid III test dummy were involved in a non-contact crash, the agency proposed to use the instrumentation mounted in the Hybrid III dummy's neck to measure directly the shear and tension forces in the dummy's neck.

The second alternative was to calculate a HIC in both contact and non-contact situations, but limit the calculation to a specified time interval. In 1985, HIC was calculated for the entire crash duration. However, vehicle manufacturers had argued that HIC was not appropriate in long duration accelerations, which correspond to non-contact events or low magnitude contacts. As explained above, the agency agrees that the confidence level is correspondingly lower for injury forecasts from HIC calculations that are based upon those portions of the WSTC which are made up of only a few data points, which portions correspond to non-contact events or low magnitude contacts. Accordingly, this second alternative proposed to change the HIC calculation so that it would be limited to any 36 millisecond interval during the crash.

After considering the comments on this proposal, the agency decided to adopt the second proposed alternative, i.e., limit the HIC calculation to any 36 millisecond interval during the crash. The agency explained in its October 17, 1986 final rule (51 FR 37028) its reasons for not adopting the proposal to substitute neck injury for HIC in non-contact crashes:

> Almost all of the commenters opposed the use of the first proposed alternative. The commenters uniformly noted that there is no current technique that can accurately and reliably identify whether and exactly when head contact has or has not occurred during a crash test in all situations. The agency agrees that, in the absence of such a method to determine the occurrence and duration of head contact, the first alternative is not appropriate. 51 FR 37030.

In response to the second proposed alternative, vehicle manufacturers uniformly supported the concept of limiting the time interval from which HIC is calculated, but many felt that the appropriate limit should be 15 to 17 milliseconds instead of the proposed 36 milliseconds. This shorter time limit would effectively raise the limit on average head accelerations to 80–85 g's, as compared to the 60 g average limit that results from the 36 millisecond HIC limit. NHTSA rejected the requested 15 to 17 millisecond limit. This rejection was based on both the fact that the higher average head accelerations allowed by the shorter limit might not have ensured protection for a wide range of the population and the fact that the shorter limit would have substantially reduced the values calculated for the HIC in NHTSA testing. See 51 FR 37031; October 17, 1986.

On April 23, 1991, NHTSA published a notice terminating rulemaking regarding the neck injury criteria and other additional injury criteria for the Hybrid III dummy (56 FR 18561). The agency explained its decision as follows:

> Research conducted to date by the agency, regarding the development of data needed to support this rulemaking, has not yielded adequate information to initiate further rulemaking. The findings indicate that existing technology to assess injury in the areas of facial laceration, neck injuries, and knee-tibia injuries, while appropriate for research and subjective comparison purposes, is still short to being useful for compliance application. In some instances, correlations between the dummy measurements and the injury mechanisms, as well as the risk of injury, are still to be established. In addition, the agency has not noted or been advised of technical progress in the private sector that would facilitate the development of additional rulemaking. 56 FR 18562.

Ford's petition for rulemaking:

Ford Motor Company (Ford) filed a petition for rulemaking on March 26, 1991, asking for modifications to the Hybrid III test dummy and the injury criteria used with the Hybrid III test dummy. Ford's three requested changes were as follows:

1. Ford asked that a neck shield be added to the Hybrid III test dummy. Ford claimed that abnormal head motions can sometimes result with the Hybrid III dummy when an inflating air bag gets caught between the various disks of the neck assembly, or gets caught between the neck assembly and chin of the Hybrid III head. According to Ford, this phenomenon causes the Hybrid III head and neck to behave erratically, resulting in unpredictable head acceleration and neck load cell measurements. Ford suggested that this problem could be eliminated if a foam neck shield were added to the Hydrid III dummy.

2. Ford alleged that the Hybrid III ankle is not sufficiently human-like. The human ankle can rotate the foot toward the tibia an average maximum of 44°, while the Hybrid III ankle can rotate only a maximum of 30°. According to Ford, this shortcoming of the Hybrid III ankle causes unrealistically high crash forces to be transferred through the lower leg and knee to the femur. Ford suggested that this shortcoming would be eliminated if

the Hybrid III ankle joint were modified to allow an additional 15° of flexion.

3. Ford asked that HIC for Hybrid III dummies be calculated using a 15 millisecond limit. According to Ford, this would make the level of the HIC's calculated using the Hybrid III dummy equivalent to the level of the HIC's calculated using the Hybrid II dummy with a 36 millisecond limit on the HIC calculation. Ford said that its assertion of equivalence was based on the fact that the HIC responses of the Hybrid III dummy are consistently higher in tests that do not involve head contact. Ford suggested that the higher HIC's are due to a faster head whipping by the Hybrid III dummy's more flexible neck. Ford argued that adopting the 15 millisecond limit for HIC calculations with the Hybrid III dummy would not reduce significantly HIC readings in cases of contacts with hard surfaces (in which cases Ford concedes the HIC is a valid predictor of injury risk), but it would reduce HIC readings in non-contact cases. Ford argued that the lowering of HIC readings for non-contact cases would be more indicative of actual injury risk in such crashes.

Agency Response to Ford's Petition

(a) Neck Shield and Ankle Flexion Issues

The data and analyses Ford submitted with its petition on these two issues suggest that both these modifications may be appropriate for the Hybrid III dummy. The other information that is currently available, both from NHTSA's own quick investigation and from other sources, do not appear to corroborate Ford's data and analyses of these issues. However, NHTSA has concluded that Ford's data and analyses raise matters that the agency should investigate more carefully. This investigation will allow the agency to determine conclusively if Ford's allegations are correct and, if so, what means should be proposed to correct those problems. Accordingly, NHTSA granted Ford's petition on these two issues in a letter dated August 30, 1991.

The public is invited specifically to provide NHTSA with their views and comments on the neck shield and ankle flexion issues raised in Ford's petition, as well as specific details for the design of the neck shield and ankle modification they are addressing and any test results that are available. Based on any such information and NHTSA's own investigation, the agency will then make a decision about whether it should issue a proposal regarding these matters.

(b) 15 Millisecond Limit for HIC Calculations

NHTSA has carefully reexamined this issue in response to Ford's petition. An across the board use of a 15 millisecond limit, instead of the current 36 millisecond limit, for calculating HIC would reduce the HIC obtained in nearly all crash tests. For instance, NHTSA recalculated the HIC's that would be obtained in all of its 35 miles per hour barrier crash tests in the New Car Assessment Program (NCAP) that used the Hybrid III test dummy, substituting a 15 millisecond limit for the 36 millisecond limit. With the 15 millisecond limit, all driver HIC's were below 1,000 and the passenger HIC's were reduced from 10 to 40 percent. Furthermore, the decrease to the 15 millisecond limit would allow 16 percent more vehicles to show HIC's of 1,000 or less at the passenger position for those cases in which a Hybrid III dummy is restrained by a safety belt and experiences head contact during a crash. Thus, the 15 millisecond limit would substantially reduce the calculated HIC in both contact and non-contact situations.

Such a reduction is not necessarily inappropriate. If head contacts that exceed 15 milliseconds and head non-contacts present no potential head injury hazard, the protection afforded against head injuries would not be lessened by reducing the calculated HIC in the manner requested by Ford. The relevant question then is whether this reduction in calculated HIC for contacts that last longer than 15 milliseconds and for non-contact situations would lessen the protection provided against head injuries.

Contacts in frontal crash tests that last longer than 15 milliseconds may occur when the dummy's head strikes a soft or padded surface. When a dummy head hits a rigid unpadded structure made of steel, for instance, the dummy head strikes the rigid surface, which does not yield or absorb much of the head's energy, and the head rebounds very quickly after the strike, resulting in a very short duration impact, generally less than 15 milliseconds. When the dummy head hits a soft or padded surface, the soft or padded surface slows down the head's momentum and absorbs some of the head's energy before the head stops travelling into the surface. This "ride down" of the head by the soft or padded surface means that the head contact with the surface lasts for a substantially longer period of time than a head contacting a rigid surface. Accordingly, the focus of this inquiry becomes whether a reduction in calculated HIC for head contacts into soft or padded surfaces would lessen the protection provided against head injuries.

NHTSA does not believe that impacts into soft or padded vehicle surfaces are always safe. The agency agrees with Ford that it is generally safer to hit a soft or padded surface than a rigid surface. However, because soft or padded surfaces have many different impact response characteristics, the effectiveness of soft or padded surfaces in controlling and mitigating injury varies. Such a surface's effectiveness in controlling and mitigating injuries also varies according to the geometry and thickness of the padding, as can be noted from widely varying contact durations. In addition, the vehicle design has a great influence on the effectiveness of the soft or padded surface by controlling the initial velocity of the head when it contacts the soft or padded surface.

The current HIC calculation over a 36 millisecond period takes into account the initial velocity of the head at the instant it strikes a surface, as well as the impact response characteristics of a soft or padded surface during head contact. Because the HIC calculation takes these factors into account, and because the safety performance of soft or padded surfaces can vary considerably, as explained above, manufacturers must design their vehicle interiors so that the soft or added surfaces will offer consistently beneficial impact responses (and safety protection) in the event of a head impact in a crash. For example, existing soft or padded surfaces, such as steering wheel rims and hubs, the upper surfaces of instrument panels, and deploying air bags are manufactured so that the vehicle can comply with the HIC calculated over a time period not exceeding 36 milliseconds.

An amendment that effectively minimized the consideration of the safety performance of soft or padded surfaces, including deploying air bags, from the HIC calculation would signal vehicle manufacturers that they need to be less concerned with the impact response characteristics of impacted surfaces in their vehicles. If vehicle manufacturers were to devote less effort to controlling the impact responses of the soft or padded surfaces in the vehicle, the safety protection provided against head injuries in those vehicles would be lessened. Because of this, the agency denies Ford's request to limit the HIC calculation to a 15 millisecond period in contact situations.

The agency next examined the issue of crashes in which the test dummy's head did not contact any vehicle system

or component. Again, the agency began by considering whether limiting the HIC calculation to a 15 millisecond period in non-contact crashes would lessen the safety protection provided against head injuries. To answer this question, NHTSA examined data from the National Accident Sampling System (NASS). NASS weighted data for the three year period from 1988 to 1990 showed that there were a total of 302,588 head and neck injuries in car crashes with belted occupants that did not involve head contacts. (Weighted data means an estimate of national injuries and fatalities based on projections derived from scientifically sampled crashes collected by the NASS Primary Sampling Units in selected areas of the United States.) Of these, 299,619 occupants sustained neck injuries and the remaining 2,969 were head injuries. These data were then further broken down to examine injuries to belted occupants in frontal crashes only. This further breakdown showed that belted occupants in head non-contact frontal crashes experienced a total of 111,311 neck injuries and 221 head injuries, for a total of 111,532 head and neck injuries. None of the 221 head injuries was a serious injury; that is, none of them exceeded AIS 1 on the Abbreviated Injury Scale. There were 1,363 neck injuries that were moderate to serious; that is, these injuries were AIS 2 or greater. Based on these data, it appears that serious head injuries of belted occupants in head non-contact frontal collisions are nil, while moderate to serious neck injuries constitute about 1.3 percent of all head and neck injuries for those crash conditions.

As explained previously, HIC was developed to assess the risk of head injury in a given impact. The above-described examination of the NASS data appears to show that occupants are not at risk for head injuries in non-contact frontal crashes. Accordingly, the issue of whether HIC should be calculated over a 15 or 36 millisecond period in non-contact crashes seems of lesser importance than the issue of whether HIC should be calculated at all in non-contact frontal crashes.

NHTSA has tentatively concluded that non-contact crashes present a risk of neck, not head, injury. NHTSA has also tentatively concluded that it can now assess more directly the risk of neck injury by means of a new neck injury criterion. Since HIC calculations in non-contact crashes are a surrogate assessment of the risk of neck injury in non-contact crashes, and the surrogate would no longer be necessary if there were a more direct assessment of the risk of neck injury, no apparent purpose is served by retaining the HIC calculation for non-contact crashes. Therefore, this notice proposes to substitute a new neck injury criterion for HIC in non-contact crashes.

Details of New Injury Criterion

1. How Would Forces on the Neck Be Measured?

In the April 12, 1985 proposal to substitute a neck injury criterion for HIC in non-contact crashes, NHTSA identified two distinct ways that forces on the neck could be measured. One way, which could be done only for the newer Hybrid III test dummy, was to use the additional instrumentation (a load cell) mounted in the Hybrid III dummy's neck to measure directly the shear and tension forces experienced in the dummy's neck, as well as the compression loading and the bending moments. However, while the neck load cell measurement of tension loads was found perfectly satisfactory and repeatable, the remaining measurements for compression loading and bending moments in flexion and extension proved to be insufficiently reliable and repeatable for use in compliance testing. A review of what was needed to address these measurement problems, and also to understand how injury outcome could be affected by the neck experiencing more than one injury mechanism during head contact, showed that considerably more research work is needed to resolve these questions. Hence, NHTSA terminated rulemaking on neck load cell measurements and associated injury criteria in the April 23, 1991 notice.

The other way, which was proposed only for use with the older Hybrid II test dummy, was to measure the peak acceleration of the dummy's head in the direction from the base of the skull to the top of the head. This acceleration could only be transmitted to the head through the neck. Hence, a measurement of peak acceleration in the head could be translated to peak tension loads on the neck. While this measurement would not consider as many different forces as the six axis load cell in the neck of the Hybrid III, and is less technologically sophisticated, it was found to be closely correlated to forces measured by the tension load cell in the neck. Thus, the potential for neck injury in head non-contact events can be assessed with the Hybrid II dummy by using the existing accelerometer in the dummy's head, instead of adding new instrumentation. Measurement of acceleration of a head in free-flight in a single plane and without the impact of a head contact was found to be more repeatable than measurements of accelerations in more than one direction or of bending moments of the neck.

In the April 12, 1985 notice that initially proposed substituting neck injury criteria for HIC in non-contact crashes, the agency proposed to measure both this acceleration and the shear forces (i.e., acceleration of the head in longitudinal fore and aft directions). However, NHTSA is not again proposing to measure the shear forces in this notice, because the available test data show that, in non-contact crashes, the primary forces acting on the neck of a belt-restrained occupant are produced by the curvilinear motion of the head relative to the thoracic spine. This curvilinear motion of the head generates a tension force in the neck. This tension force can be easily explained by the laws of physics and can be readily documented using measuring instruments.

The situation is much different for shear forces. NHTSA cannot say that belt-restrained occupants will not experience shear forces on the neck in non-contact crashes. However, the extent to which shear forces cause or exacerbate neck injuries in non-contact crashes is neither well understood nor accessible by current in-vitro or in-vivo technology on human test subjects. With the exception of neck tension forces that can be measured without any complications, the measurements of other forces and moments on the neck and their correlation to injury risk require further research and development of biomechanical knowledge. The need for such additional information and knowledge led the agency to state in the April 23, 1991 termination of rulemaking that it will require considerable additional time and research effort to develop these additional injury criteria for the neck.

That April 23, 1991 termination notice should not be read as suggesting that there is some question about the reliability of measuring tension loading on the neck, in the form of head acceleration in the inferior-superior direction (z-axis). Indeed, the same accelerometer in the head that currently contributes data to calculate HIC would be used to measure the forces on the Hybrid II dummy neck under this proposal.

Similarly, the April 23, 1991 termination notice should not be misinterpreted as suggesting that there is some question about the reliability of direct measurement in the neck of the tension forces. As explained above, the tension forces are well understood and

readily documented, unlike the other forces that can be measured by the Hybrid III neck. NHTSA believes that the control of neck tension forces by means of the proposed limit set forth in this rule would provide a considerable advancement in the understanding of how to control neck injuries for belt-restrained occupants in non-contact situations.

After considering these factors, NHTSA has decided to propose two methods for measuring forces on the neck, depending on the type of dummy used. The first method would be used with the Hybrid II test dummy. This method would use the accelerometer mounted in the dummy's head to measure head acceleration in the direction from the base of the skull to the top of the head. The second method would be used only with the Hybrid III test dummy. This method would use a load cell mounted in the Hybrid III dummy's neck to directly measure the tension loads in the neck. Either one of these measurements would remove HIC as an injury criterion in all non-contact crashes, and replace it with the appropriate neck injury criterion.

If this proposal were to be adopted as a final rule, the agency would require neck loading measurements to be used exclusively as an injury criterion in all non-contact crashes for vehicles manufactured on or after September of the calendar year following the calendar year in which the final rule was published. For vehicles manufactured on or after that date, HIC measurements would no longer apply as an injury criterion in head non-contact crashes. Manufacturers would be permitted to use the applicable neck injury criterion instead of HIC in vehicles manufactured before the mandatory use date, at the manufacturer's option.

2. What Limit Would be Established for Neck Injury Assessment?

In the April 12, 1985 proposal on neck injury criteria, NHTSA proposed to establish a limit of 66 g's on head acceleration from the base of the skull to the top of the head. This value was derived from a neck force corridor suggested by GM for use with the Hybrid III dummy. The GM corridor included a maximum tension force on the neck of 742 pounds. At that time, NHTSA divided this 742 pounds by the static weight of the head and part of the neck, which is 11.2 pounds, to arrive at the 66 g's acceleration limit (742/11.2 = 66). The latest biomechanical data (J. Gavin Howe, *et al.*, "Development of a Featureless Free-Motion Head Form," SAE #912909, Proceedings, 35th Stapp Car Crash Conference, P–251, November 1991 (Society of Automotive Engineers, Warrendale, Pa.), however, indicate that the average human head has a dynamic mass of approximately 9.9 pounds. The 742 pound maximum force divided by the dynamic mass of the head (9.9 pounds) yields an acceleration limit of 74.9 g's. The agency has rounded this to 75 g's, and is proposing that as the limit on measured acceleration in the head in the direction from the base of the skull to the top of the head in non-contact crashes.

For those that choose to directly measure forces in the Hybrid III dummy's neck, the agency is proposing a 742 pound load limit. This proposed limit was suggested by GM, as a threshold to significant neck injury based on a test series conducted by Volvo, for use with the Hybrid III dummy. The tension forces in the neck would be measured by a load cell in the neck of the Hybrid III dummy that is mounted at the dummy's head-neck juncture, and that is oriented to sense loading in the inferior-superior direction. By loading in the inferior-superior direction, NHTSA means a tension force in the neck pulling the base of the skull away from the base of the neck. The agency is not referring to compression loading (pushing the head toward the torso) or any other directional loading that may be experienced in the dummy's neck.

3. How Would One Determine if the Crash Involved Head Contact?

Between 1985 and 1991, NHTSA has used a chalk transfer method to determine if there has been head contact in the several hundred Standard No. 208 compliance tests and NCAP tests that have been conducted. In those several hundred tests, NHTSA has never had any difficulty in identifying either the presence or absence of head contact, nor have any disputes arisen with vehicle manufacturers regarding the agency's conclusion with respect to the occurrence or non-occurrence of head contact. NHTSA is proposing to use the chalk transfer method to determine whether there has been head contact for the purposes of Standard No. 208.

This chalk transfer method would require that the front halves of both the driver and passenger dummies' head surface (i.e., above the horizontal line that passes through the center of gravity of the head and forward of the lateral line that passes through the center of gravity of the head) be "painted" with a colored chalk and water solution. The solution used by NHTSA is made by mixing powdered chalk and water in approximately a 2:1 ratio by volume. There is, however, no magic to this particular ratio. The resulting chalk and water slurry must result in a sufficiently dense paint to assure visible transfer of color from the dummy's head to the vehicle's interior surfaces if there is contact. NHTSA has found the 2:1 mixture of chalk to water achieves this goal. However, if a commercially prepared mix recommended a different ratio, the agency would abide by the seller's instructions for the mix, provided that the resulting solution was capable of producing the desired "paint transfer effect."

Each dummy's head would be painted with a distinctly different color chalk slurry to ensure proper identification of which dummy's head made contact with the vehicle. For instance, a typical combination would be to use blue for the driver dummy and red for the passenger dummy.

Current NHTSA practice is to paint the dummy face with a different color than the top of the head to permit a determination of which part of the dummy's head contacted the vehicle interior surface. The face is painted from the tip of the nose back to approximately the center of the head target (roughly where the human ears are) and the top of the dummy head is painted down to the center of the head target both front and back. When NHTSA does this, a typical setup would be to paint the driver dummy's face blue and the top of that dummy's head yellow, while the passenger dummy's face would be painted red and the top of that dummy's head would be painted green. NHTSA is not proposing to require separate painting of the face and top of head of each test dummy during compliance testing. This discussion is simply intended to alert the public of the agency's current practice and to seek comments on this practice.

The dummy's head would be painted with this chalk and water slurry after the dummy has been positioned in the vehicle and the necessary electrical connections have been made. This timing is proposed to eliminate the possibility of accidental paint abrasions during the installation and positioning of the dummy in the vehicle for the test. The agency is also proposing to require that the chalk and water slurry be permitted to dry for at least five minutes before proceeding with the crash test. This drying will reduce the occurrence of chalk splattering onto the vehicle surfaces as a result of the crash forces.

One would determine whether there had been a head contact with the vehicle's interior surfaces according to the following procedure. For all vehicle interior surfaces other than glazing, one would examine each test dummy's head

after the crash test has been conducted. When the dummy's head contacts an interior surface, some removal or disturbance of the chalk occurs, with the resulting smudging or smearing generally appearing as a "rubbed-off" "bruising" mark. If there is no removal or disturbance of the chalk on the dummy's head, the crash would be considered a non-contact crash for that dummy.

If there is a removal or disturbance of the chalk on the dummy's head, one would next examine the vehicle interior surfaces forward of the dummy's original head position to see if there was evidence of chalk transfer from the head onto the impacted interior surface. Indications of head contacts at or behind the original position of the dummy's head would not be considered as "contacts." Such contacts are associated primarily with the rebound of the occupant and are not the source of serious head injury. The chalk transfer onto the impacted surface from a head contact generally has a "rubbed-on" appearance. If there has been some removal or disturbance of the chalk solution on the dummy's head, such as smudging or smearing, and a vehicle interior surface is marked with chalk that corresponds to the mark on the dummy's head, NHTSA would treat the crash as one involving head contact and calculate a HIC for the dummy, just as is now the case. If, however, there is no chalk transfer onto a vehicle interior surface, the crash would be considered as one that did not involve head contact, even if there has been some removal or disturbance of the chalk on the dummy's head. As proposed above, a neck injury criterion would be substituted for a HIC calculation in non-contact crashes.

The only exception to this proposed procedure would be for glazing. There are instances when chalk does not adhere to glass. Because of this unique interaction of chalk and glass, the proposed procedure could improperly characterize a crash in which the dummy head contacts the windshield as a non-contact crash. Therefore, the agency is proposing one minor exception to determine if there was head contact with the vehicle glazing. As with all other interior surfaces, the dummy would be inspected after the crash test to see if there is some removal or disturbance of the dried chalk on the dummy's head. If there is no removal or disturbance, the crash will be treated as a non-contact crash.

If there were a removal or disturbance of the chalk on the dummy's head, one would again examine the vehicle interior surfaces, including the glazing, to see if there was evidence of chalk transfer from the head onto the impacted interior surface. If there has been some removal or disturbance of the chalk solution on the dummy's head, such as smudging or smearing, and the glazing is marked with chalk that corresponds to the mark on the dummy's head, NHTSA would treat the crash as one involving head contact.

If, however, there were no chalk transfer onto the vehicle glazing, but the dummy head showed some removal or disturbance of the chalk, NHTSA would conduct an additional step to see if there had been head contact with the vehicle glazing. This additional step would consist of an analysis of the high speed film that is used to gather visual evidence of the crash. The agency would review that film to see if it showed clearly and unquestionably that the dummy's head had struck the vehicle glazing. If it did, the crash would be treated as one involving head contact by that dummy. If the high speed film analysis suggests that there may have been head contact with the glazing, but does not provide incontrovertible evidence of such contact, the crash would be treated as one that did not involve head contact by that dummy. NHTSA would like to emphasize that this high speed film analysis would only be used to check if there was head contact with the glazing, not with any other vehicle interior surface.

NHTSA acknowledges that commenters to the 1985 proposal to substitute neck injury criteria for HIC generally stated that there was then no current technique that could accurately and reliably identify whether and exactly when head contact has or has not occurred during a crash test in all situations. However, NHTSA understands those comments to be addressing the difficulties of determining both the occurrence and the duration of head contact, not just the determination of the occurrence of head contact. One can see the NHTSA's 1985 proposal was focused on determining both the existence and duration of head contact by examining the means that were suggested as possible ways for determining head contact. The 1985 preamble included the following discussion at 50 FR 14592 (April 12, 1985):

> At present, there are several methods available for the establishment of *head contact durations*, but there are still questions about their levels of consistency and accuracy. Measurement technologies consist of the following major groups: photographic, electrical contact switches, electrical strain or pressure transducers, and other (such as laser, chemical, etc.). (Emphasis added)

Obviously, chalk, paint, lipstick, and other transfer mediums were available in 1985, but they were not discussed in the preamble. On the other hand, one can determine head contact by simpler means than lasers or sophisticated electronics, which were identified in the 1985 preamble. NHTSA believes the comments questioning the reliability of available technologies were addressing primarily the reliability of the measurements of the duration of head contacts, not the occurrence or non-occurrence of head contact.

In this notice, NHTSA is not proposing to measure the duration of head contacts. Instead, the agency is proposing to make a simple contact/no contact determination in each compliance test. NHTSA believes that this determination can be made by using a transfer medium (chalk, in this case) applied to the test dummy's head. If that transfer medium appears on any vehicle surface or component after the crash test, or any transfer medium appears on the dummy's femur and/or knees, the obvious inference will be that the head made a contact impact.

The public is invited to comment on this approach. If any commenter believes there are serious questions about the reliability of using a chalk solution as a transfer medium to establish the occurrence of head contact, the commenter is asked to provide a specific explanation of the perceived reliability problems. If a commenter suggests an alternate means to establish the occurrence or non-occurrence of head contact, the commenter is asked to provide all available evidence to show that this alternate means would be more effective than the proposed chalk transfer method.

NHTSA would like to note that it is not proposing to consider dummy chin to chest contacts as head impacts for the purposes of this proposal. This is a purely abstract concern at this time, because no chin to chest contacts have been observed in NHTSA's compliance testing under Standard No. 208. Such contacts have, however, occasionally been observed in the 35 miles per hour crashes conducted in NHTSA's New Car Assessment Program (NCAP). If a chin to chest contact should even occur in a Standard No. 208 compliance test, however, and this proposal were adopted in a final rule, NHTSA would not treat the chin to chest contact as a head contact. The limited data, primarily cadaver testing, which are available on these chin to chest contacts do not indicate that head injury is a

likely result. Instead, the limited data indicate that, if trauma were to occur at all, it most likely would be a neck injury. Accordingly, NHTSA is proposing to use the proposed neck injury criteria if there are any chin to chest contacts, to allow the agency to more accurately evaluate the protection afforded against the likelihood of neck injuries, instead of focusing on the likelihood of head injuries.

For the purposes of this proposal, a contact with any vehicle surface or component other than the belt system would mean that a HIC would be calculated for that test dummy. An air bag is not a belt system. Thus, if the test dummy's head contacts an air bag, the HIC and not the neck injury criterion would be the applicable injury criterion. The agency is treating a contact with an air bag differently than a contact with a belt system because, in most instances, the air bag exposes the occupant to additional impact energy. While a safety belt system does not itself interfere with the free flight of the occupant's head during a crash, such is not the case with an air bag system. An air bag always intercepts the free flight of the head and provides a more rapid acceleration of the head during the initial loading period than is experienced by an occupant restrained by a belt system. The magnitude of the impact velocity of the head into the air bag depends upon whether the impact occurs with a fully deployed or still-deploying air bag. In the latter case, the head could experience a much larger differential velocity, analogous to a belted occupant's head hitting a padded surface, such a steering wheel hub, padded instrument panel, etc.

The dummy's head striking the dummy's knee(s) would also be considered as a head contact situation, and the HIC would be the applicable injury criterion. These head-to-knee contacts indicate, the NHTSA's view, either an improperly operating restraint system that permits excessive upper torso flexion with respect to the lower half of the body or an intrusion of the floor or instrument panel that is raising the lower legs and knees excessively toward the descending head. The problem of head-to-knee contacts has occurred primarily in NCAP tests, not in the Standard No. 208 compliance tests, and the agency expects head-to-knee contacts to vanish as the fleet becomes 100 percent equipped with air bags.

In conjunction with the use of the load cell in the neck of the Hybrid III dummy to measure tension loads, the agency is proposing to update the Society of Automotive Engineers (SAE) Practice to which the individual data channels in the Hybrid III dummy must conform. At this time, § 572.36(i) specifies that the individual data channels must conform with the June 1980 version of SAE Recommended Practice J211, "Instrumentation for Impact Tests." This notice proposes to update this reference to the June 1988 version of SAE J211, with the exception of the data for the neck load cell channel. The agency is proposing that the data of the neck load channel conform to channel frequency class (CFC) 600 instead of the SAE recommended 1000. NHTSA is proposing this lower CFC based on its tentative conclusion that the neck load cell will not contain high frequency data in the absence of head contact (the only instance in which NHTSA is proposing to use neck load cell data) and that the 1000 CFC filter would provide information beyond that which is needed for this proposed measurement. Commenters are invited to address this modification of the SAE recommendation and to address the issue of whether further reductions of the CFC requirements for this data channel would be appropriate since it will be used only in the absence of head contact.

The agency is also proposing to update some of the materials incorporated by reference for the Hybrid III test dummy. Specifically, the drawing of the head assembly (Drawing 78051–61), the transducer mounting instructions (Drawing 79051–63), and the assembly instructions (Drawing 78051–218), all of which are incorporated by reference in Part 572, now all show the use of a three-axis neck transducer, with optional use of a six-axis neck transducer, called the C–1709. However, the six-axis transducer is the most frequently used transducer for current tests involving the Hybrid III test dummy. With the proposed introduction of neck injury criterion, NHTSA believes it is appropriate to propose revising these drawings to show the use of the six-axis C–1709 neck transducer in the Hybrid III dummy, and permitting optional use of the currently-specified three-axis neck transducer.

This proposed rule would not have any retroactive effect. However, as noted at the beginning of this notice, the agency is proposing to allow manufacturers to voluntarily choose to being complying with these requirements before the mandatory effective date. Under section 103(d) of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1392(d)), whenever a Federal motor vehicle safety standard is in effect, a State may not adopt or maintain a safety standard applicable to the same aspect of performance which is not identical to the Federal standard. Section 105 of the Safety Act (15 U.S.C. 1392) sets forth a procedure for judicial review of final rules establishing, amending, or revoking Federal motor vehicle safety standards. That section does not require submission of a petition for reconsideration before parties may file suit in court.

Rulemaking Analyses and Notices

Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

NHTSA has considered the costs and other impacts that would be associated with this proposal if it were adopted as a final rule. Based on that consideration, NHTSA has determined that this proposal is neither "major," within the meaning of Executive Order 12291, nor "significant," within the meaning of the Department of Transportation's regulatory policies and procedures. Substituting a neck tension criterion for HIC in non-contact crashes will not require any modifications to the test dummies, the existing instrumentation, and the measurements, except that the test dummy heads must now be covered with chalk and the test facility must note whether a chalk transfer from the dummy head has taken place. This will not impose any substantial costs, require any greater technical skills, or necessitate changes to existing procedures.

As explained above, the changes from HIC to neck tension injury criterion in non-contact crashes would also not have any substantial impact on safety. Accident data indicate that no serious head injuries occur in non-contact crashes, so a decision to no longer calculate HIC in non-contact crashes would not allow a possibility of an increased risk of head injuries. Further replacing HIC, a surrogate measure of neck injury risk, with the new neck tension criterion, potentially an even better measure of that injury risk, should not significantly reduce the risk of neck injuries. This is because serious neck injury is a relatively infrequent occurrence in non-contact crashes. Thus, substituting the neck tension criterion for HIC should neither degrade nor substantially benefit occupant safety. Accordingly, a full regulatory evaluation has not been prepared for this proposal.

Regulatory Flexibility Act

NHTSA has also considered the effects of this regulatory action under

the Regulatory Flexibility Act. I hereby certify that this proposal, if adopted as a final rule, would not have a significant economic impact on a substantial number of small entities. For the reasons stated above, the substitution of one injury criterion for another in non-contact crashes would not result in any significant economic impact on those vehicle manufacturers that are small entities. Further, since no cost changes should be associated with this proposal, small organizations and small governmental entities should not be affected in their capacity as purchasers of new vehicles if this proposal were adopted in a final rule.

National Environmental Policy Act

NHTSA has analyzed this proposal for the purposes of the National Environmental Policy Act and determined that a final rule adopting this proposal would not have a significant impact on the quality of human life.

Executive Order 12612 (Federalism)

Finally, the agency has analyzed this proposal in accordance with the principles and criteria set forth in Executive Order 12612. NHTSA has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Request for Comments

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects

49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

49 CFR Part 572

Motor vehicle safety.

In consideration of the foregoing, NHTSA proposes to amend 49 CFR part 571 and part 572 as follows:

PART 571—[AMENDED]

1. The authority citation for Part 571 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.208 [Amended]

2. S6 through S6.2.5 of Standard No. 208 would be revised and a new S6.3 through S6.3.3.2(c) would be added to § 571.208, Standard No. 208, to read as follows:

S6. *Injury criteria.*

S6.1 *Injury criteria for the Part 572, Subpart B, Test dummy.*

S6.1.1 All portions of the test dummy shall be contained within the outer surfaces of the vehicle passenger compartment throughout the test.

S6.1.2 The chalk transfer method described in S6.3 of this standard shall be used to determine if there is head contact with any part of the vehicle other than the belt system and/or head contact with the test dummy's knee.

S6.1.2.1 When there is evidence of head contact with any part of the vehicle other than the belt system or head contact with the test dummy's knee, as determined in accordance with S6.3, the resultant acceleration at the center of gravity of the head shall be such that the expression:

$$\left[\frac{1}{(t_4 - t_1)}\int_{t_1}^{t_4} a\,dt\right]^{2.5}(t_4 - t_1)$$

shall not exceed 1,000, where a is the resultant acceleration expressed as a multiple of g (the acceleration of gravity) and t_1 and t_2 are any two points in time during the crash of the vehicle which are separated by not more than a 36 millisecond time interval.

S6.1.2.2 When there is no evidence of head contact with any part of the vehicle in front of the original dummy head position, other than the belt system, or of head contact with the dummy's femur and/or knee, as determined in accordance with S6.3, the resultant acceleration measured at the center of gravity of the head shall not exceed 75 g, except for intervals whose cumulative duration is not more than 3 milliseconds, when measured by the accelerometer whose sensitive axis is oriented to record inferior-superior accelerations.

S6.1.3 The resultant acceleration at the center of gravity of the upper thorax shall not exceed 60 g, except for intervals whose cumulative duration is not more than 3 milliseconds.

S6.1.4 The compressive force transmitted axially through each upper leg shall not exceed 2,250 pounds.

S6.2 *Injury Criteria for the Part 572, Subpart E, Test Dummy.*

S6.2.1 All portions of the test dummy shall be contained within the outer surfaces of the vehicle passenger compartment throughout the test.

S6.2.2 The chalk transfer method described in S6.3 of this standard shall be used to determine if there is head contact with any part of the vehicle other than the belt system and/or head contact with the dummy's knee.

S6.2.2.1 When there is evidence of head contact with any part of the vehicle other than the belt system and/or head contact with the dummy's knee, as determined in accordance with S6.3, the resultant acceleration at the center of gravity of the head shall be such that the expression:

$$\left[\frac{1}{(t_4 - t_1)}\int_{t_1}^{t_4} a\,dt\right]^{2.5}(t_4 - t_1)$$

shall not exceed 1,000, where a is the resultant acceleration expressed as a multiple of g (the acceleration of gravity) and t_1 and t_2 are any two points

in time during the crash of the vehicle which are separated by not more than a 36 millisecond time interval.

S6.2.2.2 When there is no evidence of head contact with any part of the vehicle in front of the original dummy head position, other than the belt system, or of head contact with the dummy's femur and/or knee, as determined in accordance with S6.3, the neck injury measurements shall not exceed 742 pounds of tension force in the inferior-superior direction when measured by a neck transducer having the dimensions, response characteristics, and sensitive axis locations shown for transducer C–1709, as shown in the listing of Optional Hybrid III Dummy Transducers, dated April 22, 1986, incorporated by reference in part 572 of this chapter, which is mounted for testing as shown in drawing 79051–63, revision W, incorporated by reference in Part 572 of this chapter, in the neck assembly shown in drawing 78051–218, revision R, incorporated by reference in Part 572 of this chapter.

S6.2.3 The resultant acceleration calculated from the output of the thoracic instrumentation shown in drawing 78051–218, revision R, incorporated by reference in Part 572 of this chapter, shall not exceed 60 g, except for intervals whose cumulative duration is not more than 3 milliseconds.

S6.2.4 Compression deflection of the sternum relative to the spine, as determined by instrumentation shown in drawing 78051–317, revision A, incorporated by reference in Part 572 of this chapter, shall not exceed three inches.

S6.2.5 The compressive force transmitted axially through each upper leg shall not exceed 2,250 pounds.

S6.3 *Chalk transfer method for determining head contact.*

S6.3.1 After making the vehicle adjustments specified in S8.1 of this standard and positioning the test dummies in accordance with S10 or S11 of this standard, each dummy's head shall be painted with a chalk-water slurry of adequate density to assure visible transfer of color upon impact with the vehicle's interior surfaces. The paint shall be applied to the top part of the dummy's head above the horizontal plane that passes through the center of gravity of the dummy's head and to the front part of the dummy's head in front of the vertical transverse lateral plane that passes through the center of gravity of the dummy's head. For identification purposes, the head of the test dummy at the driver's position shall be painted with a color that is readily distinguishable from the color used on the head of the test dummy at the passenger's position.

S6.3.2 The painted surfaces shall be permitted to dry for at least five minutes after application of the chalk-water slurry before the start of the crash test.

S6.3.3 *Determining Head Contact.*

S6.3.3.1 The determination of whether there was head contact with any vehicle interior surface other than the glazing or with the dummy's knee shall be made as follows:

(a) Following the crash, examine each test dummy's head to see if there has been some removal or disturbance, such as smudging or smearing, of the dried chalk on the dummy's head. If there is no such removal or disturbance of the dried chalk, the crash shall be treated as one that did not involve any head contact by that dummy.

(b) If there is evidence of removal or disturbance of the dried chalk on a dummy's head, examine all vehicle interior surfaces forward of the dummy's original head position and the dummy's femurs and knees to see if chalk of the same color that was removed or disturbed on the dummy's head has been transferred to any vehicle interior surface or the dummy's femur or knee. When there is a transfer of chalk onto a vehicle interior surface or a dummy's femur or knee and the transferred chalk is the same color as was removed or disturbed on a dummy's head, the crash shall be treated as one that involved head contact by that dummy. If there is no chalk transfer onto a vehicle interior surface or dummy's femur or knee of the same color chalk as was removed or disturbed on the dummy's head, the crash shall be treated as one that did not involve head contact by that dummy.

S6.3.3.2 The determination of whether there was head contact with vehicle glazing shall be made as follows:

(a) Following the crash, examine each test dummy's head to see if there has been some removal or disturbance, such as smudging or smearing, of the dried chalk on the dummy's head. If there is no such removal or disturbance of the dried chalk, the crash shall be treated as one that did not involve any head contact by that dummy with the vehicle glazing.

(b) If there is evidence of removal or disturbance of the dried chalk on a dummy's head, examine the vehicle glazing to see if chalk of the same color that was removed or disturbed on the dummy's head has been transferred to the glazing. When there is a transfer of chalk onto the vehicle glazing and the transferred chalk is the same color as was removed or disturbed on a dummy's head, the crash shall be treated as one that involved head contact by that dummy.

(c) If there is no chalk transfer onto the vehicle glazing of the same color chalk as was removed or disturbed on the dummy's head, and there is no visible chalk transfer onto any other vehicle interior surface or the dummy's femur or knee, analyze the high speed film used to record the crash test to see if it shows clear and unquestionable evidence of dummy head contact with the vehicle glazing. If there is such clear and unquestionable evidence, the crash shall be treated as one that involved head contact by that dummy. If there is no such clear and unquestionable evidence recorded on the high speed film, the crash shall be treated as one that did not involve head contact by that dummy.

PART 572—[AMENDED]

3. The authority citation for part 572 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

4. Section 572.36(i) would be revised to read as follows:

§ 572.36 Test conditions and instrumentation.

* * * * *

(i) The outputs of acceleration and force-sensing devices installed in the dummy and in the test apparatus specified by this part are recorded in individual data channels that conform to the requirements of SAE Recommended Practice J211, JUN 1988, "Instrumentation for Impact Tests," with channel classes as follows:

(1) Head acceleration—Class 1000
(2) Neck force—Class 600
(3) Neck pendulum acceleration—Class 60
(4) Thorax and thorax pendulum acceleration—Class 180
(5) Thorax deflection—Class 180
(6) Knee pendulum acceleration—Class 600
(7) Femur force—Class 600

* * * * *

5. The complete head assembly for the Hybrid III dummy, shown in Drawing No. 78051–61, the transducer mounting instructions, shown in Drawing No. 79051–63, and the assembly instructions shown in Drawing No. 78051–218, all of which are incorporated by reference in part 572, would all be revised to show the use of the six-axis C–1709 neck transducer in the Hybrid III dummy, with optional use of the three axis neck transducer shown in Drawing No. 83–5001–008.

Issued on December 3, 1992.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 92-183-1]

Availability of Environmental Assessments and Findings of No Significant Impact Relative to Issuance of Permits To Field Test Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that two environmental assessments and findings of no significant impact have been prepared by the Animal and Plant Health Inspection Service relative to the issuance of permits to allow the field testing of genetically engineered organisms. The environmental assessments provide a basis for our conclusion that the field testing of these genetically engineered organisms will not present a risk of introducing or disseminating a plant pest and will not have a significant impact on the quality of the human environment. Based on its findings of no significant impact, the Animal and Plant Health Inspection Service has determined that environmental impact statements need not be prepared.

ADDRESSES: Copies of the environmental assessments and findings of no significant impact are available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, APHIS, USDA, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612. For copies of the environmental assessments and findings of no significant impact, write to Mr. Clayton Givens at the same address. Please refer to the permit number listed below when ordering documents.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340 (referred to below as the regulations) regulate the introduction (importation, interstate movement, and release into the environment) of genetically engineered organisms and products that are plant pests or that there is reason to believe are plant pests (regulated articles). A permit must be obtained before a regulated article may be introduced into the United States. The regulations set forth the procedures for obtaining a limited permit for the importation or interstate movement of a regulated article and for obtaining a permit for the release into the environment of a regulated article. The Animal and Plant Health Inspection Service (APHIS) has stated that it would prepare an environmental assessment and, when necessary, an environmental impact statement before issuing a permit for the release into the environment of a regulated article (see 52 FR 22906).

In the course of reviewing each permit application, APHIS assessed the impact on the environment that releasing the organism under the conditions described in the permit application would have. APHIS has issued permits for the field testing of the organisms listed below after concluding that the organisms will not present a risk of plant pest introduction or dissemination and will not have a significant impact on the quality of the human environment. The environmental assessments and findings of no significant impact, which are based on data submitted by the applicants and on a review of other relevant literature, provide the public with documentation of APHIS' review and analysis of the environmental impacts associated with conducting the field tests.

Environmental assessments and findings of no significant impact have been prepared by APHIS relative to the issuance of permits to allow the field testing of the following genetically engineered organisms:

Permit No.	Permittee	Date Issued	Organisms	Field test location
92-174-02	Pioneer Hi-Bred International, Incorporated	11-03-92	Corn plants genetically engineered to express the coat protein genes of maize dwarf mosaic virus strain A (MDMV-A), maize chlorotic mottle virus (MCMV), or maize chlorotic dwarf virus (MCDV) for resistance to these viruses.	Hawaii, Puerto Rico.
92-191-01	U.S. Department of Agriculture, Agricultural Research Service	11-09-92	Prune plum trees genetically engineered to express the coat protein gene from papaya ringspot virus (PRV) for resistance to plum pox virus.	West Virginia.

The environmental assessments and findings of no significant impact have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), (2) Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500-1508), (3) USDA Regulations Implementing NEPA (7 CFR part 1b), and (4) APHIS Guidelines Implementing NEPA (44 FR 50381-50384, August 28, 1979, and 44 FR 51272-51274, August 31, 1979).

Done in Washington, DC, this 7th day of December 1992.

Lonnie J. King,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-30037 Filed 12-9-92; 8:45 am]

BILLING CODE 3410-34-M

[Docket No. 92-185-1]

Availability of Environmental Assessments and Findings of No Significant Impact Relative to Issuance of Permits To Field Test Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that two environmental assessments and findings of no significant impact have been prepared by the Animal and Plant Health Inspection Service relative to the issuance of permits to allow the field testing of genetically engineered organisms. The environmental assessments provide a basis for our conclusion that the field testing of these genetically engineered organisms will not present a risk of introducing or disseminating a plant pest and will not have a significant impact on the quality of the human environment. Based on its findings of no significant impact, the Animal and Plant Health Inspection Service has determined that environmental impact statements need not be prepared.

ADDRESSES: Copies of the environmental assessments and findings of no significant impact are available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, APHIS, USDA, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612. For copies of the environmental assessments and findings of no significant impact, write to Clayton Givens at the same address. Please refer to the permit numbers listed below when ordering documents.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340 (referred to below as the regulations) regulate the introduction (importation, interstate movement, and release into the environment) of genetically engineered organisms and products that are plant pests or that there is reason to believe are plant pests (regulated articles). A permit must be obtained before a regulated article may be introduced into the United States. The regulations set forth the procedures for obtaining a limited permit for the importation or interstate movement of a regulated article and for obtaining a permit for the release into the environment of a regulated article. The Animal and Plant Health Inspection Service (APHIS) has stated that it would prepare an environmental assessment and, when necessary, an environmental impact statement before issuing a permit for the release into the environment of a regulated article (see 52 FR 22906).

In the course of reviewing each permit application, APHIS assessed the impact on the environment that releasing the organisms under the conditions described in the permit application would have. APHIS has issued permits for the field testing of the organisms listed below after concluding that the organisms will not present a risk of plant pest introduction or dissemination and will not have a significant impact on the quality of the human environment. The environmental assessments and findings of no significant impact, which are based on data submitted by the applicants and on a review of other relevant literature, provide the public with documentation of APHIS review and analysis of the environmental impacts associated with conducting the field tests.

Environmental assessments and findings of no significant impact have been prepared by APHIS relative to the issuance of permits to allow the field testing of the following genetically engineered organisms:

Permit No.	Permittee	Date issued	Organisms	Field test location
92-230-01	Pioneer Hi-Bred International, Incorporated	11/10/92	Soybean plants genetically engineered to express the coat protein gene from soybean mosaic virus (SMV) for resistance to SMV.	Puerto Rico.
92-212-01	Pioneer Hi-Bred International, Incorporated	11/16/92	Corn plants genetically engineered to express the marker genes phosphinothricin acetyl translecase (PAT) and beta-glucuronidase (GUS) and a gene for male sterility.	Hawaii.

The environmental assessments and findings of no significant impact have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), (2) Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500-1508), (3) USDA Regulations Implementing NEPA (7 CFR part 1b), and (4) APHIS Guidelines Implementing NEPA (44 FR 50381-50384, August 28, 1979, and 44 FR 51272-51274, August 31, 1979).

Done in Washington, DC, this 7th day of December 1992.

Lonnie J. King,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-30038 Filed 12-9-92; 8:45 am]

BILLING CODE 3410-34-M

[Docket No. 92-186-1]

Receipt of Permit Applications for Release Into the Environment of Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that three applications for permits to release genetically engineered organisms into the environment are being reviewed by the Animal and Plant Health Inspection Service. The applications have been submitted in accordance with 7 CFR part 340, which regulates the introduction of certain genetically engineered organisms and products.

ADDRESSES: Copies of the applications referenced in this notice, with any confidential business information deleted, are available for public inspection in room 1141, South Building, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. You may obtain copies of the documents by writing to the person listed under **FOR FURTHER INFORMATION CONTACT.**

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, APHIS, USDA, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340,

"Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which are Plant Pests or Which There is Reason to Believe Are Plant Pests," require a person to obtain a permit before introducing (importing, moving interstate, or releasing into the environment) into the United States certain genetically engineered organisms and products that are considered "regulated articles." The regulations set forth procedures for obtaining a permit for the release into the environment of a regulated article, and for obtaining a limited permit for the importation or interstate movement of a regulated article.

Pursuant to these regulations, the Animal and Plant Health Inspection Service has received and is reviewing the following applications for permits to release genetically engineered organisms into the environment:

Application No.	Applicant	Date received	Organisms	Field test location
92-318-01, renewal of permit 91-022-01, issued on 05-21-92.	Pioneer Hi-Bred International, Incorporated.	11-13-92	Soybean plants genetically engineered to express a methionine-rich seed storage protein gene from Brazil nut.	Illinois, Iowa, Missouri, Ohio.
92-318-02	Pioneer Hi-Bred International, Incorporated.	11-13-92	Corn plants genetically engineered to express male sterility and a visual marker gene.	Iowa.
92-322-01, renewal of permit 91-352-02, issued on 04-15-92.	Pioneer Hi-Bred International, Incorporated.	11-17-92	Alfalfa plants genetically engineered to express the coat protein gene of the alfalfa mosaic virus (AMV) for resistance to AMV.	Washington.

Done in Washington, DC, this 7th day of December 1992.

Lonnie J. King,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-30039 Filed 12-9-92; 8:45 am]

Forest Service

Mount St. Helens National Volcanic Monument Scientific Advisory Board Meeting

The Mount St. Helens Scientific Advisory Board will meet at 9 a.m., on January 21, 1993, in the National Volcanic Monument Visitor Center, 3029 Spirit Lake Highway, Castle Rock, Washington 98611, to receive information on and discuss the following:

1. Johnston Ridge Road and Observatory—Utilities and Access.
2. Coldwater Ridge Complex-Management and Resource Protection.
3. Mt. Margaret Backcountry Management Plan.
4. Open discussion on relevant topics.

The meeting will be open to the public. Persons who wish to make a statement to the Board should notify Dr. Jack. K. Winjum, Chairperson, c/o Gifford Pinchot National Forest, 6926 E. Fourth Plain Blvd., Vancouver, Washington 98668, 206-750-5000. Written statements may be filed with the Board before or after the meeting.

Dated: December 3, 1992.

Nancy Graybeal,

Acting Regional Forester.

[FR Doc. 92-29979 Filed 12-5-92; 8:45 am]

BILLING CODE 3410-11-M

Exemption of Chipmunk Salvage Timber Sale

AGENCY: USDA, Forest Service.

ACTION: Notification that a timber salvage project designed to recover fire damaged timber is exempted from appeals under provisions of 36 CFR part 217.

SUMMARY: During the spring of 1992, severe winds caused a prescribed burn to escape fire lines and burn through approximately 80 acres of timber. In August 1992, the Priest Lake Ranger District proposed a salvage timber sale project to recover damaged sawtimber in the affected area and reforest the site. The District Ranger has determined through an environmental analysis documented in the Chipmunk Salvage Timber Sale Decision Memo (DM) and Project File that there is good cause to expedite these actions in order to rehabilitate National Forest System lands and recover damaged resources. Salvage of commercial sawtimber within the affected area must be accomplished quickly to avoid further deterioration of sawtimber and to allow for rapid reforestation of the site.

EFFECTIVE DATE: Effective on December 10, 1992.

FOR FURTHER INFORMATION CONTACT: Charles E. Harris; Acting District Ranger; Priest Lake Ranger District; Idaho Panhandle National Forests; HCR 5, Box 207; Priest River, ID 83856.

SUPPLEMENTARY INFORMATION: During the spring of 1992, severe winds caused a prescribed burn to escape fire lines and burn through approximately 80 acres of timber located approximately four miles south of Priest Lake, Idaho, in Bonner County. Approximately 95 percent of the trees within the burned area were killed. The fire-killed timber is located within lands designated as suitable for timber management and assigned to Management Area 4 (Idaho Panhandle Forest Plan, August 1987). In August 1992, the Priest Lake District Ranger of the Idaho Panhandle National Forests proposed a salvage timber sale project to recover damaged sawtimber in the affected area and reforest the site. This proposal was designed to meet the following needs: (a) Contribute to a continuing supply of timber for industry by salvaging merchantable timber products; (b) rapidly reforest timber stands with desirable native tree species; and (c) reduce future wildfire hazards by reducing fuel loadings.

An interdisciplinary team (IDT) was convened, and scoping began in August 1992. From these scoping efforts, environmental issues were identified and served as the basis for the analysis conducted by the IDT. Measures which are to be used to mitigate the effects of the proposed action were developed and incorporated into the project design. The District Ranger determined through the environmental analysis documented in the DM and Project File to proceed with implementation of the proposed action. The selected alternative would salvage 40 MBF of dead and damaged timber from approximately 80 acres. All salvage areas are accessible from existing roads. No road construction or reconstruction is planned for this sale.

The salvage timber sale project is designed to accomplish the objectives as quickly as possible to recover merchantable sawtimber before it deteriorates and removal becomes infeasible, to rapidly reforest timber stands with desirable tree species, and to reduce the potential for future wildfires. To expedite implementation of this decision, procedures outlined in 36 CFR part 217(a)(11) are being

followed. Under this regulation, the following may be exempt from appeal:

Decisions related to rehabilitation of National Forest System lands and recovery of Forest Resources from natural disasters or other natural phenomena when the Regional Forester * * * determines and gives notice in the Federal Register that good causes exists to exempt such decisions from review under this part.

Based on information from the District Ranger's Decision Memo for this project, I have determined that good cause exists to exempt this decision from administrative review. Therefore, upon publication of this notice, this project will not be subject to review under 36 CFR part 217.

Dated: December 3, 1992.

Christopher D. Risbrudt,

Deputy Regional Forester, Northern Region.

[FR Doc. 92-29826 Filed 12-9-92; 8:45 am]

BILLING CODE 3410-11-M

Soil Conservation Service

Yuma Mesa Watershed, AZ

AGENCY: Soil Conservation Service.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR part 1500); and the Soil Conservation Service Guidelines (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Supplemental Plan for the Yuma Mesa Watershed, Yuma County, Arizona.

FOR FURTHER INFORMATION CONTACT: Donald W. Gohmert, State Conservationist, Soil Conservation Service, 201 East Indianola Ave., suite 200, Phoenix, AZ 85012, telephone (602) 640-2248.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the supplement will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Donald W. Gohmert, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this supplement.

On September 1, 1987, the Soil Conservation Service authorized Public Law 83-566 assistance to install works of improvement in the Yuma Mesa Watershed. A slow agricultural economy and objections to federal specifications on some practices have caused local producers to refrain from entering into binding long-term contracts. By 1992, eighty-five percent of the planned measures should have been installed. To date, however, less than two percent of the planned measures have been installed. In March 1991, the Sponsors submitted a request to terminate future project activities and terminate the Yuma Mesa Watershed Project.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Michael E. Sullivan, Assistant State Conservationist for Water Resources.

No administrative action or implementation of the proposal will be taken until 30 days after the date of this publication in the Federal Register.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

Dated: December 3, 1992.

Donald W. Gohmert,

State Conservationist.

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 606]

Resolution and Order Approving the Application of the Yakima Air Terminal Board for a Foreign-Trade Zone in Yakima, WA

Proceedings of the Foreign-Trade Zones Board, Washington, DC

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Yakima Air Terminal Board, filed with the Foreign-Trade Zones Board (the Board) on October 28, 1991, requesting a grant of authority to establish a general-purpose foreign-trade zone in Yakima, Washington, at the Yakima Air Terminal Complex, a Customs user fee port facility, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

The approval is subject to the FTZ Act and the FTZ Board's regulations (as revised, 56 FR 50790-50808, 10/8/91), including § 400.28. The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant of Authority; Establishment of a Foreign-Trade Zone, Yakima, WA

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment . . . of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a-81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs ports of entry;

Whereas, the Yakima Air Terminal Board (the Grantee), has made application (filed 10-28-91, FTZ Docket 68-91, 56 FR 57316, 11-8-91) to the Board, requesting the establishment of a foreign-trade zone at the Yakima Air Terminal, Yakima, Washington, which has been designated a Customs user fee port facility;

Whereas, notice of said application has been given in the Federal Register and public comment has been invited; and,

Whereas, the Board has found that the requirements of the Act and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, therefore, the Board hereby grants to the Grantee the privilege of establishing a foreign-trade zone, designated on the records of the Board as Foreign-Trade Zone No. 188, at the sites described in the application, subject to the Act and the Board's regulations (as revised, 56 FR 50790-50808, 10-8-91), including § 400.28.

Signed at Washington, DC, this 30th day of November 1992.

Foreign-Trade Zones Board.

Barbara H. Franklin,

Secretary of Commerce, Chairman and Executive Officer.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 92-30048 Filed 12-9-92; 8:45 am]

BILLING CODE 3510-DS-M

International Trade Administration

[C-351-037]

Cotton Yarn From Brazil; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on cotton yarn from Brazil. We preliminarily determine the net subsidy to be 0.19 percent *ad valorem* for all firms for the period January 1, 1991 through December 31, 1991. In accordance with 19 CFR 355.7, any rate less than 0.50 percent *ad valorem* is *de minimis*. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: December 10, 1992.

FOR FURTHER INFORMATION CONTACT: Gayle Longest or Kelly Parkhill, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482-2786.

SUPPLEMENTARY INFORMATION:

Background

On March 5, 1992, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request Administrative Review" (57 FR 7910) of the countervailing duty order on cotton yarn from Brazil (42 FR 14089; March 15, 1977) for the period January 1, 1991 through December 31, 1991. On March 31, 1992, the Government of Brazil requested an administrative review for that period. We initiated the review on April 13, 1992 (57 FR 12797). The Department has now conducted this review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act). The final results of the last administrative review of this order were published in the **Federal Register** on January 14, 1992 (57 FR 1454).

Scope of Review

Imports covered by this review are shipments of Brazilian yarn, carded but not combed, wholly of cotton. During the review period, such merchandise was classifiable under item numbers 5205.11.10, 5205.11.20, 5205.12.10, 5205.12.20, 5205.13.10, 5205.13.20, 5205.14.10, 5205.14.20, 5205.15.10, 5205.15.20, 5205.31.00, 5205.32.00, 5205.33.00, 5205.34.00, and 5205.35.00 of the Harmonized Tariff Schedule (HTS). The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the period January 1, 1991 through December 31, 1991, six programs and the following ten producers/exporters of cotton yarn from Brazil: Cia Industrial e Agricola Boyes, Companhia Brasileira de Fiacao, Companhia Jauense Industrial, Filobel S.A.—Industrias Texteis do Brasil, Fiacao Nordeste do Brasil S.A.—Finobrasa, Fiacao e Tecelagem Kanedo do Brasil S.A., Minasa Trading Internacional S.A., Nisshinbo do Brasil Industria Textil Ltda., Toyobo do Brasil Industria Textil, and Unitika do Brasil Industria Textil Ltda.

Calculation Methodology for Assessment and Cash Deposit Purposes

In calculating the benefits received during the review period, we followed the methodology described in the preamble to 19 CFR 355.20(d) (53 FR 52325; December 27, 1988). First, we calculated a country-wide rate, weight-averaging the subsidy rates of the ten companies subject to review to determine the overall subsidy from all countervailing programs benefitting exports of the subject merchandise to the United States. Because the overall weighted-average country-wide rate was *de minimis*, as defined by 19 CFR 355.7, we did not proceed any further in our analysis.

Analysis of Programs

(1) Reductions of Taxes and Import Duties Through BEFIEX

The Commission for the Granting of Fiscal Benefits to Special Export Programs (BEFIEX) allows Brazilian exporters, in exchange for export commitments, to take advantage of several types of benefits, such as import duty reductions and accelerated depreciation for machinery used in the production of exports. Because this program provides tax reductions that are limited to exporters, we preliminarily determine that it is countervailable. Brazilian Law 8.032 of April 12, 1990 eliminated this program for new projects. However, the Department has determined that residual benefits may continue due to outstanding BEFIEX contracts.

Five cotton yarn exporters received import duty/tax reductions by virtue of their BEFIEX contracts during the review period.

To calculate the benefit, we divided the amount of each firm's import duty reductions received in 1991 by that firm's total exports in 1991. We then weight-averaged the benefits by each respondent's share of exports of the subject merchandise to the United States. On this basis, we preliminarily determine the benefit to be 0.18 percent *ad valorem* for all firms.

(2) Sudene

According to Brazilian Law Number 4239 of June 27, 1963, as amended, and under Decree Number 64214 of March 18, 1969, as amended, companies located in the Northeast of Brazil are eligible for exemption from income tax for production attributable to SUDENE-approved projects. The intent of this program is to encourage development of this region of Brazil.

Because this exemption is only available to companies located in a specific region of Brazil, we find this to be a countervailable domestic subsidy.

One cotton yarn exporter is located in the Northeast of Brazil and received a tax exemption for production attributable to its SUDENE-approved projects. The amount of the tax exemption due to this program can be found on a company's tax return denominated in BTN. The benefit is equal to the amount of the exemption.

We divided the benefit received by the company by its total sales in order to calculate the company's *ad valorem* subsidy. The individual benefits for each company were weight-averaged by the company's share of total exports of the subject merchandise to the United States. On this basis, we determine the benefit from this program to be 0.01 percent *ad valorem* for all firms.

(3) Other Programs

We also examined the following programs and preliminarily determine that the respondents did not use them during the review period:

A. Income Tax Exemption for Export Earnings,

B. CACEX Preferential Working Capital Financing for Exports,

C. Preferential Export Financing under CIC-OPCRE of the Banco do Brasil,

D. Preferential Financing for Industrial Enterprises by the Banco do Brazil (FST and EGF loans).

Preliminary Results of Review

As a result of our review, we preliminarily determine the net subsidy to be 0.19 percent *ad valorem* for all firms for the period January 1, 1991 through December 31, 1991. In accordance with 19 CFR 355.7, any rate less than 0.5 percent *ad valorem* is *de minimis*.

Therefore, as provided for by section 751(a)(1) of the Act, the Department intends to instruct the Customs Service to liquidate, without regard to countervailing duties, all shipments of the subject merchandise from Brazil exported on or after January 1, 1991, and on or before December 31, 1991.

The Department also intends to instruct the Customs Service not to collect cash deposits of estimated countervailing duties on any shipments of this merchandise from Brazil entered or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

Parties to the proceeding may request disclosure of the calculation methodology and interested parties may request a hearing not later than 10 days after the date of publication of this notice. Interested parties may submit written arguments in case briefs on these preliminary results within 30 days of the date of publication. Rebuttal briefs, limited to arguments raised in case briefs, may be submitted seven days after the time limit for filing the case brief. Any hearing, if requested, will be held within seven days after the scheduled date for submission of rebuttal briefs. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with 19 CFR 355.38(e). Representatives of parties to the proceeding may request disclosure of proprietary information under administrative protective order no later than 10 days after the representative's client or employer becomes a party to the proceeding, but in no event later than the date the case briefs, under § 355.38(c), are due. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any case or rebuttal brief.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.

Dated: December 4, 1992.

Rolf Th. Lundburg, Jr.,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-588-818]

Initiation of Anticircumvention Inquiry on Antidumping Duty Order on Personal Word Processors From Japan

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice of initiation of anticircumvention inquiry.

SUMMARY: On the basis of a petition filed with the Department of Commerce (the Department) by Smith Corona Corporation, we are initiating an anticircumvention inquiry to determine whether producers of personal word processors (PWPs) are circumventing the antidumping duty order on PWPs from Japan issued August 28, 1991 (56 FR 42593).

EFFECTIVE DATE: December 10, 1992.

FOR FURTHER INFORMATION CONTACT: Melissa G. Skinner or Thomas O. Barlow, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC 20230; Telephone (202) 482-4851.

SUPPLEMENTARY INFORMATION:

Background

On September 2, 1992, the Department received a petition filed by Smith Corona Corporation (SMC), requesting an investigation to determine whether imports of certain word processor parts and components by Brother Industries (USA), Inc. (Brother), are circumventing the antidumping duty order on PWPs from Japan, in accordance with section 781(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1677j(a)) (the Act). SMC alleges that Brother is circumventing the antidumping duty order on PWPs by importing parts and components from Japan and third countries, and assembling them into finished PWPs for sale in the U.S. market.

Scope of Order

The products covered by the order subject to this anticircumvention inquiry are personal word processors (PWPs) from Japan as defined in the Department's antidumping duty order on personal word processors from Japan (56 FR 42593, August 28, 1991), as amended (57 FR 37770, August 20, 1992).

Initiation of Anticircumvention Proceeding

Section 781(a)(1) of the Act authorizes the Department to include merchandise within the scope of an existing antidumping duty order if: (1) The merchandise sold in the United States is of the same class or kind as merchandise that is the subject of an antidumping duty order; (2) such merchandise sold in the United States is completed or assembled in the United States from parts or components produced in the foreign country with respect to which such order applies; and (3) the difference between the value of such merchandise sold in the United States and the value of the imported parts and components is small. In reaching a determination on whether to include the product within the scope of an existing antidumping duty order, section 781(a)(2) of the Tariff Act directs the Department to consider such factors as: (1) The pattern of trade; (2) whether the manufacturer or exporter is related to the entity that assembled or completed the merchandise sold in the United States; and (3) whether imports of the parts or components from the country with respect to which the antidumping duty order applies have increased after issuance of that order.

In accordance with section 781(a) and 19 CFR 353.29(b) and (e), we are initiating an anticircumvention inquiry on the antidumping duty order on PWPs from Japan (case number A-588-818). We intend to complete this inquiry within six months unless extraordinary complications arise.

We intend to notify the International Trade Commission (ITC) in the event of an affirmative preliminary determination of circumvention, in accordance with 19 CFR 353.29(d)(7)(i). Should consultation with the ITC be necessary, the post-preliminary determination schedule will be postponed by 60 days.

The Department will not order the suspension of liquidation of entries of any additional merchandise at this time. However, in accordance with 19 CFR 353.29(j)(2), the Department will instruct the U.S. Customs Service to suspend liquidation in the event of an affirmative preliminary determination of circumvention.

This notice is issued pursuant to section 781(a) of the Act (19 U.S.C. 1677j(a)).

Dated: December 4, 1992

Alan M. Dunn,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Minority Business Development Agency

Business Development Center Applications: Mobile, AL

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: In accordance with Executive Order 11625, the U.S. Department of Commerce's Minority Business Development Agency (MBDA) is soliciting competitive applications under its Minority Business Development Center (MBDC) program to operate an MBDC for approximately a 3-year period, subject to Agency priorities, recipient performance, and the availability of funds. The cost of performance for the first budget period (12 months) is $169,125 in Federal funds and a minimum of $29,846 in non-Federal (cost-sharing) contributions. This federal amount includes $4,125 for an annual audit. Cost-sharing contributions may be in the form of cash contributions, client fees, in-kind contributions or combinations thereof. The period of performance will be from May 1, 1993 to April 30, 1994. The MBDC will operate in the *Mobile, Alabama* geographic service area.

The award number for this MBDC will be *04-10-93007-01*.

The funding instrument for the MBDC will be a cooperative agreement. Competition is open to individuals, non-profit and for-profit organizations, State and local governments, American Indian tribes and educational institutions.

The MBDC program is designed to provide business development services to the minority business community for the establishment and operation of viable minority businesses. To this end, MBDA funds organizations that can identify and coordinate public and private sector resources on behalf of minority individuals and firms; offer a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority businesses.

Applications will be evaluated initially by regional staff on the following criteria: The experience and capabilities of the firm and its staff in addressing the needs of the business community in general and, specifically, the special needs of minority businesses, individuals and organizations (50 points); the resources available to the firm in providing business development services (10 points); the firm's approach (techniques and methodologies) to performing the work requirements included in the application (20 points); and the firm's estimated cost for providing such assistance (20 points). An application must receive at least 70% of the points assigned to any one evaluation criteria category to be considered programmatically acceptable and responsive. The selection of an application for further processing by MBDA will be made by the Director based on a determination of the application most likely to further the purpose of the MBDC program. The application will then be forwarded to the Department for final processing and approval, if appropriate. The Director will consider past performance of the applicant on previous Federal awards.

MBDCs shall be required to contribute at least 15% of the total project cost through non-Federal contributions. To assist them in this effort, MBDCs may charge client fees for management and technical assistance (M&TA) rendered. Based on a standard rate of $50 per hour, MBDCs will charge client fees at 20% of the total cost for firms with gross sales of $500,000 or less, and 35% of the total cost for firms with gross sales of over $500,000. False information on the application can be grounds for denying or terminating funding.

MBDCs performing satisfactorily may continue to operate after the initial competitive year for up to 2 additional budget periods. MBDCs with year-to-date "commendable" and "excellent" performing ratings may continue to be funded for up to 3 or 4 additional budget periods, respectively. Under no circumstances shall an MBDC be funded for more than 5 consecutive budget periods without competition. Periodic reviews culminating in year-to-date quantitative and qualitative evaluations will be conducted to determine if funding for the project should continue. Continued funding will be at the discretion of MDBA based on such factors as an MBDC's performance, the availability of funds and Agency priorities.

Awards under this program shall be subject to all Federal and Departmental regulations, policies, and procedures applicable to Federal assistance awards.

In accordance with OMB Circular A-129 "Managing Federal Credit Programs," applicants who have an outstanding account receivable with the Federal Government may not be considered for funding until these debts have been paid or arrangements, satisfactory to the Department of Commerce, are made to pay the debt.

Applicants are subject to Governmental Debarment and Suspension (Nonprocurement) requirements as stated in 15 CFR part 26.

The Departmental Grants Officer may terminate any grant/cooperative agreement in whole or in part at any time before the date of completion whenever it is determined that the MBDC has failed to comply with the conditions of the grant/cooperative agreement. Examples of some of the conditions which can cause termination are failure to meet cost-sharing requirements; unsatisfactory performance of MBDC work requirements; and reporting inaccurate or inflated claims of client assistance or client certification. Such inaccurate or inflated claims may be deemed illegal and punishable by law.

Notification must be provided that all non-profit and for-profit applicants are subject to a name check review process. Name checks are intended to reveal if any key individuals associated with the applicant have been convicted of or are presently facing, criminal charges such as fraud, theft, perjury, or other matters which significantly reflect on the applicant's management honesty or financial integrity.

On November 18, 1988, Congress enacted the Drug-Free Workplace Act of 1988 (Pub. L. 100-690, Title V, Subtitle D). The statute requires contractors and grantees of Federal agencies to certify that they will provide a drug-free workplace. Pursuant to these requirements, the applicable certification form must be completed by each applicant as a pre-condition for receiving Federal grant or cooperative agreement awards.

15 CFR part 28, is applicable and prohibits recipients of Federal contracts, grants, and cooperative agreements from using appropriated funds for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a specific contract, grant or cooperative agreement. Form CD-511, "Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying" and, when applicable, the SF-LLL, "Disclosure of Lobbying Activities," are required.

CLOSING DATE: The closing date for submitting an application is January 18, 1993. Applications must be postmarked on or before January 18, 1993. Proposals will be reviewed by the Atlanta Regional Office. The mailing address for submission of RFA responses is: U.S. Department of Commerce, Atlanta Regional Office, Minority Business

Development Agency, 401 West Peachtree Street NW., suite 1715, Atlanta, Georgia 30308–3516.

A pre-application conference to assist all interested applicants will be held on January 4, 1993, 9:00 a.m. at the following address: U.S. Department of Commerce, Minority Business Development Agency, 401 West Peachtree Street NW., room 1715, Atlanta, Georgia 30308–3516.

SUPPLEMENTARY INFORMATION: Anticipated processing time of this award is 120 days. Executive Order 12372, "Intergovernmental Review of Federal Programs," is not applicable to this program. To order a Request for Application (RFA) and to receive additional information, contact: Carlton L. Eccles, Regional Director of the Atlanta Regional Office on (404) 730–3300 or U.S. Department of Commerce, Minority Business Development Agency, 401 West Peachtree Street, NW., room 1715, Atlanta, Georgia 30308–3516.

BILLING CODE 3510–21–M

National Institute of Standards and Technology

[Docket No. 921195–2295]

Voluntary Product Standard PS 2–92; "Performance Standard for Wood-Based Structural-Use Panels"

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Approval of Voluntary Product Standard PS 92–92 "Performance Standard for Wood-Based Structural-Use Panels".

SUMMARY: The National Institute of Standards and Technology (NIST) announced in the **Federal Register** on April 8, 1992 (57 FR 11938), that it was circulating for review and comment proposed Voluntary Product Standard TS 234 "Performance Standard for Wood-Based Structural-Use Panels," in accordance with the provisions of 10.6 of Department "Procedures for the Development of Voluntary Product Standards" (15 CFR part 10, as amended; 51 FR 22497 dated June 20, 1986).

Public response to the proposed standard indicated consensus among producers, distributors, users, and consumers in accordance with the Department procedures, and the standard was approved for publication as Voluntary Product Standard PS 2–92, effective August 27, 1992. The standard covers performance requirements for a variety of structural panels including plywood, waferboard, oriented strand board, structural particleboard, and composite panels.

For further information or for copies of PS 2–92, contact Barbara Meigs, Standards Management Program, Office of Standards Services, NIST, A 625, Building 101, Gaithersburg, MD 20899, telephone 301–975–4025, FAX 301–963–2871.

Dated: December 4, 1992.

BILLING CODE 3510–13–M

National Oceanic and Atmospheric Administration

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of receipt of application for scientific research permit (P510A).

Notice is hereby given that The Shoshone-Bannock Tribes have applied in due form for a Permit to take endangered and threatened species as authorized by the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) and the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR parts 217–227).

The applicant requests authorization to conduct scientific research involving Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*). No other listed species will be directly or incidentally affected. In the course of the research, up to 2,000 juveniles will be captured, PIT tagged, and released, and up to 2,300 juveniles will be observed and counted by snorkelers. These numbers are requested for each year for a duration of 15 years.

Written data or views, or requests for a public hearing on this application should be submitted to the Director, Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Hwy., room 8268, Silver Spring, MD 20910, within 30 days of the publication of this notice Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries. All statements and opinions contained in this application summary are those of the Applicant, and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review by interested persons in the following offices by appointment:

Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Hwy., suite 8268, Silver Spring, MD 20910 (301/713–2322); and

Environmental and Technical Services Division, National Marine Fisheries Service, 911 North East 11th Avenue, room 620, Portland, OR 97232 (503/230–5400).

Dated: December 2, 1992.

Michael F. Tillman,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–M

[Docket No. 911176–2018]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Receipt of an application for experimental fishing permit.

SUMMARY: NMFS announces receipt of an application for an experimental fishing permit (EFP) to harvest arrowtooth flounder in the Gulf of Alaska during January 3–20, 1993, and during May 1–31, 1993. If awarded, this permit would be used to harvest arrowtooth flounder and allow experiments directed at surimi production. Issuance of experimental fishing permits is authorized by the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) and its implementing regulations.

ADDRESSES: Send comments to Steven Pennoyer, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802 (Attn: Lori Grave

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg, Chief, Fisheries Management Division, NMFS (907–586–7230).

SUPPLEMENTARY INFORMATION: The FMP and its implementing regulations at 50 CFR part 672 specify that EFPs may be issued to authorize fishing that otherwise would be prohibited by the FMP and regulations. The procedures for issuing permits are contained in the regulations at § 672.6

An EFP application has been accepted for review and copies have been forwarded to the North Pacific Fishery

Management Council (Council). The Council intends to review the application at its December 8–13, 1992, meeting, which will be held at the Hilton Hotel, Anchorage, Alaska, under Council agenda item D–3–b.

The applicant proposes to harvest a limited amount of arrowtooth flounder for purposes of producing market-grade surimi for product development and test marketing by surimi analog producers elsewhere in the United States. Vessels harvesting arrowtooth flounder will carry a NMFS-certified observer at all times with costs paid for by vessels fishing for the applicant. Other information regarding project design, deposition of fish harvested, and other information is contained in the application. A copy of the application is available (see **ADDRESSES**).

BILLING CODE 3510–22–M

Marine Mammals; Permits

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Issuance of modification No. 1 to permit No. 767 (P263B).

SUMMARY: On March 4, 1992, notice was published in the **Federal Register** (57 FR 7735) that Permit No. 767 had been issued to Ms. Janice Straley, P.O. Box 273, Sitka, Alaska 99835.

Notice is hereby given that on December 3, 1992, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) and the Regulations Governing Endangered Fish and Wildlife (50 CFR Parts 217–222), the National Marine Fisheries Service modified Permit No. 767 to extend the effective date through March 31, 1993.

The modified Permit is available for review by interested persons in the following offices by appointment:

Office of Protected Resources, National Marine Fisheries Service, NOAA, 1335 East West Highway, room 7324, Silver Spring, MD 20910 (301/713–2289); and

Director, Alaska Region, National Marine Fisheries Service, NOAA, 9109 Mendenhall Mall Rd. Suite 6, Juneau, AK 99802 (907/586–7221).

Dated: December 3, 1992.

Michael F. Tillman,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000–0091]

Clearance Request for Anti-Kickback Procedures

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0091).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Anti-Kickback Procedures.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 501–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

Federal Acquisition Regulation (FAR) 52.203–7, Anti-Kickback Procedures, requires that all contractors have in place and follow reasonable procedures designed to prevent and detect in its own operations and direct business relationships, violations of section 3 of the Anti-Kickback Act of 1986 (41 U.S.C. 51–58). Whenever prime contractors or subcontractors have reasonable grounds to believe that a violation of section 3 of the Act may have occurred, they are required to report the possible violation in writing to the contracting agency or the Department of Justice. The information is used to determine if any violations of section 3 of the Act have occurred.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, 2,500; responses per respondent, 1; total annual responses, 2,500; preparation hours per response, 1; and total response burden hours, 2,500.

OBTAINING COPIES OF PROPOSALS: Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4037,

Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0091, Anti-Kickback Procedures, in all correspondence.

Dated: December 4, 1992.

Beverly Fayson,

FAR Secretariat.

[FR Doc. 92–30017 Filed 12–9–92; 8:45 am]

BILLING CODE 6820-34-M

Public Information Collection Requirement Submitted to OMB for Review.

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Soldier Deployment and Military Family Separation Stress During Operation Desert Shield/Storm: The Army Individual Ready Reserve

Type of Request: New Collection

Average Burden Hours/Minutes Per Response: 30 minutes

Responses Per Respondent: 1

Number of Respondents: 7,918

Annual Burden Hours: 3,959

Annual Responses: 7,918

Needs and Uses: The Army has a need for information on the psychosocial consequences of rapid mobilization and demobilization of all components of the Army and their families. This problem is being studied by the Department of Military Psychiatry of the Walter Reed Army Institute of Research. Reserve and active Army component studies are underway. The segment of the study on psychosocial and unit cohesion related aspects of OSD/S on Individual Ready Reservists (IRR's) has not yet been undertaken. This study surveys the IRR's and their spouses.

Affected Public: Individuals or households

Frequency: One time

Respondent's Obligation: Voluntary

OMB Desk Officer: Mr. Edward C. Springer

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DoD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce

Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia 22202–4302.

Dated: December 4, 1992.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Office of the Secretary

Overseas Dependents Schools National Advisory Panel on the Education of Dependents With Disabilities

ACTION: Notice of meeting.

SUMMARY: Under the provisions of Public Law 92–463, the "Federal Advisory Committee Act," notice is hereby given that the Overseas Dependents Schools National Advisory Panel on the Education of Dependents with Disabilities (hereinafter referred to as the National Advisory Panel) will meet on December 14–17, 1992, at the Office of Dependents Schools, 1225 Jefferson Davis Highway, suite 1500, Crystal Gateway 2, Arlington, Virginia 22202.

This notice sets forth the schedule and proposed agenda of the meeting of the National Advisory Panel and describes its functions. The meeting is open to the public; however, due to space constraints, anyone wishing to attend should contact the Office of Dependents Schools special education coordinator. Less than 15 days notice is being given because of unusual difficulties encountered in coordinating the schedules of several overseas members having to travel to the meeting site and be available for this urgent meeting.

The National Advisory Panel was established under the authority of section 613 of the Education for All Handicapped Children Act of 1975 (20 U S.C. 1401, Pub. L. 94–142). The Panel is directed to: (1) Review information regarding improvements in services provided to students with disabilities in Department of Defense Dependents Schools (DoDDS); (2) receive and consider the views of various parents, students, individuals with disabilities, and professional groups; (3) review the findings of fact and decision of each impartial due process hearing; (4) assist in developing and reporting such information and evaluations as may aid DoDDS in the performance of its duties; (5) make recommendations based on program and operational information for changes in the budget, organization, and general management of the special education program, and in policy and procedures; (6) comment publicly on rules or standards regarding the education of children; and (7) submit an annual report of its activities and suggestions to the Director, DoDDS by July 31 of each year. The Panel will review the following areas: Quality Indicators for special education program, preschool plans for young children with disabilities, special education transition program, Individuals with Disabilities Amendments (IDEA), inservice training and medical related services.

For additional information regarding the National Advisory Panel, contact: Mrs. Trudy Paul, Special Education Coordinator, Office of Dependents Schools, 1225 Jefferson Davis Highway, suite 500, Arlington, Virginia 22202, telephone: 703–746–7867.

Dated: December 4, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92–30041 Filed 12–9–92; 8:45 am]

BILLING CODE 3810-01-M

DoD Advisory Panel on Streamlining and Codifying Acquisition Laws; Meeting

AGENCY: Defense Systems Management College.

ACTION: Notice of meeting.

SUMMARY: Open to the public on December 9, 1992, at the Defense Systems Management College, Building 184, Fort Belvoir, VA. The panel will meet in special session to come to closure on the following final issues:

Panel position on the Brooks Act.

Panel position on technical data.

The need to reconsider the decision on 10 U.S.C. 2410.

Competitive prototyping.

Penalties associated with 10 U.S.C. 2324

Fiscal laws.

We apologize for the shortness of notice. The aforementioned issues arose as the panel members, task force, and editorial staff were finalizing the panel report. The Panel Chairman, RADM Vincent, made the determination that he issues involved were significant enough to require an open panel meeting prior to the submission of the final report for SECDEF review and comment on December 15, 1992.

For further information contact Major Jean Kopala at (703) 355–2665.

Dated: December 7, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92–30130 Filed 12–8–92; 8:45 am]

BILLING CODE 3810–01–M

Department of Defense Wage Committee; Closed Meetings

Pursuant to the provisions of section 10 of Public Law 92–463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, January 5, 1993; Tuesday, January 12, 1993; Tuesday, January 19, 1993; and Tuesday, January 26, 1993, at 2 p.m. in room 800, Hoffman Building #1, Alexandria, Virginia.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Force Management and Personnel) concerning all matters involved in the development and authorization of wage schedules for federal prevailing rate employees pursuant to Public Law 92–392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Public Law 92–463, meetings may be closed to the public when they are "concerned with matters listed in 5 U.S.C. 552b." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency," (5 U S.C. 552b. (c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U S.C. 552b.(c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy/Equal Opportunity) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552b. (c)(2)), and the detailed wage data considered were obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b(c)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the chairman concerning matters believed to be deserving of the Committee's attention.

Additional information concerning this meeting may be obtained by writing the Chairman, Department of Defense Wage Committee, room 3D264, The Pentagon, Washington, DC 20310.

Dated: December 4, 1992.

L.M. Bynum,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3910–01–M

Department of the Army

Intent To Prepare a Draft Supplement (DSEIS) to the Final Integrated Feasibility Report and Environmental Impact Statement on the Central and Southern Florida Project, Environmental Restoration of the Kissimmee River, FL, Addressing the Kissimmee River Headwaters Revitalization in Osceola County, FL

AGENCY: U.S Army Corps of Engineers, DoD

ACTION: Notice of intent.

SUMMARY: A study of the modification of the Kissimmee River Project headwaters is authorized for the ecosystem restoration of the Kissimmee River, Florida. The study action is necessary to restore historical flows to the Kissimmee River Lower Basin while optimizing fish and wildlife habitat in the Upper Basin.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action and DSEIS can be answered by Dr. Gerald Atmar, U.S. Engineer District, P.O Box 4970, Jacksonville, Florida 32232–0019; telephone 904/232–2615.

SUPPLEMENTARY INFORMATION: The study, named the Headwaters Revitalization Study, was addressed generically by an integrated feasibility report and final Environmental Impact Statement filed with the U.S. Environmental Protection Agency, January 17, 1992 (57 FR 2093). The present study is to formulate a plan to optimize environmental improvements to the Upper Kissimmee Basin while reestablishing discharges to the Lower Basin that are necessary to restore the ecological integrity of the Kissimmee River.

Increasing the levels of Lakes Kissimmee, Cypress and Hatchineha is under study. A preliminary proposal is to increase the controlled upper water level from 52.5 to 54.0 feet NGVD, with the lower level remaining at 48.5 feet NGVD Additionally, the schedule would be zoned to provide discharges based on season and water levels. The revised schedule would seasonally reflood land between elevations 52.5 and 54.0 feet in the Upper Basin.

The revised schedule is expected to increase seasonal water storage capacity by 100,000 acre-feet, according to studies by the SFWMD, and to provide for greater, and more natural fluctuations of water levels in the lakes. Additionally, the studied regulation schedule is expected to provide capability to simulate the historic seasonal flow from Lake Kissimmee to the Lower Basin. This capability is a prerequisite for successful restoration of the Lower Basin ecosystem.

Alternative plans consist of "no action", i.e., leaving the exiting Upper Basin works in place and operational with the present schedules, and combinations of the following:

Different modifications of the Upper Chain of Lakes regulation schedules, C–34, C–35, C–36 and C–37 enlargement, and

Acquisition of real estate interests to acquire rights to reflood land below elevation 54.0 feet

The study will address the effects of higher water levels on private property, agricultural and commercial interests, public works, cultural resources, including historical structures, recreation, aesthetics, water quality, and fish and wildlife in the Upper Basin and effects on the Kissimmee River Restoration Plan Tributary lakes Rosalie, Riger and Jackson may be affected by the studied change, and effects on these lakes will also be considered

Scoping for this study was started with a letter dated July 16, 1992, to all known interested parties, based on responses to the integrated feasibility

report and final EIS cited above. The letter described the studied action and reasonable alternatives conceived at that time. The public and affected state and Federal agencies will be further involved in scoping through workshops to obtain information and concerns from agencies and the public and to share planning concepts and procedures. The workshops have not been scheduled, but will be announced through mailings and public media notices. Additionally, a series of public hearings will be scheduled after circulation of the draft report and EIS and before completion of the final report and EIS

The study is being conducted with the participation of the South Florida Water Management District (local sponsor), and the U.S. Fish and Wildlife Service, the Florida Game and Fresh Water Fish Commission, Florida Department of Natural Resources, and Florida Department of Environmental Regulation. The U.S. Department of Agriculture Soil Conservation Service has met with planners and expressed concerns over the potential seasonal loss of wetland pasturage and the effect on water quality and fish and wildlife habitat. Further participation is invited from affected Federal, state and local agencies, affected Indian tribes, and other interested private organizations and parties.

The Project Modification Report and DEIS are scheduled for availability to the public in October 1994.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

BILLING CODE 3710-AJ-M

Military Personal Property Symposium; Open Meeting

AGENCY: Military Traffic Management Command, DoD.

ACTION: Notice of open meeting, Military Personal Property Symposium.

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463) and AR 1 5-1, Committee Management, announcement is made of meeting of the Military Personal Property Symposium. This meeting will be held on 28 January 1993 at the Best Western Old Colony Inn, Alexandria, Virginia, and will convene at 0830 hours and adjourn at approximately 1500 hours.

PROPOSED AGENDA: The purpose of the symposium is to provide an open discussion and the free exchange of ideas with the public on procedural changes to the Personal Property Traffic Management Regulation, DoD 4500.34R, and the handling of other matters of mutual interest concerning the Department of Defense Personal Property Shipment and Storage Program.

All interested persons desiring to submit topics to be discussed should contact the Commander, Military Traffic Management Command, ATTN: ATPP-M, 5611 Columbia Pike, Falls Church, VA 22041-5050, (703) 756-1600, between 0800-1530 hours. Topics to be discussed should be received on or before 31 December 1992.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

[FR Doc. 92-29933 Filed 12-9-92; 8:45 am]

BILLING CODE 3710-08-M

Department of the Army, Corps of Engineers.

Intent To Prepare a Draft Environmental Impact Statement for a Proposed Expansion of Barney Reservoir, Washington and Yamhill Counties, OR

AGENCY. U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent

SUMMARY. The proposed action is the issuance of a Department of the Army permit under section 404 of the Clean Water Act of 1977, as amended, for the raising of Barney Dam and the expansion of Barney Reservoir, located on the North Fork Trask River, Washington and Yamhill Counties, Oregon. The Joint Water Commission is the applicant proposing this action for the purpose of increasing the municipal and industrial water supply of Washington County. The increased water supply would also provide water quality benefits to the Tualatin River.

FOR FURTHER INFORMATION CONTACT. Questions about the proposed action and DEIS can be answered by David Kurkoski, telephone (503) 326-6094, Portland District, U.S. Army Corps of Engineers, Regulatory and Environmental Resources Branch, P.O. Box 2946, Portland, Oregon 97208-2946.

SUPPLEMENTARY INFORMATION: The Joint Water Commission in Washington County, Oregon is planning to apply to the Portland District, U.S. Army Corps of Engineers for a Department of the Army Permit under section 404 of the Clean Water Act of 1977, as amended. The proposed action is to raise the existing Barney Dam by 50 feet to increase the storage capacity of the reservoir from the existing 4,000 acre-feet to 20,000 acre-feet. The purpose of the proposed action is to provide an increased municipal and industrial water supply to Washington County. In addition, the increased water supply would provide water quality benefits to the Tualatin River through flow augmentation to support beneficial uses. Barney Dam is an earthfill dam on the North Fork Trask River in Washington County, Oregon, built in 1972 by the City of Hillsboro. It was originally designed for expansion to create a 20,000 acre-foot reservoir in up to four stages of development. Water released from Barney Reservoir is carried by pipeline to the Tualatin River drainage. Prior to initial construction, water rights for the 20,000 acre-foot reservoir were received by the City of Hillsboro from the State of Oregon.

Barney Reservoir is owned by the Cities of Hillsboro and Forest Grove and operated by the City of Hillsboro for municipal and industrial water use purposes. The reservoir expansion will be a joint project of the City of Hillsboro, the City of Forest Grove, and the City of Beaverton (through an existing intergovernmental agreement that formed the Joint Water Commission), and the Tualatin Valley Water District for municipal and industrial uses. The Unified Sewerage Agency will participate as a partial sponsor for water use for flow augmentation in the Tualatin River.

The alternatives to be considered in the DEIS are:

- The proposed 50-foot dam raise using rockfill material.
- The proposed 50-foot dam raise using alternative materials such as roller-compacted concrete.
- Construct a new dam at an alternative site approximately ¼ mile downstream from the existing dam.
- Development of other water supplies to meet the project objectives.
- No action.

The scoping process will commence in November 1992 with the issuance of a scoping letter. Federal, state and local agencies, Indian tribes, and interested organizations and individuals will be asked to comment on the significant issues relating to the potential effects of the alternatives. Potentially significant issues to be addressed in the DEIS include: Effects of the project on wetlands and vegetation, wildlife habitat and populations and fisheries in the Trask and Tualatin Rivers. Other environmental review and consultation requirements which will be addressed in conjunction with the DEIS include:

(1) Clean Water Act of 1977, as amended;

(2) Fish and Wildlife Coordination Act;

(3) Coastal Zone Management Act of 1972, as amended;

(4) Endangered Species Act of 1973, as amended;

(5) Cultural Resources Acts;

(6) Executive Order 11988, Floodplain Management;

(7) Executive Order 11990, Protection of Wetlands.

A formal scoping meeting has not been scheduled. The applicant has scheduled public meetings in Washington, Yamhill and Tillamook Counties to provide more information on the scope of studies to be accomplished for this DEIS, to assist interested parties in developing their scoping comments. These meetings will be held at the following locations:

Tillamook: Time and location to be determined;

Gaston: 8 December 1992, 7 p.m., Gaston Fire Hall;

Hillsboro: 9 December 1992, 7 p.m., Washington County Public Services Building, Room 140.

The DEIS is scheduled to be made available to the public in July 1993.

Richard E. Dadisman,

Major, Corps of Engineers, Acting Commander.

BILLING CODE 3710-AR-M

Department of the Navy

Privacy Act of 1974; Amend and Delete Record Systems

AGENCY: Department of the Navy, DOD.

ACTION: Amend and delete record systems.

SUMMARY: The Department of the Navy proposes to amend four and delete one existing systems of records to its inventory of systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

DATES: The amendments will be effective on January 11, 1993, unless comments are received that would result in a contrary determination. The deletion is effective December 10, 1993.

ADDRESSES: Send comments to the Head, PA/FOIA Branch, Office of the Chief of Naval Operations (N09B30), Department of the Navy, The Pentagon, Washington, DC 20350-2000.

FOR FURTHER INFORMATION CONTACT: Mrs. Gwendolyn Aitken at (703) 614-2004 or DSN 224-2004.

SUPPLEMENTARY INFORMATION: The Department of the Navy systems of records notices for records systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, were published in the **Federal Register** as follows:

51 FR 12908, April 16, 1986

The Department of the Navy is also correcting an error made when the system of records notice for N05300-3, amended on September 29, 1989, at 54 FR 40167, stated that the system was not exempt. The exemption rule for this system was established prior to 1985 and continues to be accurate.

The amendments and the deletion are not within the purview of subsection (r) of the Privacy Act of 1974 (5 U.S.C. 552a), as amended, which requires the submission of altered systems reports. The specific changes to the systems of records are set forth below followed by the systems of records notices published in their entirety, as amended.

Dated: December 3, 1992.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DELETION
N05300-7

SYSTEM NAME: Bases and Stations Information System, (BASIS)(54 FR 14380, April 11, 1989).

Reason: Information is contained in the Navy Privacy Act System of Records N05300-2, Administrative Personnel Management System, therefore, N05300-7 is no long needed.

AMENDMENTS
N05300-2

SYSTEM NAME:

Administrative Personnel Management System, (54 FR 40166, September 29, 1989).

CHANGES:

* * * * *

SYSTEM LOCATION:

Delete entry and replace with "Organizational elements of the Department of the Navy. Official mailing addresses are published as an appendix to the Navy's compilation of systems of records notices."

CATEGORIES OF RECORDS IN THE SYSTEM:

In line 20, after "veterans preference" add "postal address; location of dependents and next of kin and their addresses;".

In line 24, after "line", add "safety,".

* * * * *

PURPOSE(S):

In line 8, after "access control," add "record handlers of hazardous materials; record rental of welfare and recreational equipment; track beneficial suggestions and awards;".

* * * * *

STORAGE:

In line one, delete "punched cards".

* * * * *

SYSTEM MANAGER(S) AND ADDRESS:

Delete entry and replace with "Commanding officer of the activity in question. Official mailing addresses are published as an appendix to the Navy's compilation of systems of records notices."

NOTIFICATION PROCEDURE:

Delete entry and replace with "Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the commanding officer of the activity in question. Official mailing addresses are published as an appendix to the Navy's compilation of systems of records notices.

The request should include full name, Social Security Number, and address of the individual concerned and should be signed."

RECORD ACCESS PROCEDURES:

Delete entry and replace with "Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the commanding officer of the activity in question. Official mailing addresses are published as an appendix to the Navy's compilation of systems of records notices.

The request should include full name, Social Security Number, and address of the individual concerned and should be signed."

* * * * *

N05300-2

SYSTEM NAME:

Administrative Personnel Management System.

SYSTEM LOCATION:

Organizational elements of the Department of the Navy. Official mailing addresses are published as an appendix to the Navy's compilation of systems of records notices. Included in this notice are those records duplicated for maintenance at a site closer to where the employee works (e.g., in an administrative office or a supervisor's work area).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All civilian, (including former members and applicants for civilian employment), military and contract employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Correspondence/records concerning personnel identification, location (assigned organization code and/or work center code); MOS; labor code; payments for training, travel advances and claims, hours assigned and worked, routine and emergency assignments, functional responsibilities, clearance, access to secure spaces and issuance of keys, educational and experience characteristics and training histories, travel, retention group, hire/termination dates; type of appointment; leave; trade, vehicle parking, disaster control, community relations, (blood donor, etc), employee recreation programs; grade and series or rank/rate; retirement category; awards; biographical data; property custody; personnel actions/dates; violations of rules; physical handicaps and health/safety data; veterans preference; postal address; location of dependents and next of kin and their addresses; mutual aid association memberships; union memberships; qualifications; computerized modules used to track personnel data; and other data needed for personnel, financial, line, safety and security management, as appropriate.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations and E.O. 9397.

PURPOSE(S):

To manage, supervise, and administer programs for all Navy civilian and military personnel such as preparing rosters/locators; contacting appropriate personnel in emergencies; training; identifying routine and special work assignments; determining clearance for access control; record handlers of hazardous materials; record rental of welfare and recreational equipment; track beneficial suggestions and awards; controlling the budget; travel claims; manpower and grades; maintaining statistics for minorities; employment; labor costing; watch bill preparation; projection of retirement losses; verifying employment to requesting banking; rental and credit organizations; name change location; checklist prior to leaving activity; payment of mutual aid benefits; safety reporting/monitoring; and, similar administrative uses requiring personnel data. Arbitrators and hearing examiners in civilian personnel matters relating to civilian grievances and appeals.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The "Blanket Routine Uses" that appear at the beginning of the Department of the Navy's compilation of systems of records notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS:

STORAGE:

File folders, card files, magnetic tape, magnetic disc.

RETRIEVABILITY:

Name, Social Security Number, case number, organization, work center and/or job order.

SAFEGUARDS:

Password controlled system, file, and element access based on predefined need to know. Physical access to terminals, terminal rooms, buildings and activities' grounds are controlled by locked terminals and rooms, guards, personnel screening and visitor registers.

RETENTION AND DISPOSAL:

Normally retained for two years and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Commanding officer of the activity in question. Official mailing addresses are published as an appendix to the Navy's compilation of systems of records notices.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the commanding officer of the activity in question. Official mailing addresses are published as an appendix to the Navy's compilation of systems of records notices.

The request should include full name, Social Security Number, and address of the individual concerned and should be signed.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the commanding officer of the activity in question. Official mailing addresses are published as an appendix to the Navy's compilation of systems of records notices.

The request should include full name, Social Security Number, and address of the individual concerned and should be signed.

CONTESTING RECORD PROCEDURES:

The Department of the Navy rules for accessing records and contesting contents and appealing determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5; 32 CFR part 701; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Individual, employment papers, other records of the organization, official personnel jackets, supervisors, official

travel orders, educational institutions, applications, duty officer, investigations, OPM officials, and/or members of the American Red Cross.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

N05300–3

SYSTEM NAME:

Faculty Professional Files (54 FR 40167, September 29, 1989).

CHANGES:

* * * * *

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Delete entry and replace with "Parts of this system may be exempt pursuant to 5 U.S.C. 552a(k)(5), as applicable.

An exemption rule for this system has been promulgated in accordance with the requirements of 5 U.S.C. 553(b)(1), (2) and (3), (c) and (e) and published in 32 CFR part 701. For additional information contact the system manager."

* * * * *

N05300–3

SYSTEM NAME:

Faculty Professional Files.

SYSTEM LOCATION:

Superintendent, Naval Postgraduate School, Monterey, CA 93943–5100.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Faculty personnel employed by the Naval Postgraduate School and individuals applying for positions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Faculty academic promotion/tenure case evaluation files and faculty professional status and accomplishment file.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations.

PURPOSE(S):

Promotion/tenure case evaluation files are used by Department Chairmen, Deans, and the Superintendent to determine the ranking, promotion tenure reappointment and evaluation of faculty personnel. Faculty professional status and accomplishment files constitute official record of employment.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The "Blanket Routine Uses" that appear at the beginning of the Department of the Navy's compilation of systems of records notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS:

STORAGE:

File folders.

RETRIEVABILITY:

Name.

SAFEGUARDS:

During working hours, records are secured within locked file drawers within departmental offices to which only authorized personnel have access. After working hours, records are kept within locked file drawers within secured offices located within a locked building which is part of a naval facility to which entry is restricted.

RETENTION AND DISPOSAL:

Faculty academic promotion/tenure case evaluation files are destroyed upon personnel action completion. Faculty professional status and accomplishment files are retained in a permanent file.

SYSTEM MANAGER(S) AND ADDRESS:

Provost, Naval Postgraduate School (Code 01), Monterey, CA 93943–5100.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Provost, Naval Postgraduate School (Code 01), Monterey, CA 93943–5100.

Requests should contain full name and address of the individual concerned and should be signed.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves in this system of records should address written inquiries to the Provost, Naval Postgraduate School (Code 01), Monterey, CA 93943–5100

Requests should contain full name and address of the individual concerned and should be signed.

CONTESTING RECORD PROCEDURES:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5; 32 CFR part 701; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information in this system comes from previous employers, educational background, correspondence, peer evaluations, supervisory evaluations and student evaluations of teaching.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Parts of this system may be exempt pursuant to 5 U.S.C. 552a(k)(5), as applicable.

An exemption rule for this system has been promulgated in accordance with the requirements of 5 U S C. 553(b)(1), (2) and (3), (c) and (e) and published in 32 CFR part 701. For additional information contact the system manager.

N05350–1

SYSTEM NAME:

Navy Personnel Rehabilitation Support System (51 FR 18151, May 16, 1986).

CHANGES:

SYSTEM NAME:

Delete entry and replace with "Navy Drug and Alcohol Program System."

SYSTEM LOCATION:

Delete entry and replace with "Primary System-Bureau of Naval Personnel (Pers 63), Navy Department, Washington, DC 20370–5630

Decentralized segments-Navy Alcohol Rehabilitation Centers, Navy Alcohol Rehabilitation Departments in Naval Hospitals, Counseling and Assistance Centers, Navy Alcohol and Drug Safety Action Program Offices, Navy Drug Screening Laboratories, Bureau of Naval Personnel Detachment (Drug and Alcohol Program Management Activity), and local activities to which an individual is assigned. Addresses are contained in a directory which is available from the Chief of Naval Personnel (Pers 63), Washington, DC 20370–5630."

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Delete entry and replace with "Navy personnel (officers and enlisted) who have been identified as drug or alcohol abusers and who are subsequently screened or referred for remedial education, outpatient counseling, or residential rehabilitation; counselors, counselor interns, and counselor applicants; Navy personnel who attend the Navy Alcohol and Drug Safety Action Program for preventive education; dependents and civilians, where authorized, who participate in preventive and remedial education programs, outpatient counseling, and residential rehabilitation; and officer, enlisted, and civilian staff members of facilities providing drug and alcohol education, screening, counseling, rehabilitation, and drug testing."

CATEGORIES OF RECORDS IN THE SYSTEM:

Delete entry and replace with "Documentation containing demographic data, screening and assessment information, progress notes, medical and laboratory data, narrative summaries of treatment, aftercare plans, and other information pertaining to a member's participation in substance abuse education, counseling, and rehabilitation programs."

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Delete entry and replace with "5 U S C. 301, Departmental Regulations; 10 U S.C. para 1090; 42 U S C. 290dd–3 and 290ee–3; and E.O 9397."

PURPOSE(S):

Delete entry and replace with "To train, educate, identify, screen, counsel, rehabilitate, and monitor the progress of individuals in drug and alcohol abuse programs.

Information is used to screen and evaluate certified counselors, counselor interns, and counselor applicants throughout the course of their duties."

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Delete entry and replace with "In order to comply with the provisions of 42 U.S.C. 290dd–3 and 290ee–3, the Department of the Navy 'Blanket Routine Uses' do not apply to this system of records.

Specifically, records of the identity, diagnosis, prognosis, or treatment of any client/patient, irrespective of whether or when he/she ceases to be client/patient, maintained in connection with the performance of any alcohol or drug abuse prevention, education, training, treatment, rehabilitation, or research which is conducted, regulated, or directly or indirectly assisted by any department or agency of the United States, shall, except as provided therein, be confidential and be disclosed only for the purposes and under the circumstances expressly authorized in 42 U.S.C. 290dd–3 and 290ee–3. This statute takes precedence over the Privacy Act of 1974 in regard to accessibility of such records, except to the individual to whom the record pertains.

The content of any record may be disclosed in accordance with prior written consent of the patient with respect to whom such record is maintained, but only to such extent, under such circumstances, and for such purposes as may be allowed under such prescribed regulations.

Information from records may be released without the member's consent in the following situations:

To medical personnel to the extent necessary to meet a bona fide medical emergency.

To qualified personnel for the purpose of conducting scientific research, management audits, or program evaluation, but such personnel may not identify, directly or indirectly, any individual patient in any report of such research, audit or evaluation, or otherwise disclose patient identities in any manner.

If authorized by an appropriate order of a court of competent jurisdiction granted after application showing good case therefore In accessing good cause, the court shall weigh the public interest and the need for disclosure against the injury to the patient, to the physician-patient relationship, and to the treatment services. Upon the granting of such order, the court, in determining the extent to which any disclosure of all or any part of any record is necessary, shall impose appropriate safeguards against unauthorized disclosures.

The above prohibitions do not apply to any interchange of records within the Armed Forces or within those components of the Department of Veterans Affairs furnishing health care to veterans or between such components and the Armed Forces."

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS:

STORAGE:

Delete entry and replace with "Automated records may be stored on computer disks (both hard drive and floppy), magnetic tapes, and drums.

Manual records may be stored in paper file folders, computer printouts, microfiche, or microfilm."

RETRIEVABILITY:

Delete entry and replace with 'Name and Social Security Number."

SAFEGUARDS:

In lines one and two, delete the phrase "and punched card processing"

RETENTION AND DISPOSAL:

Delete entry and replace with "Manual records are maintained for two years and then destroyed Automated records are maintained indefinitely."

SYSTEM MANAGER(S) AND ADDRESS:

Delete entry and replace with "Chief of Naval Personnel (Pers 63), Navy Department, Washington, DC 20370–5630."

NOTIFICATION PROCEDURE:

Delete entry and replace with "Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Chief of Naval Personnel (Pers 06), Washington, DC 20370–5630 or to the naval activity providing treatment. Addresses are contained in a directory which is available from the Chief of Naval Personnel (Pers 63), Washington, DC 20370–5630.

The letter should contain full name, Social Security Number, rank/rate, military status, and signature of the requester. The individual may visit the Bureau of Naval Personnel, Arlington Annex, Federal Office Building 2, Room 1066, Washington, DC for assistance with records located in that building; or the individual may visit the local activity to which attached for access to locally maintained records. Proof of identification will consist of Military Identification Card for persons having such cards, or other picture-bearing identification."

RECORD ACCESS PROCEDURES:

Delete entry and replace with "Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Chief of Naval Personnel (Pers 06), Washington, DC 20370–5630 or to the naval activity providing treatment. Addresses are contained in a directory which is available from the Chief of Naval Personnel (Pers 63), Washington, DC 20370–5630.

The letter should contain full name, Social Security Number, rank/rate, military status, and signature of the requester. The individual may visit the Bureau of Naval Personnel, Arlington Annex, Federal Office Building 2, Room 1066, Washington, DC for assistance with records located in that building; or the individual may visit the local activity to which attached for access to locally maintained records. Proof of identification will consist of Military Identification Card for persons having such cards, or other picture-bearing identification."

CONTESTING RECORD PROCEDURES:

Delete entry and replace with "The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211 5; 32 CFR part 701; or may be obtained from the system manager."

RECORD SOURCE CATEGORIES:

Delete entry and replace with "DOD/DON officials; notes and documents from Service Jackets and Medical

Records; and general correspondence concerning the individual."

N05350–1

SYSTEM NAME:

Navy Drug and Alcohol Program System.

SYSTEM LOCATION:

Primary System-Bureau of Naval Personnel (Pers 63), Navy Department, Washington, DC 20370–5630.

Decentralized segments-Navy Alcohol Rehabilitation Centers, Navy Alcohol Rehabilitation Departments in Naval Hospitals, Counseling and Assistance Centers, Navy Alcohol and Drug Safety Action Program Offices, Navy Drug Screening Laboratories, Bureau of Naval Personnel Detachment (Drug and Alcohol Program Management Activity), and local activities to which an individual is assigned. Addresses are contained in a directory which is available from the Chief of Naval Personnel (Pers 63), Washington, DC 20370–5630.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Navy personnel (officers and enlisted) who have been identified as drug or alcohol abusers and who are subsequently screened or referred for remedial education, outpatient counseling, or residential rehabilitation; counselors, counselor interns, and counselor applicants; Navy personnel who attend the Navy Alcohol and Drug Safety Action Program for preventive education; dependents and civilians, where authorized, who participate in preventive and remedial education programs, outpatient counseling, and residential rehabilitation; and officer, enlisted, and civilian staff members of facilities providing drug and alcohol education, screening, counseling, rehabilitation, and drug testing.

CATEGORIES OF RECORDS IN THE SYSTEM:

Documentation containing demographic data, screening and assessment information, progress notes, medical and laboratory data, narrative summaries of treatment, aftercare plans, and other information pertaining to a member's participation in substance abuse education, counseling, and rehabilitation programs.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S C. 301, Departmental Regulations; 10 U.S.C. para 1090; 42 U.S C. 290dd–3 and 290ee–3; and E O. 9397.

PURPOSE(S):

To train, educate, identify, screen, counsel, rehabilitate, and monitor the progress of individuals in drug and alcohol abuse programs.

Information is used to screen and evaluate the certified counselors, counselor interns, and counselor applicants throughout the course of their duties.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In order to comply with the provisions of 42 U.S.C. 290dd–3 and 290ee–3, the Department of the Navy 'Blanket Routine Uses' do not apply to this system of records.

Specifically, records of the identity, diagnosis, prognosis, or treatment of any client/patient, irrespective of whether or when he/she ceases to be client/patient, maintained in connection with the performance of any alcohol or drug abuse prevention, education, training, treatment, rehabilitation, or research which is conducted, regulated, or directly or indirectly assisted by any department or agency of the United States, shall, except as provided therein, be confidential and be disclosed only for the purposes and under the circumstances expressly authorized in 42 U.S.C. 290dd–3 and 290ee–3. This statute takes precedence over the Privacy Act of 1974 in regard to accessibility of such records, except to the individual to whom the record pertains.

The content of any record may be disclosed in accordance with prior written consent of the patient with respect to whom such record is maintained, but only to such extent, under such circumstances, and for such purposes as may be allowed under such prescribed regulations.

Information from records may be released without the member's consent in the following situations:

To medical personnel to the extent necessary to meet a bona fide medical emergency.

To qualified personnel for the purpose of conducting scientific research, management audits, or program evaluation, but such personnel may not identify, directly or indirectly, any individual patient in any report of such research, audit or evaluation, or otherwise disclose patient identities in any manner.

If authorized by an appropriate order of a court of competent jurisdiction granted after application showing good case therefore. In accessing good cause, the court shall weigh the public interest and the need for disclosure against the injury to the patient, to the physician-patient relationship, and to the treatment services: Upon the granting of such order, the court, in determining the extent to which any disclosure of all or any part of any record is necessary, shall impose appropriate safeguards against unauthorized disclosures.

The above prohibitions do not apply to any interchange of records within the Armed Forces or within those components of the Department of Veterans Affairs furnishing health care to veterans or between such components and the Armed Forces.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS:

STORAGE:

Automated records may be stored on computer disks (both hard drive and floppy), magnetic tapes, and drums.

Manual records may be stored in paper file folders, computer printouts, microfiche, or microfilm.

RETRIEVABILITY:

Name and Social Security Number.

SAFEGUARDS:

Computer facilities are located in restricted areas accessible only to authorized persons that are properly screened, cleared and trained.

Manual records and computer printouts are available only to authorized personnel having a need to know.

RETENTION AND DISPOSAL:

Manual records are maintained for two years and then destroyed. Automated records are maintained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Chief of Naval Personnel (Pers 63), Navy Department, Washington, DC 20370–5630

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Chief of Naval Personnel (Pers 06), Washington, DC 20370–5630 or to the naval activity providing treatment. Addresses are contained in a directory which is available from the Chief of Naval Personnel (Pers 63), Washington, DC 20370–5630.

The letter should contain full name, Social Security Number, rank/rate, military status, and signature of the requester. The individual may visit the Bureau of Naval Personnel, Arlington Annex, Federal Office Building 2, Room 1066, Washington, DC for assistance

with records located in that building; or the individual may visit the local activity to which attached for access to locally maintained records. Proof of identification will consist of Military Identification Card for persons having such cards, or other picture-bearing identification.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Chief of Naval Personnel (Pers 06), Washington, DC 20370–5630 or to the naval activity providing treatment. Addresses are contained in a directory which is available from the Chief of Naval Personnel (Pers 63), Washington, DC 20370–5630.

The letter should contain full name, Social Security Number, rank/rate, military status, and signature of the requester. Proof of identification will consist of Military Identification Card for persons having such cards, or other picture-bearing identification

CONTESTING RECORD PROCEDURES:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5; 32 CFR part 701; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

DOD/DON officials; notes and documents from Service Jackets and Medical Records; and general correspondence concerning the individual.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

N05520–4

SYSTEM NAME:

NIS Investigative Files System (51 FR 18158, May 16, 1986).

CHANGES:

* * * * *

SYSTEM LOCATION:

Delete entry and replace with "Primary System-Naval Investigative Service Command, Washington, DC 20388–5000.

Decentralized Segments - Naval Investigative Service Regional Offices retain copies of certain portions of some investigative files and related documentation for up to one year. Naval Investigative Service Resident Agencies retain copies of investigative reports during pendency and for one year thereafter. They also retain evidence custody cards on persons from whom evidence was seized. The number and location of these Resident Agencies are subject to change in order to meet the requirements of the Department of the Navy.

Naval Investigative Service Command Regional Forensic Laboratories retain records of lab analysis of evidence submitted for law enforcement purposes.

Consolidated Evidence Facilities maintain evidence inventory records.

Current locations of NIS decentralized segments may be obtained from the Commander, Naval Investigative Service Command, Washington, DC 20388–5000."

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Delete entry and replace with "Persons in the following categories who require access to classified defense information prior to August 1972:

Active and inactive members of the naval service, civilian personnel employed by the Department of the Navy (DON), industrial and contractor personnel civilian personnel being considered for sensitive positions, boards, conferences, etc.

Civilian personnel who worked or resided overseas, Red Cross personnel. Civilian and military personnel accused, suspected, or victims of felonious type offenses, or lesser offenses impacting on the good order, discipline, morale or security of the DON; civilian personnel seeking access to or seeking to conduct or operate any business or other function aboard a DON installation, facility or ship; civilian or military personnel who are subjects, co-subjects, and victims in law enforcement and investigative cases in which law enforcement and investigative authorities (Federal, state, and local) have requested laboratory analysis of submitted evidence for law enforcement purposes; civilian and military personnel upon whom evidence is stored at a Consolidated Evidence Facility; civilian or military personnel involved in the loss, compromise, or unauthorized disclosure of classified material/information; civilian and military personnel who were of counterintelligence interest to the DON."

CATEGORIES OF RECORDS IN THE SYSTEM:

Official Reports of Investigation (ROI) prepared by NIS or other federal, state, local or foreign law enforcement or investigative body. NIS operations reports (NORs) and their predecessor NIS information reports (NIRs). NORs and NIRs document information received by NIS which is of interest to the naval services or other law enforcement or investigative bodies. The information may be of criminal, counterintelligence, or general investigative interest.

General Reports (GEN). Although no longer used as such, the investigative purpose of the GEN was to report the results of pre-employment inquiries on applicants for positions as special agents with NIS. The official ROI is now used for this purpose.

Action Lead Sheets (ALS's), investigative summaries, memoranda for the files and correspondence relating to specific cases and contained in the individual dossier.

Polygraph Data. A listing of persons who submitted to polygraph examination by NIS examiners. The data includes the examinee's name, location and results of the examination and the identity of the examiner.

Case Control and Management documents which serve as the basis for controlling and guiding the investigative activity. Records identifying confidential sources and contacts with them. Index to persons reported by "Name Only".

Regional Laboratory Report Records. Records reporting and documenting laboratory analysis of submitted evidence.Consolidated Evidence Inventory Records. Reporting and documenting evidence analyzed, stowed, transferred, or destroyed.Wiretap Data Records. Automated listing of persons who were subjects of wiretapping or eavesdropping operations.

Case Control and Narcotics Data Records. Automated records used only for statistical purposes in accounting for productivity, manhour expenditures; various statistical data concerning narcotics usage and used solely for statistical purposes.

Screening Board Reports. These reports set forth the results of oral examination of applicants for a position as a Special Agent with NIS."

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Delete entry and replace with "5 U.S.C. 301 and 10 U.S.C. 5013, Departmental Regulations; 44 U.S.C. 3101; 47 U.S.C. 605; Executive Memorandum of June 26, 1939, Investigations of Espionage,

Counterespionage and Sabotage Matters; DOD Directive 5210.8, Policy on Investigation and Clearance of DOD Personnel for Access to Defense Information; DOD Directive 5200.24, Telephone Interception and Eavesdropping; DOD Dir 5200.26, Defense Investigative Program; DOD Dir 5200.27, Acquisition of Information Concerning Persons and Organizations Not Affiliated with the Department of Defense; Secretary of the Navy Instruction 3820.2D, Investigative and Counterintelligence Collection and Retention Guidelines Pertaining to the Department of the Navy; Secretary of the Navy Instruction 5520.3, Criminal and Security Investigations and Related Activities Within the Department of the Navy; E.O. 9397; and E.O. 12036, United States Intelligence Activities."

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Delete paragraph four and replace with "To other investigative units (federal, state, or local) for whom the investigation was conducted, or who are engaged in regulatory, criminal investigative and intelligence activities; to defense counsel in the course of acquiring information."

Delete paragraph five.

* * * * *

STORAGE:

Delete entry and replace with "Paper and automated records."

RETRIEVABILITY:

Delete entry and replace with "NIS permanent files are filed by terminal digit number. In order to locate the file it is necessary to query the Defense Central Index of Investigations (DCII) computer using the name of the subject and at least one other personal identifier such as date of birth, place of birth, or Social Security Number. Files may also be retrieved by a case control number assigned at the time the investigation is initiated. Copies of the files in the NISROs and Resident Agencies are retrieved by name. Consolidated Evidence Facility and Regional Forensic Lab information is retrieved by name, case control number, submitting agency log number, log numbers, or lab numbers."

SAFEGUARDS:

Delete entry and replace with "NIS investigative files (permanent and temporary) are maintained and stored in open shelves and filing cabinets located in secured areas accessible only to authorized personnel. Controls have been established to restrict computer output to only authorized users at all system locations. Computer records are kept in secure continually manned areas and are accessible only to authorized computer operators. Dated files are retired to the Washington National Records Center where retrieval is restricted to NIS authorized personnel."

* * * * *

SYSTEM MANAGER(S) AND ADDRESS:

Delete entry and replace with "Commander, Naval Investigative Service Command, Washington, DC 20388–5000 has ultimate responsibility for all NIS file holdings. Management of NIS permanent files is the direct responsibility of the Head, Administration Department. Regional directors are responsible for files retained in their NISRO subordinate resident agencies."

NOTIFICATION PROCEDURE:

Delete entry and replace with "Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Commander, Naval Investigative Service Command, Washington, DC 20388–5000.

Requests must contain the full name of the individual and at least one additional personal identifier such as date and place of birth, or Social Security Number. Persons submitting written requests must properly establish their identity to the satisfaction of the NIS. This can be accomplished by either submitting a notarized signature or providing an unsworn declaration that states "I declare under perjury or penalty under the laws of the United States of America that the foregoing is true and correct." Attorneys or other persons acting on behalf of a subject of a record must provide a notarized authorization from the subject of the record."

RECORD ACCESS PROCEDURES:

Delete entry and replace with "Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Commander, Naval Investigative Service Command, Washington, DC 20388–5000.

Requests must contain the full name of the individual and at least one additional personal identifier such as date and place of birth and Social Security Number. Persons submitting written requests must properly establish their identity to the satisfaction of the NIS. This can be accomplished by either submitting a notarized signature or providing an unsworn declaration that states "I declare under perjury or penalty under the laws of the United States of America that the foregoing is true and correct."

Attorneys or other persons acting on behalf of a subject of a record must provide a notarized authorization from the subject of the record."

CONTESTING RECORD PROCEDURES:

Delete entry and replace with "The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5; 32 CFR part 701; or may be obtained from the system manager."

RECORD SOURCE CATEGORIES:

Delete entry and replace with "Individuals concerned, other records of the activity, investigators and witnesses."

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Delete entry and replace with "Parts of this system may be exempt pursuant to 5 U.S.C. 552a(j)(2) and (k)(1), (k)(3), (k)(4), (k)(5), and (k)(6), as applicable.

An exemption rule for this system has been promulgated in accordance with the requirements of 5 U.S.C. 553(b)(1), (2) and (3), (c) and (e) and published in 32 CFR part 701. For additional information contact the system manager."

* * * * *

N05520–4

SYSTEM NAME:

NIS Investigative Files System.

SYSTEM LOCATION:

Primary System-Naval Investigative Service Command, Washington, DC 20388–5000.

Decentralized Segments - Naval Investigative Service Regional Offices retain copies of certain portions of some investigative files and related documentation for up to one year. Naval Investigative Service Resident Agencies retain copies of investigative reports during pendency and for one year thereafter. They also retain evidence custody cards on persons from whom evidence was seized. The number and location of these Resident Agencies are subject to change in order to meet the requirements of the Department of the Navy.

Naval Investigative Service Command Regional Forensic Laboratories retain records of lab analysis of evidence submitted for law enforcement purposes.

Consolidated Evidence Facilities maintain evidence inventory records.

Current locations of NIS decentralized segments may be obtained from the Commander, Naval Investigative Service Command, Washington, DC 20388–5000.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons in the following categories who require access to classified defense information prior to August 1972:

Active and inactive members of the naval service, civilian personnel employed by the Department of the Navy (DON), industrial and contractor personnel, civilian personnel being considered for sensitive positions, boards, conferences, etc. Civilian personnel who worked or resided overseas, Red Cross personnel. Civilian and military personnel accused, suspected, or victims of felonious type offenses, or lesser offenses impacting on the good order, discipline, morale or security of the DON; civilian personnel seeking access to or seeking to conduct or operate any business or other function aboard a DON installation, facility or ship; civilian or military personnel who are subjects, co-subjects and victims in law enforcement and investigative cases in which law enforcement and investigative authorities (Federal, state, and local) have requested laboratory analysis of submitted evidence for law enforcement purposes; civilian and military personnel upon whom evidence is stored at a Consolidated Evidence Facility; civilian or military personnel involved in the loss, compromise, or unauthorized disclosure of classified material/information; civilian and military personnel who were of counterintelligence interest to the DON.

CATEGORIES OF RECORDS IN THE SYSTEM:

Official Reports of Investigation (ROI) prepared by NIS or other federal, state, local or foreign law enforcement or investigative body. NIS operations reports (NORs) and their predecessor NIS information reports (NIRs). NORs and NIRs document information received by NIS which is of interest to the naval services or other law enforcement or investigative bodies. The information may be of criminal, counterintelligence, or general investigative interest. General Reports (GEN). Although no longer used as such, the investigative purpose of the GEN was to report the results of pre-employment inquiries on applicants for positions as special agents with NIS. The official ROI is now used for this purpose.

Action Lead Sheets (ALS's), investigative summaries, memoranda for the files and correspondence relating to specific cases and contained in the individual dossier.

Polygraph Data. A listing of persons who submitted to polygraph examination by NIS examiners. The data includes the examinee's name, location and results of the examination and the identity of the examiner.

Case Control and Management documents which serve as the basis for controlling and guiding the investigative activity. Records identifying confidential sources and contacts with them. Index to persons reported by "Name Only".

Regional Laboratory Report Records. Records reporting and documenting laboratory analysis of submitted evidence.

Consolidated Evidence Inventory Records. Reporting and documenting evidence analyzed, stowed, transferred, or destroyed.Wiretap Data Records. Automated listing of persons who were subjects of wiretapping or eavesdropping operations.

Case Control and Narcotics Data Records. Automated records used only for statistical purposes in accounting for productivity, manhour expenditures; various statistical data concerning narcotics usage and used solely for statistical purposes.

Screening Board Reports. These reports set forth the results of oral examination of applicants for a position as a Special Agent with NIS.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301 and 10 U.S.C. 5013, Departmental Regulations; 44 U.S.C. 3101; 47 U.S.C. 605; Executive Memorandum of June 26, 1939, Investigations of Espionage, Counterespionage and Sabotage Matters; DOD Directive 5210.8, Policy on Investigation and Clearance of DOD Personnel for Access to Defense Information; DOD Directive 5200.24, Telephone Interception and Eavesdropping; DOD Directive 5200.26, Defense Investigative Program; DOD Directive 5200.27, Acquisition of Information Concerning Persons and Organizations Not Affiliated with the Department of Defense; Secretary of the Navy Instruction 3820.2D, Investigative and Counterintelligence Collection and Retention Guidelines Pertaining to the Department of the Navy; Secretary of the Navy Instruction 5520.3, Criminal and Security Investigations and Related Activities Within the Department of the Navy; E.O. 9297; and E.O. 12036, United States Intelligence Activities.

PURPOSE(S):

The information in this system is (was) collected to meet the investigative, counterintelligence, and security responsibilities of the DON. This includes personnel security, internal security, criminal, and other law enforcement matters all of which are essential to the effective operation of the Department. The records in this system are used to make determinations of: suitability for access or continued access to classified information; suitability for employment or assignment; suitability for access to military installations or industrial firms engaged in government projects/contracts; suitability for awards or similar benefits; use in current law enforcement investigation of any type including applicants; use in judicial or adjudicative proceedings including litigation or in accordance with a court order; insurance claims including workmen's compensation; provide protective services under the DOD Distinguished Visitor Protection Program and to assist the U.S. Secret Service in meeting its responsibilities; used for public affairs or publicity purposes such as wanted persons, etc; referral of matters under their cognizance to federal, state or local law enforcement authorities including criminal prosecution, civil court action or regulatory order; advising higher authorities and naval commands of the important developments impacting on security, good order or discipline; reporting of statistical data to naval commands and higher authority; input into the Defense Central Index of Investigations (DCII).

Users of the records in this system include NIS employees who require access for operational, administrative, or supervisory purposes; DOD criminal investigative and intelligence units; DOD components making suitability determinations.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To law enforcement or investigatory authorities for law enforcement purposes.

To federal intelligence/counterintelligence agencies of matters under their purview.

To foreign government organizations of criminal and counterintelligence information necessary for the prosecution of justice, or for mutual security and protection.

To other investigative units (federal, state, or local) for whom the investigation was conducted, or who are engaged in regulatory, criminal

investigative and intelligence activities; to defense counsel in the course of acquiring information.

To officials and employees of the National Archives for historical purposes.

To commercial insurance companies in those instances in which they have a legitimate interest in the results of the investigation, but only to that extent and provided an unwarranted invasion of privacy is not involved.

To victims of crimes to the extent necessary to pursue civil and criminal remedies.

The "Blanket Routine Uses" that appear at the beginning of the Department of the Navy's compilation of systems notices also apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS:

STORAGE:

Paper and automated records.

RETRIEVABILITY:

NIS permanent files are filed by terminal digit number. In order to locate the file it is necessary to query the Defense Central Index of Investigations (DCII) computer using the name of the subject and at least one other personal identifier such as date of birth, place of birth, or Social Security Number. Files may also be retrieved by a case control number assigned at the time the investigation is initiated. Copies of the files in the NISROs and Resident Agencies are retrieved by name. Consolidated Evidence Facility and Regional Forensic Lab information is retrieved by name, case control number, submitting agency log number, log numbers, or lab numbers.

SAFEGUARDS:

NIS investigative files (permanent and temporary) are maintained and stored in open shelves and filing cabinets located in secured areas accessible only to authorized personnel. Controls have been established to restrict computer output to only authorized users at all system locations. Computer records are kept in secure continually manned areas and are accessible only to authorized computer operators. Dated files are retired to the Washington National Records Center where retrieval is restricted to NIS authorized personnel.

RETENTION AND DISPOSAL:

Retention of completed NIS investigative files on Personnel Security Investigations (PSI's) is authorized for 15 years unless adverse information is developed, in which case they may be retained for 25 years. PSI files on persons considered for affiliation with DOD will be destroyed within one year if the affiliation is not consummated.

Special Agent applicant records are retained for one year if the applicant declines offer of employment and five years if the applicant is rejected for employment.

Criminal files are retained for 25 years. Major investigations of a counterintelligence/security nature, of espionage or sabotage, may be retained permanently.

Investigations to have possible historical value may be offered to the National Archives for continued retention. Counterintelligence records on persons not affiliated with DOD must be destroyed within 90 days or one year under criteria set forth in DOD Directive 5200.27, unless retention is required by law or specifically approved by the Secretary of the Navy.

Decentralized consolidated evidence files and decentralized laboratory report files are destroyed after 5 years unless circumstances require longer retention.

Files retained in the NISRO's and resident agencies are temporary and are destroyed after 90 days or one year, as appropriate.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, Naval Investigative Service Command, Washington, DC 20388–5000 has ultimate responsibility for all NIS file holdings. Management of NIS permanent files is the direct responsibility of the Head, Administration Department. Regional directors are responsible for files retained in their NISRO subordinate resident agencies.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Commander, Naval Investigative Service Command, Washington, DC 20388–5000. Requests must contain the full name of the individual and at least one additional personal identifier such as date and place of birth, or Social Security Number. Persons submitting written requests must properly establish their identity to the satisfaction of the NIS. This can be accomplished by either submitting a notarized signature or providing an unsworn declaration that states "I declare under perjury or penalty under the laws of the United States of America that the foregoing is true and correct." Attorneys or other persons acting on behalf of a subject of a record must provide a notarized authorization from the subject of the record.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Commander, Naval Investigative Service Command, Washington, DC 20388–5000. Requests must contain the full name of the individual and at least one additional personal identifier such as date and place of birth and Social Security Number. Persons submitting written requests must properly establish their identity to the satisfaction of the NIS. This can be accomplished by either submitting a notarized signature or providing an unsworn declaration that states "I declare under perjury or penalty under the laws of the United States of America that the foregoing is true and correct."

Attorneys or other persons acting on behalf of a subject of a record must provide a notarized authorization from the subject of the record.

CONTESTING RECORD PROCEDURES:

The Department of the Navy rules for accessing records and contesting contents and appealing initial determinations by the individual concerned are published in Secretary of the Navy Instruction 5211.5; 32 CFR part 701; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Individuals concerned, other records of the activity, investigators and witnesses.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Parts of this system may be exempt pursuant to 5 U.S.C. 552a(j)(2) and (k)(1), (k)(3), (k)(4), (k)(5), and (k)(6), as applicable.

An exemption rule for this system has been promulgated in accordance with requirements of 5 U.S.C. 553(b)(1), (2), and (3), (c) and (e) and published in 32 CFR part 701. For additional information, contact the system manager.

BILLING CODE 3810–01–F

DEPARTMENT OF EDUCATION

[CFDA No.: 84.028A]

Regional Resource and Federal Centers Program; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1993

Purpose of Program: To support the establishment and operation of Regional

Resource Centers that provide consultation, technical assistance, and training to State educational agencies, and through those State educational agencies, to local educational agencies and to other appropriate public agencies providing special education and related services and early intervention services. The purpose of this assistance is to aid these agencies in providing early intervention, special education, and related services to infants, toddlers, children, and youth with disabilities and their families.

The priority for this program supports AMERICA 2000, the President's strategy for moving the Nation toward the National Educational Goals, by assisting those with disabilities through improved services and better trained service providers.

Eligible Applicants: Institutions of higher education, private nonprofit organizations, State educational agencies, public agencies, or combinations of these agencies and institutions, such as combinations including one or more local educational agencies within particular regions of the United States.

Note: The Department is not bound by any estimates in this notice.

Applications Available: December 14, 1992.

Deadline for Transmittal of Applications: February 5, 1993.

Deadline of Intergovernmental Review: April 8, 1993.

Available Funds: $6,778,000.

Estimated Range of Awards: $850,000–1,410,800.

Estimated Size of Awards: $1,130,000.

Estimated Number of Awards: 6.

Project Period: Up to 60 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR part 305.

Priority: Under 34 CFR 75.105(c)(3) the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only applications that meet this absolute priority:

Absolute Priority—Regional Resource Centers

This priority supports six Regional Resource Centers (RRC) as described in 34 CFR 305.10.

Invitational Priorities: Within the absolute priority specified in this notice, the Secretary is particularly interested in applications that meet the following invitational priorities.

However, under 34 CFR 75.105(c)(1) an application that meets one or more of these invitational priorities does not receive competitive or absolute preference over other applications:

Invitational Priority 1: Projects that assist States in identifying and addressing current issues, such as (1) meeting the needs of a diverse group of students with disabilities including minority and medically fragile children, (2) the retention and recruitment of special education personnel, and (3) improving the outcomes for students with disabilities as they make the transition from school to the work place, e.g., employment and independent living.

Invitational Priority 2: Projects that propose to network with other Regional Resource Centers, technical assistance providers, clearinghouses, and dissemination projects regarding sound educational practices and that address the needs of States in the region.

FOR APPLICATIONS OR INFORMATION CONTACT: Marie Roane, U.S. Department of Education, 400 Maryland Avenue SW., room 4623, Switzer Building, Washington, DC 20202–2644. Telephone (202) 205–8451. Deaf and hearing impaired individuals may call (202) 205–8170 for TDD services.

Program Authority: 20 U.S.C. 1421

Dated: December 4, 1992.

Robert R. Davila,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Financial Assistance Award; Intent To Award a Noncompetitive Grant

AGENCY: U.S. Department of Energy.

ACTION: Notice of noncompetitive grant.

SUMMARY: The DOE announces that it plans to award a grant to the Georgia Emergency Management Agency (GEMA), P.O. Box 18055, Atlanta, Georgia 30316–0055, to support emergency planning and response and environmental monitoring activities in the State of Georgia as related to the DOE's Savannah River Site (SRS). The grant will cover a five-year period with estimated DOE support of $3,209,330 for the period. Funds of $956,650 will be provided for the first budget period. Pursuant to § 600.7(6)(2)(i)(C) of the DOE Assistance Regulations (10 CFR part 600), DOE has determined that a noncompetitive award is appropriate since the applicant is a unit of government and the activity to be supported is related to performance of a governmental function within the subject jurisdiction, thereby precluding DOE provision of support to another entity.

FOR FURTHER INFORMATION CONTACT: Elizabeth T. Martin, U.S. Department of Energy, Savannah River Field Office, Contracts Division, P.O. Box A, Aiken, SC 29802, Telephone: (803) 725–2191.

SUPPLEMENTARY INFORMATION: The State of Georgia will maintain and enhance the emergency planning and response and environmental monitoring capabilities to assure the citizens of Georgia that their health, safety and environment are being protected through existing DOE programs and vigorous independent monitoring and oversight by Georgia officials. Activities will include: Develop and maintain effective radiological and hazardous material emergency preparedness capabilities for responding to an emergency at the SRS; coordinate state and local emergency plans and procedures development, training, and public awareness programs and emergency response exercise participation; and coordinate and oversee environmental analysis and monitoring programs and activities in the vicinity of the SRS (surface, ground

and drinking water, air, crops, milk, soil and vegetation).

GEMA is the qualified State regulatory agency to perform the functions covered under this grant. In addition, the Environmental Protection Division of the Georgia Department of Natural Resources, the primary State agency for radiological monitoring and emergency response, will conduct activities under this grant through a contractual arrangement with GEMA.

DOE has determined that this award to GEMA on a noncompetitive basis is appropriate.

Issued in Aiken, South Carolina, on December 1, 1992.

Robert E. Lynch,

Head of the Contracting Activity Designee, DOE Savannah River Field Office.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. RP92-237-002 and 003]

Alabama-Tennessee Natural Gas Co.; Proposed Change in FERC Gas Tariff

December 4, 1992.

Take notice that on December 1, 1992, Alabama-Tennessee Natural Gas Company ("Alabama-Tennessee"), Post Office Box 918, Florence, Alabama 35631, tendered for filing as part of its FERC Gas Tariff, First Revised Volume No 1, the following tariff sheets with a proposed effective date of April 1, 1993:

Sub. 36th Revised Sheet No. 4

Alabama-Tennessee states that this filing is being made to comply with the Commission's October 30, 1992 "Order Accepting and Suspending Tariff Sheets Subject to Refund and Conditions, and Establishing Hearing" ("Order"), 61 FERC ¶ 61,164 (1992), in which Alabama-Tennessee was directed, *inter alia*, to refile its rates for its Rate Schedule G and SG sales services based on projected units of service under these rate schedules and to file revised purchased gas adjustment demand allocation factors and revised rates which reflect current levels of jurisdictional services.

Alabama-Tennessee has requested such waivers of the Commission's Regulations that may be necessary to permit these tariff sheets to become effective as proposed.

Alabama-Tennessee states that copies of its tariff filing have been mailed to all of its jurisdictional customers and interested State commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-29945 Filed 12-9-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. GT93-15-000]

Alabama-Tennessee Natural Gas Co.; Proposed Change in FERC Gas Tariff

December 4, 1992.

Take notice that on December 1, 1992, Alabama-Tennessee Natural Gas Company ("Alabama-Tennessee"), Post Office Box 918, Florence, Alabama 35631, tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheets with a proposed effective date of December 1, 1992:

Third Revised Sheet No. 99
Third Revised Sheet No. 100

Alabama-Tennessee states that this filing reflects the information required under § 154.41 of the Commission's Regulations, 18 CFR 154.41 (1992), in connection with the recent realignment of services effectuated by certain jurisdictional resale customers of Alabama-Tennessee. In addition, Alabama-Tennessee has made corrections to certain other incidental typographical errors that are reflected on the tariff sheets currently in effect which this filing would supercede.

Alabama-Tennessee has requested such waivers of the Commission's Regulations that may be necessary to permit these tariff sheets to become effective as proposed.

Alabama-Tennessee states that copies of its tariff filing have been mailed to all of its jurisdictional customers and interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 or rule 214 of the Commission's Rules of Practice and Procedure 18 CFR 385.211 or 385.214. All such motions or protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-29946 Filed 12-9-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP93-39-000]

ANR Pipeline Co., Proposed Changes in FERC Gas Tariff

December 4, 1992.

Take notice that on December 1, 1992, pursuant to section 4 of the Natural Gas Act and part 154 of the Federal Energy Regulatory Commission's ("Commission") Regulations thereunder, ANR Pipeline Company ("ANR") tendered for filing with the Commission Ninth Revised Sheet No. 570 of its FERC Gas Tariff, Original Volume No. 2 with a proposed effective date of January 1, 1993.

ANR states that the purpose of the instant filing is to reflect an increase from $267,912 to $269,695 in the monthly charge paid by the High Island Offshore System ("HIOS") to ANR pursuant Rate Schedule X-64 under Original Volume No. 2 of ANR's F.E.R.C. Gas Tariff. Rate Schedule X-64 is a Service Agreement dated August 4, 1977 between ANR and HIOS. Under the terms of this Service Agreement, which was approved by Commission Order issued July 6, 1978 at Docket No. CP78-134, ANR provides certain gas measurement, dehydration and related services for HIOS for the Grand Chenier, Louisiana facility. In addition, within this filing ANR is proposing that the Rate Schedule X-64 tariff language requiring an annual redetermination filing by ANR before the Commission to justify and adjust the monthly charge to HIOS be eliminated. ANR believes that good cause exists for the Commission to authorize the implementation of this proposed change.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before

December 11, 1992 appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP92–45–002]

ANR Pipeline Co.; Proposed Changes in FERC Gas Tariff

December 4, 1992.

Take notice that on December 1, 1992, ANR Pipeline Company ("ANR") tendered for filing with the Federal Energy Regulatory Commission ("Commission") Substitute Eighth Revised Sheet No. 570 under Rate Schedule X–64 of Original Volume No. 2 of its FERC Gas Tariff to be effective for refund purposes for the period January 1, 1992 through December 31, 1992.

ANR states that this compliance filing is being made to reduce the monthly charge under Rate Schedule X–64 to reflect ANR's Offer of Settlement approved by the Commission in a Letter Order dated October 26, 1992 in Docket No. RP92–45–001. The reduction to the monthly charge is in accordance with the Commission's Letter Orders dated December 31, 1991 and October 26, 1992 in Docket Nos. RP92–45–000 and RP92–45–001, respectively.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Federal Energy Regulatory Commission

[Docket No. TQ93–2–31–000]

Arkla Energy Resources; Filing of Revised Tariff Sheets Reflecting Quarterly PGA Adjustment

December 4, 1992.

Take notice that on December 1, 1992, Arkla Energy Resources (AER), a division of Arkla, Inc., tendered for filing six copies of the following revised tariff sheets to become effective January 1, 1993;

Rate Schedule No. X-26

Original Volume No. 3
Twenty First Revised Sheet No. 185.1

Rate Schedule No. G–2

Second Revised Volume No. 1
Sixteenth Revised Sheet No. 11

Rate Schedule No. CD

Second Revised Volume No. 1
Sixteenth Revised Sheet No. 16

AER states that the tariff sheets reflect AER's third party quarterly PGA filing made subsequent to its annual PGA effective April 1, 1992 under the Commission's Order Nos. 483 and 483–A.

AER states that the proposed changes reflect an increase in AER's system cost of $2,702.628 and would increase its revenue from jurisdictional sales and service under Rate Schedule G–2 by $2,105 for the PGA of January, February and March, 1993 as adjusted.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

[FR Doc. 92–29949 Filed 12–9–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP93–42–000]

Colorado Interstate Gas Co.; Proposed Changes in FERC Gas Tariff

December 4, 1992.

Take notice that on December 2, 1992, Colorado Interstate Gas Company ("CIG"), Post Office Box 1087, Colorado Springs, Colorado 80944, tendered for filing the following tariff sheets to its FERC Gas Tariff, Original Volume No. 3:

Second Revised Sheet No. 76
Second Revised Sheet No. 77
Original Sheet No. 77A
Original Sheet No. 77B
Original Sheet No. 77C
Original Sheet No. 77D
Original Sheet No. 77E
Original Sheet No. 77F
Original Sheet No. 77G
Original Sheet No. 77H
Third Revised Sheet No. 78

In general, these sheets revise the General Terms and Conditions of CIG's Volume No. 3 Tariff provisions for dealing with current and future transportation imbalances, on an interim basis until October 1, 1993, or such other date on which the Commission approves CIG's restructuring of services under Order No. 636. Specifically, the tariff is revised to eliminate CIG's current provisions for assessing balancing charges and penalties, and replaces those provisions with new methods for clearing imbalances including in-kind volume paybacks, Imbalance Transfers, Imbalance Swaps, and Cash Out procedures.

CIG states that acceptance of its proposal will allow it to implement a more effective and timely method, than is currently in place on CIG's system, for dealing with transportation imbalances. Further, CIG states that this method will provide the speed and efficiency which is needed to ensure that current imbalances on CIG's system are fully resolved prior to the full restructuring of CIG's services under Order No. 636, anticipated to take place on October 1, 1993. Accordingly, CIG believes that these tariff provisions will significantly ease the transition that CIG and the public served by CIG must make from doing business in the traditional manner to the way of doing business prescribed by Order No. 636.

CIG has requested that the Commission accept this filing, to become effective on January 1, 1993.

CIG states that copies of its filing were served on all holders of its FERC Gas Tariff, Original Volume No. 3.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission,

825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-29950 Filed 12-9-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. RP93-38-000 and TM93-2-33-000]

El Paso Natural Gas Co.; Tariff Filing

December 4, 1992.

Take notice that on December 1, 1992, El Paso Natural Gas Company ("El Paso"), gave notice, pursuant to part 154 of the Federal Energy Regulatory Commission ("Commission") Regulations Under the Natural Gas Act, certain tariff sheets to its FERC Gas Tariffs, First Revised Volume No. 1-A and Second Revised Volume No. 1 to implement Gas Research Institute's ("GRI") interim funding mechanism to become effective January 1, 1993.

El Paso states that the currently effective GRI volumetric surcharge of 1.47 cents per dth remains unchanged from last year; however, commencing January 1, 1993, such volumetric surcharge will be the first rate increment to be discounted in the event El Paso discounts its commodity/usage rates. In addition, commencing January 1, 1993, the Commission has authorized an 8 cents per dth per month uniform reservation surcharge which will be applicable to firm Shipper's Transportation Contract Demand or Billing Determinant. With respect to transactions involving discounted reservation charges, El Paso's total annual 1993 GRI funding responsibility related to such transactions, shall be limited to ten percent of its total 1991 GRI contribution.

El Paso also states that it has submitted for filing tariff sheets to reflect the removal from its Second Revised Volume No. 1 Tariff of Section 20, Gas Research Institute General Research, Development and Demonstration Funding Unit Adjustment Provision and Section 23, Annual Charge Adjustment Provision ("ACA"), contained in the General Terms and Conditions of said tariff. Inasmuch as the GRI and ACA surcharges are only applicable to transportation services, the removal of Sections 20 and 23 alleviates any change of double recovery of the GRI and ACA surcharges.

El Paso requests that the tendered tariff sheets be accepted for filing and permitted to become effective January 1, 1993.

El Paso states that copies of the filing were served upon El Paso's interstate pipeline system transportation and sales customers and interested State regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[TM93-2-24-001]

Equitrans, Inc.; Proposed Change in FERC Gas Tariff

December 4, 1992.

Take notice that Equitrans, Inc. ("Equitrans"), on December 2, 1992, tendered for filing with the Federal Energy Regulatory Commission ("Commission") the following substitute tariff sheet to its FERC Gas Tariff, Original Volume No. 1, to replace the previously filed herein on November 30, 1992:

Substitute Forty-Second Revised Sheet No. 10

The proposed tariff sheet is intended to reflect the Commission's 1993 Gas Research Institute (GRI) funding unit from customers. The 1993 GRI unit surcharge approved by the Commission is $0.0800 per dekatherm (dth) per month demand surcharge and $0.0147 per dth commodity surcharge pursuant to Order No. 378.

The reason for submitting the substitute sheet is to reflect the rate revision contained in Equitrans' December 2, 1992, Interim Purchased Gas Adjustment filing in Docket No.

Pursuant to § 154.51 of the Commission's Regulations, Equitrans requests that the Commission grant any waivers necessary to permit the tariff sheets contained in the filing noticed herein to become effective January 1, 1993.

Equitrans states that a copy of its filing has been served upon its purchasers, interested state commissions, and all parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-29952 Filed 12-9-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. RP93-41-000 and RP92-179-002]

Florida Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

December 4, 1992.

Take notice that on December 1, 1992 Florida Gas Transmission Company (FGT) tendered for filing to become part of its FERC Gas Tariff, the following tariff sheets, to become effective January 1, 1993:

Thirty-Fifth Revised Sheet No. 8
Twelfth Revised Sheet No. 8A
Tenth Revised Sheet No. 8B

FGT states that section 25 of its tariff contains language that establishes a mechanism to permit recovery of transitional costs via a volumetric surcharge. The instant filing includes certain transitional costs included in the TCR Account as of September 30, 1992, and reflects a TCR surcharge for the six months commencing January 1, 1993.

FGT states that the filing reflects the addition of approximately $67.2 million in payments made to producer suppliers

to buy out of or otherwise reform FGT's existing supply portfolio. FGT further states that the buy-out and buy-down costs can be classified into two categories. The first category includes $2.4 million of costs incurred in the period from May, 1992 through September, 1992, of which $1.8 million has been included for recovery. The second portion of the filing includes costs for which FGT had previously sought the authority to defer recovery, pending the opportunity to demonstrate that such costs were more properly includable in an Order No. 636 gas supply realignment mechanism. By order issued June 30, 1992, the Commission denied the requested waiver and deferral, and required FGT to include such costs in its existing TCR mechanism. On October 5, 1992 the Commission denied the request for stay and rehearing. FGT states that pursuant to the Commission's orders in Docket No. RP92–179, the filing also reflects $76.3 million of costs which it has not included in previous transitional cost filings, of which $65.4 million has been included for recovery.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with §§ 385.211 and 385.214 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92–29953 Filed 12–9–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TM93–1–110–000]

Iroquois Gas Transmission System, L.P.; Proposed Changes to FERC Gas Tariff

December 4, 1992.

Take notice that Iroquois Gas Transmission System, L.P. ("Iroquois") on December 1, 1992 tendered for filing the following revised tariff sheets to its FERC Gas Tariff proposed to be effective January 1, 1993.

Original Volume No. 1

Fifth Revised Sheet No. 4

Iroquois states that the above tariff sheets were filed to reflect a GRI Charge Adjustment of 8.0¢ per dth of monthly demand and 1.47¢ per dth of non-discounted commodity pursuant to the Commission's Order of August 28, 1992 in Docket No. RP92–133–000 approving the Gas Research Institute's 1993 interim funding mechanism.

Iroquois requested that the above tariff sheets become effective January 1, 1993 to coincide with the effective date of the new GRI funding mechanism per the Commission's Order in RP92–133–000 and Iroquois' initiation as a GRI member pipeline.

Iroquois states that copies of the filing were served on Iroquois's jurisdictional customers, interested State regulatory commissions, and other interested parties.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedures. All such petitions or protests should be filed on or before December 11, 1992.

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 92–29954 Filed 12–9–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TM93–2–46–000]

Kentucky West Virginia Gas Co.; Proposed Change in FERC Gas Tariff

December 4, 1992.

Take notice that Kentucky West Virginia Gas Company (Kentucky West) on December 2, 1992, tendered for filing with the Federal Energy Regulatory Commission (Commission) Fifth Revised Sheet No. 44 to its FERC Gas Tariff, Second Revised Volume No. 1, to become effective January 1, 1993.

Kentucky West states the revised tariff sheet amends its Gas Research Institute (GRI) funding charge to place in effect on January 1, 1993, the new Gas Research Institute funding unit of $.0147 per dth on all applicable nondiscounted commodity units and nondiscounted one-part rates for transportation service, including those associated with the bundled sales transactions. Additionally, there will be an $0.08 per dth per month demand or reservation surcharge on all firm sales or transportation entitlements. This funding unit was approved by the FERC in Opinion No. 378, issued on November 16, 1992, under Docket No. RP92–133–001.

Kentucky West states that, by its filing, or any request or statement made therein, it does not waive any rights to collect amounts, nor the right to collect carrying charges applicable thereto, to which it is entitled pursuant to the mandate of the United States Court of Appeals for the Fifth Circuit issued on March 6, 1986, in Kentucky West Virginia Gas Co. v. FERC, 780 F.2d 1231 (5th Cir. 1986), or to which it becomes entitled pursuant to any other judicial and/or administrative decisions.

Kentucky West states that a copy of its filing has been served upon each of its jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulation Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 285.214 of the Commission's Rules and Practice and Procedure. All such motions or protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TQ93–3–46–000]

Kentucky West Virginia Gas Co.; Proposed Change in FERC Gas Tariff

December 4, 1992.

Take notice that Kentucky West Virginia Gas Company (Kentucky West) on December 1, 1992, tendered for filing with the Federal Energy Regulatory Commission (Commission) an Out-of-Cycle PGA filing, which includes Forty-Third Revised Sheet No. 41 to its FERC Gas Tariff, Second Revised Volume No. 1, to become effective December 1, 1992. The revised tariff sheet reflects a current increase of $0.2056 per dth in the average cost of purchased gas resulting

in a Weighted Average Cost of Gas of $2.2974 per dth.

Kentucky West states that effective December 1, 1992, pursuant to its obligations under various gas purchase contracts, it has specified a total price of $2.3100 per dth, inclusive of all taxes and any other production-related cost add-ons, that it would pay under these contracts.

Pursuant to § 154.51 of the Commission's regulations, Kentucky West requests waiver of the thirty day notice requirement to permit the tariff sheet attached hereto to become effective on December 1, 1992. In addition, Kentucky West requests waiver of § 154.304 of the Commission's regulations and any other provisions of the Commission's regulations necessary to permit the attached tariff sheet to become effective on December 1, 1992.

Kentucky West states that, by its filing, or any request or statement made therein, it does not waive any rights to collect amounts, nor the right to collect carrying charges applicable thereto, to which it is entitled pursuant to the mandate of the United States Court of Appeals for the Fifth Circuit issued on March 6, 1986, in *Kentucky West Virginia Gas Co.* v. *FERC*, 780 F.2d 1231 (5th Cir. 1986), or to which it is or becomes entitled pursuant to any other judicial and/or administrative decisions.

Kentucky West states that a copy of its filing has been served upon each of its jurisdictional customers and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ93-3-16-000; TM93-3-16-000, and TA93-2-16-001]

National Fuel Gas Supply Corp.; Proposed Changes in FERC Gas Tariff

December 4, 1992.

Take notice that on November 27, 1992, National Fuel Gas Supply Corporation ("National") tendered for filing the following revised tariff sheets as part of its FERC Gas Tariff, Second Revised Volume No. 1, to become effective on January 1, 1993:

(A) Sub Twenty-Seventh Revised Sheet No. 5

(B) Seventh Revised Sheet No. 6

National states that the filing is made to implement (a) an Update to Annual Purchased Gas Adjustment ("PGA") rate change, and (b) Gas Research Institute ("GRI") surcharges to National's sales, transportation and storage customers as approved by the Commission at Docket No. RP92-133-000 (Phase I). National's revised demand and commodity rates are $10.97 per Dt and 286.05 cents per Dt respectively.

National further states that copies of this filing were served upon the Company's jurisdictional customers and the Regulatory Commissions of the States of New York, Ohio, Pennsylvania, Delaware, Massachusetts and New Jersey.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 or 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All such motions to intervene or protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP93-5-003 and 004]

Northwest Pipeline Corp.; Proposed Change in FERC Gas Tariff

December 4, 1992.

Take Notice that on November 30, 1992, Northwest Pipeline Corporation ("Northwest") tendered for filing and acceptance the following tariff sheets

Second Revised Volume No. 1

Substitute Twenty-first Revised Sheet No. 10
Substitute Twentieth Revised Sheet No. 11
Second Substitute Fifteenth Revised Sheet No. 13

First Revised Volume No. 1-A

Substitute Sixteenth Revised Sheet No. 201

Northwest states that the purpose of this filing is to comply with the Commission's October 30, 1992 "Order Rejecting Tariff Sheets, Accepting and Suspending Tariff Sheets, Subject to Refund and Conditions, Establishing Hearing Procedures" (i) to refile interruptible transportation rates to reflect the project level of interruptible throughout and costs allocated to interruptible transportation service; (ii) provide a cost mitigation study, (iii) provide justification for rolled-in rates, and (iv) refile its request for waiver of the Commission's PGA regulations. Northwest has challenged portions of the Commission's October 30 Order requiring that it make this filing. Northwest reserves the right and gives notice that it will refile any tariff sheets and rates Docket No. RP93-5-003 and 004 for affected periods, should Northwest ultimately be successful on its request for rehearing.

Northwest states that a copy of this filing has been served on all jurisdictional customers, state regulatory commissions in its market area, as well as all parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. TQ93-2-7-000 and TM93-2-7-000]

Southern Natural Gas Co.; Proposed Changes to FERC Gas Tariff

December 4, 1992.

Take notice that on November 30, 1992, Southern Natural Gas Company ("Southern") tendered for filing the following revised sheets to its FERC Gas Tariff, Sixth Revised Volume No. 1:

Second Revised One Hundred Twenty-Fourth Revised Sheet No. 4A
Second Revised Thirty-Seventh Revised Sheet No. 4B
Second Revised Forty-Third Revised Sheet No. 4J
Fourth Revised Sheet No. 30N
First Revised Sheet No. 30Z.08
Fourth Revised Sheet No. 45I

Southern states that the proposed tariff sheets are being filed with proposed effective date of January 1, 1993. The aforesaid tariff sheets reflect an increase of $.18 per Mcf at 1,000 Btu in the commodity component of Southern's rates from its last scheduled PGA filing in Docket No. TQ93-1-7-000 as a result of projected changes in Southern's cost of purchased gas. Additionally, the aforesaid tariff sheets implement the Gas Research Institute's ("GRI") revised surcharges for 1993 of 1.47¢ commodity GRI Adjustment Charge and $.08 demand GRI Adjustment Charge.

Southern states that copies of the filing were mailed to all of Southern's jurisdictional purchasers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (§§ 385.214, 385.211). All such petitions or protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make the protestant parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket Nos. RP93-37-000 and TM93-2-9-000]

Tennessee Gas Pipeline Co.; Rate Change Pursuant to Tariff Adjustment Provisions

December 4, 1992.

Take notice that on December 1, 1992, Tennessee Gas Pipeline Company (Tennessee) is filing the revised tariff sheets to (i) change its GRI funding method under Article XXVII and (ii) revise its recovery of take-or-pay and contract reformation costs pursuant to Article XXX of the General Terms and Conditions of Volume One of its FERC Gas Tariff. Tennessee is also revising the billing provisions of the General Terms and Conditions to limit billing adjustments to twelve months following the production month to which the original billing applied. Tennessee states that the following changes are proposed to be effective January 1, 1993:

Fourth Revised Volume No. 1

Second Revised Sheet No. 20
Second Revised Sheet No. 20A
Second Revised Sheet No. 24
Second Revised Sheet No. 24A
Second Revised Sheet No. 26
Second Revised Sheet No. 26A
Second Revised Sheet No. 29
Second Revised Sheet No. 29A
Fifth Revised Sheet No. 30
First Revised Sheet No. 30A
First Revised Sheet No. 30C
First Revised Sheet No. 30D
First Revised Sheet No. 38
Second Revised Sheet No. 39
First Revised Sheet No. 40
First Revised Sheet No. 41
First Revised Sheet No. 42
First Revised Sheet No. 290
First Revised Sheet No. 331
First Revised Sheet No. 332

Original Volume No. 2

29th Revised Sheet No. 5
4th Revised Sheet No. 5A
27th Revised Sheet No. 6
3rd Revised Sheet No. 6A
11th Revised Sheet No. 7
3rd Revised Sheet No. 7A
12th Revised Sheet No. 8
3rd Revised Sheet No. 8A
15th Revised Sheet No. 9
7th Revised Sheet No. 9A
15th Revised Sheet No. 10
2nd Revised Sheet No. 10A

Tennessee states that the purpose of the revisions to Sheet Nos. 38-42 is to adjust Tennessee's transition cost demand surcharge effective January 1, 1993 to reflect the recovery of an additional $2 million, including interest, of new demand costs. The additional costs of $4,789,094 have been allocated under an equitable sharing formula of 50% absorption—41.8% demand—8.2% volumetric in conformance with the Stipulation and Agreement approved by Order of the Commission on June 25, 1992, in docket Nos. RP86-119 *et al.* The resulting revised demand surcharges are shown on the revised sheets; the volumetric charges remain constant.

Tennessee states that the purpose of Sheet Nos. 331.332 is to amend Tennessee's GRI funding mechanism pursuant to the Commission's order on August 28, 1992, in Docket No. RP92-133. The revisions establish a demand surcharge of $0.08 per dth applicable to firm sales and non-discounted throughput. Sheet Nos. 20, 20A, 24, 24A, 26, 26A, 29, 29A, 30, 30A-D reflect the new demand surcharge. The demand and commodity surcharges have been added to rate schedules FSST-E, FSST-NE, SST-E, and SST-NE since third party gas can be transported under these schedules.

Tennessee states that copies of the filing are being mailed to all affected customers and state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 11, 1992.

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

[FR Doc. 92-29960 Filed 12-9-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA93-1-17-000]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

December 4, 1992.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on December 2, 1992 tendered for filing as part of its FERC Gas Tariff, six copies of tariff sheets listed on Appendix A attached to the filing.

The proposed effective date of these revised tariff sheets is February 1, 1993.

Texas Eastern states that the tariff sheets are being filed pursuant to section 23, Purchased Gas Cost Adjustment, and section 26, Electric Power Cost (EPC) Adjustment, contained in the General Terms and Conditions of Texas Eastern's FERC Gas Tariff. This filing constitutes Texas Eastern's regular annual PGA filing to be effective February 1, 1993 pursuant to 18 CFR 154.305. Texas Eastern states that in compliance with Section 154.305(a)(2) of the Commission's Regulations, a report containing detailed computations for the derivation of the current adjustment to be applied to Texas Eastern's effective rates is enclosed in the format prescribed by FERC Form No. 542-PGA (Revised) and FERC's Notice of Criteria for Accepting Electronic PGA Filings dated April 12, 1991.

Texas Eastern states that the PGA changes proposed in this filing consist of Current Adjustments and Surcharge Adjustments as follows for the components of Texas Eastern's sales rates:

Rate component	Current adjustment	Surcharge adjustment
Demand	$0.050/dth	$0.176/dth
Commodity	($0.5247)/dth	$0.1103/dth

Texas Eastern states that these current adjustments represent the change in Texas Eastern's projected quarterly cost of purchased gas from Texas Eastern's November 1, 1992 quarterly filing in Docket No. TQ93-2-17. The Surcharge Adjustments are designed to amortize the Current Deferral Subaccount Balance in Account 191 as of September 30, 1992 over the 12-month period beginning February 1, 1993.

Texas Eastern states that the filing also constitutes Texas Eastern's semiannual adjustment to reflect changes in electric power costs pursuant to Section 26. These changes in rates for Sales and Transportation services are based upon the projected annual electric power cost incurred in the operation of transmission compressor stations with electric motor prime movers for the 12 months beginning February 1, 1993 and to also reflect the EPC Surcharge which is designed to clear the balance in the Deferred EPC Account as of October 31, 1992.

Texas Eastern states that copies of its filing have been served on all Authorized Purchasers of Natural Gas from Texas Eastern and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commision's Rules and Regulations. All such motions or protests should be filed on or before December 21, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on a file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 92-29963 Filed 12-9-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA93-1-18-000]

Texas Gas Transmission Corp., Proposed Changes in FERC Gas Tariff

December 4, 1992.

Take notice that Texas Gas Transmission Corporation (Texas Gas), on December 1, 1992, tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Sixty-fifth Revised Sheet No. 10
Sixty-fourth Revised Sheet No. 10A
Forty-sixth Revised Sheet No. 11
Thirty-sixth Revised Sheet No. 11A
Thirty-fifth Revised Sheet No. 11B

Texas Gas states that these tariff sheets reflect changes in projected purchased gas costs and the unrecovered purchased gas cost surcharge pursuant to the Annual PGA provision of the Purchased Gas Adjustment clause of its FERC Gas Tariff and are proposed to be effective February 1, 1993. Texas Gas further states that the proposed tariff sheets reflect a current commodity rate increase of $.1102 per MMBtu from the rates set forth in the Out-of-Cycle PGA filed November 25, 1992 (Docket No. TQ93-3-18), and an increase of $.3092 per MMBtu in the Unrecovered Purchased Gas Cost surcharge. The D-1 demand rates increases by $.01 per MMBtu and the SGN Standby rates increase by $.0007 to $.0010. No changes in the D-2 demand rates are proposed in the instant filing.

Texas Gas states that copies of the filing are being mailed to all of Texas Gas's jurisdictional sales customers an interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such protests or motions should be filed on or before December 21, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. TM93-5-29-000]

Transcontinental Gas Pipe Line Tariff Filing

December 4, 1992.

Take notice that Transcontinental Gas Pipe Line Corporation (TGPL) on December 1, 1992 tendered for filing Fifth Revised Sheet No. 60 to its FERC Gas Tariff, Third Revised Volume No. 1, proposed to be effective January 1, 1993.

TGPL states that the purpose of the filing is to reflect in TGPL's rates commencing January 1, 1993 the GRI demand/reservation surcharge of $0.08 per Mcf (or dt) per month, and the GRI volumetric surcharge of 1.47¢ per dt (1.51¢ per Mcf) which TGPL is

authorized to collect pursuant to the Commission's August 28 Order and section 24 of the General Terms and Conditions of TGPL's Volume No. 1 Tariff. As indicated on the tariff sheet submitted herein, the applicability of such GRI surcharges are subject to certain limitations with regard to selectively discounted transportation transactions.

TGPL served copies of the filing to its customers and interested State Commissions. In accordance with provisions of Section 154.16 of the Commission's Regulations, copies of this filing are available for public inspection, during regular business hours, in a convenient form and place at TGPL's main offices at 2800 Post Oak Boulevard in Houston, Texas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commissions's Rules and Regulations. All such motions or protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP92–165–008]

Trunkline Gas Co.; Proposed Changes In FERC Gas Tariff

December 4, 1992.

Take notice that Trunkline Gas Company (Trunkline) on December 1, 1992 tendered for filing substitute tariff sheets to its FERC Gas Tariff, Original Volume Nos. 1 and 2 listed on Appendices A and B attached to the filing.

Trunkline proposes that these revised tariff sheets become effective November 1, 1992.

Trunkline states that these substitute tariff sheets are being filed to reflect the corrected ACA unit charge rate as filed by Trunkline on October 14, 1992 and accepted by Letter Order issued November 6, 1992 to be effective October 1, 1992.

Trunkline states that a copy of this filing is being served on all jurisdictional customers, interested state commissions and all parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TQ93–1–35–000]

West Texas Gas, Inc.; Filing

December 4, 1992.

Take notice that on December 2, 1992, West Texas Gas, Inc. ("WTG") filed Fourth Revised Sheet No. 4 to its FERC Gas Tariff, Revised Volume No. 1, proposed to be effective January 1, 1993. Second Revised Sheet No. 4 and the accompanying explanatory schedules constitute WTG's quarterly PGA filing submitted in accordance with the Commission's purchased gas adjustments regulations.

WTG states that hard copies of its filing were served upon WTG's customers and interested state commissions.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 and 385.214. All such motions or protests should be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92–29965 Filed 12–9–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket RP93–40–000]

Western Gas Interstate Co.; Change in Rates

December 4, 1992.

Take notice that on December 1, 1992, Western Gas Interstate Company ("Western"), pursuant to section 4 of the Natural Gas Act and part 154 of the Commission's Regulations thereunder, tendered for filing proposed changes to its FERC Gas Tariff to be effective January 1, 1993.

Western states that the rates and charges filed in this proceeding are based on the overall cost of service for the test period consisting of actual experience for the twelve months ending September 30, 1992, adjusted for known and measurable changes through June 30, 1992.

Western states that, following a Commission decision, its cost allocation has changed from previous rate cases because costs are now allocated to the jurisdictional portion of Western's Del Norte export facilities, which were not part of Western's jurisdictional system in its previous rate cases. In addition, Western has adopted the Straight Fixed Variable methodology of cost allocation, in accordance with the Commission's Order Nos. 636 and 636–A.

Any person desiring to be heard or to protest Western's filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such motions or protests must be filed on or before December 11, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Office of Hearings and Appeals

Cases Filed the Week of November 6 Through November 13, 1992

During the week of November 6 through November 13, 1992, the appeal and applications for other relief listed in the appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

Dated: December 3, 1992.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

Date	Name and location of applicant	Case No.	Type of submission
11/09/92	Texaco/Lilburn Texaco, Atlantic Beach, FL	RR321-120	Request for Modification/Rescission in the Texaco Refund Proceeding. Cases Filed the Week of November 13 Through November 20, 1992

During the Week of November 13 through November 20, 1992, the appeals and applications for exception or other relief listed in the appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy. Submissions inadvertently omitted from earlier lists have also been included.

Under DOE procedural regulations, 10 CFR part 205, any person who will be aggrieved by the DOE action sought in these cases may filed written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

Dated: December 3, 1992.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS
[Week of November 13 through November 20, 1992]

Date	Name and location of applicant	Case No.	Type of submission
Oct. 15,1992	Gulf/Litn Super Market, Atlantic Beach, FL	RR300-210	Request for modification/rescission in the Gulf refund proceeding. If granted: The April 24, 1992 Dismissal Letter (Case No. RF300-13609) issued to Litn Super Market would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Nov. 2, 1992	Gulf/123 Quick Mart, Atlantic Beach, FL	RR300-211	Request for modification/rescission in the Gulf refund proceeding. If granted: The October 25, 1991 Dismissal Letter (Case No. RF300-11803) issued to 123 Quick Mart would be modified regarding the firm's Application for Refund submitted in the Gulf refund proceeding.
Nov. 17, 1992	Public Utility District No. 2 of Grant County, WA, Ephrata, WA.	LFA-0249	Appeal of an information request denial. If granted: The October 16, 1992 Freedom of Information request denial issued by the DOE's Richland Field Office would be rescinded, and Public Utility District No. 2 of Grant County, WA would receive access to DOE information.
Nov. 18, 1992	Preston Gates Ellis & Rouvelas Meeds, Washington, DC.	LFA-250	Appeal of an Information Request Denial. If granted: The October 15, 1992 Freedom of Information Request Denial issued by the DOE's Savannah River Field Office would be rescinded, and Preston Gates Ellis & Rouvelas Meeds would receive access to a complete request of all proposals submitted by PRC-Environmental Management, Inc. in response to US DOE Proposal DE-RP09-92SSR18258.
Nov. 20, 1992	Texaco/Gay Meadows Texaco, Memphis, TN	RR321-121	Request for modification/rescission in the Texaco refund proceeding. If granted: The March 17, 1992 Decision and Order (Case No. RF321-18507) issued to Gay Meadows Texaco would be modified regarding the firm's Application for Refund submitted in the Texaco refund proceeding.

Office of Hearings and Appeals Week of October 12 Through October 16, 1992

During the week of October 12 through October 16, 1992, the decisions and orders summarized below were issued with respect to applications for relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Refund Applications

Commonwealth of Pennsylvania, 10/14/92, RF272–67007

The DOE issued a Decision and Order granting an Application for Refund filed by the Commonwealth of Pennsylvania in the Subpart V crude oil special refund proceeding. The Application was based upon purchases of petroleum products by a number of state entities, specified in the Decision and Order, during the crude oil price control period. The Application did not include any purchases made by any counties, municipalities, or school districts. The total refund granted to the Commonwealth of Pennsylvania was $398,192.

FMC Corporation, 10/16/92, RF272–21816, RD272–21816

The DOE issued a Decision and Order granting a Subpart V crude oil overcharge Refund to FMC Corporation (FMC) an end-user which used refined petroleum products in the production of chemicals and machinery. A group of twenty-eight States and two Territories filed objections and a Motion for Discovery with respect to this Application, attempting to rebut the end-user presumption of injury. The DOE found that the end-user presumption was applicable and that the Motion for Discovery should be denied. The DOE further determined that Aromatic 150 was an eligible product in this proceeding. The DOE determined that FMC should receive a refund of $469,646.

Refund Applications

The Office of Hearings and Appeals issued the following Decisions and Orders concerning refund applications, which are not summarized. Copies of the full texts of the Decisions and Orders are available in the Public Reference Room of the Office of Hearings and Appeals.

FEDERAL COMMUNICATIONS COMMISSION

[FCC 92–464]

fONOROLA Corporation and EMI Communications Corporation to Resell International Private Lines Between the United States and Canada

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: On October 8, 1992, the FCC adopted a Memorandum Opinion, Order and Certification in which it made the determination, pursuant to the FCC's International Resale Order, that Canada affords resale opportunities equivalent to those available under U.S. law. Furthermore, the FCC authorized both fONOROLA Corporation and EMI Communications Corporation to resell international private lines between the United States and Canada, subject to certain operating and reporting conditions. The FCC also promulgated two operating conditions of general applicability to future authorizations for the resale of international private lines between the United States and Canada.

EFFECTIVE DATE: December 10, 1992.

FOR FURTHER INFORMATION CONTACT: Jennifer A. Warren, Attorney, Common Carrier Bureau, (202) 632–3214.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Order, Opinion and Certification regarding the resale of international private lines between the United States and Canada. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (room 239), 1919 M St., NW., Washington, DC 20554. The complete text of this decision also may be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, 1990 M St., NW., Washington, DC 20036.

Summary of Memorandum Order, Opinion and Certification

In this Memorandum Order, Opinion and Certification, the FCC finds, pursuant to the International Resale Order, that Canada affords international private line resale opportunities equivalent to those available under U.S. law. Having so found, the FCC certified that the present and future public convenience and necessity require the provision of resale of international private line services between the United States and Canada. Accordingly, the FCC authorized two U.S. carriers, fONOROLA Corporation and EMI

Communications Corporation, to resell international private lines for switched services between the United States and Canada, subject to certain operating and reporting conditions. In particular, the FCC adopted two operating conditions applicable to these and all future authorizations. First, the FCC conditioned these authorizations, and will condition all future international private line resale authorizations for service between the United States and Canada, upon the traffic carried over the resold international private lines being only U.S.-Canada traffic, that is, traffic originating in Canada and terminating in the United States or traffic originating in the United States and terminating in Canada. Second, the FCC conditioned these authorizations, and will condition all such future authorizations, upon the applicants and certain related persons or companies being subject to a "no exclusive arrangements" condition with regard to the handling or interchanging traffic to or from the United States, its territories or possessions.

Ordering Clauses

Accordingly, *it is certified* that the present and future public convenience and necessity require the provision of resale of international private line services between the United States and Canada.

It is further ordered that these authorizations, and all such future authorizations, for the resale of international private lines for switched services between the United States and Canada shall be conditioned as set forth above.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

BILLING CODE 6712-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

Public Information Collection Requirements Submitted to OMB for Review

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following public information collection requirements for review and clearance in accordance with the Paperwork Reduction Act of 1980, 44 U.S.C. chapter 35.

DATES: Comments on this information collection must be submitted on or before February 8, 1993.

ADDRESSES: Direct comments regarding the burden estimate or any aspect of this information collection, including suggestions for reducing this burden, to: The FEMA Information Collections Clearance Officer at the address below; and to Gary Waxman, Office of Management and Budget, 3235 New Executive Office Building, Washington, DC 20503, (202) 395-7340, within 60 days of this notice.

FOR FURTHER INFORMATION CONTACT: Copies of the above information collection request and supporting documentation can be obtained by calling or writing Linda Borror, FEMA Information Collections Clearance Officer, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-2624.

Type: New collection.

Title: Emergency Management Exercise Reporting System.

Abstract: The Emergency Management Exercise Reporting System is the means by which FEMA intends to collect data to

(1) Validate the effectiveness of Agency programs at the State and local level;

(2) Determine whether program changes are being appropriately implemented at the State and local levels;

(3) Evaluate the preparedness capability of State and local governments to respond to and recover from emergencies of all sizes, regardless of cause;

(4) Identify those corrective actions that require additional focus on the part of FEMA (e.g., planning, training, equipment, facilities, or personnel) for short- and long-term planning;

(5) Respond to information on emergency management readiness; and

(6) Provide annual summary data on State and local emergency management exercises nationwide that can be used for improved exercise design and evaluation techniques; and request exercise credit for actual response operations in Presidentially declared or undeclared disasters to satisfy the emergency management exercise requirement under the Comprehensive Cooperative Agreement (CCA).

The Emergency Management Exercise Reporting System is an annual exercise/training reporting requirement contained in each CCA. The new EMERS consolidates and replaces the following collections: FEMA Form 90-2, Disaster Response Questionnaire, and its automated system CENSUS (OMB No. 3067-0188); FEMA Form 95-16, State and Local Exercise Data, and its automated system XDATA (OMB No. 3067-0189); and the State/Regional Summary Evaluation Form (SRSEF).

The reporting requirement applies to both those local jurisdictions which have conducted an exercise and those which are affected by a Presidential declaration of a major disaster. The completed form (attachment A) and instructions (attachment B) will be used by local jurisdictions to submit data to the States. States will in turn input the data into the EMERS automated system for transmittal to the FEMA regional offices. FEMA will then forward the data to the Headquarters program office.

FEMA will train State Training Officers and Exercise Training Officers in 16 States within FEMA Regions 1, 8, and 10 and pilot test EMERS from February 1993 to June 1993. FEMA expects to implement EMERS October 1, 1993.

Type of Respondents: State and local governments.

Estimate of Total Annual Reporting and Recordkeeping Burden: Training—1,792 hours (Regions 1,8,10 512—hours; Regions 2,3,4,5,6,7,9—1,280 hours). Pilot—458 hours (Locals—375 hours; States—83 hours). Full Implementation—2,931 hours (Locals—2,400 hours; States—531 hours). Total 5,181 hours.

Number of Respondents: Training—112 (Regions 1,8,10—32; Regions 2,3,4,5,6,7,9—80 hours). Pilot 516—(Locals—500; States—16). Full Implementation—3,240 (Locals 3,200; States 40). Total 3,812 respondents.

Estimated Average Burden Time per Response: Training—16 hours; Pilot—55 minutes; Full Implementation—55 minutes.

Frequency of Response: Other: Locals—Data will be submitted at the conclusion of exercises or actual occurrences. States—Data may be submitted on a quarterly basis consistent with a schedule established in the annual Comprehensive Cooperative Agreement but the schedules can be revised quickly in relation to on-going activity.

Dated: November 30, 1992.

Weymouth Tini,

Acting Director, Office of Administrative Support.

INSTRUCTIONS FOR COMPLETING

THE EMERGENCY MANAGEMENT EXERCISE REPORTING SYSTEM FORM

BACKGROUND: The Emergency Management Exercise Reporting System (EMERS) replaces the:

- o State/Regional Summary Evaluation Form (SRSEF);
- o FEMA Form 95-16, Exercise Data collection form;
- o Automated Exercise Data (XDATA) system; and
- o FEMA Form 90-2, the Disaster Response Questionnaire (DRQ).

The purpose of the new form is to reduce the amount of reporting forms/systems required for the exercise and training programs while ensuring that the data collected meets the needs of Federal, State and local exercise/training personnel.

The data provided on this form will be used to (1) track annual accomplishments against the 4-year exercise cycle; (2) identify the type of hazard, objectives, scope, and number of participants for each exercise; (3) serve as a means of requesting exercise credit for actual occurrences; and (4) highlight for local, State and Federal emergency management trainers, planners and exercise personnel those areas where corrective actions need to be taken, including planning, training, personnel, equipment and/or facilities.

The instructions are designed to assist you in completing the information requested for each block on the new form. If you are a local official and need assistance or have any questions regarding the form, please contact your State Exercise Training Officer.

PART I. GENERAL INFORMATION

1. *FY (Fiscal Year)*: Please enter the *current* fiscal year. A *current* Federal Fiscal Year begins on **October 1** and ends with **September 30** of the following year (*for example, FY 1993 runs from October 1, 1992 - September 30, 1993.*)

2. *QUARTER*: Please enter either a **1, 2, 3** or **4** to indicate the first, second, third or fourth quarter of the *current* Federal fiscal year for which you are reporting. The following is a listing of the months which comprise each quarter:

Quarter	Months
1	*October - December*
2	*January - March*
3	*April - June*

4 *July - September*

3. ***JURISDICTION***: Enter the name of your county, city, township or other political subdivision.

4. ***EMA-FUNDED JURISDICTION***: Check (√) ***Yes*** if your jurisdiction is a participant in the **Emergency Management Assistance (EMA)** program or ***No*** if it is not.

5. ***STATE***: Enter the 2 character abbreviation for your State.

6. ***STATE REGION***: This block is intended to reflect ***State-defined*** areas, regions, administrative subdivisions, etc., that may be used by the State for day-to-day management. If a ***State*** does **NOT** use such subdivisions, leave blank.

7. *TYPE OF EVENT*: The purpose of this section is to determine whether your jurisdiction conducted an **exercise** or was involved in an **actual occurrence** for which exercise credit is being requested. If it was an exercise, please indicate with a check mark (√) whether it was a *tabletop, functional or full scale exercise* (definitions listed below). If your jurisdiction was involved in an actual occurrence (definition listed below) for which exercise credit is being requested, please place a check mark (√) by actual occurrence.
Please indicate with a check (√) whether approval is requested for Full Scale or Functional level exercise.

Check **Yes** if the actual occurrence is a Presidentially declared disaster or **No** if it is not.
Listed below are definitions of the three major exercise types:

TABLETOP EXERCISE: An activity in which elected or appointed officials and key staff with emergency management responsibilities are gathered together informally to discuss various **simulated** emergency situations. A tabletop exercise is designed to elicit constructive discussion by the participants without time constraints as they examine and then attempt to solve problems based on existing Emergency Operations Plans. The intent of a *tabletop* is to allow participants to evaluate plans and procedures and to resolve questions of coordination, assignment of responsibilities, interaction between agencies, etc., in a non-threatening format and under minimum stress. A tabletop exercise usually lasts from 2-4 hours, but may be longer depending on the issues to be addressed.

FUNCTIONAL EXERCISE: A ***functional*** exercise is designed to focus on testing, under simulated conditions, the policies, procedures, roles and responsibilities of individual or multiple emergency functions either before, during or after

any emergency period. (Specific functions are contained in *Civil Preparedness Guide 1-8, Guide for the Development of State and Local Emergency Operations Plans* and include, at a minimum, **Direction and Control, Communications, Warning, Emergency Public Information, Evacuation, Reception and Care, In-Place Protective Shelter, Health and Medical, Law Enforcement, Public Works, Fire and Rescue, Radiological Protection, Human Services and Resource Management**).) A functional exercise is larger than a tabletop -- it involves activities that are usually performed in some type of operating center, the field or a combination of both in which time constraints are applied. Functional exercises normally run for 2-8 hours and are followed by an evaluation or critique.

FULL SCALE EXERCISE: A *full scale* exercise is designed to evaluate the operational capability of emergency management systems in an interactive manner over a substantial period of time, *i.e.*, usually one or more days. It involves the testing of a major portion of the basic elements of Emergency Operations Plans and organizations in a highly stressful environment in order to more closely simulate actual response conditions. This type of exercise includes mobilization and actual movement of emergency personnel and resources required to demonstrate coordination and responsibilities. The Emergency Operating Center is activated and field command posts may be established.

ACTUAL OCCURRENCE: An actual occurrence is defined as any natural, technological or national security event which has happened in your jurisdiction for which a coordinated emergency response or recovery operation was required. This includes both large-scale events that have resulted in a Presidential declaration of an *emergency* or a *major disaster* and those occurrences of a lesser magnitude which required significant State and/or local response and recovery activities.

8. *FOCUS ON*: Regardless of whether your activity was an exercise or an actual occurrence, place a check mark (√) to denote whether the focus of the event was on **response** or **recovery** activities (definitions follow).

RESPONSE: A *response* exercise focuses on those ***critical and immediate*** measures required to save lives and protect property in an emergency. Such measures may include, but are not limited to, emergency medical services, emergency debris clearance, restoration of electricity and communications, evacuation and shelter, public information, reception and care or restoration of critical public services. Response activities for small-scale disasters could be only a matter of hours or a day -- for large-scale disasters (*e.g.*, Hurricane

Andrew), response activities could involve days or more than a week. In instances where supplementary Federal assistance is required, Federal agency activities would be coordinated under the ***Federal Response Plan***, which describes the basic mechanisms by which the Federal government will mobilize resources and conduct activities to **augment** State and local response efforts.

RECOVERY: A *recovery* exercise is defined as focusing on those **non-critical, longer- term** activities required to restore a community as closely as possible to its original condition. Recovery differs from response in that response activities are related to **immediate, critical functions to save lives and protect property** -- recovery activities may take weeks or months to complete. Recovery activities may include, but are not limited to, the restoration of public facilities, streets, roads and bridges, debris clearance from public and private property or temporary housing.

9. ***DATES OF EXERCISE/EVENT***: Please enter the timeframe during which your exercise or actual event occurred. Show the dates in month/day/year (06/17/92 or 10/11/92) format and include both the beginning and ending dates. *Do not include pre-exercise briefings or training sessions or post-conference critiques as part of the exercise -- the information should be limited to the actual dates during which participants actually played in an exercise.*

10. ***HAZARD SCENARIO***: Please indicate **one and only one** item as the **PRIMARY** hazard for which an exercise was conducted or an actual event for which exercise credit is being requested. However, more than one **SECONDARY** event may be selected. For example, a jurisdiction may suffer a hurricane as a primary event; secondary events could include a dam failure, a hazardous materials transportation incident and landslides; a terrorist attack could involve a radiological incident at a fixed facility.

11. ***NUMBER OF PARTICIPANTS IN EACH CATEGORY***: Please indicate the number of personnel in each category that participated in either the exercise or the actual event. In order to maintain a more concise listing, the categories listed frequently include more than one type of response function, *i.e., Law Enforcement* could include local and State police, the Sheriff's department, highway patrol, etc.

PART II. FUNCTIONS TESTED

1. ***EMERGENCY FUNCTIONS***: Please indicate for each emergency function tested, whether the results where satisfactory or needs improvement. Circle *S* for ***Satisfactory*** or ***NI*** for ***Needs***

Improvement.

Place a check mark (√) under each area (Planning, Training, Personnel, Equipment, Facilities) where corrective actions need to be taken.

PART III. ACTUAL OCCURRENCE DATA

1. *EXERCISE CREDIT*: If exercise credit is requested for an actual occurrence and a Presidential declaration is not declared, please provide the number of fatalities, injured, evacuated, sheltered, and the dollar values of the estimated damage to public and private property.

PART IV. STATE AND LOCAL COMMENTS AND SIGNATURES

1. *NARRATIVE*: Please provide a short discussion of the corrective actions you feel should be taken. Use the Block Number of the Emergency Function which needs improvement and the following codes for the corrective actions checked: *P = Planning; T = Training; PE = Personnel; E = Equipment; F = Facilities.*

For example, assume Planning and Training were checked as corrective actions for emergency function 12, Effectiveness of Warning. Comments about these areas are to be shown in the following format:

> 12P: The community has a large population of elderly people. No special considerations were made for them. The Emergency Operations Plan needs to be revised to address this issue.
>
> 12T: Response personnel need training on needs of elderly people during an evacuation because of problems encountered in responding to the needs of elderly people during the exercise.

This section can also be used to provide **brief and concise** comments to the State, Regional or Headquarters program managers. Information could include innovative methods tried in either the exercise or actual response operation, improvements in interaction between various agencies, or improved means of locating and transporting critically needed materials.

2. *SIGNATURES*: Please sign and date the form.

6

PART V. REGIONAL REVIEW

If exercise credit is requested, your FEMA Regional Office will review the request and complete the information on exercise credit. A copy of the form showing this information, will be sent to your State Emergency Management Office. The State Emergency Management Office will in turn contact you as to what should be done with this information.

BILLING CODE 6718-01-C

[FEMA–968–DR]

Mississippi; Amendment to a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Mississippi (FEMA–968–DR), dated November 25, 1992, and related determinations.

EFFECTIVE DATE: December 2, 1992.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3606.

SUPPLEMENTARY INFORMATION: The notice of a major disaster for the State of Mississippi, dated November 25, 1992, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of November 25, 1992:

The counties of Amite, Copiah, and Wilkinson for Individual Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Richard W. Krimm,

Deputy Associate Director, State and Local Programs and Support.

BILLING CODE 6718–02–M

[FEMA–968–DR]

Mississippi; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

EFFECTIVE DATE: November 25, 1992.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Mississippi (FEMA–968–DR), dated November 25, 1992, and related determinations.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3606.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated November 25, 1992, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows.

I have determined that the damage in certain areas of the State of Mississippi, resulting from tornadoes, high winds, and severe storms on November 21–22, 1992, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act ("the Stafford Act"). I, therefore, declare that such a major disaster exists in the State of Mississippi.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and Public Assistance in the designated areas. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Public Assistance will be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Ihor Husar of the Federal Emergency Management Agency

to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Mississippi to have been affected adversely by this declared major disaster:

The counties of Attala, Chickasaw, Choctaw, Covington, Jasper, Jefferson Davis, Kemper, Lauderdale, Leake, Lincoln, Neshoba, Newton, Noxubee, Rankin, Scott, Simpson, Smith, and Webster for Individual Assistance.

The counties of Rankin, Smith, Jefferson Davis, Covington, and Jasper for Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Wallace E. Stickney,

Director.

BILLING CODE 6718-02-M

FEDERAL MARITIME COMMISSION

[Docket No. 92-52]

Wilfredo Garcia a/k/a Willie "Bill" Allen et al.; Order of Investigation and Hearing

In the matter of Virginia "Gina" Scalabrino a/k/a Virginia "Gigi" Allen; and ABU W. Garcia Forwarding, Inc. d/b/a ABU W. Garcia, Auto Transporters Keystone Ltd., World Express Shipping, World Express Shippers, A 1 Shipping Solutions, American Keystone Transport, and Calif-Pen Transporters.

Wilfredo Garcia a/k/a Willie "Bill" Allen ("Garcia") is believed to be the principal behind each of the companies identified in the above caption. Virginia "Gina" Scalabrino, a/k/a Virginia "Gigi" Allen is believed to be Garcia's wife and business associate.

It appears that ABU W. Garcia Forwarding, Inc. ("ABU W. Garcia"), a Pennsylvania corporation d/b/a Auto Transporters keystone Ltd. ("Keystone"), issued bills of lading and other shipping documents for shipments from various points or ports in the United States to foreign ports. It appears that Garcia also advertised an ocean transportation service in yellow page directories in several U.S. cities under the company names of ABU W. Garcia and Keystone as well as under the pseudonyms of World Express Shipping, World Express Shippers, A 1 Shipping Solutions, American Keystone Transport, and Calif-Pen Transporters. It further appears that Garcia and his companies booked or arranged for space for shipments with steamship lines. Neither Garcia, nor any of the entities or individuals named herein, filed with the Federal Maritime Commission ("Commission" or "FMC") a tariff for the transportation services offered by Garcia, filed with the FMC evidence of a bond required of non-vessel-operating common carriers ("NVOCC") or received a license from the FMC to provide ocean freight forwarder services.

The Commission has received complaints from shippers to the effect that Garcia engaged in a pattern of practice by which Garcia collected monies for transportation services, but either never transported the cargo to the overseas destination as contracted or, in instances when cargo was transported overseas, did not pay the ocean freight to the steamship line. Shippers were required to make additional payments to have the cargo transported or to obtain release of the cargo. Shippers did not receive refunds of monies previously paid to Garcia.

Therefore, it appears that between March 27, 1991 and October 1992, respondents, individually or in conjunction with each other, operated as an untariffed and unbonded NVOCC from ports or points in the United States to foreign ports in violation of sections 8(a)(1) and 23(a) of the Shipping Act of 1984 ("1984 Act"), 46 U.S.C. app. 1707(a)(1) and 46 U.S.C. app. 1720(a), and acted as an unlicensed ocean freight forwarder in violation of section 19(a) of the 1984 Act, 46 U.S.C. app. 1718(a).

In addition, the activities of Garcia and his companies also may be in violation of the following provisions of the 1984 Act: (1) section 10(a)(1), 46 U.S.C. app. 1709(a)(1), for attempting to obtain ocean transportation for less than applicable rates; (2) section 10(b)(6)(E), 46 U.S.C. app. 1709(b)(6)(E), for engaging in unfair practices in the matter of the adjustment and settlement of claims; and (3) section 10(d)(1), 46 U.S.C. app. 1709(d)(1), for failing to establish, observe, and enforce just and reasonable regulations and practices relating to or connected with receiving, handling, storing, or delivering property. It is believed that these apparent unlawful activities continue.

Now therefore, it is Ordered, That pursuant to sections 10, 11 and 13 of the 1984 Act, 46 U.S.C. app. 1709, 1710 and 1712, an investigation is hereby instituted to determine:

(1) Whether any of the respondents, individually or in conjunction with each other, violated the following sections of the 1984 Act: (1) Section 8(a)(1), by operating as an NVOCC in the foreign commerce of the United States without having a tariff on file with the Commission; (b) section 10(a)(1), for attempting to obtain ocean transportation at less than applicable tariff rates; (c) section 10(b)(6)(E), for engaging in unfair practices in the matter of the adjustment and settlement of claims; (d) section 10(d)(1), for failing to establish, observe, and enforce just and reasonable regulations and practices relating to or connected with receiving, handling, storing, or delivering property; (e) section 19(a), for acting as an ocean freight forwarder without a license issued by the FMC; and (f) section 23(a), for operating as an NVOCC without furnishing the requisite bond to the FMC;

(2) Whether, in the event violations of sections 8(a)(1), 10(a)(1), 10(b)(6)(E), 10(d)(1), 19(a) and 23(a) of the 1984 Act are found, civil penalties should be assessed and, if so, the amount of such penalties; and

(3) Whether, in the event violations are found, an appropriate cease and desist order should be issued.

It is further Ordered, That a public hearing be held in this proceeding and that this matter be assigned for hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges at a date and place to be hereafter determined by the Administrative Law Judge in compliance with Rule 61 of the Commission's Rules of Practice and Procedure, 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Administrative Law Judge only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record;

It is further Ordered, That Wilfredo Garcia a/k/a Willie "Bill" Allen; Virginia "Gina" Scalabrino a/k/a Virginia "Gigi" Allen; and ABU W. Garcia Forwarding, Inc. d/b/a/ ABU W. Garcia, Auto Transporters Keystone Ltd., World Express Shipping, World Express Shippers, A 1 Shipping Solutions, American Keystone Transport, and Calif-Pen Transporters are designated respondents in this proceeding;

It is further Ordered, That the Commission's Bureau of Hearing Counsel is designated a party to this proceeding;

It is further Ordered, That notice of this Order be published in the Federal Register, and a copy be served on parties of record;

It is further Ordered, That other persons having an interest in participating in this proceeding may file petitions for leave to intervene in accordance with Rule 72 of the Commission's Rules of Practice and Procedure, 46 CFR 502.72;

It is further Ordered, That all further notices, orders, and/or decisions issued by or on behalf of the Commission in this proceeding, including notice of the time and place of hearing or prehearing conference, shall be served on parties of record;

It is further Ordered, That all documents submitted by any party of record in this proceeding shall be directed to the Secretary, Federal Maritime Commission, Washington, DC 20573, in accordance with Rule 118 of the Commission's Rules of Practice and Procedure, 46 CFR 502.118, and shall be served on parties of record;

It is Further Ordered, That in accordance with Rule 61 of the Commission's Rules of Practice and Procedure, the initial decision of the Administrative Law Judge shall be issued by December 3, 1993, and the final decision of the Commission shall be issued by April 4, 1994.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL MEDIATION AND CONCILIATION SERVICE

Labor-Management Cooperation Program; Application Solicitation

AGENCY: Federal Mediation and Conciliation Service.

ACTION: Request for public comment on draft fiscal year 1993 program guideline/application solicitation for Labor-Management Committees.

SUMMARY: The Federal Mediation and Conciliation Service (FMCS) is publishing the draft Fiscal Year 1993 Program Guidelines/Application Solicitation for the Labor-Management Cooperation Program to inform the public and obtain public comments. The program is supported by Federal funds authorized by the Labor-Management Cooperation Act of 1978, subject to annual appropriations.

DATES: Comments are due on or before January 8, 1993.

ADDRESSES: Send comments to: Peter Regner, Director, Labor-Management Grants and Projects, FMCS 2100 K Street, NW., Washington, DC 20427.

FOR FURTHER INFORMATION CONTACT: Peter Regner, (202) 653-5320.

Labor-Management Cooperation Program Application Solicitation for Labor-Management Committees—FY 1993

A. Introduction

The following is the draft solicitation for the Fiscal Year (FY) 1993 cycle of the Labor-Management Cooperation Program as it pertains to the support of labor-management committees. These guidelines represent the continuing efforts of the Federal Mediation and Conciliation Service to implement the provisions of the Labor-Management Cooperation Act of 1978 which was initially implemented in FY81. The Act generally authorizes FMCS to provide assistance in the establishment and operation of plant, area, public sector, and industry-wide labor-management committees which:

(A) Have been organized jointly by employers and labor organizations representing employees in that plant, area, government agency, or industry; and

(B) Are established for the purpose of improving labor-management relationships, job security, and organizational effectiveness; enhancing economic development; or involving workers in decisions affecting their jobs, including improving communication with respect to subjects of mutual interest and concern.

The Program Description and other sections that follow, as well as a separately published FMCS Financial and Administrative Grants Manual, make up the basic guidelines, criteria, and program elements a potential applicant for assistance under this program must know in order to develop an application for funding consideration for either a plant, area-wide, industry, or public sector labor-management committee. Directions for obtaining an application kit may be found in Section I. A copy of the Labor-Management Cooperation Act of 1978 follows this solicitation and should be reviewed in conjunction with this solicitation.

B. Program Description

Objectives

The Labor-Management Cooperation Act of 1978 identifies the following seven general areas for which financial assistance would be appropriate:

(1) To improve communication between representatives of labor and management;

(2) To provide workers and employers with opportunities to study and explore new and innovative joint approaches to achieving organizational effectiveness;

(3) To assist workers and employers in solving problems of mutual concern not susceptible to resolution within the collective bargaining process;

(4) To study and explore ways of eliminating potential problems which reduce the competitiveness and inhibit the economic development of the plant, area, or industry;

(5) To enhance the involvement of workers in making decisions that affect their working lives;

(6) To expand and improve working relationships between workers and managers; and

(7) To encourage free collective bargaining by establishing continuing mechanisms for communication between employers and their employees through Federal assistance in the formation and operation of labor-management committees.

The primary objective of this program is to encourage and support the establishment and operation of joint labor-management committees to carry out specific objectives that meet the forementioned general criteria. The term "labor" refers to employees represented by a labor organization and covered by a formal collective bargaining agreement. These committees may be found at either the plant (worksite), area, industry, or public sector levels. A plant or worksite committee is generally characterized as restricted to one or more organizational or productive units operated by a single employer. An area committee is generally composed of multiple employers of diverse industries as well as multiple labor unions operating within and focusing upon city, county, contiguous multicounty, or statewide jurisdictions. An industry committee generally consists of a collection of agencies or enterprises and related labor unions producing a common product or service in the private sector on a local, state, regional, or nationwide level. A public sector committee consists of government employees and managers in one or more units of a local or state government. Those employees must be covered by a formal collective bargaining agreement or other enforceable labor-management agreement. In deciding whether an application is for an area or industry committee, consideration should be given to the above definitions as well as to the focus of the committee.

In FY 1993, competition will be open to plant, area, private industry, and public sector committees. In-plant committee applications should offer an innovative or unique effort. All application budget requests should focus directly on supporting the committee. Applicants should avoid seeking funds for activities that are clearly available under other Federal programs (e.g., job training, mediation of contract disputes, etc.). In addition, $56,000 will be reserved for a continuation grant to the State and Local Government Labor-Management Committee for support of the Seventh National Labor-Management Conference in June 1994.

Required Program Elements

1. *Problem Statement*—The application, which should have numbered pages, must discuss in detail what specific problem(s) face the plant, area, government, or industry and its workforce that will be addressed by the committee. Applicants must document the problem(s) using as much relevant data as possible and discuss the full range of impacts these problem(s) could have or are having on the plant, government, area, or industry. An industrial or economic profile of the area and workforce might prove useful in explaining the problem(s). This section basically discusses WHY the effort is needed.

2. *Results or Benefits Expected*—By using specific goals and objectives, the application must discuss in detail WHAT the labor-management committee as a demonstration effort will accomplish during the life of the grant. While a goal of "improving communication between employers and employees" may suffice as one over-all goal of a project, the objectives must, whenever possible, be expressed in measurable terms. Applicants should focus on the impacts or changes that the committee's efforts will have. Existing committees should focus on expansion efforts/results expected from FMCS funding. The goals, objectives, and projected impacts will become the foundation for future monitoring and evaluation efforts.

3. *Approach*—This section of the application specifies HOW the goals and objectives will be accomplished. At a minimum, the following elements must be included in all grant applications:

(a) A discussion of the strategy the committee will employ to accomplish its goals and objectives;

(b) A listing, by name and title, of all existing or proposed members of the labor-management committee. The application should also offer a rationale for the selection of the committee members (e.g., members represent 70% of the area or plant workforce).

(c) A discussion of the number, type, and role of all committee staff persons. Include proposed position descriptions for all staff that will have to be hired as well as résumés for staff already on board;

(d) In addressing the proposed approach, applicants must also present their justification as to why Federal funds are needed to implement the proposed approach;

(e) A statement of how often the committee will meet as well as any plans to form subordinate committees for particular purposes; and

(f) For applications from existing committees (i.e., in existence at least 12 months prior to the submission deadline), a discussion of past efforts and accomplishments and how they would integrate with the proposed expanded effort.

4. *Major Milestones*—This section must include an implementation plan that indicates what major steps, operating activities, and objectives will be accomplished as well as a timetable for WHEN they will be finished. A milestone chart must be included that indicates what specific accomplishments (process and impact) will be completed by month over the life of the grant using October 1993 as the start date. The accomplishment of these tasks and objectives, as well as problems and delays therein, will serve as the basis for quarterly progress reports to FMCS.

5. *Evaluation*—Applicants must provide for either an external evaluation or an internal assessment of the project's success in meeting its goals and objectives. An evaluation plan must be developed which briefly discusses what basic questions or issues the assessment will examine and what baseline data the committee staff already has or will gather for the assessment. This section should be written with the applicant's own goals and objectives clearly in mind and the impacts or changes that the effort is expected to cause.

6. *Letters of Commitment*—Applications must include current letters of commitment from all proposed or existing committee participants and chairpersons. These letters should indicate that the participants support the application and will attend scheduled committee meetings. A blanket letter signed by a committee chairperson or other official on behalf of all members is not acceptable. Union letters should be submitted on union letterhead.

7. *Other Requirements*—Applicants are also responsible for the following:

(a) The submission of data indicating approximately how many employees will be covered or represented through the labor-management committee;

(b) From existing committees, a copy of the existing staffing levels, a copy of the by-laws, a breakout of annual operating costs and identification of all sources and levels of current financial support;

(c) A detailed budget narrative based on policies and procedures contained in the FMCS Financial and Administrative Grants Manual;

(d) An assurance that the labor-management committee will not interfere with any collective bargaining agreements; and

(e) An assurance that committee meetings will be held at least every other month and that written minutes of all committee meetings will be prepared and made available to FMCS.

Selection Criteria

The following criteria will be used in the scoring and selection of applications for award:

(1) The extent to which the application has clearly identified the problems and justified the needs that the proposed project will address.

(2) The degree to which appropriate and measurable goals and objectives have been developed to address the problems/needs of the area. For existing committees, the extent to which the committee will focus on expanded efforts.

(3) The feasibility of the approach proposed to attain the goals and objectives of the project and the perceived likelihood of accomplishing the intended project results. For in-plant applicants, this section will address the degree of innovativeness or uniqueness of the proposed effort.

(4) The appropriateness of committee membership and the degree of commitment of these individuals to the goals of the application as indicated in the letters of support.

(5) The feasibility and thoroughness of the implementation plan in specifying major milestones and target dates.

(6) The cost effectiveness and fiscal soundness of the application's budget request, as well as the application's feasibility vis-a-vis its goals and approach.

(7) The overall feasibility of the proposed project in light of all of the information presented for consideration; and

(8) The value to the government of the application in light of the overall objectives of the Labor-Management Cooperation Act of 1978. This includes such factors as innovativeness, site location, cost, and other qualities that impact upon an applicant's value in encouraging the labor-management committee concept.

C. Eligibility

Eligible grantees include state and local units of government, labor-management committees (or a labor union, management association, or company on behalf of a committee that will be created through the grant), and certain third party private non-profit entities on behalf of one or more committees to be created through the grant. Federal government agencies and their employees are not eligible.

Third-party private, non-profit entities which can document that a major purpose or function of their organization has been the improvement of labor relations are eligible to apply. However, all funding must be directed to the functioning of the labor-management committee, and all requirements under Part B must be followed. Applications from third-party entities must document particularly strong support and participation from all labor and management parties with whom the applicant will be working. Applicants from third-parties which do not directly support the operation of a new or expanded committee will not be deemed eligible.

Applicants who received funding under this program in the past for committee operations are generally not eligible to apply. The only exceptions apply to third-party grantees who seek funds on behalf of an entirely different committee.

D. Allocations

FMCS has been given an allocation of $749,000 for this program. Of this amount, $588,000 will be allocated for new submissions, up to $105,000 for the continuation of selected FY91 grantees to September 1993, and $56,000 for support of the Seventh National Labor-Management Conference. Specific funding levels will not be established for each type of committee. Instead, the review process will be conducted in such a manner that at least one award will be made in each category (plant, industry, public sector, and area), providing that FMCS determines that at least one outstanding application exists in each category. After these applications are selected for award, the remaining applications will be considered according to merit without regard to category.

FMCS reserves the right to retain up to 10 percent of the FY93 appropriation to contract for program support purposes (such as evaluation) other than administration. This may alter the specific amounts available for new or continuation grants.

E. Dollar Range and Length of Grants and Continuation Policy

Awards to continue and expand existing labor-management committees

(i.e., in existence 12 months prior to the submission deadline) will be for a period of 12 months. If successful progress is made during this initial budget period and if sufficient appropriations for expansion and continuation projects are available, these grants may be continued up to an additional 12 months at a 50 percent cash match ratio. The total project period can thus normally be no more than 24 months.

Initial awards to establish new labor-management committees (i.e., not yet established or in existence less than 12 months prior to the submission deadline), will be for a period of 18 months. If successful progress is made during this initial budget period and if sufficient appropriations for expansion and continuation projects are available, these grants may be continued up to an additional 18 months at a 50 percent cash match ratio. The total project period can thus normally be no more than 36 months.

The dollar range of awards is as follows:

—Up to $35,000 in FMCS funds per annum for existing in-plant applicants;
—Up to $50,000 over 18 months for new in-plant committee applicants;
—Up to $75,000 in FMCS funds per annum for existing area, industry and public sector committees applicants;
—Up to $100,000 per 18-month period for new area, industry, and public sector committee applicants.

Applicants are reminded that these figures represent maximum Federal funds only. If total costs to accomplish the objectives of the application exceed the maximum allowable Federal funding level and its required grantee match, applicants may supplement these funds through voluntary contributions from other sources.

F. Match Requirements and Cost Allowability

Applicants for new labor-management committees must provide at least 10 percent of the total allowable project costs. Applicants for existing committees must provide at least 25 percent of the total allowable project costs. All matching funds may come from state or local government sources or private sector contributions, but may generally not include other Federal funds. Funds generated by grant-supported efforts are considered "project income," and may not be used for matching purposes.

It will be the policy of this program to reject all requests for indirect or overhead costs as well as "in-kind" match contributions. In addition, grant funds must not be used to supplant private or local/state government funds currently spent for these purposes. Funding requests from existing committees should focus entirely on the costs associated with the expansion efforts. Also, under no circumstances may business or labor officials participating on a labor-management committee be compensated out of grant funds for time spent at meetings or time spent in training sessions. Applicants generally will not be allowed to claim all or a portion of existing staff time as an expense or match contribution.

For a more complete discussion of cost allowability, applicants are encouraged to consult the FY93 FMCS Financial and Administrative Grants Manual which will be included in the application kit.

G. Application Submission and Review Process

Applications should be signed by both a labor and management representative and be postmarked no later than June 5, 1993. No applications or supplementary materials can be accepted after the deadline. It is the responsibility of the applicant to ensure that the application is correctly postmarked by the U.S. Postal Service or other carrier. An original application containing numbered pages, plus three copies, should be addressed to the Federal Mediation and Conciliation Service, Labor-Management Grants and Projects, 2100 K Street NW., Washington, DC 20427. FMCS will not consider videotaped submissions or attachments to submissions.

After the deadline has passed, all eligible applications will be reviewed and scored initially by one or more FMCS Grant Review Boards. The Board(s) will decide which applications will be recommended for funding consideration. The Director, Labor-Management Grants and Projects, will finalize the scoring and selection process for those applications recommended by the Board(s). The individual listed as contact person in Item 6 on the application form will generally be the only person with whom FMCS will communicate during the application review process.

All FY93 grant applicants will be notified of results and all grant awards will be made before September 30, 1993. Applications submitted after the June 5 deadline date or that fail to adhere to eligibility or other major requirements will be administratively rejected by the Director, Labor-Management Grants and Projects.

H. Application Development Training

In FY93, FMCS will offer a free half-day training program to assist potential applicants with the development and writing of an FMCS grant application. This training session will be conducted in Washington, DC, on February 10, 1993. Individuals interested in attending the session should contact FMCS to reserve a space and receive additional information. See Section I for contact information.

I. Contact

Individuals wishing to apply for funding under this program should contact the Federal Mediation and Conciliation Service as soon as possible to obtain an application kit. These kits, as well as additional information or clarification, can be obtained free of charge by contacting Lee A. Buddendeck or Peter L. Regner, Federal Mediation and Conciliation Service, Labor-Management Grants and Projects, 2100 K Street NW., Washington, DC 20427; or by calling (202) 653–5320.

Bernard E. DeLury,

Director, Federal Mediation and Conciliation Service.

BILLING CODE 6732-01-M

FEDERAL RESERVE SYSTEM

Fourth Financial Corporation, et al.; Notice of Applications to Engage de novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased

competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 30, 1992.

A. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Fourth Financial Corporation, Wichita, Kansas; to engage *de novo* through its subsidiary, Bank IV Community Development Corporation, in projects designed primarily to promote community welfare such as the economic rehabilitation of and development of low-income areas by providing housing, services, or jobs for residents pursuant to § 225.25(b)(6) of the Board's Regulation Y.

B. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. First Hawaiian, Inc., Honolulu, Hawaii; to engage *de novo* through its subsidiary, First Hawaiian Creditcorp, Inc., Honolulu, Hawaii, in industrial banking pursuant to § 225.25(b)(2) and through First Hawaiian Leasing, Inc., Honolulu, Hawaii, in leasing personal and real property pursuant to § 225.25(b)(5) of the Board's Regulation Y. These activities will be conducted in the United States, including its overseas territories, including, but not limited to Guam, and the Pacific commonwealth nations, including, but not limited to the Commonwealth of the Northern Mariana Islands.

Board of Governors of the Federal Reserve System, December 4, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 92–29997 Filed 12–9–92; 8:45 am]

BILLING CODE 6210–01–F

SBL Capital Bank Shares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than January 4, 1993.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. SBL Capital Bank Shares, Inc., Lodi, Wisconsin; to become a bank holding company by acquiring 100 percent of the voting shares of State Bank of Lodi, Lodi, Wisconsin.

B. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Citizens Bancshares Company, Chillicothe, Missouri; to acquire 100 percent of the voting shares of Blackwater Bancshares, Inc., Glendale, Arizona, and thereby indirectly acquire First Stock Bank, Blackwater, Missouri.

Board of Governors of the Federal Reserve System, December 4, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 92–29998 Filed 12–9–92; 8:45 am]

BILLING CODE 6210–01–F

LeRoy Trofholz; Change in Bank Control Notice

Acquisition of Shares of Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notice is available for immediate inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for the notice or to the offices of the Board of Governors. Comments must be received not later than December 30, 1992.

A. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. LeRoy Trofholz, Schuyler, Nebraska; to acquire 50 percent of the voting shares of Valley Bank Shares, Inc., Schuyler, Nebraska, and thereby indirectly acquire First Nebraska Bank, Schuyler, Nebraska.

Board of Governors of the Federal Reserve System, December 4, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

[ATSDR–62]

Public Health Advisory Procedures

AGENCY: Agency for Toxic Substances and Disease Registry (ATSDR), Public Health Service (PHS), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: This notice announces the procedures ATSDR will use in preparing a public health advisory. The public is invited to comment on the procedures used in issuing a public health advisory.

DATES: Comments must be received by January 11, 1993.

ADDRESSES: Written comments in response to this notice should bear the docket control number ATSDR–62, and should be submitted to: C. Harold Emmett, P.E., Chief, Emergency Response and Consultation Branch, Division of Health Assessment and Consultation, Agency for Toxic Substances and Disease Registry, 1600 Clifton Road, NE., Mail Stop E–57, Atlanta, Georgia 30333.

FOR FURTHER INFORMATION CONTACT: C. Harold Emmett, ATSDR; telephone (404) 630–6360.

SUPPLEMENTARY INFORMATION: The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA) (42 U.S.C. 9604(i)), requires ATSDR, as the lead agency within the PHS, to notify the Administrator of the Environmental Protection Agency (EPA) of a release or threatened release of a hazardous substance that may pose a serious threat to human health or the environment or that an exposure or physical condition presents a significant risk to human health. The public health advisory officially provides such notification. ATSDR also notifies the appropriate EPA regional office, the state health department, and the public.

Definition

A public health advisory is a statement by ATSDR containing a finding that a release of a hazardous substance poses a significant risk to human health and recommending measures to be taken to reduce exposure and eliminate or substantially mitigate the significant risk to human health. It may also address a physical condition which poses a significant risk to human health. (Release is further defined in 42 U.S.C. 9601 (22).)

Public health advisories address the human health risks posed by chemical and/or physical hazards found at a site. Specifically, an ATSDR public health advisory addresses the hazardous substances at a site and their concentrations in the various environmental media; the fate and transport of those materials as they move through the environment; the size and susceptibility of the population; the likelihood of exposure of the population; and the plausible health outcomes of such an exposure.

Rationale for Developing Public Health Advisories

ATSDR may issue a public health advisory based on the findings of a public health assessment, health consultation, health study, or other public health action. ATSDR may also be requested by EPA, other Federal agencies, states, or citizens to evaluate data and information on a release to determine if a public health advisory is warranted.

ATSDR determines what health actions need to be undertaken. Traditionally, these public health actions include health studies, professional and community health education, health surveillance, and exposure registries. The actions are often carried out in cooperation with state health departments.

Who Prepares Public Health Advisories

The preparation of public health advisories is an ATSDR responsibility, which is carried out by the Division of Health Assessment and Consultation (DHAC). Preliminary work, such as data gathering, may be accomplished by any division or branch within ATSDR. The final preparation of the public health advisory is the responsibility of the Emergency Response and Consultation Branch (ERCB) of DHAC.

Criteria for Developing Public Health Advisories

A public health advisory may be issued for sites where a release or a threatened release of hazardous substances may pose a serious threat to human health or the environment or where an exposure or physical condition poses a significant risk to human health. The following criteria are used to define such a threat. These criteria are not intended to limit ATSDR's discretion under CERCLA in issuing public health advisories or in determining other appropriate responses to human health threats at a particular site.

1. Hazardous materials on site are known to be toxic to human health, or physical conditions exist that pose a significant threat to public health; and
2. An established or plausible exposure pathway exists between the contaminant and the nearby human population; and
3. People are being or could be exposed to hazardous substances at levels that pose an urgent public health hazard or a public health hazard. (An urgent public health hazard exists when exposures exceed an ATSDR acute or intermediate Minimal Risk Level (MRL) or other comparable value. A public health hazard exists when exposures exceed a chronic MRL or other comparable value. For radiological contamination, external gamma radiation levels exist that, on an annual basis, exceed current recommendations of national or international radiation protection organizations); and
4. No immediate remediation or removal is planned; and
5. The public health advisory is ATSDR's best option for ensuring a rapid response.

Format of Public Health Advisories

To ensure that a public health advisory (1) adequately addresses site conditions, (2) contains a complete discussion of the health implications of those conditions, and (3) includes conclusions, recommendations, and public health actions for protecting the nearby population, the following format is used:

Introduction (Statement of Purpose)

This section states the purpose of issuing a public health advisory, provides information on how ATSDR became aware of the site or situation, states the problem, and states the major recommendations and public health actions.

Background

The background section provides a brief site history and actions that have taken place at the site, gives the sources of information used in preparing the public health advisory, and describes the contact(s) made with local and state officials.

Basis for the Public Health Advisory

This section describes why the public health advisory was issued. It evaluates the site in terms of the criteria used for issuing a public health advisory. It describes the existence and extent of health hazards and discusses the potential outcome of continued exposure to those chemicals or conditions. The presentation is scientific, is supported by appropriately cited references, and focuses on health-based discussions.

Conclusions

This section provides conclusions based on facts outlined in the previous sections of the public health advisory.

The conclusions present the most important findings of the report in such a manner that the focus of the public health advisory is on the site's most critical health issues.

Recommendations and Proposed Actions

This section describes actions that ATSDR believes to be necessary in order to protect public health and prevent exposure to toxic materials and resulting adverse health effects. The recommendations follow directly from

the conclusions and include any health actions proposed by the ATSDR Health Activities Recommendation Panel (HARP).

References

This section lists all data packages and all technical and health information sources cited in the public health advisory.

Time Frame for Issuing a Public Health Advisory

Time is critical when preparing a public health advisory. A public health advisory is issued because there are indications of an immediate, adverse health impact on a nearby population. An advisory is initiated upon the approval of the Director of DHAC. The initial draft should be completed within 5 working days of being assigned, and the review of the first draft should be completed within 2 working days after the draft is completed. The initial draft is reviewed by the Section Chief, the Branch Chief, the Assistant Director for Public Health Practice, and the Division Director of DHAC. A draft is provided to the chairperson of the HARP at the time a draft document is sent to the Division Director.

The HARP is convened on an emergency basis to determine follow-up health actions. The HARP recommendations are included in the draft document sent to the Assistant Administrator.

After the Division Director approves the draft public health advisory, it is sent to the Assistant Administrator for review. A brief summary of the site background with a statement outlining ATSDR's recommendations is provided to the ATSDR office of Policy and External Affairs (OPEA). A "developmental draft" is sent to the Office of General Counsel (OGC) for assistance with the document. Comments on the drafts from the Office of the Assistant Administrator (OAA) and OGC are returned to the Director, DHAC. Draft public health advisories for sites managed by other Federal agencies are provided to the ATSDR Office of Federal Programs for review and comment before being released from the Agency. DHAC makes appropriate changes and a revised draft is sent through the ATSDR Regional Representative to the EPA regional office for comments. The Regional Representative also makes copies of the draft available to other Federal, state, and local agencies involved with the site.

The ATSDR Emergency Response and Consultation Branch provides EPA headquarters with a draft so that the EPA Administrator is aware that the public health advisory is being prepared. It is expected that the review by EPA and the appropriate state will take no more than 5 working days. DHAC receives comments through the Regional Representative, makes revisions to the document, and submits a draft to the Deputy Administrator of ATSDR through the OAA for review and comments. The final revised public health advisory is then submitted for approval to the ATSDR Administrator through the OAA.

The ATSDR Administrator sends the final public health advisory to the EPA Administrator.

The ATSDR Assistant Administrator sends copies of the final public health advisory to the EPA Regional Administrator and the principal state health official. The ATSDR Regional Representative provides copies to other agencies and individuals as appropriate. ERCB provides a copy of the final public health advisory to the ATSDR Washington, DC, office for distribution to appropriate congressional staff. ERCB also provides a final copy to OPEA for distribution to the media.

Standard Statements

Standard statements in all public health advisories will:

1. Identify the data and information reviewed or analyzed in development of the public health advisory.
2. State that the interpretation, advice, and recommendations provided are based on the data and information referenced.
3. State that the conclusions, recommendations, and public health actions are site-specific and should not automatically be considered applicable to any other situation.
4. Commit to a review of additional data or to respond to additional requests.

Record Keeping

Files containing public health advisory documentation are kept by ERCB while the public health advisory is being developed.

When the advisory is complete, the file is sent to and maintained by the Records and Information Management Branch (RIMB), DHAC. All confidential medical information is handled in accordance with ATSDR policy.

Upon completion of the public health advisory, the author of the public health advisory abstracts data and information for the Hazardous Substances Data Management System (HAZDAT). Those abstracts are sent to RIMB, which is responsible for entering the data into the HAZDAT system. RIMB also tabulates and reports the number of public health advisories completed each quarter

Consistency

A public health advisory is scientifically and programmatically compatible with other Agency documents and with Agency policy. The prospective review of the public health advisories includes reviews by the ERCB section and branch chiefs, the Assistant Director for Public Health Practice, and the Director, DHAC, to assess consistency, scientific quality, policy implications, and appropriateness. As stated previously, the ATSDR Health Activities Recommendations Panel also reviews the draft public health advisory before it is issued. The ATSDR Science Forum reviews of all public health advisories after they are issued to further ensure scientific consistency and to determine policy issues. The Director of DHAC is responsible for providing the public health advisories to the Science Forum.

External Review of Draft Health Advisories

The contents of draft public health advisories should be discussed with appropriate Federal, state, and local agencies during their development to ensure the completeness of the advisories if those agencies can ensure that such information will be treated as confidential and privileged.

Public Comment

Because of their time-critical nature, public health advisories are not issued for public comment before their final release.

Follow-up on Recommendations

ATSDR monitors recommendations identified in the public health advisory as requiring some immediate action on the part of another agency or entity to determine if they have been acted upon. DHAC coordinates with other programs that are responsible for conducting or arranging such follow-up. Recommendations requiring immediate follow-up include those that would alleviate an immediate threat to human health or those that request further information to assist ATSDR in characterizing an immediate public health threat at a site or event. ATSDR evaluates the effectiveness of the advice and recommendations in the public health advisory through its follow-up. The reasons that recommendations are not being followed will be determined. ATSDR's evaluation includes information on the numbers and types of persons affected and, when feasible,

specific information on health and economic impact.

Dated: December 4, 1992.

Walter R. Dowdle,

Acting Administrator, Agency for Toxic Substances and Disease Registry.

[FR Doc. 92-29980 Filed 12-9-92; 8:45 am]

BILLING CODE 4160-70-M

Health Care Financing Administration

Privacy Act of 1974; Report of New System

AGENCY: Department of Health and Human Services (HHS), Health Care Financing Administration (HCFA).

ACTION: Notice of new system of records.

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, we are proposing to establish a new system of records, "Evaluation of the Medicare SELECT program, HHS/HCFA/ORD No. 09-70-0058." We have provided background information about the proposed system in the "**SUPPLEMENTARY INFORMATION**" section below. Although the Privacy Act requires only that the "Routine Uses" portion of the system be published for comment, HCFA invites comments on all portions of this notice. See "**DATES**" section for comment period.

DATES: HCFA filed a new system report with the Chairman of the Committee on Government Operations of the House of Representatives, the Chairman of the Committee on Governmental Affairs of the Senate, and the Acting Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget, on December 1, 1992. Comments on the routine use portion of this notice must be received by January 11, 1993. The new system of records will become effective February 8, 1993, unless HCFA receives comments which would necessitate alterations to the system.

ADDRESSES: The public should address comments to Richard DeMeo, HCFA Privacy Act Officer, Office of Budget and Administration, HCFA, Room 2-H-4 East Low Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207-5187. Comments received will be available for inspection at this location.

FOR FURTHER INFORMATION CONTACT: Rose Hatten, Division of Health Systems and Special Studies, Office of Demonstrations and Evaluations, Office of Research and Demonstrations, HCFA, Room 2306, Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207-5187. Her telephone number is (410) 966-6830.

SUPPLEMENTARY INFORMATION: HCFA proposes to initiate a new system of records collecting data under the authority of section 4358(d) of the Omnibus Budget Reconciliation Act of 1990, Public Law 101-508. The purpose of this system of records is to provide data necessary to evaluate the Medicare SELECT program. Medicare SELECT is a Medicare supplemental insurance policy under which full supplemental benefits generally are paid only when covered services are supplied by providers in the insurer's managed care network.

HCFA will award a contract for an independent evaluation of the Medicare SELECT program. As part of the evaluation effort, the contractor will use individually identifiable data to analyze the effects of the sale of Medicare SELECT policies on beneficiaries' health care costs, selection of health care providers, and use of health care services. Consequently, the evaluation contractor will establish a system of records that includes individually identifiable data for these purposes.

Under current legislation, approved Medicare SELECT policies may be sold in 15 States for 3 years beginning January 1, 1992. Until December 31, 1994, sales of approved Medicare SELECT policies are permitted in Alabama, Arizona, California, Florida, Indiana, Kentucky, Michigan, Minnesota, Missouri, North Dakota, Ohio, Oregon, Texas, Washington, and Wisconsin. It is anticipated that the independent evaluation will be performed during the period from October 1, 1992 through September 30, 1995. The system of records is expected to include data on the number and type of services used by Medicare SELECT policyholders and comparison group members and their experiences in accessing health care, both during and prior to the 3-year period of policy sales. These data will come from Medicare SELECT insurance policies sold to participants, utilization data systems maintained by providers who serve the covered population and comparison group members, a survey of demonstration participants and control group members, and HCFA claims and administrative data.

Samples to conduct analyses will be selected from Medicare SELECT policyholders and individuals from comparison groups. In order to fulfill the objectives and complete the tasks of this contract, the contractor must have individually identifiable records. Since we are proposing to establish this system of records in accordance with the requirements and principles of the Privacy Act, it will not have an unfavorable effect on the privacy or other personal or property rights of individuals.

The Privacy Act permits us to disclose information without the consent of the individual for what is known as "routine use"—that is, disclosure without consent for purposes that are compatible with the purposes for which we collected the information. The establishment of routine uses does not mandate HCFA to release records with identifiers. In fact, HCFA is extremely cautious when releasing records. The proposed routine uses in the new system meet the compatibility criteria because claims data and other personally identifiable information are submitted to HCFA not only for the purpose of claims processing, but also, implicitly, for the administration and evaluation of the Medicare program. The congressionally mandated study, for which we are responsible, is an application of HCFA's continuing obligation to administer and evaluate the Medicare program. The disclosures under the routine uses will not result in any unwarranted adverse effects on personal privacy or other personal or property rights of individuals.

Dated: November 18, 1992.

William Toby, Jr.,

Acting Deputy Administrator, Health Care Financing Administration.

09-70-0058

SYSTEM NAME:

Evaluation of the Medicare SELECT Program, HHS/HCFA/ORD.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

The system will be maintained by an evaluation contractor to be selected by HCFA. Contact the system manager for the location of the contractor. The system, or portions of the system, may also be transferred to the Health Care Financing Administration Data Center for processing and storage. The Data Center is located at the Lyon Building, 7131 Rutherford Road, Baltimore, Maryland 21207-5187.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Medicare enrollees who reside in Alabama, Arizona, California, Florida, Indiana, Kentucky, Michigan, Minnesota, Missouri, North Dakota, Ohio, Oregon, Texas, Washington, and Wisconsin who purchase Medicare SELECT policies and individuals selected as comparison group members.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system will contain information concerning individuals' names, Social Security numbers, demographic characteristics (e.g., age, sex), supplemental health insurance coverage, utilization and cost of health care services, and selection of health care providers.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 4358(d) of the Omnibus Budget Reconciliation Act of 1990, Public law 101–508 (42 U.S.C. 139522 note).

PURPOSE(S):

To provide data necessary to analyze the impact of Medicare SELECT policies on participants' use and cost of services, and selection of providers of care.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Disclosure may be made to the following:

1. The evaluation contractor, to be selected by HCFA, who will use this information to analyze the impacts of the Medicare SELECT policies.

2. A congressional office, from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

3. The Department of Justice, to a court or other tribunal, or to another party before such tribunal, when:

a. The Department of Health and Human Services (HHS), or any component thereof; or

b. Any HHS employee in his or her official capacity; or

c. Any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or

d. The United States or any agency thereof (when HHS determines that the litigation is likely to affect HHS or any of its components)

is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the tribunal, or other party is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that each disclosure is compatible with the purpose for which the records were collected.

Note: Personally identifiable information is submitted to HCFA not only for claims processing, but also for the necessary administration of the Medicare and Medicaid programs. Studies and evaluations are a necessary part of the administration of these programs, as is, occasionally, the defense of litigation brought against the Government. It is necessary to include such a routine use in HCFA's systems of records because agencies such as ours occasionally have a legitimate need to provide documents to a court, or to the Justice Department in its role as attorney for agencies in litigation. The need to disclose can arise suddenly, and cannot be predicted in advance. Because it is not feasible to obtain the individual's consent to the disclosure for a variety of reasons, we include this routine use in our systems.

4. A contractor for the purpose of collating, analyzing, aggregating, or otherwise refining or processing records in this system, or for developing, modifying, and/or manipulating automated data processing (ADP) software. Data would also be disclosed to contractors incidental to consultation, programming, operation, user assistance, or maintenance for ADP or telecommunications systems containing or supporting records in the system.

5. An individual or organization for a research, demonstration, evaluation, or epidemiologic project related to the prevention of disease or disability or the restoration or maintenance of health if HCFA:

a. Determines that the use or disclosure does not violate legal limitations under which the record was provided, collected, or obtained;

b. Determines that the research purpose for which the disclosure is to be made:

(1) Cannot be reasonably accomplished unless the record is provided in individually identifiable form, and

(2) Is of sufficient importance to warrant the effect and/or risk on the privacy of the individual that additional exposure of the record might bring, and

(3) There is reasonable probability that the objective for the use would be accomplished;

c. Requires the recipient to: (1) Establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and

(2) Remove or destroy the information that allows the individual to be identified at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient presents an adequate justification of a research or health nature for retaining such information, and

(3) Makes no further use or disclosure of the record except:

(a) In emergency circumstances affecting the health or safety of any individual, or

(b) For use in another research project, under these same conditions, and with the written authorization of HCFA, or

(c) For disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or

(d) When required by law;

d. Secures a written statement attesting to the recipient's understanding of and willingness to abide by these provisions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper and magnetic media.

RETRIEVABILITY:

Information will be retrieved by the beneficiary's name, Social Security number, and Health Insurance Claim number:

SAFEGUARDS:

The contractor will maintain all records in secure storage areas accessible only to authorized employees and will notify all employees having access to records of criminal sanctions for unauthorized disclosure of information on individuals. For computerized records, the contractor will initiate ADP system security procedures required by HHS *Information Resources Manual* (e.g., use of passwords) and the National Institute of Standards and Technology Federal Information Processing Standards and HCFA's Automated Information Systems Guide, HCFA g:0805–1, "Systems Security Policies." Similar safeguards will be provided to any records transferred to HCFA central office.

RETENTION AND DISPOSAL:

Paper copies of data collection forms and magnetic tapes (or equivalent media) with identifiers will be retained in secure storage areas. Records will be retained for 2 years after the termination of the evaluation contract. The disposal techniques of degaussing will be used to strip magnetic tape (or equivalent media) of identifying names and numbers. Paper copies of records will be destroyed at this time.

SYSTEM MANAGER AND ADDRESS:

Director, Office of Research and Demonstrations, Health Care Financing Administration, 2230 Oak Meadows

Building, 6325 Security Boulevard, Baltimore, Maryland 21207–5187.

NOTIFICATON PROCEDURE:

Inquiries and requests for system records should be addressed to the system manager at the address indicated above. The requestor must specify the name and Social Security number or Health Insurance Claim number of the record for which an inquiry or request is made.

RECORD ACCESS PROCEDURE:

Same as notification procedure. Requestors should reasonably specify the record contents being sought. These procedures are in accordance with Department Regulations, 45 CFR 5b.5(a)(2).

CONTESTING RECORD PROCEDURE:

Contact the system manager named above and reasonably identify the record and specify the information to be contested. State the reason for contesting the record (e.g., why it is inaccurate, irrelevant, incomplete, or not current). These procedures are in accordance with Department regulations, 45 CFR 5b.7.

Note: Notification, record access, and contesting record procedures apply only to the subject individual.

RECORD SOURCE CATEGORIES:

Sources of information contained in this records system are expected to include the following: Medicare SELECT insurance policies sold to participants; utilization data systems maintained by providers who serve the covered population and comparison group members; a survey of demonstration participants and control group members; and HCFA claims and administrative data.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

[FR Doc. 92–30022 Filed 12–9–92; 8:45 am]

BILLING CODE 4120–03–M

Health Resources and Services Administration

Advisory Council, Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of January 1993:

Name: Advisory Committee on Infant Mortality.

Date and Time: January 14–15, 1993, 8:30 a.m.

Place: Dupont Ballroom, Washington Marriott, 1221 22nd Street, NW., Washington, DC 20037.

The meeting is open to the public.

Purpose: The Committee provides advise and recommendations to the Secretary on the following: Department programs which are directed at reducing infant mortality and improving the health status of pregnant women and infants; how best to coordinate the variety of Federal, State, local and private programs and efforts that are designed to deal with the health and social problems impacting on infant mortality; and the implementation of the Healthy Start Initiative and other recommendations of the Domestic Policy Council, and infant mortality objectives from Healthy People: 2000: National Health Promotion and Disease Prevention Objectives.

Agenda: Topics that will be discussed include: Presentation on the PHS Interagency Committee on Infant Mortality analysis of FY 1993 and review of FY 1994 recommendations. Subcommittees will convene.

Anyone requiring information regarding the Committee should contact Mr. Ronald Carlson, Executive Secretary, Advisory Committee on Infant Mortality, Health Resources and Services Administration, room 14–33, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–2460.

Persons interested in attending any portion of the meeting should contact Ms. Kyungeun Carol Han, Public Health Analyst, Office of Planning, Evaluation and Legislation, Health Resources and Services Administration, Telephone (301) 443–2204.

Agenda Items are subject to change as priorities dictate.

Dated: December 4, 1992.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

[FR Doc. 92–29922 Filed 12–9–92; 8:45 am]

BILLING CODE 4160–15–M

Program Announcement and Proposed Funding Priority and Special Considerations for Grants for Geriatric Education Centers

The Health Resources and Services Administration (HRSA) announces the acceptance of applications for fiscal year (FY) 1993, Grants for Geriatric Education Centers under the authority of section 777(a) of the Public Health Service Act, as amended by the Health Professions Education Extension Amendments of 1992, Public Law 102–408, dated October 13, 1992. Comments are invited on the proposed funding priority and special considerations.

Approximately $5,500,000 will be available in FY 1993 for this program. Total continuation support recommended is $3,900,000. It is anticipated that approximately $1,600,000 will be available to support 5 to 6 competing awards averaging $225,000 for single institution applicants and $275,000 for consortia of three or more institutions.

Previous Funding Experience

Previous funding experience is provided to assist potential applicants to make better informed decisions regarding submission of an application for this program. In FY 1992, HRSA reviewed 25 applications for Grants for Geriatric Education Centers. Of those applications, 56 percent were approved and 44 percent were not recommended for further consideration. Eight projects, or 32 percent of the applications received, were funded. In FY 1991, HRSA reviewed 32 applications for Grants for Geriatric Education Centers. Of those applications, 56 percent were approved and 44 percent were not recommended for further consideration. Eight projects, or 25 percent of the applications received, were funded.

Eligibility

Section 777(a) of the PHS Act authorizes the award of grants to accredited health professions schools as defined by section 737(a)(3), or programs for the training of physician assistants as defined by section 799(3), or schools of allied health as defined in section 799(4), or schools of nursing as defined by section 853(2).

Applicants must be located in the United States, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands (the Republic of Palau), the Republic of the Marshall Islands, or the Federated States of Micronesia.

To receive support, applicants must meet the requirements of regulations as set forth in 42 CFR part 57, subpart 00. The initial period of Federal support should not exceed 3 years. Projects may recompete for an additional 3 years.

Grants may be awarded to support the development of collaborative arrangements involving several health professions schools and health care facilities. These arrangements, called Geriatric Education Centers (GECs), are established to facilitate training of health professional faculty, students, and practitioners in the diagnosis, treatment, and prevention of disease, disability, and other health problems of the aged. Health professionals include physicians, osteopathic physicians, dentists, optometrists, podiatrists,

pharmacists, nurses, nurse practitioners, physician assistants, chiropractors, clinical psychologists, health administrators, and allied health professionals.

Projects supported under these grants may address any combination of the statutory purposes listed below:

(a) Improve the training of health professionals in geriatrics;

(b) Develop and disseminate curricula relating to the treatment of the health problems of elderly individuals;

(c) Expand and strengthen instruction in methods of such treatment;

(d) Support the training and retraining of faculty to provide such instruction;

(e) Support continuing education of health professionals and allied health professionals who provide such treatment; and

(f) Establish new affiliations with nursing homes, chronic and acute disease hospitals, ambulatory care centers, and senior centers in order to provide students with clinical training in geriatric medicine.

Grant supported projects may be designed to accomplish the statutory purposes in a variety of ways, emphasizing multidisciplinary, as well as discipline-specific approaches to the development of geriatric education resources. For example:

- Health professions schools within a single academic health center, or a consortium of several educational institutions, may share their educational resources and expertise through a Geriatric Education Center to extend a broad range of multidisciplinary educational services outward to other institutions, faculty, facilities and practitioners within a geographic area defined by the applicant.

- Educational institutions that have limited geriatric education resources and which traditionally have had linkages to a geographic area where substantial geriatric education needs exist, may seek to establish a geriatric education center. Such a center could be designed to enhance and expand the capability of collaborating professional schools to provide geriatric education resources in the geographic area in need.

- Projects may support the development of Geriatric Education Centers designed to focus on multidisciplinary geriatric education emphasizing high priority services and high risk groups among the elderly, minority aging, or other special concerns.

National Health Objectives for the Year 2000

The Public Health Service (PHS) urges applicants to submit work plans that address specific objectives of Healthy People 2000. Potential applicants may obtain a copy of Healthy People 2000. (Full Report; Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report; Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (Telephone 202–783–3238).

Education and Service Linkage

As part of its long-range planning, HRSA will be targeting its efforts to strengthening linkages between U.S. Public Health Service supported education programs and programs which provide comprehensive primary care services to the underserved.

Review Criteria

The following criteria will be considered in the review of applications:

(1) The degree to which the proposed project adequately provides for the project requirements described in 42 CFR 57.4004;

(2) The extent to which the rationale and specific objectives of the project are based upon a needs assessment of the status of geriatrics training in the institutions to be assisted and/or the geographic area to be served;

(3) The ability of the project to achieve the project objectives within the proposed geographic area;

(4) The adequacy of educational facilities and clinical training settings to accomplish objectives;

(5) The adequacy of organizational arrangements involving professional schools and other organizations necessary to carry out the project;

(6) The adequacy of the qualifications and experience in geriatrics of the project director, staff and faculty;

(7) The administrative and managerial ability of the applicant to carry out the proposed project in a cost-effective manner, and;

(8) The potential of the project to continue on a self-sustaining basis.

Other Considerations

In addition, the following funding factors may be applied in determining funding of approved applications.

A funding preference is defined as the funding of a specific category or group of approved applications ahead of other categories or groups of approved applications.

A funding priority is defined as the favorable adjustment of aggregate review scores of individual approved applications when applications meet specified criteria.

Special consideration is defined as the enhancement of priority scores by merit reviewers based on the extent to which applications address special areas of concern.

It is not required that applicants request consideration for a funding factor. Applications which do not request consideration for funding factors will be reviewed and given full consideration for funding.

The following funding preference will be used in FY 1993. This funding preference was implemented in FY 1989 after public comment (54 FR 3685, dated January 25, 1989).

Established Funding Preference

In determining the order of funding of competing applications which have been recommended for approval, a funding preference will be given to approved applications for projects which will offer training involving four or more health professions, one of which must be allopathic or osteopathic medicine.

Proposed Funding Priority

A funding priority will be given to applications that demonstrate linkages for the purpose of training educators or practitioners who serve minority or low-income elderly. Eligible training sites include Area Health Education Center, community and migrant health centers, community mental health centers, Native American clinics, Native Hawaiian clinics, state or local health departments, public health clinics, rural hospitals and clinics, and home health agencies and longterm care facilities that accept Medicaid patients. This priority is consistent with a HRSA strategy to improve the geriatric expertise of health professionals who serve minority and low-income elders at risk of poor health outcomes.

Applicants must identify the training facility to be utilized, the number and type of trainees, and the nature and length of the training experience. A letter of agreement that demonstrates an understanding of and commitment to the proposed training activity must be included for each facility.

Proposed Special Considerations

Special consideration will be given to the extent to which applicants enroll educators and practitioners from underserved areas, for example, rural areas. This special consideration is intended to foster improved geriatric health care in rural and other underserved areas because health

professionals who come from such areas are more likely to return there upon completion of training to teach and provide needed health services.

Special consideration will also be given to programs that provide training and continuing education to health care professionals (including allied health professionals) in the delivery of health and long-term care services to persons with Alzheimer's disease. Alzheimer's disease represents one of the most significant medical and social problems of aging. This special consideration encourages activities designed to improve the qualifications of health care professionals who work directly with Alzheimer's Disease patients and families, and who oversee the care provided by formal and informal caregivers.

Additional Information

Interested persons are invited to comment on the proposed funding priority and special considerations. The comment period is 30 days. All comments received on or before January 8, 1993 will be considered before the final funding priority and special considerations are established. No funds will be allocated or final selections made until a final notice is published stating when the final funding priority and special considerations will be applied. Written comments should be addressed to: Neil Sampson, M.P.H., Director, Division of Associated, Dental, and Public Health Professions, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 8–101, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying at the Division of Associated, Dental, and Public Health Professions, Bureau of Health Professions, at the above address, weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

Application Requests

Requests for grant application materials and questions regarding grants policy and business management issues should be directed to: Ms. Jacquelyn Whitaker (D–31), Grants Management Specialist, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 8C–26, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–6857.

Completed applications should be returned to the Grants Management Branch at the above address.

If additional programmatic information is needed, please contact: Ms. Anne Kahl, Geriatric Initiatives Branch, Division of Associated, Dental, and Public Health Professions, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 8–103, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–6887.

The standard application from PHS 6025–1, HRSA Competing Training Grant Application, General Instructions and supplement for this program have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB clearance number is 0915–0060.

The deadline date for receipt of applications is January 11, 1993. Applications shall be considered as meeting the deadline if they are either:

1. Received on or before the deadline date, or

2. Postmarked on or before the deadline and received in time for submission to the independent review group. A legibly dated receipt from a commercial carrier or the U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

Late applications not accepted for processing will be returned to the applicant.

This program, Grants for Geriatric Education Centers, is listed at 93.969 in the Catalog of Federal Domestic Assistance. It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100). This program is not subject to the Public Health System Reporting Requirements.

Dated: December 4, 1992.

John H. Kelso,

Acting Administrator.

National Institutes of Health

National Heart, Lung, and Blood Institute; Notice of the Meeting of the Cardiology Advisory Committee

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Cardiology Advisory Committee, National Heart, Lung, and Blood Institute, January 25–26, 1993, Building 31C, Conference Room 8, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

The entire meeting will be open to the public on January 25 from 9 a.m. to 5 p.m. and on January 26 from 8 a.m. to adjournment. Attendance by the public will be limited to space available. Topics for discussion will include a review of the research programs relevant to the Cardiology area and consideration of future needs and opportunities.

Terry Bellicha, Chief, Communications and Public Information Branch, National Heart, Lung, and Blood Institute, room 4A21, Building 31, National Institutes of Health, Bethesda, Maryland 20892, (301) 496–4236, will provide a summary of the meeting and a roster of the committee members.

Michael J. Horan, M.D., Associate Director for Cardiology, Division of Heart and Vascular Diseases; National Heart, Lung, and Blood Institute; room 318, Federal Building, Bethesda, Maryland 20892, (301) 496–5421, will furnish substantive program information upon request.

Public Health Service

National Toxicology Program; Availability of Technical Report on Toxicology and Carcinogenesis Studies of 2,4-Diaminophenol Dihydrochloride

The HHS' National Toxicology Program announces the availability of the NTP Technical Report on the toxicology and carcinogenesis studies of 2,4-diaminophenol dihydrochloride, used as a color accelerator in photographic developers and in photographic bleaching baths. It is also used as an intermediate in the manufacture of certain dyes for animal fur.

Two-year toxicology and carcinogenesis studies were conducted by administering 2,4-diaminophenol dihydrochloride in corn oil by gavage to groups of 60 male and 60 female F344/N rats and 60 B6C3F1 mice of each sex. Rats received doses of 0, 12.5 or 25 mg/kg; mice received doses of 0, 19 or 38 mg/kg.

Under the conditions of these 2-year gavage studies, there was no evidence of carcinogenic activity* of 2,4-diaminophenol dihydrochloride in male or female F344/N rats that received 12.5 or 25 mg/kg. There was some evidence of carcinogenic activity of 2,4-diaminophenol dihydrochloride in male B6C3F1 mice based on increased incidences of renal tubule adenomas; there was no evidence of carcinogenic activity of 2,4-diaminophenol dihydrochloride in female B6C3F1 mice that received 19 or 38 mg/kg.

Administration of 2,4-diaminophenol dihydrochloride to rats was associated with increased severity of nephropathy in males and females, increased incidence of nephropathy in females, and focal renal tubule hyperplasia in males and females. In mice, chemical exposure was associated with renal tubule necrosis and regeneration in males and females and forestomach acanthosis in males.

The staff scientist for this study is Dr. Richard D. Irwin. Questions or comments about the contents of this Technical Report should be directed to Dr. Irwin at P. O. Box 12233, Research Triangle Park, NC 27709 or telephone (919) 541–3340.

Copies of Toxicology and Carcinogenesis Studies of 2,4-Diaminophenol Dihydrochloride in F344/N Rats and B6C3F1 Mice (Gavage Studies) (TR 401) are available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161; telephone (703) 487–4650. The order number is PB 93–117919.

* The NTP uses five categories of evidence of carcinogenic activity observed in each animal study: Two categories for positive results ("clear evidence" and "some evidence"), one category for uncertain findings ("equivocal evidence"), and one category for no observable effect ("no evidence"), and one category for studies that cannot be evaluated because of major flaws ("inadequate study").

Dated: December 4, 1992.

Kenneth Olden,

Director, National Toxicology Program.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CO-070-0-4410-13-241A]

Grand Junction District Advisory Council, CO; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: The Grand Junction District Advisory Council will meet on Tuesday, January 12, 1992. The meeting will convene at 9 a.m. in the conference room at the Bureau of Land Management Office, 50629 Hwy 6 & 24, Glenwood Springs, Colorado 6.

SUPPLEMENTARY INFORMATION: The agenda for the meeting will include (1) Introduction, (2) Briefing on duties of Rangers and interactions with county law enforcement, (3) Ruby Canyon Update, (4) Report on minerals in Rabbit Valley and Ruby Canyon, (5) Update on Hawxhurst Land Exchange, (6) King Mountain Land Exchange Update, (7) Volunteer Recruitment, (8) Glenwood Springs Resource Area Travel Management Plan process update, (9) Any new issue updates for board members, and (10) Public Comment Period.

The meeting is open to the public. Interested persons may make oral statements to the Council between 2:30 and 3 p.m. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 2815 H Road, Grand Junction, Colorado 81506 by January 5, 1992. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Minutes of the Council meeting will be available for public inspection in the District Office thirty (30) days following the meeting.

FOR FURTHER INFORMATION CONTACT: Tim Hartzell, District Manager, Grand Junction District Office, Bureau of Land Management, 2815 H Road, Grand Junction, Colorado 81506, phone (303) 244-3000.

Tim Hartzell,

District Manager.

Record of Decision and Rangeland Program Summary and Notice of Off-Road Vehicle and Outstanding Natural Area/Research Natural Area/Area of Critical Environmental Concern Designations for the Three Rivers Resource Management Plan; Burns District, Oregon; Correction.

AGENCY: Bureau of Land Management, DOI.

ACTION: Correction.

SUMMARY: In notice document 92-25230 beginning on page 47669 in the issue of Monday, October 19, 1992, make the following corrections:

On page 47670 in the second column, under the heading "Forestry and Woodlands," an additional decision is added which reads:

• Meet public demands for miner forest products such as fuel wood, posts, poles, Christmas trees, vegetal materials, etc., consistent with other resource objectives.

On page 47671 in the first column, the heading "Fish" should be corrected to read "Fire."

Dated: December 1, 1992.

Donald R. Cain,

Associate District Manager.

BILLING CODE 4310-33-M

[UT-050-4210-05; U-60631]

Realty Action

AGENCY: Bureau of Land Management, Richfield District, Interior.

ACTION: Notice of realty action U-60631; noncompetitive sale of public lands in Garfield County, Utah.

SUMMARY: Notice is given that the following described parcel of public land has been examined, and through the development of local use planning decisions based upon public input, resource considerations, regulations and Bureau policies, has been found suitable for disposal by sale pursuant to section 203 of the Federal Land Policy and Management Act of 1976 (FLPMA) (90 Stat. 2750; 43 U.S.C. 1713) using noncompetitive (direct sale) procedures (43 CFR 2711.3-3(a)(1)). Sale will be at no less than the appraised fair market value of $1000.00.

Salt Lake Meridian, Utah

T.37 S., R.11 E.,
Sec. 6, NW¼SE¼.
The described land aggregates 40 acres.

The land is being offered as a direct sale to Garfield County, Utah, in accordance with 43 CFR 2711.3-3(a)(1). Garfield County proposes to use the land for a solid waste disposal site. The parcel will be offered for sale to Garfield County not less than sixty (60) days after the date of publication of this notice.

Bidder Qualifications

Bidders must be U.S. citizens, 18 years of age or more; a State or State instrumentality authorized to hold property; or a corporation authorized to hold property; or a corporation authorized to own real estate.

Bid Standards

The Bureau of Land Management (BLM) reserves the right to accept or reject any and all offers, or withdraw the

land from sale if, in the opinion of the Authorized Officer, consummation of the sale would not be fully consistent with section 203(g) of FLPMA or other applicable laws.

Publication of this notice in the **Federal Register** constitutes notice to the grazing permittees of the Rockies Allotment that their grazing leases may be directly affected by this action. Specifically, the permitted Animal Unit Months (AUMs) will not be reduced because of this sale, but the land (acreage) will have to be excluded from the allotment effective upon issuance of the patent.

Publication of this notice in the **Federal Register** segregates the public lands from the operation of the public land laws and the mining laws. The segregative effect will end upon issuance of a patent, or two hundred seventy (270) days from the date of the publication, whichever occurs first.

The Terms and Conditions Applicable to the Sale Area:

1. All minerals, including oil and gas, shall be reserved to the United States, together with the right to prospect for, mine and remove minerals. A more detailed description of this reservation, which will be incorporated in the patient document, is available for review at the Richfield District Office and the Henry Mountain Resource Area Office.

2. A right-of-way will be reserved for ditches and canals constructed by the authority of the United States (Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945).

3. The sale of the lands will be subject to all valid existing rights and reservations of record.

DATES: On or before January 25, 1993, interested parties may submit comments to the Richfield District Manager, Bureau of Land Management, 150 East 900 North, Richfield, Utah 84701. Objections will be reviewed by the Utah State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

SUPPLEMENTARY INFORMATION: Additional information concerning the lands, the terms and conditions of the sales, and the bidding instructions may be obtained from Roy Edmonds, 150 East 900 North, Richfield, Utah 84701, (801) 896–8221.

Dated: December 2, 1992.

Jerry Goodman,

District Manager.

BILLING CODE 4310–DQ–M

[CO–942–93–4730–12]

Colorado; Filing of Plats of Survey

December 2, 1992

The plats of survey of the following described land, will be officially filed in the Colorado State Office, Bureau of Land Management, Lakewood, Colorado, effective 10 am., December 2, 1992.

The plat representing the dependent resurvey of portions of certain mineral claims in the northwest ¼ of section 28, T. 3 S., R. 74 W., Sixth Principal Meridian, Colorado, Group No. 695, was accepted June 30, 1992.

This plat, in two sheets, representing the dependent resurvey of portions of the subdivisional line between sections 5 and 8 and of the subdivision of section 5, the subdivision of section 5 and the informative traverse of certain sand and gravel pits in section 5, T. 1 N., R. 102 W., Sixth Principal Meridian, Colorado, Group No. 1009, was accepted August 17, 1992.

The plat representing the metes-and-bounds survey in section 2, T. 44 N., R. 7 E., New Mexico Principal Meridian, Colorado, Group No. 1018, was accepted August 7, 1992.

The plat representing the dependent resurveying of a portion of the subdivisional lines, the subdivision of section 34, and a metes-and-bounds survey in section 34, T. 45 N., R. 7 E, New Mexico Principal Meridian, Colorado, Group No. 1018, was accepted August 7, 1992.

The supplemental plat showing a subdivision of original lots 4, 5, and 12 in section 15, T. 13 S., R. 92 W., Sixth Principal Meridian, Colorado, was accepted August 5, 1992.

These surveys were executed to meet certain administrative needs of this Bureau.

The supplemental plat correcting the lotting error in the NE¼ of section 27, T. 34 N., R. 11 W., New Mexico Principal Meridian, Colorado, was accepted August 7, 1992.

This survey was executed to meet certain administrative needs of the Bureau of Reclamation and the Bureau of Indian Affairs.

The plat representing the dependent resurvey of portions of the east and north boundaries, subdivisional lines, and certain mineral claims, a metes-and-bounds survey of portions of certain lots in section 11, and the subdivision of section 11, T. 13 S., R. 83 W., Sixth Principal Meridian, Colorado, Group No. 983, was accepted September 18, 1992.

The plat representing the dependent resurvey of a portion of the west boundary, a portion of the subdivisional line between section 18 and 19 and the original meander line of the left bank of the Colorado River through section 18, the survey of a portion of the subdivision of section 18, the meanders of a portion of the present left bank of the Colorado River, and the accretion of certain public land lots in section 18, T. 1 N., R. 2 W., Ute Meridian, Colorado, Group No. 886, was accepted August 18, 1992.

The plat representing the dependent resurvey of a portion of the subdivisional lines, and the subdivision of section 13, 14, and 15, T. 1 N., R. 3 W., Ute Meridian, Colorado, Group No. 886 was approved August 18, 1992.

The plat representing the dependent resurvey of a portion of the Eleventh Standard Parallel North through a portion of Ranges 11 and 12 West, a portion of the west boundary and the subdivisional lines, and the subdivision of certain sections, T. 44 N., R. 11 W., New Mexico Principal Meridian, Colorado, Group No. 928, was accepted June 30, 1992.

These surveys were executed to meet certain administrative needs of the U.S. Forest Service.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado, 80215.

Jack A. Eaves,

Chief, Cadastral Surveyor for Colorado.

[FR Doc. 92–30016 Filed 12–9–92; 8:45 am]

BILLING CODE 4310–JB–M

Fish and Wildlife Service

Notice of Record of Decision and Statement of Findings on the Environmental Impact Statement for the Chincoteague National Wildlife Refuge Master Plan

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA), the United States Fish and Wildlife Service ("Service") issues this Record of Decision and Statement of Findings upon consideration of the Final Environmental Impact Statement (FEIS) for the Chincoteague National Wildlife Refuge Master Plan.

The Service has evaluated and considered the alternatives for the long-range management and development of the Chincoteague National Wildlife Refuge as presented in the FEIS and has reviewed and considered public and

agency comments. Based on that evaluation and review, the Service has selected the Proposed Action Alternative as described in the FEIS for implementation. This determination was based on a thorough analysis of the environmental, social, economic, and similar considerations.

Background

This action is designed to give overall guidance for the protection, use, and development of Chincoteague National Wildlife Refuge (CNWR) during the next ten to twenty years. Chincoteague National Wildlife Refuge was established in 1943 for use as an inviolate sanctuary, or for any other management purposes, for migratory birds. At the time of the original acquisition, primary recognition was given to southern Assateague Island's value as important habitat for migrating and wintering greater snow geese. While the refuge continues to provide important waterfowl habitat, the management emphasis has expanded over the years to address a variety of other wildlife needs. Today, Chincoteague NWR supports breeding populations of the endangered Delmarva Peninsula fox squirrel and threatened piping plover. In addition the refuge has supported a resident pair of peregrine falcons, also an endangered species, since 1982, and hundreds of peregrine falcons stop on the refuge during migration. The refuge is also one of the top five shorebird migratory staging areas in the United States, east of the Rocky Mountains. However, the refuge also provides an important educational and recreational resource for people attracted to the beautiful beach and excellent wildlife viewing opportunities. Visitation has increased sharply since construction of the bridge from Chincoteague Island in 1963 and inclusion of refuge lands within Assateague Island National Seashore (AINS) in 1965. According to refuge records, public use has grown from an estimated 100,000 visits in 1963 to more than 1.5 million visits in 1987, ascribing to Chincoteague NWR the third highest number of visits of any national wildlife refuge in the country. The primary impetus for master planning of Chincoteague NWR at this particular time comes from a growing need to balance high visitation with protection and enhancement of wildlife populations that depend on refuge habitat. The situation must be viewed in the broad context of regional and national trends in loss of wildlife habitat and demand for recreational and economic opportunities.

The Selected Alternative

The selected alternative is the Proposed Action as described in the FEIS. Management proposals regarding wildlife species and their habitat include: Acquiring important wildlife habitat in the refuge vicinity; managing refuge forests to establish and maintain endangered Delmarva Peninsula fox squirrel habitat and habitat diversity; protecting nesting and feeding piping plovers, a threatened species, and other shorebirds by intensifying predator control and continuing/expanding closures; enhancing freshwater wetland habitat on the refuge by improving water capabilities in the impoundments; maintaining existing biodiversity present on the refuge; and maintaining better control of the Chincoteague ponies. The public use and facilities management actions include: emphasizing wildlife oriented recreational and educational opportunities; continuing the deer and waterbird hunting programs; managing off-road vehicle access to protect the piping plover; retaining the current beach general recreation zone; establishing a maximum beach use capacity; continuing private vehicle beach access as long as beach parking areas remain; allowing NPS to maintain existing parking at the beach as long as the land base remains; coordinating with NPS and the Chincoteague community in identifying a suitable off-site parking area; implementing a system to eliminate traffic backups at the beach; and developing a FWS headquarters/visitor center on a geologically stable portion of the island.

Other Alternatives Considered

Besides the proposed action, the major alternatives under consideration that were analyzed and evaluated during planning include the following:

1. The No Action alternative describes current management activities, assuming that these will continue over the next ten to twenty years. A description of this course of no significant new action provides a reference point to compare and evaluate environmental consequences associated with the other alternative plans. Although significant steps are presently being undertaken to manage and protect wildlife, the overall, environmental effects of taking No Action may result in reduced wildlife habitat quality and reduced wildlife reproduction. Inadequate visitor facilities and public use regulation mechanisms will continue to compromise wildlife oriented experiences, and may degrade wildlife habitat or otherwise jeopardize wildlife production.

2. The Wildlife Management alternative emphasizes wildlife protection and gives full consideration to actively managing refuge habitats and public uses for maximum wildlife benefit. Public use has lower priority, although programs that do not require a large outlay of funding or necessitate construction of nonwildlife oriented facilities on the refuge are proposed. Habitat and wildlife production benefits from implementation of the natural resource management proposals in this alternative will exceed those described for the Proposed Action alternative, as certain public access is confined to seasonal shuttle access and habitat management programs and wildlife studies efforts are increased. Public use management consequences reflect reduced recreation opportunities, including less wildlife observation opportunities.

3. The Public Use alternative emphasizes visitor accommodation. The major objectives to protect and perpetuate the ecosystem and wildlife populations are met. Many proposed management efforts are directed towards educational, interpretive, and wildlife oriented public recreation programs. The intent is to promote public awareness and enjoyment of the refuge. Improved interpretive and educational opportunities will increase the awareness of refuge visitors about wildlife and habitat issues. However, habitat degradation and wildlife disturbance will result from increased public access to Toms Cove Hook, the White Hills, and northern refuge areas, possibly reducing wildlife presence and reproduction. These actions may, in turn, reduce the quality of wildlife oriented public use experiences.

Minimization of Impacts

Possible project impacts, public concerns, and methods to be used to mitigate those impacts and concerns are addressed in the FEIS; the major impacts and concerns are listed here. Habitat disturbance, which will result from the construction of a Visitor Center/Headquarters, will be minimized by constructing in an already disturbed site, other sites will be restored to natural habitat, and siting the facility will be conducted to use as little habitat as possible. Possible public disturbance to wildlife and habitat will be lessen by only allowing certain uses, using time restrictions, redirecting use to less sensitive areas, and using closures. A visitor cap on beach use will allow for controlled growth to allow for economic growth in the community but will also

lessen impacts to the resources. Concern that future beach parking would lead to further loss of habitat on the refuge was alleviated for future parking. Impacts of off road vehicle use on the refuge were lessen by changing this entrance, maintaining a corridor, and planning to add further restrictions if needed to protect threatened species. The impacts of traffic backups at the beach were reduced by identifying a means to eliminate these backups. The concern of pony impacts to the habitat were minimized through better containment and fire company coordination. By directing the forest management program with research and test plots, the concern for impacts to the forest resources was lessened. Concern about artificially manipulating the sand dunes was minimized by maintaining them only in selected locations and by improving drainage of impoundments so as to reduce this maintenance need. The possible impacts from deep well pumping were mitigated by calling for research and a monitoring program.

Findings and Decision

Having reviewed and considered the FEIS for the Chincoteague National Wildlife Refuge Master Plan and the public comments thereon, the Service finds as follows:

1. The requirements of NEPA and their implementing regulations have been satisfied, and

2. Statutory authority for the Service to fund (implement) this project exists, and

3. The Proposed Action Alternative represents the best balance between the Service's goals and objectives and the public's concerns identified throughout the public participation process, and

4. Consistent with social, economic, and other essential considerations form among the reasonable alternatives thereto, the Proposed Action Alternative is one which minimizes or avoids adverse environmental effects to the maximum extent practicable, including effects disclosed in the FEIS, and

5. Consistent with the social, economic and other essential considerations, to the maximum extent practicable, adverse environmental effects revealed in the FEIS process will be minimized or avoided by incorporating as conditions to this decision mitigative measures.

Having made the above findings, the Service has decided to proceed, as funding permits, with implementation of the Proposed Action Alternative. The decision to implement this alternative is subject to the following conditions that will further minimize or avoid the environmental impacts and public concerns identified during the environmental review process:

A. All activities involving physical alteration of land will be subjected to all regulatory requirements and approvals including necessary permits will be obtained or satisfied prior to construction.

B. Mitigation measures such as erosion control, timing of construction, seeding, and other conservation measures will be strictly adhered to in all construction-related activities that may be implemented as part of this project and shall be incorporated into any permits that may be issued for these activities.

This statement of Findings/Record of Decision will serve as the written facts and conclusions relied upon in reaching this decision.

Nancy M. Kaufman,

Acting Regional Director.

BILLING CODE 4310-31-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 32187]

Canadian National Railway Company—Trackage Rights Exemption—St. Clair Tunnel Co.; Exemption

St. Clair Tunnel Company (SCTC) has agreed to grant overhead and local trackage rights to Canadian National Railway Company (CN),[1] between milepost 1.73 at the United States-Canada Boundary line and milepost 2.70 at the east line of 16th Street in Port Huron, MI. The transaction will be consummated upon receipt of approval from the appropriate regulatory agencies in the U.S. and Canada.[2]

This grant of trackage rights is one of a series of transactions that will facilitate the construction of a new tunnel to replace the existing railroad tunnel which crosses under the St. Clair River, between Sarnia, Ontario and Port Huron, MI.[3]

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Charles A. Spitulnik, Hopkins & Sutter, 888 16th Street, NW., suite 700, Washington, DC 20006.

As a condition to the use of this exemption, any employees adversely affected by the trackage rights will be protected under Norfolk and Western Ry. Co.—Trackage Rights—BN, 354 I.C.C. 605 (1978), as modified in Mendocino Coast Ry., Inc.—Lease and Operate, 360 I.C.C. 653 (1980), and as clarified in Wilmington Term. RR, Inc.—Pur. & Lease—CSX Transp., Inc., 6 I.C.C.2d 799 (1990).

Dated: December 4, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary

[FR Doc. 92-30007 Filed 12-9-92; 8:45 am]

BILLING CODE 7035-01-M

[1] SCTC is a wholly owned subsidiary of CN.

[2] This proceeding is related to the notice of exemption in Finance Docket No. 32180, St. Clair Tunnel Company—Acquisition Exemption—Canadian National Railway Company, filed November 13, 1992.

[3] Notices of exemptions were served August 4, 1992, in Finance Docket No. 32115, Grand Trunk Western Railroad Company—Trackage Rights Exemption—St. Clair Tunnel Company, Finance Docket No. 32116, St. Clair Tunnel Company—Acquistion Exemption—Grand Trunk Western Railroad Company, and Finance Docket No. 32117, Canadian National Railway Company—Continuance in Control Exemption—St. Clair Tunnel Company.

[Finance Docket No. 32196]

St. Clair Tunnel Company—Acquisition Exemption—Canadian National Railway Company; Exemption

St. Clair Tunnel Company (SCTC),[1] filed a notice of exemption to acquire CN's St. Clair Subdivision between milepost 1.73 at the United States-Canada Boundary line and milepost 2.70 at the east line of 16th Street in Port Huron, MI.[2]

This transaction is one of a series of transactions involving the relocation of the existing railroad tunnel which crosses under the St. Clair River, between Sarnia, Ontario and Port Huron, MI.[3]

This transaction is filed under 49 CFR 1180.2(d)(3). It will not result in adverse changes in service levels, significant operational changes, or a change in the competitive balance with carriers outside the corporate family.

To ensure that all employees who may be affected by the transaction are given the protection afforded under 49 U.S.C. 10505(g)(2) and 49 U.S.C. 11347, the labor conditions set forth in New York Dock Ry.—Control—Brooklyn Eastern Dist., 360 I.C.C. 60 (1979), are imposed.

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Charles A. Spitulnik, Hopkins & Sutter, 888 16th Street NW., suite 700, Washington, DC 20006.

Decided: December 4, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[2] This proceeding is related to the notice of exemption in Finance Docket No. 32197, Canadian National Railway Company—Trackage Rights Exemption—St. Clair Tunnel Company, filed November 13, 1992.

[3] Notices of exemptions were served August 4, 1992, in Finance Docket No. 32115, Grand Trunk Western Railroad Company—Trackage Rights Exemption—St. Clair Tunnel Company, Finance Docket No. 32116, St. Clair Tunnel Company—Acquisition Exemption—Grand Trunk Western Railroad Company, and Finance Docket No. 32117, Canadian National Railway Company—Continuance in Control Exemption—St. Clair Tunnel Company.

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy and 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States, et al.* versus *ABC Industries, et al.*, Civil Action No. 4:92 CV 163, was lodged on November 25, 1992, with the United States District Court for the Western District of Michigan.

The ABC Complaint, which would be resolved entirely under the proposed settlement, asserts claims under sections 106 and 107 of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9601 et seq. The Complaint and proposed settlement address the Superfund NPL Site ("Site") known as the Verona Well Field, located in Battle Creek, Michigan. The State of Michigan is a co-plaintiff in ABC and has alleged state law claims under the Michigan Environmental Response Act ("MERA"), which is Michigan's CERCLA analog.

The proposed decree would resolve the State claims on substantially the same basis as settlement terms resolving the federal aspects of ABC, which are summarized below.

U.S. EPA has determined each ABC defendant to be a *de minimis* contributor of hazardous substances to the Site. The settlement embodied by the proposed consent decree, if entered by the Court and complied with by the *ABC* defendants, will resolve the liability of each settling defendant to the United States under CERCLA for all matters addressed in the consent decree, including incurrence of response costs at the Site, both past and future, and including but not limited to the cutoff of contribution claims asserted against these settling defendants by any other party potentially responsible for the Site under CERCLA.

In return for this protection, each settling defendant must pay what EPA has determined to be the settlor's fair share of past costs, as well as the settlor's share of estimated future costs of response at the Site. Finally, to account for the possibilities such as response cost overruns on remedies already underway at the Site or the need to implement additional remedies, each settling defendant also will pay a cash premium above and beyond the settlor's fair share of past costs and predicted costs.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States, et al.* versus *ABC Industries, et al.*, DOJ Ref. #90-11-3-626B.

The proposed consent decree may be examined at the Office of the United States Attorney, 399 Federal Building Grand Rapids, MI 49503; the Region 5 Office of the Environmental Protection Agency, 77 W. Jackson Blvd., Chicago, Illinois 60604; and at the Consent Decree Library, 601 Pennsylvania Avenue NW., Washington, DC 20044, 202-347-2072. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 601 Pennsylvania Avenue NW., Box 1097, Washington, DC 20044. In requesting a copy, please refer to the case referenced above and enclose a check in the amount of $27.00 (25 cents per page reproduction costs), payable to the Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 92-29935 Filed 12-9-92; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Consent Decree

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on November 25, 1992, a proposed Consent Decree in *United States* v. *Nabisco, Inc.*, Civil Action No. 92-4959, was lodged with the United States District Court for the District of New Jersey. The proposed Consent Decree settles the United States' claims that the defendant had violated the Clean Air Act.

Under the terms of the Consent Decree the settling defendant will pay $358,000 in civil penalties, install pollution control equipment, and test such equipment.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Nabisco, Inc.*, D.O.J. Ref. 90-5-2-1-1635.

The proposed Consent Decree may be examined at the Office of the United

States Attorney, Civil Division, 970 Broad Street, Newark, New Jersey 07102; the Office of the United States Environmental Protection Agency, Region II, 26 Federal Plaza, NY, NY 10278; and at the Consent Decree Library, Environmental Enforcement Section, 601 Pennsylvania Avenue NW., Washington, DC 20044, (202 347–2072). A copy of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library, Environmental Enforcement Section, 601 Pennsylvania Avenue NW., Box 1097, Washington, DC 20044. In requesting a copy, please refer to the referenced case and enclose a check in the amount of $5.25 (25 cents per page—reproduction cost) made payable to the Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Lodging of Consent Decree

Notice is hereby given that a proposed Consent Decree in *United States* v. *Winnebago Reclamation Service, Inc., et al.* among the United States and 20 defendants was lodged on November 25, 1992 with the United States District Court for the Northern District of Illinois. In this action, the United States on behalf of the United States Environmental Protection Agency sought, *inter alia*, injunctive relief and recovery of response costs under the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9601 *et seq.*, in connection with the Pagel's Pit Site in Winnebago County, south of Rockford, Illinois. The proposed Consent Decree requires, *inter alia*, (1) implementation of the remedial actions selected by EPA for the Pagel's Pit Site as described in the Consent Decree; (2) payment to the United States of $492,000 in past response costs; and (3) payment of the United States' future costs of overseeing the implementation of remedial action. Pursuant to 42 U.S.C. 9622(g), the Decree also contains a de minimis settlement with a limited reopener with nineteen of the defendants.

The Department of Justice will receive comments relating to the proposed Consent Decree for 30 days following the publication of this Notice. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Winnebago Reclamation Service, Inc.*, D.J. Ref. No. 90–11–3–712. The proposed Consent Decree may be examined at the Office of the United States Attorney for the Northern District of Illinois, 211 S. Court, room 212, Rockford, Illinois 61101; the Region V Office of the United States Environmental Protection Agency, 77 West Jackson Street, Chicago, Illinois 60604; and the Consent Decree Library, 601 Pennsylvania Avenue NW., Box 1097, Washington, DC 20004 (202–347–2072). A copy of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library. In requesting a copy, please enclose a check in the amount of $57.25 (25 cents per page for reproduction costs), payable to the Consent Decree Library.

John C. Cruden,

Chief, Environment and Natural Resources Division, Environmental Enforcement Section.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (92–76)]

NASA Advisory Council (NAC), Aeronautics Advisory Committee (AAC); Meeting on Flight Controls and Guidance

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a NAC, Aeronautics Advisory Committee meeting on flight controls and guidance.

DATES: January 6, 1992, 8 a.m. to 5 p.m.; January 7, 1992, 8 a.m. to 5 p.m.; and January 8, 1992, 8 a.m. to 11:30 a.m.

ADDRESSES: National Aeronautics and Space Administration, Dryden Flight Research Facility, Conference Room 1, Building 4800, Edwards, CA 93523.

FOR FURTHER INFORMATION CONTACT: Mr. Ken Szalai, National Aeronautics and Space Administration, Dryden Flight Research Facility, Edwards, CA 94035, 805/258–3118.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the seating capacity of the room. the agenda for the meeting is as follows:

—Control Science Review
—Flight Crucial Systems
—Review of Dryden Programs

Dated: December 4, 1992.

John W. Gaff,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

[FR Doc. 92–30060 Filed 12–9–92; 8:45 am]

BILLING CODE 7510–01–M

NATIONAL SCIENCE FOUNDATION

Collection of Information Submitted for OMB Review

In accordance with the Paperwork Reduction Act and OMB Guidelines, the National Science Foundation is posting a notice of information collection that will affect the public. Interested persons are invited to submit comments by January 8, 1993. Comments may be submitted to:

(A) *Agency Clearance Officer.* Herman G. Fleming, Division of Personnel and Management, National Science Foundation, Washington, DC 20550, or by telephone (202) 357–7335. Copies of materials may be obtained at the above address or telephone. Comments may also be submitted to:

(B) *OMB Desk Officer.* Office of Information and Regulatory Affairs, Attn: Dan Chenok, Desk Officer, OMB, 722 Jackson Place, room 3208, NEOB, Washington, DC 20503.

Title: Retrospective Yearbook, Presidential Awardees for Excellence in Science and Mathematics, 1983–1993.

Affected Public: Individuals.

Respondents/Reporting Burden: 1,400 respondents; 15 minutes each respondent.

Abstract: The purpose of this data collection effort is to gather information from award winners for a Yearbook to commemorate a decade of operation of the Presidential Awards for Excellence in Science and Mathematics Teaching Program by the National Science Foundation.

Dated: December 7, 1992.

Herman G. Fleming,

Reports Clearance Officer.

A Special Message for Presidential Award Winners

Dear Presidential Award Winner: This is a special year for the Presidential Awards for Excellence in Science and Mathematics Teaching Program. We are celebrating our first decade of honoring the very best teachers in science and mathematics.

As part of our celebration the National Science Foundation has asked Booz-Allen and Hamilton to help them produce a yearbook showcasing the program and all its awardees. The yearbook will also contain some basic information about each awardee—Name, school, state, award year,

discipline, and teaching level. This information will help others in need to assistance or expert advice locate a Presidential Awardee who can help.

To do this we need your help. Please:

- Send us a small black and white snapshot that we can use to picture you along with the others in "your class."
- Sign the permission line below, allowing us to include information on you in the yearbook.
- Share your thoughts with us by responding to three short questions.

Please return your answers, your signed permission, and your picture in the enclosed envelope, marked "Presidential Awardees." We hope that all of you will help us out with this project. Please be assured, however, that should you decline to participate, there will be no negative consequences.

Thank you in advance for all your support. We look forward to hearing from you.

I give my permission to the National Science Foundation to include my name, school, state award year, discipline, and teaching level in a yearbook commemorating a decade of the Presidential Awards Program.

BILLING CODE 7555-01-M

Advisory Committee for Atmospheric Sciences; Meeting

SUMMARY: In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to review the 5-year University Corporation for Atmospheric Research (UCAR) proposal for the operation and management of the National Center for Atmospheric Research (NCAR), and the report of the NSF Panel to evaluate UCAR's response to the review issues. The meeting will also update the current Atmospheric Sciences Long-Range Plan. Because the proposal and associated documents being reviewed include privileged intellectual property and information of a proprietary or confidential nature, including information concerning individuals, this part of the meeting is closed to the public. These matters fall under exemptions (4) and (6) of 5 U.S.C., 552b(c), Government in the Sunshine Act.

Name: Advisory Committee on Atmospheric Sciences

Date & Time: January 11, 1993, 9 a.m. to 5 p.m. (Closed); January 12, 1993, 9 a.m. to 3 p.m. (Open); January 12, 1993, 3 p.m. to 5 p.m. (Closed); January 13, 1993, 9 a.m. to 12 p.m. (Open)

Place: Room 543, National Science Foundation, 1800 G Street, NW., Washington, DC.

Type of Meeting: Part open.

Contact: Dr. Carol A. Roberts, Acting Division Director, Division of Atmospheric Sciences, Washington, DC (202) 357-9874.

Minutes: May be obtained from the contact person listed above.

Purpose of Meeting: Review and evaluate the UCAR 5-year proposal for operation and management of the National Center for Atmospheric Research and the report of the NSF Panel; to discuss the Long-Range Planning for the Division of Atmospheric Sciences.

Agenda:

Closed: January 11, 1993, 9 a.m. to 3 p.m.—UCAR Proposal Review.

Open: January 12, 1993, 9 a.m. to 3 p.m.—Long-Range Planning.

Closed: January 12, 1993, 3 p.m. to 5 p.m.—Continuation of UCAR Proposal Review.

Open: January 13, 1993, 9 a.m. to 12 p.m.—Continuation of Long-Range Planning.

Dated: December 7, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

Special Emphasis Panel in Earth Sciences; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

Date and Time: January 8, 1993; 8 a.m.-5 p.m.

Place: Conference Room # 536, 1800 G St., NW., Washington, DC.

Type of Meeting: Closed.

Contact Person: Dr. Marvin E. Kauffman, Program Director, Education and Human Resources Program, Division of Earth Sciences, room 602, National Science Foundation, 1800 G St., NW., Washington, DC 20550. Telephone: (202) 357-7356.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Postdoctoral Research Fellowship Applications as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: December 7, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

Special Emphasis Panel in Mechanical and Structural Systems; Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation (NSF) announces the following four meetings:

Name: Special Emphasis Panel in Mechanical and Structural Systems.

Date and Time: January 7, 1993; 9 a.m. to 5 p.m.

Place: Room 536, National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

Contact Person: Dr. Jorn Larsen-Basse, Program Director, Surface Engineering and Tribology, Telephone: (202) 357-9542.

Date and Time: January 14-15, 1993; 8:30 a.m. to 5 p.m.

Place: Room 1242, National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

Contact Person: Dr. John Scalzi, Program Director, Large Structural and Building Systems, Telephone: (202) 357-9542.

Date and Time: January 14-15, 1993; 8:30 a.m. to 5 p.m.

Place: Room 1243, National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

Contact Person: Dr. Ken P. Chong, Program Director, Structural Systems and Building Processes, Telephone: (202) 357-9542.

Date and Time: January 25-26, 1993; 8:30 a.m. to 5 p.m.

Place: Room 536, National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

Contact Person: Dr. Mehmet Tumay, Program Director, Geomechanical, Geotechnical, and Geo-Environmental Systems, Telephone: (202) 357-9542.

Types of Meetings: Closed.

Purpose of Meetings: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Surface Engineering and Tribology proposals and Structures, Geomechanics and Building Systems proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: December 7, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

Special Emphasis Panel in Physics; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-

463 as amended), the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Nuclear Physics (PHY).

Dates and Times: The list of Nuclear Physics Site Visits follows:

1. Princeton University, Cyclotron Laboratory, Seminar Room, Princeton, NJ 08544—1/15/93, 9 a.m.–5 p.m.
2. University of Pennsylvania, Department of Physics, Tandem Laboratory, Seminar Room, Philadelphia, PA 19104—1/16/93, 9 a.m.–5 p.m.
3. Florida State University, Department of Physics, Tandem Laboratory, Seminar Room, Tallahassee, FL 32306—1/18/93, 9 a.m.–5 p.m.
4. University of Wisconsin, Department of Physics, Seminar Room, Madison, WI 53706—1/21/93, 11 a.m.–7 p.m.
5. California Institute of Technology, Kellogg Laboratory, Seminar Room, Pasadena, CA 91125—1/23/93, 9 a.m.–5 p.m.
6. State University of New York, at Stony Brook, Department of Physics, Seminar Room, Stony Brook, NY 11974—2/2/93, 9 a.m.–5 p.m.
7. University of Rochester, Nuclear Structure Research Laboratory, Seminar Room, Rochester, NY 14627—2/3/93, 12 p.m.–5 p.m.; 2/4/93, 9 a.m.–5 p.m.
8. Notre Dame University, Department of Physics, Seminar Room, Notre Dame, IN 46556—2/5/93, 9 a.m.–5 p.m.; 2/6/93, 9 a.m.–5 p.m.

Types of Meetings: Closed.

Contact Person: Dr. Harold C. Britt, Program Director, Nuclear Physics Program, Division of Physics, room 341, National Science Foundation, Washington, DC 20550. Telephone (202) 357–7992.

Purpose of Meetings: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To perform a site visit, examine proposals, reviewer's evaluations and make recommendations for new and renewal awards for Nuclear Physics in FY 1993 competition.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data such as salaries, and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552 b.(c)(4) and (6) of the Government in the Sunshine Act.

Dated: December 7, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555–01–M

Special Emphasis in Physics; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

Date: January 5–7, 1993.

Place: Room 543, National Science Foundation, 1800 G St. NW., Washington, DC.

Type of Meeting: Part-Open.

Contact Person: Dr. Harold Britt, Program Director, Nuclear Physics, rm. 341, National Science Foundation, 1800 G Street NW., Washington, DC 20550. Telephone: 202–357–7993.

Minutes: May be obtained from the contact person listed above.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: Open session: 1/5 and 1/6—9 a.m.–12 p.m. and 2:30–5:30 p.m.; Overview presentations from eight NSF supported University Accelerator Facilities; Closed session 1/5 and 1/6—8:30–9 a.m.; 12–2 p.m. 5:30–8 p.m.; 1/7—8:30 a.m.–3 p.m.

To review and evaluate Accelerator Laboratory Proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: December 7, 1992.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Nuclear Waste; Meeting

The Advisory Committee on Nuclear Waste (ACNW) will hold its 49th meeting on Thursday and Friday, December 17 and 18, 1992, 8:30 a.m. until 6 p.m., room P-110, 7920 Norfolk Avenue, Bethesda, MD. Notice of this meeting was published in the **Federal Register** on Wednesday, November 25, 1992 (57 FR 55574).

The entire meeting will be open to public attendance. The agenda for the subject meeting shall be as follows:

A. Discuss items of priority for ACNW consideration during 1993.

B. Hear an information briefing on the NRC staff's evaluation of DOE's requested resolution of site characterization analysis objection #1.

C. Hear an information briefing on the results of geological cross-section balancing activities.

D. Hear a briefing from the ACNW Working Group Chairman on the Performance Assessment Working Group meeting of December 16, 1992.

E. Discuss a report to the Director of NMSS concerning ACNW interests.

F. Continue to prepare a Committee report on the impact of long-range climate change in the Southern Great Basin.

G. Hear a briefing on a recent DOE workshop concerned with the use of expert judgment in high level waste licensing.

H. Discuss anticipated and proposed Committee activities, future meeting agenda, administrative, and organizational matters, as appropriate. Also, discuss matters and specific issues that were not completed during previous meetings as time and availability of information permit.

Procedures for the conduct of and participation in ACNW meetings were published in the **Federal Register** on June 6, 1988 (53 FR 20699). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and staff. Use of still, motion picture, and

television cameras during this meeting may be limited to selected portions of the meeting as determined by the ACNW Chairman. The office of the ACRS is providing staff support for the ACNW. Persons desiring to make oral statements should notify the Executive Director of the office of the ACRS as far in advance as practical so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the Executive Director of the office of the ACRS, Mr. Raymond F. Fraley (telephone 301/492–4516), prior to the meeting. In view of the possibility that the schedule for ACNW meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director or call the recording (301/492–4600) for the current schedule if such rescheduling would result in major inconvenience.

Dated: December 4, 1992.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 92–29926 Filed 12–9–92; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–220]

Niagara Mohawk Power Corp., (Nine Mile Point Nuclear Station Unit No. 1); Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that by letter dated October 27, 1992, Ben L. Ridings (Petitioner) filed a "Petition for Emergency Enforcement Action and Request for Public Hearing" (Petition) regarding Nine Mile Point Nuclear Station Unit No. 1 (NMP–1) with the Nuclear Regulatory Commission. The Petition, which has been referred to me for consideration as a petition under 10 CFR 2.206, requests. that the Nuclear Regulatory Commission immediately order Niagara Mohawk Power Corporation (NMPC) to cease power operation of NMP–1 and place the reactor in a cold shutdown condition. The Petition seeks relief on the basis of allegations that:

(1) NMP–1 does not meet NRC requirements for an engineered safety feature system (ESFS) grade high-pressure coolant injection (HPCI) system,

(2) 45 percent of the containment isolation valves have administrative deficiencies, and

(3) NMPC, NMPC's quality assurance group and the NRC have reviewed these safety concerns, and contrary to any practical justification, have remained silent.

With respect to the lack of an ESFS grade HPCI system, the Petitioner had two concerns: First, the Petitioner stated that the feedwater system, which can operate in an HPCI mode, is not an acceptable alternative system because it does not have a backup electrical power supply provided by an onsite emergency diesel generator; second, the Petitioner was concerned about using the feedwater system in a HPCI mode because some 44 out of 47 values in the feedwater injection flow path are not included in the NMP–1 Inservice Test Program for pumps and valves.

For the reasons stated in a letter to the Petitioner dated December 4, 1992, Petitioner's request for immediate action was denied. Petitioner's request is being treated in accordance with 10 CFR 2.206 of the Commission's regulations. The NRC will take appropriate action on this request within a reasonable time.

A copy of the Petition is available for inspection and copying for a fee in the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555 and at the Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Dated at Rockville, Maryland, this 4th day of December 1992.

For the Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 92–29994 Filed 12–9–92; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–219]

GPU Nuclear Corp.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 160 to Facility Operating License No. DPR–16 issued to GPU Nuclear Corporation (the licensee), which revised the Technical Specifications for operation of the Oyster Creek Nuclear Generating Station located in Ocean County, New Jersey. The amendment is effective as of the date of issuance.

The amendment modified the Technical Specifications to delete the auto-start logic of the Containment Spray System (CSS) by plant modifications to be performed in the 14R refueling outage. In order to achieve this, revisions were necessary to Technical Specifications 3.1 and 3.4 Bases sections; deletion of the instrumentation requirements of Table 3.1–1 Section E; deletion of Containment Spray System from Table 4.1.2 (which lists surveillance test frequencies for Automatic Trip Systems); and deletion of the surveillance requirement for Technical Specification 4.4.C.2 for auto-start actuation test.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on March 12, 1992 (57 FR 8785). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment (57 FR 47125).

For further details with respect to the action see (1) the application for amendment dated February 19, 1992, (2) Amendment No. 160 to License No. DPR–16, (3) the Commission's related Safety Evaluation, and (4) the Commission's Environmental assessment. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555 and at the local public document room located at the Ocean County Library, Reference Department, 101 Washington Street, Toms River, New Jersey 08753. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Document Control Desk.

Dated at Rockville, Maryland this 4th day of December 1992.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I–4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 92–29995 Filed 12–9–92; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–280 and 50–281]

Virginia Electric and Power Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. DPR–32 and DPR–37, issued to Virginia Electric and Power Company (the licensee), for operation of the Surry Power Station, Units 1 and 2, located in Surry County, Virginia.

The proposed amendment would revise the Technical Specifications to establish operating requirements for the recirculation mode transfer (RMT) function and include the following:

(1) Limiting Conditions for Operation, Action Statements, and Surveillance Requirements for the RMT function,

(2) Deletion of refueling water storage tank maximum volume requirements and clarification of refueling water storage tank water temperature requirements, and

(3) Administrative changes to provide consistency throughout.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 11, 1993, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Swem Library, College of William and Mary, Williamsburg, Virginia 23185. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first pre-hearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 248–5100 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to Herbert Berkow: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Michael W. Maupin, Esq., Hunton and Williams, Riverfront Plaza, East Tower, 951 E. Byrd Street, Richmond, Virginia 23219, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.91.

For further details with respect to this action, see the application for amendment dated August 7, 1992, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room located at the Swem Library, College of William and Mary, Williamsburg, Virginia 23185.

Dated at Rockville, Maryland, this 4th day of December 1992.

For the Nuclear Regulatory Commission.

Herbert N. Berkow,

Director, Project Directorate II–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

[Docket Nos. 50–280 and 50–281]

Virginia Electric and Power Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. DPR–32 and DRP–37, issued to Virginia Electric and Power Company (the licensee), for operation of the Surry Power Station, Units 1 and 2, located in Surry County, Virginia.

The proposed amendment would revise the Technical Specifications (TS) to allow one of two service water flow paths to the main control and emergency switchgear rooms air conditioning condensers to be removed from service for system maintenance. This is accomplished by specifying an Action Statement for operable service water flow paths to the main control and emergency switchgear rooms air conditioning condensers governed by TS 3.14.C. A limiting Condition for Operation (LCO) permitting one train to be out of service for 24 hours prior to HOT SHUTDOWN and an additional 48 hours prior to COLD SHUTDOWN will be used in lieu of the requirements of TS 3.0.1.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 11, 1993, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Swen Library, College of William and Mary, Williamsburg, Virginia 23815. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first pre-hearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 248–5100 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to Herbert N. Berkow: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Michael W. Maupin, Esq., Hunton and Williams, Riverfront Plaza, East Tower, 951 E. Byrd Street, Richmond, Virginia 23219, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests

for hearing will not be entertained absent a determination by the Commission, the presiding officer to the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated November 10, 1992, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room located at the Swem Library, College of William and Mary, Williamsburg, Virginia 23185.

Dated at Rockville, Maryland, this 4th day of December 1992.

RAILROAD RETIREMENT BOARD

Determination of Quarterly Rate of Excise Tax for Railroad Retirement Supplemental Annuity Program

In accordance with directions in section 3221(c) of the Railroad Retirement Tax Act (26 U.S.C. 3221(c)), the Railroad Retirement Board has determined that the excise tax imposed by such section 3221(c) on every employer, with respect to having individuals in his employ, for each work-hour for which compensation is paid by such employer for services rendered to him during the quarter beginning January 1, 1993, shall be at the rate of 31 cents.

In accordance with directions in section 15(a) of the Railroad Retirement Act of 1974, the Railroad Retirement Board has determined that for the quarter beginning January 1, 1993, 33.9 percent of the taxes collected under sections 3211(b) and 3221(c) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Account and 66.1 percent of the taxes collected under sections 3211(b) and 3221(c) plus 100 percent of the taxes collected under section 3221(d) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Supplemental Account.

Dated: December 3, 1992.

By Authority of the Board.

Beatrice Ezerski,

Secretary to the Board.

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before December 28, 1992, written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–31558; File No. SR–NASD–92–14]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change Relating to the Use of Negative Response Letters in Certain Bulk Exchanges of Money Market Funds

December 3, 1992.

On September 10, 1992, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("SEC" or "Commission") a proposed rule change [1] pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [2] and Rule 19b-4 thereunder.[3] The proposal amends the NASD's Rules of Fair Practice to exempt the use of negative response letters in connection with the bulk exchange of money market mutual funds in certain situations.

Notice of the proposed rule change, together with its terms of substance, was provided by the issuance of a Commission release (Securities Exchange Act Release No. 31360, October 27, 1992) and by publication in the **Federal Register** (57 FR 49733, November 3, 1992). One comment was received, which expressed support for the proposal. This order approves the proposed rule change.

The rule change approved herein amends Article III, section 15 of the NASD Rules of Fair Practice to create an exemption for the use of negative response letters in connection with bulk exchanges of money market mutual funds, provided that the bulk exchanges are effected at net asset value and are limited to mergers and acquisitions of funds, a change of clearing members, or an exchange of funds used in sweep accounts. In addition, such negative response letters will be subject to the following requirements: (1) The negative response letter must include a tabular comparison of the nature and amount of fees charged by each fund; (2) the negative response letter must include a comparative description of the investment objective of each fund; (3) a prospectus of the fund to be purchased must accompany the negative response letter; and, (4) the negative response feature may not be activated until at least 30 days after the date on which the letter was mailed.

Article III, section 15 requires written authority from a customer before a member or registered representative can exercise discretion in the customer's account. In NASD Notice to Members 91–39 (June 1991), the NASD reminded members that the use of negative response letters, which permit the automatic execution of a recommendation in such letters if a customer does not respond to the letter by a specific date, would violate the provisions of Article III, section 15. Following the distribution of Notice to Members 91–39, the NASD received requests from members that it consider amending Article III, section 15 to exempt the use of negative response letters in connection with the bulk exchange of money market mutual funds in certain situations. The first situation involves the use of a negative response letter to effect the bulk exchange of money market mutual funds resulting from the merger or acquisition of a currently used money market fund. The second situation involves the use of a negative response letter to effect the bulk exchange of money market mutual funds necessitated by the member's change of its respective clearing member and the money market mutual fund which such clearing member utilizes. The third situation involves the use of a negative response letter to effect the bulk exchange of money market mutual funds when a member wishes to utilize a different fund from that which is being used currently as the investment vehicle for a sweep account. In such customer accounts, the balances resulting from securities transactions are automatically invested in money market funds for the benefit of the customer.

The NASD believes that the use of negative response letters in connection with the above-described situations should be exempted from the provisions of Article III, section 15 because investment performance is not the primary reason for the fund exchange, and alternative administrative procedures can be extraordinarily burdensome. The NASD believes that the above-described situations are not usually related to the enhancement of the account's financial performance. Abuses of discretion and overreaching, which Article III, section 15 addresses, are therefore unlikely to occur in the three above-described bulk fund exchanges. The NASD also recognizes that it is often necessary to notify hundreds and, sometimes, several thousand money market mutual fund shareowners of an impending money market fund exchange. It may be an extremely difficult, if not impossible, administrative task to contact each of the customers who have failed to respond, and to solicit their approval of the fund exchange. At best, such an individual contact and approval process results in considerable time delays and added cost in effecting the fund exchange.

The NASD believes, however, that additional disclosure and timing requirements are appropriate in connection with the proposed exemptions to Article III, section 15 for the protection of investors because such exchanges involve the redemption of one security and the purchase of another. Accordingly, the rule change further provides that (i) the negative response letter include a tabular comparison of the nature and amount of fees charged by each fund; (ii) the negative response letter include a

---

[1] This filing was originally submitted on April 30, 1992. On August 5, 1992, the NASD filed Amendment No. 1 with the Commission. Amendment No. 1 reported the results of a member vote on the proposed rule change, which was published for member vote in NASD Notice to Members 92–25 (May 1992). The results of the member vote were as follows: 1890 voting in favor, 133 opposed, and 19 not voting, out of 2042 ballots received. The NASD filed Amendment No. 2 to the proposed rule change on September 10, 1992, which completely replaced the original rule filing.

[2] 15 U.S.C. 78s(b)(1)(1988).

[3] 17 CFR 240.19b–4 (1992).

comparative description of the investment objective of each fund; (iii) a prospectus of the fund to be purchased accompany the negative response letter; and (iv) the negative response feature not be activated until at least 30 days after the date on which the letter was mailed.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of section 15A(b)(6) of the Act.[4] Section 15A(b)(6) requires, *inter alia*, that the NASD's rules be designed to "promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing and settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest." The Commission believes that the proposed exemption for the use of negative response letters in connection with certain bulk exchanges of money market mutual funds is consistent with the provisions of section 15A(b)(6) because it will eliminate an obstacle to the timely and efficient execution of such bulk exchanges without compromising investor protections, and therefore, will benefit customers and members alike. For this reason, and for the reasons stated above, the Commission believes that the proposed rule change satisfies the requirements of section 15A(b)(6) of the Act.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the instant rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

Jonathan G. Katz,

Secretary.

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc., Relating to Rules for Quotations and Transaction Reporting for High Yield Securities Including Bonds Quoted in the Fixed Income Pricing System

December 4, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on November 10, 1992, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Association is proposing regulatory requirements for members that participate in the high yield fixed income securities market. The proposed trade reporting rules will require members to report transactions in all high yield bonds traded over-the-counter to the NASD for regulatory purposes, and will also require real-time trade reporting for securities included in the Fixed Income Pricing System ("FIPS"). FIPS has been developed to facilitate the collection, processing and dissemination of real-time, firm quotations for 30 to 50 of the most liquid bonds in the top tier of high yield fixed income securities. FIPS also provides for hourly dissemination of high/low trading ranges and accumulated volume in each bond quoted in the system.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Background

In September 1991, the SEC's Division of Market Regulation released to Congress the Report on Transparency in the Market for High-Yield Debt Securities[1] which found that "a substantial improvement in the transparency of the high-yield debt market is both necessary and desirable." In that report, the Division concluded that developing a quotation and transaction reporting system for the most liquid high yield bonds would increase transparency and improve surveillance efforts in the high yield bond markets. At the same time, the Division recognized that increasing transparency in a market that is relatively illiquid could have significant costs in terms of dealer participation in such a market. Thus, the Division focussed its comments on efforts to increase transparency in the 40 to-50 most actively traded securities.

Following release of the Division's report, the Chairman of the SEC requested that the high yield bond trading community formulate proposals to implement the Division's suggestions for increased transparency and surveillance of the market. In February 1992, the NASD's Ad Hoc Committee on Transparency in the High Yield Market ("Committee") prepared a "White Paper" which articulated its concerns about the negative effect of increased transparency on the liquidity in the high yield market. Nevertheless, the Committee submitted a proposal to the Commission[2] that included these specific recommendations:

(1) Hourly batch reporting of top tier trading ranges and volume for public dissemination,

(2) Display of firm quotations in top tier bonds, and

(3) Periodic or end-of-day reporting of individual transaction data for all high-yield securities for surveillance purposes.

The Committee further recommended that, in conjunction with the NASD, it assume responsibility for establishing and maintaining on a current basis the list of designated top tier securities.

[1] See, letter from Richard C. Breeden, Chairman, SEC to the Honorable Donald W. Riegle, Jr., Chairman, Senate Committee on Banking, Housing and Urban Affairs (Sept. 6, 1991).

[2] An earlier report was submitted to the SEC in January 1992 that recommended transaction reporting but failed to recommend implementation of a quotation or trading system for high yield bonds.

The NASD is submitting this rule proposal to create a regulatory framework for: (1) Transaction reporting for surveillance purposes and (2) increased transparency through live, firm quotations and hourly dissemination of transaction information including high and low trading ranges and volume in the high yield securities quoted in FIPS.[3]

2. The Fixed Income Pricing Systems for Quotations in High Yield Debt Securities

A. Designation of securities quoted in the fixed income pricing system. As the SEC report recognized, trading in high-yield securities comprises activity in several different market segments or tiers, and the most important distinction between the top tier and the lower two tiers is the frequency of trading or liquidity in the issues. Accordingly, high yield bonds will be selected for inclusions in FIPS from the most liquid tier of high yield bonds. Unlike listing qualifications in the Nasdaq market, issuers will not make listing applications; rather, trading characteristics of outstanding issues will determine whether the bonds warrant inclusion in the FIPS quotation system. To accomplish the selection of bonds for the system, the NASD has established an advisory committee that is a subcommittee of the NASD's Fixed Income Committee. In conjunction with the advisory committee, the NASD will develop a list of top tier securities based on the following factors: volume, price, name recognition of the issue, research following, and representation from diverse industry groups. Within one year, the list of FIPS securities will be composed of no less than 50 bonds, but in order to permit the addition of significant new issues during that period, the initial list will be composed of approximately 30 bonds. In addition, the NASD will establish a minimum number of outstanding bonds in the issue for including a security in FIPS and require at least two dealers in each FIPS issue. After the first year of operation, the NASD will propose more quantitative standards for both the listing and delisting of FIPS bonds.

The high yield bonds quoted in FIPS may be immediately withdrawn from the system if the bonds have matured, been called, been upgraded (rated higher than BB+) or been downgraded to an extent that their trading characteristics no longer warrant inclusion in the system. In addition, the NASD and the advisory committee will conduct periodic reviews of the securities quoted in FIPS to recommend changes as warranted, utilizing the criteria discussed above relating to volume and depth in the security. Participants in the system will be notified of any deletion of a FIPS bond from the quote system through the FIPS "News" frame, these procedures should provide participants with notice of orderly additions and deletions from the system. The NASD anticipates that the list of FIPS securities will grow to 50 bonds within the first year of operation.

The processing of bonds in any automated environment mandates development and use of a unique identifier for each bond issue. Multiple bonds with the same or similar due dates and interest rates may be issued by a corporation for different purposes over a period of time. This is in contrast to a corporation's issuance of common or preferred stock in the equity marketplace. Due to the multiplicity of issues and potential for confusion, the NASD will assign a unique identifier to each bond that will be quoted in FIPS and trade reported to the NASD. The identifiers will be configured as mnemonics that relate to the issuer and the specific bond series and will be available on-line to subscribers in FIPS and also in a hard copy publication from the NASD.

B. Quotation requirements for the fixed income pricing system. Members holding themselves out regularly as brokers or dealers in high yield bonds quoted in the system will be required to participate in FIPS and transmit their quotations to the system for dissemination to the public. Dealer quotes may be one-sided or two-sided, but must be continuous and firm to all members submitting offers to trade at the quoted prices and sizes. (Firm quote exceptions for dealers updating their quotations or executing at trade parallel those in place for equity securities.) Quotations submitted by members must reflect a minimum size of 100 bonds ($100,000 par value) and be in increments of 1/8 percentage points. Participants may trade at prices other than those quoted, but all quotes must be reasonably related to the prices at which those executions occur. Because there are no requirements for the submission of two-sided quotations, there will not be any need at the outset for excess spread parameters.

Registered dealers may enter quotes directly into FIPS or may use a registered broker's broker. Dealer quotations entered directly will be identified as much in FIPS; dealer quotations entered through a broker's broker will appear on the FIPS screen as the broker's quotes and the dealer's identity will remain anonymous to other participants and the public. Each individual dealer will be able to use FIPS to see its own quote reflected in the broker's quote, however. For example, if a broker received two dealer quotes for 100 bonds each, priced at 98, the FIPS system would reflect a single quote of 200 bonds at 98 from the broker. Both for the FIPS dealers would be able to "pierce" that broker quote however, and see that 100 bonds reflected their own quote and the other 100 bonds was from another unidentified dealer. The NASD's Market Operations and Surveillance departments will, or course, be able to see each individual dealer quotation.

Because high yield bonds are frequently issued publicly held corporations for which equity securities may be traded in the Nasdaq or exchange markets, the NASD will institute quotation halt procedures in FIPS bonds when the related equities have been halted, or when news has been disseminated by the issuer or other information regarding the issuer comes to light that may affect trading in the bonds. Participants will be alerted to quotation halts via the FIPS News frame and the NASD will withdraw all broker and dealer quotations from the FIPS screen at the commencement of the halt. Similarly, the NASD will notify participants when quoting may resume and allow a short period of time for participants to reenter their quotations into FIPS.

Members will be able to view FIPS quotations through a FIPS terminal, and quotations will be disseminated to non-members through securities information processors, or vendors, so that they will be generally available to investors. The operating hours of the quotation system have been established at 9:30 a.m. to 4 p.m. eastern time, to mirror the equity market hours.

Although the predominant volume of trading in high yield bonds is negotiated over the telephone, the NASD is developing a supplemental trading capability in FIPS that will permit screen-based order entry and negotiation of orders, similar to the SelectNet service available to members trading Nasdaq securities. Members will be able to broadcast orders to all participants quoting a FIPS security in the system or will be able to direct an order to a single dealer or broker. Orders may be timed to expire after three minutes or may be designated as day orders or good-til-canceled orders. The system will permit negotiation of the terms of the order, subject to the

[3] The NASD will also submit rule proposals for service charges for participants and subscribers to the FIPS service.

directions and limitation of the entering member (e.g., all or none) and will permit straight acceptance and execution of the order. Members executing trades through FIPS will not be required to report these trades separately, as the details of the transactions will have already been captured by the system.

3. Reporting Transactions in High Yield Bonds

The NASD believes that reporting transactions in high yield bonds facilitates two critical market functions—regulatory surveillance of the activity in the market and public dissemination of prices at which transactions have actually occurred. As discussed in more detail below, with integrated quotation and transaction information, the NASD will implement automated surveillance procedures and will enhance the on-site examination programs currently in place.

With regard to public dissemination of transaction information, the NASD concurs with the SEC and the Ad Hoc Committee's views that the benefits of transparency must not increase the financial risks to participants in the marketplace to the extent that they are no longer willing or able to absorb risk, commit capital or provide liquidity to the market. In the high yield bond markets, dealer risk can only be managed through fundamental research on the issuer. Unlike the market for government bonds or investment-grade securities, traders in less active high yield securities will not take a position or consequence without a detailed understanding of the credit risk and the debtor's vulnerability to changing economic and business conditions. A dealer's decision to provide liquidity to a seller requires a substantial time commitment, the maintenance of extensive analytical research capabilities and relatively high capital costs. Accordingly, the NASD worked with the Ad Hoc Committee to devise a meaningful mechanism that would provide for public dissemination of transactional data without diminishing liquidity in the market: to require trade reporting of transactions in FIPS securities within five minutes after execution and to disseminate hourly calculations of high and low trading price ranges as well as accumulated volume statistics. This summary information will minimize both the degree to which vulnerable dealer positions will be exposed and the number of sensitive proprietary judgments about the credit worthiness of particular issues that may be revealed. Hence the costs in reduced liquidity would be far less significant than under a real-time reporting and dissemination system. At the same time, the summary information disseminated should significantly increase the ability of investors to monitor market movements and the quality of executions received in high yield bonds quoted in FIPS.

A. Trade reporting procedures. Members will be required to submit trade reports on all transactions in FIPS securities (those top tier securities quoted in FIPS) within five minutes after an execution. Members' reporting obligations are as follows:

(A) In transactions between a FIPS dealer and a FIPS broker, the FIPS broker shall be required to report;

(B) In transactions between two FIPS dealers, the dealer representing the sell side shall be required to report;

(C) In transactions between a FIPS participant and a member of the Association that is not a FIPS authorized participant, the FIPS participant shall be required to report;

(D) In transactions between two members of the Association that are not authorized FIPS participants, the sell side shall be required to report; and

(E) In transactions between a member and a non-member (i.e., a customer) the member shall be required to report.

In addition, each trade report must contain the following information:

(A) Bond identification symbol assigned by the Association;

(B) Number of bonds or par value of entire order;

(C) Unit price, excluding commissions, mark-ups or mark-downs;

(D) Time of execution (if the trade report is submitted more than three minutes after execution);

(E) Contra side, if a broker or dealer, and if the contra side includes more than one party, the member shall report each contra side individually, with the number of bonds (or par value), unit price, and time of execution associated with each contra side trade. Transactions between a FIP participant and a customer shall indicate the contra side as such.

(F) A symbol indicating whether the trade is as principal, riskless principal or agent;

(G) A symbol indicating whether the transaction is a buy, sell or cross; and

(H) The settlement date if the trade is other than regular way settlement.

In addition, members will be required to report information on all other transactions in high yield bonds to the NASD for surveillance purposes. Trade reporting for non-FIPS securities may be accomplished any time during the trading day, but in any event by 5 p.m. eastern time of trade date, and must include the time of execution on the report. The other trade reporting requirements and information to be submitted to the NASD are identical to those required for FIPS securities. Finally, once the FIPS order execution functions are implemented, trades executed through FIPS will automatically be captured, batched with other trade reports and disseminated hourly to the public.

4. Surveillance of the Market

The NASD concurs with the Commission's expressed views that the institution of automated surveillance in the corporate bond area is both necessary and appropriate for protection of the investing public. The proposed surveillance system for high yield debt securities will provide the NASD's Market Surveillance department with the ability to conduct reviews over the high yield market by allowing bond data to be downloaded from the FIPS processor to Market Surveillance systems. Market Surveillance will use quotation and transactional data to monitor for insider trading, failure to report the required trade information during the appropriate time frames, adjusted trading and backing away. In addition, the data will serve to form the basis of on-site examinations for violations of the NASD's mark-up policy and reviews of agency commissions, analysis of best execution, market manipulation through domination and control, and review of net capital.

5. FIPS System Functionality

FIPS is comprised of two primary components—the host application or server operated by the NASD or its subsidiaries and the workstation application operated by the member firm. In the server component of FIPS, application-specific processing such as logon/logoff, security validation and entitlement, business function, database servers, and administrative and operational controls will be implemented. The FIPS host application is responsible for processing transactions sent by workstations such as quotations and quote updates, distributing data to the workstations, and accepting trade reports. Data distributed to workstations may be in response to a specific transaction request or may be a piece of information distributed to all attached workstations. The host system will accept data from the local area network based workstations and will also accept transaction reports from member firm in-house trading system via computer-

to-computer interface (CTCI) link to the host.

In the FIPS workstation application, functions such as the Graphical User Interface (which allows users to configure the information display to meet their own individual work environment), screen formatting, screen navigation, and first level editing will be implemented. The FIPS workstation application can be configured via a user profile to display quotes on only those bonds that the trader wishes to follow. When new information is transmitted to FIPS, such as adding a new quote or updating an existing quote, the change is immediately sent to all relevant FIPS terminals. While the FIPS host application broadcasts all changes to the terminals, the FIPS workstation application will only display those changes pertinent to the user profile. In other words, information filtering is handled at the workstation level and not at the host. Any relevant screens will be updated dynamically when the information is broadcast by the FIPS host. The workstation will also have a local file database to store frequently accessed data, thus reducing communications overhead to the NASD host.

For members that operate their own automated trading systems, FIPS will accommodate the firm's existing in-house environment through CTCI linkages. All quotes and quote updates will be communicated through the FIPS workstation application to the FIPS host. Trade reports, on the other hand, can be communicated through the firm's host system through a CTCI link into the NASD's equity systems.

Two FIPS host systems will be maintained—the primary system in Trumbull, Connecticut and the backup or redundant system in Rockville, Maryland. In the event of a failure of the primary system, the redundant site will assume the FIPS processing functions. Security will be provided at the host application level through user IDs and passwords.

FIPS will facilitate reporting of the top tier trades hourly and provide end-of-day reporting for all bonds; provide for dealer and broker screens tailored to each use; provide leased line and dial-up connections; allow members to use their existing equity CTCI lines for trade reporting; and provide interfaces with member in-homes trading systems.

The NASD will make FIPS quotation and summary transaction information available to investors and the public through securities information processors. The data feeds to these vendors will include dealer and broker quotations on the FIPS bonds as well as aggregate transaction information including hourly summaries and daily summaries of high and low execution prices and accumulated volume in the FIPS securities.

The NASD believes the proposed rule change is consistent with sections 11A and 15A(b)(6) of the Act. Section 15A(b)(6) requires that the rules of a national securities association be designed to "prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transaction in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system." Section 11A(a)(1)(C)(iii) states that it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure the availability to brokers, dealers and investors of information with respect to quotations for and transactions in securities. FIPS will increase transparency in the high yield market by providing participants and investors with real-time, firm quotations in the most liquid bonds, and will facilitate surveillance of the market with real-time trade reporting requirements pertaining to FIPS securities and end-of-day trade reporting requirements for all other OTC transactions in high yield bonds.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received. However, the NASD worked with the Ad Hoc Committee on Transparency in the High Yield Market and with the NASD Fixed Income Committee in developing these rules and procedures.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the NASD consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by December 31, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-31546; File No. SR-OCC-92-36]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by The Options Clearing Corp. Relating to a Modification of OCC's Fees

December 1, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on November 12, 1992, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been preparedby the self-

[1] 15 U.S.C. 78s(b)(1).

regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would modify OCC's schedule of fees for its Direct Data Service and its Clearing Management and Control System.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to modify OCC's fee schedule for its Direct Data Service ("DDS") and its Clearing Management and Control System ("C/MACS") to more closely reflect the actual cost of providing such services to individual Clearing Members.

DDS is a fast, convenient means for Clearing Members with data processing facilities to receive data processed by OCC. The Clearing Member may choose to receive, on a subscription basis, all data relating to its daily activity, or may select the specific data types required by its data processing systems. DDS transmits OCC's nightly processing data to Clearing Members via OCC's dial-up network or via a leased line network.

C/MACS is an on-line system which allows Clearing Members to submit post-trade activity directly to OCC and includes editing, inquiry and audit controls. C/MACS data entry capabilities include the submission of exercise notices, position adjustments, transfers of accounts, Clearing Member Trade Assignment Agreement (CMTA) transfers, unmatched transfers and spreads. Like DDS, C/MACS may be accessed via a dial-up network or a leased line network. Subscription to C/MACS is an OCC mandated requirement of membership.

OCC's current fee schedule charges a monthly rate for leased line DDS, dial-up DDS, leased line C/MACS, and dial-up C/MACS. A reduced fee is charged to those Members that subscribe to both DDS and C/MACS since some of the same equipment is used. The current fee schedule does not take into consideration the location of the subscribing Clearing Member or the communication speed of the leased line or dial-up network.

OCC is proposing to modify the current fee schedule for several reasons. First, OCC's communications network has greatly expanded beyond the cities to the suburbs, and regionally across the country, resulting in higher communication costs in some areas and lower costs in others. Accordingly, the proposed fee schedule would reflect the actual cost of providing the ancillary service to Clearing Members in a particular location. Second, the communication speed of the particular leased line or dial-up line used by the Clearing Member impacts the actual cost of delivery. Accordingly, the proposed fee schedule would take into account the communication speed of the particular network line being used.

Structurally, the proposed fee schedule would consist of a base charge dependent upon communications speed, a line charge based upon speed and member location, and a subscription fee based on services used. OCC believes that the proposed fee schedule would encourage certain Clearing Members to upgrade their ancillary services, resulting in more efficient operations for both the Member and OCC. The proposed fee schedule would become effective January 1, 1993.

For example, under the existing fee schedule, the OCC charges each Clearing Member a flat rate of $1,570 a month for DDS. Under the proposed fees, a Clearing Member located in Chicago would pay from $804 to $1,899 a month for DDS depending upon the communications speed of the leased line or dial-up line. For the same service, a Clearing Member located in New Jersey would pay from $1,112 to $2,084 a month.

Finally, OCC has determined that it is now necessary to begin charging Clearing Members for the use of its Express Bundling service, a report transmission service. Previously, Clearing Members were not able to print entire reports from their terminal. As a result, in order for Clearing Members to obtain hard copies of a report, the OCC was required to transmit the entire report directly to the Clearing Member's printer via the Express Bundling service. Clearing Members are now able to print entire reports from their own terminal. The OCC has therefore determined that clearing Members who wish to continue to use the Express Bundling service must pay for the actual cost incurred. Accordingly, the proposed fee schedule includes the new charge for the Express Bundling service.

The proposed rule change is consistent with the requirements of section 17A of the Securities Exchange Act of 1934, as amended ("Act"), because it promotes new data processing and communication techniques, thereby creating the opportunity for more efficient, effective and safe procedures for clearance and settlement, and because it allocates reasonable fees in an equitable manner among OCC's Clearing Members.

B. Self-Regulatory Organization's Statement on Burden on Competition

OCC does not believe that the proposed rule change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments were not and are not intended to be solicited with respect to the proposed rule change, and none were received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4 because the proposed rule change establishes or changes a due, fee, or other charge imposed by OCC. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent

amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

All submissions should refer to File No. SR–OCC–92–36 and should be submitted by December 31, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF STATE

[Public Notice 1733]

Ad Hoc U.S. Task Group 12/4 of the U.S. Organization for the International Radio Consultative Committee; Meeting

The Department of State announces that Ad Hoc U.S. Task Group 12/4 of the U.S. Organization for the International Radio Consultative Committee (CCIR) will hold an open meeting January 27, 1993 at the Federal Communications Commission, 2000 L Street, NW., Washington, DC in room 258 from 9:30 a.m. to noon.

CCIR Study Group 12 deals with matters concerning inter-service sharing and compatibility. Task Group 12/4 was recently established to study frequency sharing criteria within the range 1 to 3 GHz.

The objectives of the meeting on January 27 are to:

—Identify the relevant frequency bands for the sharing study;
—Identify the sharing combinations that need to be studied;
—Identify and review existing relevant sharing studies within each Study Group;
—Identify areas which need further study; and
—Establish a work program.

The first meeting of Task Group 12/4 is scheduled for 19–23 April 1993 in Geneva.

Members of the general public may attend the meeting and join in the discussions subject to instructions of the Chairman. Requests for further information should be directed to Mr. Harry Ng, Federal Communications Commission, (202) 634–1834.

Dated: December 4, 1992.

Warren G. Richards,

Chairman, U.S. CCIR National Committee.

BILLING CODE 4710–45–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 92–067]

New York Harbor Traffic Management Advisory Committee; Applicants for Appointment

AGENCY: Coast Guard, DOT.
ACTION: Request for applicants.

SUMMARY: The U.S. Coast Guard is seeking applicants for appointment to membership on the New York Harbor Traffic Management Advisory Committee (NYHTMAC). The mission of the committee is to provide consultation and advice on a wide range of issues. It provides local expertise on such matters as vessel traffic in New York Harbor, anchorages, communications, and advice on a wide range of matters regarding all facets of navigation safety and other related topics dealing with waterways traffic management. The New York Harbor Management Advisory Committee operates in the public interest and addresses those duties imposed on the Coast Guard by law.

The advisory committee shall be composed of no fewer than 12 members from Federal, State and local government, the marine industry, port and harbor authorities, environmental groups, and other interested parties who will be appointed by the Secretary of Transportation upon recommendation by the Commander, First Coast Guard District and the Commandant for terms not to exceed the expiration date of the charter.

The duration of this committee is continuous with a charter renewal required every two (2) years. Appointments to the committee are for the two (2) year life of the charter and candidates for appointment shall apply prior to charter expiration. The present charter expires on September 13, 1993.

To achieve the balance of membership required by the Federal Advisory Committee Act, the Coast Guard is especially interested in receiving applications from minorities and women.

DATES: Requests for applications should be received no later than April 30, 1993.

ADDRESSES: Persons interested in applying or further information should write to: Commanding Officer, Vessel Traffic Service New York, Building 108, First Floor, Governors Island, NY 10004, Attn: NYHTMAC Executive Secretary, or contact, Lieutenant Commander Paul Benvenuto, USCG, NYHTMAC Executive Secretary at (212) 668–7429.

Dated: November 23, 1992.

R.M. Larrabee,

Captain, U.S. Coast Guard, Captain of the Port New York, NYHTMAC Executive Director.

BILLING CODE 4910–14–M

[CGD8–92–30]

Houston/Galveston Navigation Safety Advisory Committee; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. II) notice is hereby given of the thirtieth meeting of the Houston/Galveston Navigation Safety Advisory Committee. The meeting will be held on Thursday, January 28, 1993, in the conference room of the Houston Pilots Office, 8150 South Loop East, Houston, Texas. The meeting is scheduled to begin at approximately 9 a.m. and end at approximately 1 p.m. The agenda for the meeting consists of the following items:

1. Call to Order.
2. Presentation of the minutes of the Inshore and Offshore Waterways Subcommittee and discussion of recommendations.
3. Discussion of previous recommendations made by the Committee.
4. Presentation of any additional new items for consideration of the Committee.
5. Adjournment.

The purpose of this Advisory Committee is to provide recommendations and guidance to the Commander, Eighth Coast Guard District on navigation safety matters affecting the Houston/Galveston area.

The meeting is open to the public. Members of the public may present written or oral statements at the meeting.

Additional information may be obtained from Mr. M. M. Ledet, USCG, Recording Secretary, Houston/Galveston Navigation Safety Advisory Committee, c/o Commander, Eighth Coast Guard District (oan), room 1209, Hale Boggs Federal Building, 501 Magazine Street,

New Orleans, LA 70130–3396, telephone number (504) 589–4686.

Dated: December 7, 1992.

J.C. Card,

Rear Admiral, U.S. Coast Guard, Commander, Eighth Coast Guard District.

BILLING CODE 4910–14–M

[CGD8–92–31]

Houston/Galveston Navigation Safety Advisory Committee; Inshore Waterway Management Subcommittee Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. II) notice is hereby given of a meeting of the Inshore Waterway Management Subcommittee of the Houston/Galveston Navigation Safety Advisory Committee. The meeting will be held on Thursday, January 7, 1993, in the offices of the West Gulf Maritime Association, 1717 East Loop, suite 200, Houston, Texas. The meeting is scheduled to begin at 9 a.m. and end at 10:30 a.m. The agenda for the meeting consists of the following items:

1. Call to Order.
2. Discussion of previous recommendations made by the full Advisory Committee and the Inshore Waterway Management Subcommittee.
3. Presentation of any additional new items for consideration of the Subcommittee.
4. Adjournment.

The meeting is open to the public. Members of the public may present written or oral statements at the meeting.

Additional information may be obtained from Mr. M.M. Ledet, USCG, Recording Secretary, Houston/Galveston Navigation Safety Advisory Committee, c/o Commander, Eighth Coast Guard District (oan), room 1209, Hale Boggs Federal Building, 501 Magazine Street, New Orleans, LA 70130–3396, telephone number (504) 589–4686.

Dated: December 7, 1992.

J.C. Card,

Rear Admiral, U.S. Coast Guard, Commander, Eighth Coast Guard District.

BILLING CODE 4910–14–M

[CGD92–068]

New York Harbor Traffic Management Advisory Committee; Meeting

AGENCY: Coast Guard, DOT.

ACTION: Notice of meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. app. I), notice is hereby given of a meeting of the New York Harbor Traffic Management Advisory Committee to be held on January 13, 1993, in the South Conference Room "B", 34th floor, One World Trade Center, New York, New York, beginning at 10 a.m.

The agenda for this meeting of the New York Harbor Traffic Management Advisory Committee is as follows:

1. Introductions.
2. Update of Marine Events.
3. Update of dredging operations in New York harbor.
4. Update on Vessel Traffic Service.
5. Update on Coast Guard regulatory initiatives: Bridge-to-Bridge Act.
6. Bayonne Bridge lighting/clearances.
7. 40 foot channel through the Kill Van Kull and Newark Bay.
8. "P.O.R.T.S." update.
9. Tidal Gauges.
10. Topics from the floor.
11. Review of agenda topics and selection of date for next meeting.

The New York Harbor Traffic Management Advisory Committee has been established by Committee has been established by Commander, First Coast Guard District to provide information, consultation, and advice with regard to port development, maritime trade, port traffic, and other maritime interests in the harbor. Members of the Committee serve voluntarily without compensation from the Federal Government.

Attendance is open to the interested public. With advance notice to the Chairperson, members of the public may make oral statements at the meeting. Persons wishing to present oral statements should notify the Executive Director no later than one day before the meeting. Any member of the public may present a written statement to the Committee at any time.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander J.P. Benvenuto, USCG, Executive Secretary, NY Harbor Traffic Management Advisory Committee, Vessel Traffic Service, Building 108, Governors Island, New York, NY 10004–5070; or by calling (212) 668–7429.

Dated: 23 November 1992.

R.M. Larrabee,

Captain, U.S. Coast Guard, Captain of the Port New York, NYHTMAC Executive Director.

BILLING CODE 4910–14–M

Federal Transit Administration

Environmental Impact Statement on Transit Improvements in Austin, TX

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Federal Transit Administration (FTA) and the Capital Metropolitan Transportation Authority (Capital Metro) intend to resume the preparation of an Environmental Impact Statement (EIS) in accordance with the National Environmental Policy Act (NEPA), for transportation improvements in the Northwest/North Central Corridor of Austin. A previous effort by FTA (formerly the Urban Mass Transit Administration) and Capital Metro to complete an EIS for transit

improvements in the corridor became inactive in 1989 when Capital Metro chose to pursue additional alternatives. The resumption of the EIS process is based on the identification of new alternatives.

The EIS is being prepared in conformance with 40 CFR parts 1500–1508, Council on Environmental Quality, "Regulations for Implementing the Procedural Requirements of the National Environmental Policy Act;" and 49 CFR part 622, Federal Transit Administration, "Environmental Impact and Related Procedures." In addition to fixed guideway or rail transit alternatives, the EIS will evaluate the No-Build and Transportation System Management (TSM) alternatives, and any additional alternatives which result from the scoping process. Scoping will be accomplished through correspondence with interested persons, organizations, and federal, state, and local agencies and through a public meeting.

DATES: *Comment Due Date:* Written comments on the scope of alternatives and impacts to be considered should be sent to Capital Metro by February 2, 1993. *Scoping Meeting:* A public scoping meeting will be held on Tuesday, January 19, 1993 at 6 p.m. at the Austin Public Library. Interested persons may view exhibits describing the corridor beginning one hour before the meeting. See **ADDRESSES** below.

ADDRESSES: *Written comments* on the project scope should be sent to Jim Robertson, Project Manager, Capital Metro, 2910 East Fifth Street, Austin, Texas 78702, (512) 389–7444. Scoping materials may be requested from Capital Metro at the phone number listed. The *scoping meeting* will be held at the following location: Austin Public Library, 4th Floor Auditorium, 800 Guadalupe, Austin, Texas.

FOR FURTHER INFORMATION CONTACT: Ms. Peggey Crist, Transportation Program Specialist, Federal Transit Administration, Region 6, (817) 334–3787.

SUPPLEMENTARY INFORMATION:

I. Scoping

The FTA and Capital Metro invite interested individuals, organizations and federal, state and local agencies to a public scoping meeting to be held on January 19, 1993 at the time and location indicated under **DATES** and **ADDRESSES** (above), to participate in defining the alternatives to be evaluated in the EIS and identifying any significant social, economic, or environmental issues related to the alternatives.

An information packet describing the purpose of the project, the proposed alternatives, the impact areas to be evaluated, the citizen involvement program and the preliminary project schedule has been mailed to affected federal, state and local agencies and to interested parties on record. Others may request the scoping materials by contacting Jim Robertson at the address above or by calling him at (512) 389–7444. Scoping comments may be made verbally at the public scoping meeting or in writing. During scoping, comments should focus on identifying specific social, economic or environmental impacts to be evaluated and suggesting alternatives which are less costly or less environmentally damaging while achieving similar transit objectives.

Scoping should not indicate a preference for a particular alternative. Comments on preferences should be communicated after the Draft EIS has been completed. If you wish to be placed on a mailing list to receive further information as the project develops, contact Mr. Jim Robertson as previously described.

II. Description of Study Area and Project Need

The Northwest/North Central corridor is a major travel corridor which includes the Central Business District, the State Capitol Complex and the University of Texas (UT) campus as well as several major activity/employment centers. Major transportation facilities in this corridor include U.S. 183, IH–35, Loop 1 (MoPac Boulevard), Lamar Boulevard and Guadalupe Street. The Central Business District, State Capitol Complex and UT are the three major transit generators in the region.

The Northwest/North Central Corridor was studied under the previous EIS effort. Work completed as part of that previous effort will be updated and incorporated into the current DEIS.

Transit improvements in the Northwest/North Central Corridor are intended to improve transportation capacity, transit quality and accessibility in the corridor. The project should benefit regional air quality by providing an improved alternative to single occupancy automobile trips.

III. Alternatives

Transportation alternatives previously considered were the following

A—No Build.

B—Expanded All-Bus System with Low Cost Improvements (Transportation System Management).

C—Busway, Ranch-to-Market (RM) 620 to Martin Luther King Boulevard, using U.S. 183, Braker Lane, Austin & Northwestern Railroad Right-of-Way and IH–35, with a Subalignment on Lamar Boulevard.

D—Light Rail Transit, RM 620 to Central Area via Braker Lane, Lamar Boulevard and Guadalupe Street, with Central Loop and Palmer Auditorium Subalignments.

E—Light Rail Transit, RM 620 to Central Area via Austin & Northwestern Railroad Right-of-Way through East Austin and into downtown via 3rd and 4th Streets, with Central Loop and Palmer Auditorium Subalignments.

When the previous study drew to a close in 1989, Capital Metro opted to pursue the expansion of the existing bus route network and deferred and/or ceased further development of the other alternatives. In 1991, a new Light Rail Transit alternative in the Northwest/North Central Corridor was identified for study.

Transportation alternatives proposed for consideration in the current Northwest/North Central Corridor DEIS are the following:

(1) A No-Build option, which involves no change to transportation services or facilities in the corridor beyond already committed projects;

(2) A Transportation System Management (TSM) approach, which represents the optimum bus service improvements that can be made without construction of a fixed guideway or exclusive busway; and

(3) A Light Rail Transit alternative, following the Austin & Northwestern Railroad (AU&NW) right-of-way from Parmer Lane at MoPac Boulevard to Lamar Boulevard, Lamar Boulevard to Guadalupe, Guadalupe to Martin Luther King Boulevard, and then through the State Capitol Complex and CBD areas using Lavaca Street and 4th Street; an eastern leg follows along 4th Street to east of IH–35 and transitions back to the AU&NW right-of-way along 5th Street to Pleasant Valley Road. An alternative subalignment using Congress Avenue exists for the downtown area. Another alternative subalignment, between Lamar and U.S. 183, follow U.S. 183 and North Lamar Boulevard instead of the AU&NW Railroad right-of-way.

These alternatives have been selected based on the results of previous planning efforts in the corridor area. Other alternatives may emerge during the scoping process.

IV. Probable Effects/Potential Impacts for Analysis

The FTA and Capital Metro plan to evaluate all significant social, economic, and environmental impacts of these and other alternatives and publish findings

in the DEIS. Among the primary issues are:

- Transportation service, including future capacity of the corridor, transit cost, transit service, patronage change, and effect on traffic movement and parking;
- Transit financial implications;
- The impact of the proposed alternatives on strengthening the urbanized core of Austin;
- Local and regional economic impacts;
- Community impacts, including land use, neighborhood compatibility, and safety;
- Cultural impacts, including the effects on historic, archaeological and park resources;
- Natural resource impacts, including air quality, noise and vibration; water resources and quality. The proposed impacts will be identified both for the construction period and for the long term operation of the alternatives.

The proposed impact evaluation criteria will take into account both positive and negative impacts, direct and indirect impacts, and site-specific and corridor-wide impacts. Evaluation criteria will be consistent with the applicable federal, state, and local standards, criteria, regulations, and policies. Mitigation (reduction) measures will be explored for any adverse impacts that are identified as part of the analysis.

V. FTA Procedures

In accordance with the Federal Transit Act, as amended, and FTA policy, the Draft EIS will be prepared in conjunction with an Alternatives Analysis, and the Final EIS in conjunction with Preliminary Engineering, the next step in project planning. After its publication, the Draft EIS will be available for public and agency review and comment, and a public hearing will be held. On the basis of the Draft EIS and the comments received, Capital Metro will select a locally preferred alternative and seek approval from the FTA to continue with Preliminary Engineering and preparation of the Final EIS.

Issued on: December 7, 1992.

Wilbur E. Hare,

Regional Administrator.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

December 4, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Bureau of Alcohol, Tobacco and Firearms

OMB Number: 1512-0115
Form Number: ATF 5220.4
Type of Review: Extension
Title: Monthly Report—Export Warehouse Proprietor
Description: Proprietors who are qualified to operate export warehouses that handle untaxpaid tobacco products are required to file a monthly report. This report summarizes all transactions by the proprietor handling receipts, dispositions and onhand quantities. ATF F 5220.4 is used for product accountability and is examined by regional office personnel.
Respondents: Businesses or other for-profit
Estimated Number of Respondents: 206
Estimated Burden Hours Per Respondent: 48 minutes
Frequency of Response: Monthly
Estimated Total Reporting Burden: 2,002 hours
OMB Number: 1512-0461
Form Number: ATF REC 5110/11
Type of Review: Extension
Title: Marks and Labels on Containers of Distilled Spirits
Description: The marking, branding and labeling of containers of spirits by distilled spirits plants provide the data to identify, trace and quantify the spirits.
Respondents: Businesses or other for-profit, Small businesses or organizations
Estimated Number of Respondents: 279
Estimated Burden Hours Per Respondent: 1 hour
Frequency of Response: Other
Estimated Total Reporting Burden: 279 hours
Clearance Officer: Robert N. Hogarth, (202) 927-8930, Bureau of Alcohol, Tobacco and Firearms, room 3200, 650 Massachusetts Avenue, NW., Washington, DC 20226.
OMB Reviewer: Milo Sunderhauf, (202) 395-6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation Order No. 85-5 of June 27, 1985 (50 FR 27393, July 2, 1985), I hereby determine that the objects to be included in the exhibit "Chiefly Feasts: The Enduring Kwakiutl Potlatch" (see list [1]), imported from abroad for the temporary exhibition without profit within the United States, are of cultural significance. These objects are imported pursuant to a loan agreement with the foreign lender. I also determine that the temporary exhibition or display of the listed exhibit objects at the Houston Museum of Natural Sciences, Houston, Texas, from on or about January 29, 1993 to on or about September 5, 1993, the National Museum of Natural History, Smithsonian Institution, Washington, DC, from on or about September 15, 1993 to on or about July 18, 1994, and the Seattle Art Museum, Seattle, Washington, from on or about May 4, 1994 to on or about October 23, 1994, is in the national interest.

Public notice of this determination is ordered to be published in the **Federal Register.**

Dated: December 4, 1992.

Alberto J. Mora,

General Counsel.

BILLING CODE 8230-01-M

Summer Institute in the American Political System for Foreign University Educators

AGENCY: United States Information Agency.

ACTION: Notice—Request for Proposals.

SUMMARY: The United States Information Agency (USIA) invites applications to conduct a six week graduate level summer institute (including an integrated follow-on tour) in the American political system for approximately 18 foreign university educators (primarily members of law, government, political science and foreign relations faculties) who are either currently teaching about some aspect of the American political system or are planning to do so. Participants will be selected by the United States Information Service (USIS) posts overseas and will have high-level fluency in English. USIA is asking for detailed proposals from colleges, universities, consortia of colleges and universities, and other not-for-profit academic organizations that demonstrate an acknowledged reputation in the relevant subdisciplines of political science and expertise in conducting graduate level programs for foreign educators.

DATES: Deadline for proposals: All copies must be received at the U.S. Information Agency by 5 p.m. Washington, DC time, on Friday, January 22, 1993. Faxed documents will not be accepted, nor will documents post-marked January 22, 1993 but received at a later date. It is the responsibility of each applicant to ensure that proposals are received by the above deadline. In order to allow adequate preparation time, grants should begin by April 2, 1993. Approximate institute program dates should be July 2 to August 12, 1993. Participants will be scheduled to arrive in the U.S. on or about July 1, and depart on August 13, 1993.

ADDRESSES: The original and 14 copies of the completed application, including required forms, should be submitted by the deadline to: U.S. Information Agency, Ref.: Summer Institute in the American Political System for Foreign University Educators, Office of Grants Management, E/XE, 301 4th Street SW., room 336, Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested organizations or institutions should contact William C. Jones at the U.S. Information Agency, Division for the Study of the U.S., E/AAS, room 256, 301 4th Street SW., Washington, DC 20547, telephone: (202) 619-4557, to request detailed application packets, which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget information.

SUPPLEMENTARY INFORMATION: The authority for this exchange program is contained in the Mutual Educational and Cultural Exchange Act of 1961, as amended, Public Law 87-256 (Fulbright-Hays Act). The Fulbright Program seeks to increase mutual understanding between the people of the United States and people of other countries. Pursuant to the Bureau's authorizing legislation, programs must "maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life," and must "maintain their scholarly integrity and shall meet the highest standards of academic excellence * * *".

Overview

The summer institute in the American political system aims to provide approximately 18 foreign university educators with opportunities to improve teaching about the U.S. by enriching their knowledge of the foundations, development, and current functioning of the American political system by working with distinguished scholars and by undertaking individual projects (for example, intensive reading, scholarly research, or writing) of their own choosing.

Guidelines

Eligibility

Accredited colleges, universities, consortia of colleges and universities, and other not-for-profit academic organizations which demonstrate an acknowledged reputation in the relevant subdisciplines of political science and expertise in conducting graduate level programs for foreign educators are eligible to apply. Proposals from consortia may be submitted by a member institution with documented authority to represent all members.

Applicant institutions must have a minimum of four years' experience in conducting international exchange programs. The project director, or one of the key program staff responsible for the academic program, must have an advanced degree in political science. University staff escorts traveling under USIA cooperative agreement support must be U.S. citizens with demonstrated qualifications for this service.

Objectives

The objective of the institute is to provide foreign university teachers with opportunities to improve teaching about the U.S. by enriching their knowledge of the foundations, development, and current functioning of the U.S. political system.

[1] A copy of this list may be obtained by contacting Ms. Lorie Nierenberg of the Office of the General Counsel of USIA. The telephone number is 202/619-6975, and the address is U.S. Information Agency, 301 Fourth Street, SW., room 700, Washington, DC 20547.

Audience

The program should be designed for approximately 18 experienced university-level educators who are currently teaching some aspect of the American political system or plan to do so. Institute participants will come primarily from faculties of law, political science, government and international relations. Participants will be selected by United States Information Service (USIS) posts worldwide and will have a high-level fluency in English. Although some participants may have visited the U.S. previously, an initial orientation to the U.S. and the American campus should be an integral part of the institute and should be held at the beginning of the program.

Program Design

The institute should be specially designed for experienced foreign university-level educators and should not duplicate courses normally given by graduate departments for American graduate degree candidates. Although it is important that the topics and readings of the institute be clearly organized, the institute should not be structured like a lecture course or a graduate seminar. Rather, it should facilitate the development of a collegial atmosphere in which institute faculty and participants discuss relevant texts, issues, and concepts. Total program length is six weeks with a minimum of five weeks devoted to the academic component at the host institution. The last week of the seminar should provide an escorted tour which includes three-to-four program days in Washington, DC to reinforce the academic content of the institute. A visit to one more additional site for scholarly purposes is optional.

Academic and Tour Components

The institute is offered for foreign university educators in the fields of law, political science, government, and international relations who want to deepen and revitalize their understanding of the foundations, development, and current functioning of the U.S. political system. It is important that the academic program be clearly organized, and that its organization be broad enough to accommodate the diverse backgrounds of its participants. The institute should begin with an orientation to the U.S. and the American campus. During the course of the institute, participants should be encouraged to engage in individual scholarly and/or curriculum projects. The institution which conducts the program should be prepared to offer the level of scholarly resources and professional assistance necessary to give adequate support to such projects. It should also offer participants an overview of the state of the discipline of political science in the United States, and familiarize them with scholarly and institutional contacts and bibliographic information which will be useful to them for follow-up activities.

The tour component of the institute should be planned, arranged, and conducted by the program director and principal project staff and should be seen as an integral part of the program, complementing and reinforcing the academic component. It must include three-to-four program days in Washington, DC, and may include a visit to one more site. Either the Washington program or the program at an optional third site should include visits to think tanks and archives, and should be structured so that participants are given a chance to pursue separate professional interests. Programming in Washington should include a half-day wrap-up session at the United States Information Agency. The grantee institution should consult closely with USIA in planning the Washington itinerary. Details of the academic and tour programs may be modified in consultation with USIA's Branch for the Study of the U.S. following the grant award.

Proposed Budget: Applicants must submit a comprehensive line item budget for which specific details are available in the application packet. The total USIA-funded budget must not exceed $128,000. USIA-funded administrative costs as defined in the application packet must not exceed $42,500. Applications requesting more than $42,500 for administrative costs, and/or more than $128,000 for total institute costs to USIA, or that do not allocate these costs consistent with the budget instructions will not be considered. Organizations submitting proposals are urged to cost share program and administrative expenses to the greatest degree possible. Participant international travel costs will be covered by USIA, and should not be included in the budget submission.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contracts offices. Proposals may also be reviewed by the Agency's Office of General Counsel. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for cooperative agreement awards resides with USIA's contracting officer.

Review Criteria

Technically eligible applications will be reviewed competitively according to the following criteria:

1. Overall quality.

A. The content, significance, definition, organization and academic rigor of the proposed program (including the follow-on tour) and its appropriateness to program objectives.

B. Evidence of careful planning.

C. The program or project should be representative of current expert knowledge in the field, and should be consistent with the requirements of the Bureau's legislative charter, meeting the highest professional qualitative standards of achievement.

2. Institutional capacity. Adequacy of proposed resources, including faculty, library and other research and scholarly resources; housing availability, and other institutional support important to a collegial setting, should be adequate and appropriate to achieve the program goals.

3. Experience of professionals and staff assigned to the program with foreign educators; institution's track record with international exchange programs.

4. Evaluation and follow-up.

A. Adequacy of plan for an evaluation at the conclusion of the institute by the grantee institution.

B. Adequacy of provisions made for "multiplier effect," i.e., future follow-up and networking between grantees and appropriate U.S. scholarly organizations and institutions.

5. Evidence of strong on-site administrative and managerial capabilities (with specific discussion of how managerial and logistical arrangements will be undertaken).

6. Availability of local and state resources for the orientation, institute, and follow-on tour.

7. Cost effectiveness. The overhead and administrative components of grants, as well as salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate. In-kind contributions should be considered.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative.

Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. Final awards cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about March 30, 1993. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: December 3, 1992.

Barry Fulton,

Acting Associate Director, Bureau of Educational and Cultural Affairs.

BILLING CODE 8230-01-M

Summer Institute in American Studies (Focus on Twentieth Century American Literature) for Foreign University Educators

AGENCY: United States Information Agency.

ACTION: Notice—Request for Proposals.

SUMMARY: The United States Information Agency (USIA) invites applications to conduct a six week graduate level summer institute (including an integrated follow-on tour) in American studies with a special focus on twentieth century American literature for approximately 18 foreign university educators (primarily members of language and literature departments who teach American literature or American studies). Participants will be selected by United States information Service (USIS) posts overseas and will have high-level fluency in English. USIA is asking for detailed proposals from colleges, universities, consortia of colleges and universities, and other not-for-profit academic organizations that demonstrate an acknowledged reputation in the disciplines of American studies and in American literature and expertise in conducting graduate level programs for foreign educators.

DATES: Deadline for proposals: All copies must be received at the U.S. Information Agency by 5 p.m.Washington, DC time, on Friday, January 22, 1993. Faxed documents will not be accepted, nor will documents post-marked January 22, 1993 but received at a later date. It is the responsibility of each applicant to ensure that proposals are received by the above deadline. In order to assure adequate preparation time, grants should begin by April 2, 1993. Approximate institute program dates should be July 2 to August 12, 1993. Participants will be scheduled to arrive in the U.S. on or about July 1, and depart on August 13, 1993.

ADDRESSES: The original and 14 copies of the completed application, including required forms, should be submitted by the deadline to: U.S. Information Agency, Ref.: Summer Institute in American Studies (focus on twentieth century American literature) for Foreign University Educators, Office of Grants Management, E/XE, 301 4th Street, SW., room 336, Washington, D.C. 20547.

FOR FURTHER INFORMATION CONTACT: Interested organizations or institutions should contact William C. Jones at the U.S. Information Agency, Division for the Study of the U.S., E/AAS, room 256, 301 4th St. SW., Washington, DC 20547, telephone: (202) 619-4557, to request detailed application packets, which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget information.

SUPPLEMENTARY INFORMATION: The authority for this exchange program is contained in the Mutual Educational and Cultural Exchange Act of 1961, as amended, Public Law 87-256 (Fulbright-Hays Act). The Fulbright Program seeks to increase mutual understanding between the people of the United States and people of other countries. Pursuant to the Bureau's authorizing legislation, programs must "maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life," and must "maintain their scholarly integrity and shall meet the highest standards of academic excellence * * *".

Overview

The summer institute aims to provide approximately 18 foreign university teachers with opportunities to broaden the cultural and historical base of courses they teach in American studies and American literature by enriching their knowledge of multidisciplinary approaches to the study of American literature and society, using the example of twentieth century American literature, by working with distinguished scholars, and by undertaking individual projects (for example, intensive reading, scholarly research, or writing) of their own choosing.

Guidelines

Eligibility

Accredited colleges, universities, consortia of colleges and universities, and other not-for-profit academic organizations which demonstrate an acknowledged reputation in the disciplines of American studies and in American literature and expertise in conducting graduate level programs for foreign educators are eligible to apply.

Proposals from consortia may be submitted by a member institution with documented authority to represent all members. Applicant institutions must have a minimum of four years' experience in conducting international exchange programs. The project director, or one of the key program staff responsible for the academic program, must have an advanced degree in either American literature or American studies. University staff escorts traveling under USIA cooperative agreement support must be U.S. citizens with demonstrated qualifications for this service.

Objectives

The objective of the institute is to provide foreign university educators with opportunities to broaden the cultural and historical base of courses they teach in American studies and literature by enriching their knowledge of multidisciplinary approaches to the study of American literature and society, and by strengthening their knowledge of twentieth century American literature.

Audience

The program should be designed for 18 experienced university-level foreign educators who are currently teaching American studies or American literature, or who plan to do so. Institute participants will come primarily from language and literature departments or from American studies departments with a strong American literature component. Participants will be selected by United States Information Service (USIS) posts worldwide and will have high-level fluency in English. Although some participants may have visited the U.S. previously, an initial orientation to the U.S. and the American campus should be an integral part of the institute and should be held at the beginning of the program.

Program Design

The institute should be especially designed for experienced foreign university-level educators and should not duplicate courses normally given by graduate departments for American

graduate degree candidates. Although it is important that the topics and readings of the institute be clearly organized, the institute should not be structured like a lecture course or a graduate seminar. Rather, it should facilitate the development of a collegial atmosphere in which institute faculty and participants discuss relevant texts, issues, and concepts. Total institute length is six weeks with at least a four week academic component. The program should include an approximately two-week escorted tour of two regions of the United States and Washington, DC designed to reinforce the academic content of the institute by providing additional institutional contact and exposure to relevant historical sites, libraries, archives, etc. The tour should end in Washington, DC.

Academic and Tour Components

The institute is offered for foreign university educators in the fields of American studies and American literature who want to to broaden the cultural and historical base of courses they teach in American studies and literature, and enrich their teaching through a knowledge of multidisciplinary approaches to the study of American literature and society. The academic program should briefly discuss major American studies principles and approaches, particularly those which apply to the use of literature as texts in the study of American culture and society. The institute should then focus on a few key twentieth century American literary texts. It is important that the academic program be clearly organized, and that its organization be broad enough to accommodate the diverse backgrounds of its participants. The institute should begin with an orientation to the U.S. and the American campus. During the course of the institute, participants should be encouraged to engage in individual scholarly and/or curriculum projects. The institution which conducts the program should be prepared to offer the level of scholarly resources and professional assistance necessary to give adequate support to such projects. It should also familiarize participants with scholarly and institutional contacts and bibliographic information which will be useful to them for follow-up activities.

The tour component of the institute should be planned, arranged, and conducted by the program director and principal project staff and should be seen as an integral part of the program, complementing and reinforcing the academic component by providing exposure to a range of sites including archives, libraries, state and local historical societies, etc. The proposal should indicate the tour sites, which should not exceed two regions in addition to a visit to Washington, D.C. at the end of the tour. Programming in Washington should include a half-day wrap-up session at the United States Information Agency. Grantee institution should consult closely with USIA in planning the Washington itinerary. Details of the academic and tour components may be modified in consultation with USIA's Branch for the Study of the U.S. following the grant award.

Proposed Budget

Applicants must submit a comprehensive line item budget for which specific details are available in the application packet. The total USIA-funded budget must not exceed $136,000. USIA-funded administrative costs as defined in the application packet must not exceed $42,500. Applications requesting more than $42,500 for administrative costs, and/or more than $136,000 for total institute costs to USIA, or that do not allocate these costs consistent with the budget instructions will not be considered. Organizations submitting proposals are urged to cost share program and administrative expenses to the greatest degree possible. Participant international travel costs will be covered by USIA, and should not be included in the budget submission.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contracts offices. Proposals may also be reviewed by the Agency's Office of General Counsel. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for cooperative agreement awards resides with USIA's contracting officer.

Review Criteria

Technically eligible applications will be reviewed competitively according to the following criteria:

1. Overall quality.

A. The content, significance, definition, organization and academic rigor of the proposed program (including the follow-on tour) and its appropriateness to program objectives.

B. Evidence of careful planning.

C. The program or project should be representative of current expert knowledge in the field, and should be consistent with the requirements of the Bureau's legislative charter, meeting the highest professional qualitative standards of achievement.

2. Institutional capacity. Adequacy of proposed resources, including faculty, library and other research and scholarly resources; housing availability, and other institutional support important to a collegial setting, should be adequate and appropriate to achieve the program goals.

3. Experience of professionals and staff assigned to the program with foreign educators; institution's track record with international exchange programs.

4. Evaluation and follow-up.

A. Adequacy of plan for an evaluation at the conclusion of the institute by the grantee institution.

B. Adequacy of provisions made for "multiplier effect," *i.e.*, future follow-up and networking between grantees and appropriate U.S. scholarly organizations and institutions.

5. Evidence of strong on-site administrative and managerial capabilities (with specific discussion of how managerial and logistical arrangements will be undertaken).

6. Availability of local and state resources for the orientation, institute, and follow-on tour.

7. Cost effectiveness. The overhead and administrative components of grants, as well as salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate. In-kind contributions should be considered.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. Final awards cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about March 30, 1993. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: December 3, 1992.

Barry Fulton,

Acting Associate Director, Bureau of Educational and Cultural Affairs.

BILLING CODE 12-19-92

Freedom Support Act—Secondary School Exchange Initiative for Academic Year Programs

AGENCY: United States Information Agency.

ACTION: Notice—request for proposals.

SUMMARY: The United States Information Agency (USIA) invites applications from U.S. educational, cultural, and other not-for-profit institutions to conduct exchanges of youth between the ages of 15 and 18½ years of age with the twelve Newly Independent States (NIS) of the former Soviet Union. These exchanges represent part of the activities of the Secondary School Exchange Initiative as included in the Freedom Support Act and are subject to the availability of funding for the Fiscal Year 1993 program.

This is a request for proposals for components of the academic year program (inbound) and for the semester and year outbound program. Requests for proposals in support of other programs under the aegis of the Freedom Support Act are being published separately.

DATES: Deadline for proposals: All copies of proposals for grants under this request must be received at the U.S. Information Agency by 5 p.m. Washington, DC time on Friday, January 15, 1993. Faxed documents will not be accepted, nor will documents postmarked on January 15 but received at a later date. It is the responsibility of each grant applicant to ensure that its proposal is received by the above deadlines. Grant funding should be available after April 1, 1993 in support of projects that will require implementation by June.

ADDRESSES: The original and 14 copies of the completed application, including required forms, should be submitted in the format described in the Bureau's application package and mailed to: U.S. Information Agency, Ref: F.S.A.—Academic Program Youth Exchange, Office of Grants Management, E/XE, 301 4th Street SW., rm. 336, Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested organizations/institutions should contact David Dallas, Youth Programs Division, E/P, room 357, (202) 619-6299; FAX (202) 619-5311, to request detailed application packets, which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget preparation information.

SUPPLEMENTARY INFORMATION: Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social and cultural life.

Overall authority for these exchanges is contained in the Freedom Support Act (Pub. L. 102-391).

Overview

Grant funding is intended to promote the exchange of young people, from 15 to 18½, years of age between the U.S. and Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan (NIS). The Agency's main objective is to foster interaction between American and foreign youth. Consequently, extensive interaction is a requirement. Proposals should demonstrate how American and foreign youth will interact in a way that encourages the exchange of ideas, values and information.

Three different program designs will be utilized for this program which include: (A) An academic year program, (B) A school-to-school linkage program, and (C) Short-term exchanges program. This request contains information on the Category A program. Information on Categories B and C appears in separate RFP's. Additionally, guidelines are provided for outbound semester and year programs. This RFP deals only with the academic year program. Other RFP's will be published soliciting proposals for the other two programs.

Guidelines for Inbound Academic Program

Purpose

To place pre-selected high school students from NIS countries in the U.S. to study and live for up to one academic year. To place the students in qualified host families and welcoming schools. To enable participants to have program enhancements that give them a broader view of the society and culture of the U.S.

The administration of this program has been divided into three parts—1. Recruitment, selection, pre-departure logistics and orientation; 2. Washington DC enhancement program; 3. Placement, supervision and program enhancements during the school year, which may include providing intensive English training for some participants. The selection of organizations to administer the recruitment and selection process is being conducted separately. The RFP soliciting organizations to administer the Washington DC enhancement program will be published separately. Organizations are, therefore, invited to submit proposals only for part 3 in response to this RFP.

Note: Organizations submitting proposals for Placement should bear in mind that the Washington DC enhancement program (Part 2), will be conducted during the months of January and February for students placed east of the Mississippi River as their mid-year program; and, at the end of the academic year (June/July, 1994) for students placed west of the Mississippi River.

3. *Placement*—Organizations may bid on no fewer than 20 slots. There is no maximum number of placement slots.

Placements will be for one full academic year. It is anticipated that 20 to 30 organizations will be funded to provide placement for approximately 1,500 students.

Placements will be spread all across the U.S., but organizations are expected to place participants in "clusters" of up to 30 who will live within a two-hour radius of each other (via car). The purpose of clustering is to facilitate periodic gatherings for ongoing orientation, excursions and cultural programming, as well as supervision and feedback.

The organization should provide: A monthly get-together of the "cluster" for special programming and a 3-day end-of-program gathering for re-entry training and debriefing prior to departure. All students will have a mid-year regional program. As described above, for students east of the Mississippi River this will be held in Washington DC and conducted by a separate organization. Placement organizations should plan a mid-year program for students west of the Mississippi, preferably in conjunction with other placement organizations in a given region.

Organizational responsibilities include arrival orientation in the local district or region and all placement in schools and host families. Practices and procedures must meet the requirements of J-visa regulations for secondary school exchange visitor sponsors.

All organizations bidding on placement must include a provision for those students in need of intensive English training. It is anticipated that approximately 500 participants will require some remedial training in English before commencing the school year. Three weeks of intensive instruction should suffice for this

purpose. It is estimated that the cost per capita will be $1,500 for language training. Airfare to and from the language training site will be paid under the separate grants to the organizations administering recruitment and selection. Individual placement organizations will not know until the finalists are assigned how many of their students will need intensive English training.

Program Description for English Training: Students will arrive in the United States on or about July 25 and will travel immediately to the training sites for 3 weeks of English instruction. The administering organization should include material on American society and culture, but the focus should be on raising the students' reading, comprehension and speaking skills in preparation for entering American schools.

Guidelines for Outbound Academic Program

Purpose

To provide opportunities for American high school students or immediate graduates to study in NIS countries for a semester or an academic year at the secondary or preparatory level. The length of stay may be no less than four months. $200,000 is available for this program. It is anticipated that this is sufficient to partially sponsor up to 100 students, depending on the level of cost-sharing.

There is no prescribed formula for this aspect of the program. Grantee organizations, working with their NIS partners, will: Recruit and select students using their own criteria; arrange for their placement in NIS schools; select and orient host families; make all travel and logistical arrangements; conduct orientation sessions; conduct reentry and debriefing sessions; supervise students, solve problems, and provide counseling as needed; develop a mechanism for the transfer of academic credit and/or the certification of school attendance; and evaluate the program's success.

Organizations may submit proposals solely for an outbound program or may include this as a component of their proposals for any other program in this initiative. Both private not-for-profit organizations and public educational institutions (including secondary schools, school districts and state education agencies) are eligible.

Budget

The organization must submit a comprehensive line item budget. Details are available in the application packet. Grants awarded to eligible organizations with less than four years of experience in conducting international exchange programs will be limited to $60,000.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contract offices. Proposals may also be reviewed by the Agency's Office of the General Counsel. Funding decisions are at the discretion of the Associate Director of Educational and Cultural Affairs. Final technical authority for grant awards resides with the Agency's Office of Contracts.

Review Criteria

Technically eligible applications will be competitively reviewed according to the following criteria:

1. Quality of the Program Idea

Proposals should exhibit originality, substance, rigor and relevance to Agency mission and adherence to the criteria and conditions described above.

2. Reasonable, Feasible, and Flexible Objectives

Proposals should clearly demonstrate how the institution will meet the program's objectives and plan.

3. Multiplier Effect/Impact

Proposed programs should strengthen long-term mutual understanding, to include maximum sharing of information and establishment of long-term institutional and individual linkages.

4. Value to U.S.-Partner Country Relations

Assessments by USIA's geographic area desk, and overseas officers of the need, potential, impact and significance in the partner country(ies).

5. Cost Effectiveness

The overhead and administrative components of grants, as well as salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate. Proposals should maximize cost-sharing through other private sector support as well as institutional direct funding contributions.

6. Institutional Capacity

Proposed personnel and institutional resources should be adequate and appropriate to achieve the program or project's goals.

7. Institution's Track Record/Ability

Proposals should demonstrate a track record of successful programs, including responsible fiscal management and full compliance with all reporting requirements for past Agency grants as determined by USIA's Office of Contracts (M/KG). The Agency will consider the past performance of prior grantees and the demonstrated potential new applicants.

8. Follow-on Activities

Proposals should provide a plan for continued follow-on activity (without USIA support) which insures that USIA supported programs are not isolated events.

9. Evaluation Plan

Proposals should provide a plan for evaluation by the grantee institution.

10. Geographic Diversity

The Agency will seek to provide geographic diversity within the NIS and the U.S. through this program.

11. Organizational Restrictions

The Agency will need to consider any restrictions an organization may have on their ability to accept students for the placement program. If no restrictions are mentioned and explained in the proposal, the organization is obligated to accept any participant assigned by the Agency.

12. Organizational Standing

An organization submitting a proposal should be in good standing with USIA and the Council on Standards for International Educational Travel. Organizations submitting proposals for placement should have a minimum of four years experience in youth exchanges.

13. English Training

The organization submitting proposals for placement must ensure high quality English training for participants whether the program is conducted by the organization or subcontracted. Particulars of English training must be fully described in the proposal.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by

the Agency that contradicts published language will not be binding.

Issuance of the RFP does not constitute an award commitment on the part of the Government. Final award cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about April 1, 1993. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: December 3, 1992.

Barry Fulton,

Acting Associate Director, Bureau of Educational and Cultural Affairs.

BILLING CODE 8230-01-M

Freedom Support Act—Secondary School Exchange Initiative for Short Term Projects

AGENCY: United States Information Agency.

ACTION: Notice—request for proposals.

SUMMARY: The United States Information Agency (USIA) invites applications from U.S. educational, cultural, and other not-for-profit institutions to conduct exchanges of youth between the ages of 15 and 18½ years of age with the twelve Newly Independent States (NIS) of the former Soviet Union. These exchanges represent part of the activities of the Secondary School Student Exchange Initiative as included in the Freedom Support Act and are subject to the availability of funding for the Fiscal Year 1993 program.

This is a request for proposals for short term thematic exchanges. Requests for proposals in support of other programs under the aegis of the Freedom Support Act are being published separately.

DATES: Deadline for proposals: All copies must be received at the U.S. Information Agency by 5 p.m. Washington DC on Friday, January 15, 1993. Faxed documents will not be accepted, nor will documents postmarked on January 15 but received at a later date. It is the responsibility of each grant applicant to ensure that proposals are received by the above deadline. Grants should begin May 1. It is the responsibility of each grant applicant to ensure that its proposal is received by the above deadline. Grant funding will be available after April 1, 1993. Projects may not begin before May 1, 1993.

ADDRESSES: The original and 14 copies of the completed application, including required forms, should be submitted in the format described in the Bureau's application package and mailed to: U.S. Information Agency, Ref: F.S.A.—Short-Term Youth Projects, Office of Grants Management, E/XE, 301 4th Street SW., rm. 336, Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested organizations/institutions should contact David Dallas, Youth Programs Division, E/P, room 357, (202) 619-6299; FAX (202) 619-5311, to request detailed application packets, which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget preparation information.

SUPPLEMENTARY INFORMATION: Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social and cultural life.

Overall authority for these exchanges is contained in the Freedom Support Act (Pub. L. 102-391).

Overview

Grant funding is intended to promote the exchange of secondary school students, from 15 to 18½ years of age, between the U.S. and Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. The Agency's main objective is to foster interaction between American and foreign youth. Consequently, extensive interaction is a requirement. Proposals should demonstrate how American and foreign youth will interact in a way that encourages the exchange of ideas, values and information.

Three different program designs will be utilized for this program which include: (A) An academic year program, (B) A school-to-school linkage program, and (C) Short-term exchanges program. This RFP deals with the short term exchange program. Other RFP's will be published soliciting proposals for the other two programs.

Guidelines for Short-Term Exchanges

Grants will be awarded to support programs for 3 to 6 week duration. Programs should have a thematic focus. Eligible foci may include, but are not limited to: The arts (theater, dance, music, fine arts, literature, folklore, and film/video); language and culture; science, technology, and mathematics; conservation and the environment; journalism; historic preservation; social, political, and economic issues; agriculture; business administration/management (including enterprise promotion); and homestay programs under the title, "the American Community Experience," which should include local programming in such areas as State and municipal government, regional culture, etc.

A minimum of ten students each from both the U.S. and the NIS must be exchanged through the program. One-for-one reciprocity is not a requirement, but is encouraged. Proposals should provide detailed information on the activities in both the U.S. and the partner country. Proposals should provide written evidence that the U.S. organization has the commitment of a counterpart organization in the partner country willing and able to engage in the proposed activities. In most cases, the counterpart organization should assume responsibility for the local costs of hosting the American participants in the reciprocal portion of the program. Homestays are desirable. The minimum stay in country for all programs is 3 weeks.

Projects requesting support for tours of performing arts groups or sports teams are eligible only if the primary purpose of the program is mutual education and there is extensive structured interaction between international participants and their hosts. Tours of performing arts groups or sports groups where the primary activity is performance or competition will not be eligible. Outdoor camping projects must have a thematic focus. They must include details for measuring performance/achievement of the participants.

Unless there are extenuating circumstances, programs should maintain a ratio of not more than one adult per every ten youth. The exchange program may also include excursions, social and cultural activities, and opportunities to experience community life. It is very desirable for each group of NIS students to have a segment of their program in Washington, DC or a state capital.

Grantee organizations are responsible for developing a sustainable partnership with an organization or agency of government in the NIS; designing the components of the exchange; managing all travel arrangements, logistics, insurance coverage, visas, etc.; training of adult escorts; disbursing and accounting for grant funds.

Budget

Approximately $2,000,000 will be available for grants under this program.

The organization must submit a comprehensive line item budget. Details are available in the application packet. Grants awarded to eligible organizations with less than four years of experience in conducting international exchange programs will be limited to $60,000.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contract offices. Proposals may also be reviewed by the Agency's Office of the General Counsel. Funding decisions are at the discretion of the Associate Director of Educational and Cultural Affairs.

Final technical authority for grant awards resides with the Agency's Office of Contracts.

Review Criteria

Technically eligible applications will be competively reviewed according to the following criteria:

1. Quality of the Program Idea

Proposals should exhibit originality, substance, rigor and relevance to Agency mission and adherence to the criteria and conditions described above.

2. Reasonable, Feasible, and Flexible Objectives

Proposals should clearly demonstrate how the institution will meet the program's objectives and plan.

3. Multiplier Effect/Impact

Proposed programs should strengthen long-term mutual understanding, to include maximum sharing of information and establishment of long-term institutional and individual linkages.

4. Value to U.S.-Partner Country Relations

Assessments by USIA's geographic area desk, and overseas officers of the need, potential, impact and significance in the partner country(ies).

5. Cost Effectiveness

The overhead and administrative components of grants, as well as salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate. Proposals should maximize cost-sharing through other private sector support as well as institutional direct funding contributions.

6. Institutional Capacity

Proposed personnel and institutional resources should be adequate and appropriate to achieve the program or project's goals.

7. Institution's Track Record/Ability

Proposals should demonstrate a track record of successful programs, including responsible fiscal management and full compliance with all reporting requirements for past Agency grants as determined by USIA's Office of Contracts (M/KG). The Agency will consider the past performance of prior grantees and the demonstrated potential of new applicants.

8. Follow-on Activities

Proposals should provide a plan for continued follow-on activity (without USIA support) which insures that USIA supported programs are not isolated events.

9. Evaluation Plan

Proposals should provide a plan for evaluation by the grantee institution.

10. Selection Process

Proposals should provide detailed criteria for selection of student participants.

11. Geographic Diversity

The Agency will seek to provide geographic diversity within the NIS and the U.S. through this program.

Notice

The terms and conditions published in the RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. Final award cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about April 1, 1992. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: December 3, 1992.

Barry Fulton,

Acting Associate Director, Bureau of Educational and Cultural Affairs.

BILLING CODE 8230-01-M

Freedom Support Act—Secondary School Exchange Initiative for School to School Linkages

AGENCY: United States Information Agency.

ACTION: Notice—request for proposals.

SUMMARY: The United States Information Agency (USIA) invites applications from U.S. educational, cultural, and other not-for-profit, private organizations and public institutions to conduct exchanges of youth between the ages of 15 and 18½ years of age with the twelve Newly Independent States (NIS) of the former Soviet Union. These exchanges represent part of the activities of the Secondary School Exchange Initiative as included in the Freedom Support Act and are subject to the availability of funding for the Fiscal Year 1993 program.

This is a request for proposals for short-term reciprocal exchanges based on multiple school linkages. Requests for proposals in support of other programs under the aegis of the Freedom Support Act are being published separately.

DATES: Deadline for proposals: All copies of proposals for grants under this request must be received at the U.S. Information Agency by 5 p.m. Washington, DC time on Thursday, January 21, 1993. Faxed documents will not be accepted, nor will documents postmarked on January 21 but received at a later date. It is the responsibility of each grant applicant to ensure that its proposal is received by the above deadlines. Grant funding will be available after May 1, 1993. Projects may not begin prior to May 1, 1993.

ADDRESSES: The original and 14 copies of the application, including required forms, should be submitted in the format described in the Bureau's application package and mailed to: U.S. Information Agency, Ref: F.S.A.—School-to-School Youth Exchanges, Office of Grants Management, E/XE, 301 4th Street SW., room 336, Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested organizations/institutions should contact David Dallas, Youth Programs Division, E/P, room 357, (202) 619-6299; FAX (202) 619-5311, to request detailed application packets, which include award criteria additional

to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget preparation information.

SUPPLEMENTARY INFORMATION: Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social and cultural life.

Overall authority for these exchanges is contained in the Freedom Support Act (Pub. L. 102–391).

Overview

Grant funding is intended to promote the exchange of young people, from 15 to 18½ years of age, between the U.S. and Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. The Agency's main objective is to foster interaction between American and foreign youth. Consequently, extensive interaction is a requirement. Proposals should demonstrate how American and foreign youth will interact in a way that encourages the exchange of ideas, values and information.

Grants are awarded to expand or enhance existing exchange programs or to encourage the development of new exchanges. Programs may involve the U.S. organization in a partnership with organizations in one or more countries. The minimum length of stay in country for any project is three weeks.

Three different grant program designs will be utilized for this program which include: (A) An academic year program, (B) A school-to-school linkage program, and (C) Short-term exchanges program. This RFP deals only with the school-to-school linkage program. Other RFP's will be published soliciting proposals for the other two programs.

Guidelines for School to School Linkages

Purpose

To link a network of American secondary schools with a network of schools in one or more NIS countries as the basis for short-term reciprocal, one-for-one exchanges involving 3 to 4 weeks stays in the hosts country.

$3.6 million is available for exchanges under this category of which $2.4 million is for support of inbound groups and up to $1.2 million for support of outbound American groups. Exchanges funded under this grant must take place before September 1994.

Each network should consist of a minimum of 10 schools (five pairs). These may be schools with common features or interests (e.g., teach Russian/English as a foreign language, are math & science magnet schools), or they may be schools in a finite system (e.g., a local school district, county or state). They may be schools in communities that are affiliated with communities in NIS countries under an umbrella organization.

Schools may have not yet been paired or they may already be linked by computers or have developed ties through correspondence. Partnerships should have an existence beyond the scope of this initiative; that is, there should be an inherent reason for their linkage apart from the availability of grant funds. Partnered schools should engage in regular communication throughout the year and carry on such activities as joint research projects, pen pal exchanges, video exchanges, etc.

USIA grants under this initiative will support exchanges of students and accompanying escorts between the linked US and NIS schools. The minimum stay in country is 3 weeks. These exchanges should be designed to enable varying numbers of students and accompanying adults to live with host families while at their host school, preferably while school is in session. The goal is for each school to send a group and host a group each year, but variations in this model will be entertained. Full reciprocity is desirable but not a requirement. The exchange program may also include excursions, social and cultural activities, and opportunities to experience community life. It is considered desirable for each group of NIS students to have a program in Washington, DC. If such a program is not feasible, the NIS students should have a program in the state capital of their host school.

The American organization is responsible for recruiting and selecting a minimum of 5 American schools, forming a partnership with an organization or agency of government in the NIS responsible for a network of partner schools and linking the US and NIS schools. In addition, the American organization will design the overall plan and criteria for the exchanges; manage all travel arrangements, logistics, visas, etc.; and, conduct training seminars for escorts.

Budget

The organization must submit a comprehensive line item budget. Details are available in the application packet. Grant awards to eligible organizations with less than four years experience in conducting international exchange programs will be limited to $60,000.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contract offices. Proposals may also be reviewed by the Agency's Office of the General Counsel. Funding decisions are at the discretion of the Associate Director of Educational and Cultural Affairs. Final technical authority for grant awards resides with the Agency's Office of Contracts.

Review Criteria

Technically eligible applications will be competitively reviewed according to the following criteria:

1. Quality of the Program Idea

Proposals should exhibit originality, substance, rigor and relevance to Agency mission and adherence to the criteria and conditions described above.

2. Reasonable, Feasible, and Flexible Objectives

Proposals should clearly demonstrate how the institution will meet the program's objectives and plan.

3. Multiplier Effect/Impact

Proposed programs should strengthen long-term mutual understanding, to include maximum sharing of information and establishment of long-term institutional and individual linkages.

4. Value to U.S.-Partner Country Relations

Assessments by USIA's geographic area desk, and overseas officers of the need, potential, impact and significance in the partner country(ies).

5. Cost Effectiveness

The overhead and administrative components of grants, as well as salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate. Proposals should maximize cost-sharing through other private sector support as well as institutional direct funding contributions.

6. Institutional Capacity

Proposed personnel and institutional resources should be adequate and appropriate to achieve the program or project's goals.

7. Institution's Track Record/Ability

Proposals should demonstrate a track record of successful programs, including responsible fiscal management and full compliance with all reporting requirements for past Agency grants as determined by USIA's Office of Contracts (M/KG).

The Agency will consider the past performance of prior grantees and the demonstrated potential new applicants.

8. Follow-on Activities

Proposals should provide a plan for continued follow-on activity (without USIA support) which insures that USIA supported programs are not isolated events.

9. Evaluation Plan

Proposals should provide a plan for evaluation by the grantee institution.

10. Selection Process

Proposals should provide detailed criteria for selection of student participants.

11. Geographic Diversity

The Agency will seek to provide geographic diversity within the NIS and the U.S. through this program.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding.

Issuance of the RFP does not constitute an award commitment on the part of the Government. Final award cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about April 1, 1993. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: December 3, 1992.

AGENCY: United States Information Agency.

ACTION: Request for proposals.

SUMMARY: The Creative Arts Exchanges Division (E/DE), Office of Arts America, Bureau of Educational and Cultural Affairs, announces a discretionary grants program for private, non-profit organizations in support of projects that link their international exchange interests with counterpart institutions/groups in other countries in ways supportive of the aims of the Bureau of Educational and Cultural Affairs. Interested applicants are urged to read the complete **Federal Register** announcement before addressing inquires to the Office or submitting their proposals.

DATES: Deadline for Proposals: All copies must be received at the U.S. Information Agency by 5 p.m. Washington, DC time on Friday, February 26, 1993. Faxed documents will not be accepted, nor will documents postmarked on February 26, 1993, but received at a later date. It is the responsibility of each grant applicant to ensure that proposals are received by the above deadline. This action is effective from the publication date of this notice through February 26, 1993, for projects whose activities will begin between July 1, 1993, and December 31, 1993.

For projects that would begin after December 31, 1993, competition details will be announced in the **Federal Register** on or about June 1, 1993. Inquires concerning technical requirements are welcome prior to submission of applications.

ADDRESSES: The original and 14 copies of the completed application, including required forms, should be submitted by the deadline to: U.S. Information Agency, REF: E/DE Discretionary Grant Competition, Office of Grants Management (E/XE), room 336, 301 4th Street, SW. Washington, DC 20547.

FOR FURTHER INFORMATION: Interested organizations/institutions must contact the Creative Arts Exchange Division (E/DE), Office of Arts America, Bureau of Educational and Cultural Affairs, United States Information Agency, 301 4th Street, SW., Washington, DC 20547, (202) 619-5319, to request detailed application packets, which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget preparation information.

SUPPLEMENTARY INFORMATION: The Creative Arts Exchanges Division (E/DE), Office of Arts America of the United States Information Agency announces a program to encourage, through limited awards to non-profit institutions, increased private sector commitment to and involvement in international exchanges. Awarding of any and all grants is contingent upon the availability of funds.

E/DE works with U.S. private sector non-profit organizations on cooperative international group projects that introduce American and foreign participants to each others' cultural and artistic traditions. The Office supports international projects in the United States or overseas involving artistic creators, leaders or potential leaders in the following fields and professions: Leaders of cultural institutions/organizations, composers, choreographers, playwrights/dramaturgs/theatrical set, costume, lighting designers, writers/poets, visual artists, architects, folk artists, craftpersons and folklorists, museum professionals.

E/DE particularly seeks cooperative projects with organizations having broad outreach and networking capabilities into American arts activities nationwide. These projects should work through U.S. Information Service (USIS) posts worldwide to carry out activities supportive of the USIA mission, goals and objectives. USIS posts' role in such projects should be substantive and integral more than purely facilitative. In this regard, E/DE projects support USIS posts by providing: (a) Vehicles for professional interaction between arts/museum communities in the United States and other countries; (b) vehicles for creating ongoing institutional linkages between American arts/museum organizations and their counterparts in other countries; and (c) vehicles for USIS officers to use for substantive contacts with key members/groups in their arts constituencies.

Projects supported under the terms of E/DE grants share the following features:

1. Projects must include an international exchange of persons component involving cultural leaders and commentators, critics, administrators and professionals in the professional fields in which the division operates (see above).

2. The office accords priority consideration to projects potentially leading to institutional linkages between American organizations and their counterparts in other countries.

3. Projects may operate either to or from the United States, preferably in both directions.

4. E/DE projects taking place in the United States operate as competitions in which participating USIS posts retain exclusive nomination prerogative of candidates for awards, while the American arts organizations retain selection prerogative of award-winners.

Awards consist of travel and per diem expenses to attend the event or participate in the activity partially funded under the terms of the E/DE grant.

5. Projects to send American professionals to other countries must include assurances of quality, fairness and balance in the selection of participants. Such proposed projects must demonstrate their support of USIS posts' goals and objectives in the countries in which they are to operate. E/DE will consider proposals for activities in other countries when USIS posts are consulted in the design of the proposed program and in the choice of the most suitable venues for such programs.

6. Pursuant to the Bureau of Cultural and Educational Affairs' authorizing legislation, "Programs must maintain a non-political character, should be balanced and representative of the diversity of American political, social and cultural life."

7. The Creative Arts Exchanges Division (E/DE), Office of Arts America requires a minimum of 33% co-funding with grantee organizations in all projects.

8. Funding assistance is limited to participant travel and per diem requirements with modest contributions to defray administrative costs which cannot exceed 20% of the total amount requested from USIA.

9. Organizations with less than four years' experience in conducting international exchange programs are limited to $60,000 of USIA support, and their budget submissions should not exceed this amount.

10. Grant proposals cannot exceed $150,000 in the amount requested from the USIA.

Additional Guidance

The Creative Arts Division, Office of Arts America offers the following additional guidance to prospective applicants:

1. The Office of Arts America encourages project proposals involving more than one country. However, single-country projects that are clearly defined and demonstrate the potential for creating and strengthening continuing linkages between foreign and U.S. institutions are also welcome.

2. Proposals are subject to review and comment by the USIS posts in the relevant countries.

3. Proposed programs should clearly identify foreign counterpart organizations and provide evidence of the organizations' participation.

4. Proposals centering on arts presenters/administrators should consist of exchanges involving these professionals exclusively. E/DE cannot under its guidelines fund performing arts productions or tours, film or video production and/or festivals, independently-operating international competitions, community-level arts presentations or festivals for general audiences, the production or presentation of visual arts exhibits, or projects in the fields of historical/cultural conservation/preservation (see Program Exclusions, point 5, below).

5. The Bureau is the major supporter of the American Association of Museums (AAM) International Partnerships Among Museums (IPAM) program. Museums interested in international projects should address queries to the Office of International Programs, American Association of Museums, 1225 Eye Street, NW., Washington, DC 20005; telephone: (202) 289–1818; FAX: (202) 289–6578. The Office will not accept direct applications from museums for international projects (see Program Exclusions, point 5, below).

Program Exclusions

1. Projects should be intellectual and cultural, not technical. Vocational training (an occupation other than one requiring a baccalaureate or higher academic degree; e.g., clerical work, mechanical/electronic maintenance, etc., and other occupations requiring less than two years of higher education) and technical training (special and practical knowledge of a mechanical or a technical subject which enhances mechanical, narrowly technical, or semi-skilled capabilities) are ineligible for support.

2. Scholarship programs or proposals for long-term (a semester or more) academic studies or training are ineligible for support.

3. E/DE does not support speaking tours, conferences or seminars (i.e., one to fourteen-day programs with plenary sessions, main speakers, panels, and a passive audience).

4. Office of Arts America grants are not given to support research projects, research for project development purposes, youth or youth-related activities (participants' age under 25), publications funding, or student and/or teacher/faculty exchanges, or projects for the exchange of amateurs or semi-professionals.

5. The Office does not accept proposals for the support of performing arts productions or tours, film or video production and/or festivals, independently-operating international competitions, community-level arts presentations or festivals for general audiences, the production or presentation of visual arts exhibits, museum projects except for those under the AAM/IPAM program (see *Additional Guidance*, point 5 above), or projects in the fields of historical/cultural conservation/preservation.

6. USIA is a major yearly supporter of Sister Cities International (SCI). USIA has agreed to fund administrative expenses of the SCI national office but will not fund projects arising from sister city relationships once they are established.

Funding and Budget Requirements for All Submissions

Cost-Sharing

The Creative Arts Exchanges Division (E/DE), Office of Arts America requires co-funding with grantees in all projects. Proposals with cost sharing of less than 33 percent of the total project cost will be considered ineligible. Since USIA grant assistance constitutes only a portion of total project funding, proposals should list and provide evidence of other anticipated sources of support. Grant applications should demonstrate substantial financial and in-kind support using a three-column format that clearly displays cost-sharing support of proposed projects.

Administrative Costs Limitation

Funding assistance is limited to participant travel and per diem requirements with modest contributions to defray administrative costs, which may not exceed 20 percent of the total funds requested. The grantee institution may wish to cost-share any of these expenses. Administrative costs are defined as salaries, benefits and other direct and indirect costs incurred. Important note for universities: The U.S. Information Agency's Bureau of Educational and Cultural Affairs defines American faculty salaries as an administrative expense, regardless of how the faculty time is to be used.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate USIA geographic area offices, and the Bureau budget and contract offices. Proposals may also be reviewed by the Agency's Office of General Counsel. Funding decisions are at the discretion of the

Associate Director for Educational and Cultural Affairs. Final technical authority for grant awards resides with USIA's contracting officer.

Review Criteria

USIA will consider proposals based on the following criteria:

1. *Quality of Program Idea:* Proposals should exhibit originality, substance, rigor, and relevance to Agency mission.

2. *Institution Reputation/Ability/ Evaluations:*

Institutional grant recipients should demonstrate potential for program excellence and/or track record of successful programs, including responsible fiscal management and full compliance with all reporting requirements for past Agency grants as determined by USIA's Office of Contracts (M/KG). The Agency will consider past performance of prior grantees and the demonstrated potential of new applicants.

3. *Project Personnel:* Personnel's thematic and logistical expertise should be relevant to the proposed program.

4. *Program Planning:* Detailed agenda and relevant work plan/project timeline should demonstrate substantive rigor and logistical capacity.

5. *Thematic Expertise:* Proposal should demonstrate expertise in the subject area which guarantees an effective sharing of information.

6. *Cross-Cultural Sensitivity/Area Expertise:* Evidence of sensitivity to historical, linguistic, and other cross-cultural factors; relevant knowledge of geographic area should be evident.

7. *Ability to Achieve Program Objectives:* Objectives should be reasonable, feasible, and flexible. Proposal should clearly demonstrate how the grantee institution will meet the program's objectives.

8. *Multiplier Effect:* Proposed programs should strengthen long-term mutual understanding, to include maximum sharing of information and establishment of long-term institutional ties.

9. *Cost-Effectiveness:* The overhead and administrative components should be as low as possible and shall not exceed 20% of the total funds requested. All other items should be necessary and appropriate to achieve the program's objectives.

10. *Cost-Sharing:* Proposals should maximize cost-sharing through other private sector support as well as institutional direct funding contributions. Proposals with cost sharing of less than 33 percent of the total project cost will be considered ineligible.

11. *Follow-on Activities:* Proposals should provide a plan for continued exchange activity (without USIA support) which insures that USIA supported programs are not isolated events. USIA will seek evidence of plans for activities supportive of long-term institutional ties.

12. *Project Evaluation:* Proposals should include a plan to evaluate the activity's success.

Technical Requirements

Proposals can only be accepted for review when they are fully in accord with the terms of this RFP, as well as with requirements stipulated in the application package.

Notice

The terms and conditions published in the RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of RFP does not constitute an award commitment on the part of the Government. Final awards cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about June 1, 1993. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: December 3, 1992.

Barry Fulton,

Acting Associate Director, Bureau of Educational and Cultural Affairs.

BILLING CODE 8230–01–M

Summer Institutes for the Study of the U.S. for Secondary School Educators

AGENCY: United States Information Agency.

ACTION: Notice—Request for Proposals.

SUMMARY: The United States Information Agency (USIA) invites applications for four institutions, each to conduct a six-week graduate level, multidisciplinary summer institute and integrated follow-on tour for the study of the U.S. for foreign secondary school educators (teacher trainers, curriculum developers, education ministry officials and textbook writers) of English language, American literature, government, history and/or geography who have broad responsibility for curriculum design and improvement. The institutes should offer graduate-level programs aimed at improving the participants' understanding of the U.S. in the context of the study of one of the following areas: (1) U.S. history [institute A]; (2) the American political system [institute B]; (3) twentieth century American literature [institute C]; (4) interdisciplinary/ multidisciplinary American studies [institute D]. Each institute will have approximately 30 participants. Institutes are conducted entirely in English. Participants will be selected by United States Information Service (USIS) posts and Fulbright Commissions overseas and will have high-level fluency in English. USIA is asking for detailed proposals from colleges, universities, consortia of universities, and other not-for-profit educational/academic organizations which demonstrate an acknowledged reputation in fields concerned with the study of the U.S. and expertise in conducting graduate level programs for foreign educators. The Agency expects to award four grants in support of the program. Since each of the four institutes will stress a different study of the U.S. field, applicants must indicate which of the four fields will be emphasized.

DATES: Deadline for proposals: All copies must be received at the U.S. Information Agency by 5 p.m. Washington, DC. time, on Friday, January 22, 1993. Faxed documents will not be accepted, nor will documents post-marked January 22, 1993 but received at a later date. It is the responsibility of each grant applicant to ensure that proposals are received by the above deadline. In order to assure adequate preparation time, grants should begin by April 2, 1993. Approximate institute program dates should be June 26 to August 6, 1993. Participants will be scheduled to arrive in the U.S. on or about June 25, and depart on August 7, 1993.

ADDRESSES: The original and 14 copies of the completed application, including required forms, should be submitted by the deadline to: U.S. Information Agency, Ref.: Summer Institutes for the Study of the U.S. for Secondary School Educators, Office of Grants Management, E/XE, 301 4th Street, SW., room 336, Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested organizations or institutions should contact William C. Jones at the U.S. Information Agency, Division for the Study of the U.S., E/AAS, room 256, 301 4th St. SW., Washington, DC 20547, telephone: (202) 619–4557, to request detailed application packets, which include award criteria additional to this

announcement, all necessary forms, and guidelines for preparing proposals, including specific budget information.

SUPPLEMENTARY INFORMATION: The authority for this exchange program is contained in the Mutual Educational and Cultural Exchange Act of 1961, as amended, Public Law 87–256 (Fulbright-Hays Act). The Fulbright Program seeks to increase mutual understanding between the people of the United States and people of other countries. Pursuant to the Bureau's authorizing legislation, programs must "maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life," and must "maintain their scholarly integrity and shall meet the highest standards of academic excellence * * *".

Overview

Summer institutes aim to provide a deeper understanding of U.S. culture and civilization for foreign secondary school educators who are concerned professionally with teaching about the U.S. Institutes will assist participants through study of American culture, society and institutions and by providing opportunities for research in support of their curricular goals.

Guidelines

Eligibility

Accredited colleges, universities, consortia of universities, and other not-for-profit educational organizations which demonstrate an acknowledged reputation in fields concerned with the study of the U.S. and expertise in conducting graduate level programs for foreign educators are eligible to apply. Institutions must have a minimum of four years' experience in conducting international exchange programs. Proposals from consortia may be submitted by a member institution with documented authority to represent all members. The project director, or one of the key program staff responsible for the academic program, must have an advanced degree in a field related to the study of the U.S., preferably in the institute's field of emphasis. University staff escorts traveling under USIA cooperative agreement support must be U.S. citizens with demonstrated qualifications for this service.

Objectives

The objective of the institutes is to support and encourage the efforts of educators in other countries to improve the quality of teaching about American society and culture at the secondary and teaching training levels by focussing on specific U.S. studies needs and interests. While each of the four institutes should offer a broad overview of U.S. institutions, society and culture, each will also focus on one specific discipline: U.S. history, the U.S. political system, twentieth century American literature, or interdisciplinary/multidisciplinary American studies.

Audience

The program should be designed for approximately 30 highly motivated teacher trainers, curriculum developers, textbook writers, ministry officials and senior secondary level classroom teachers with added "multiplier" responsibilities whose professional assignments require significant knowledge of American civilization and culture. Participants' fields of U.S. studies specialization will be primarily in language, literature, government, history and geography. Participants will be selected by United States Information Service (USIS) posts and Fulbright Commissions worldwide and will have high-level fluency in English. They will be assigned to the institutes by USIA. Although some participants may have visited the U.S. previously, an initial orientation to the U.S. and the American campus should be an integral part of the institute and should be held at the beginning of the program.

Program Design

The applicant is asked to design a two-part program of approximately six weeks duration:

(a) A minimum four-week academic program at a college, university, or other institution of higher learning;

(b) An escorted tour of two other regions of the United States designed to reinforce the academic content of the institute. In addition, the tour should end in Washington, DC.

The academic component of the program must be at least four weeks long; however, the tour component of the program may be less than two weeks.

Academic and Tour Components

Each institute should offer a graduate-level academic program aimed at improving the participants' understanding of the U.S. in the context of the study of one of the following areas: (1) U.S. history [institute A]; (2) the American political system [institute B]; (3) twentieth century American literature [institute C]; (4) multidisciplinary/interdisciplinary American studies [institute D]. Two weeks of the academic portion of the institute should be devoted to providing a broad overview of the diversity, complexity and unity of American life and institutions in a historical and cultural context; the remaining half of the academic program should be devoted to the area selected for emphasis.

The academic program should be specially designed for experienced foreign secondary educators and teacher trainers and should not duplicate courses normally given by graduate departments for American graduate degree candidates. Although it is important that the topics and readings of the institute be clearly organized, the institute should not be structured like a lecture course or a graduate seminar. Rather, it should facilitate the development of a collegial atmosphere in which institute faculty and participants discuss relevant texts, issues, and concepts; and it should provide time for individual research. Proposals should include detailed syllabi with specific topical readings required for each academic unit, accompanied by complete proposed required reading lists and appropriate selected bibliographies.

In addition to substantive presentations and discussions about American society, institutes should provide opportunities for research in support of participants' curricular goals. Participants should be given access to scholarly and bibliographic collections and other materials, as well as adequate professional assistance by institute personnel. Institutes should also familiarize participants with scholarly and institutional contacts which will be useful to them for follow-up activities.

The tour component of the institutes should be planned, arranged, and conducted by the program director and principal project staff and should be seen as an integral part of the program, complementing and reinforcing the academic component. The proposal should indicate the tour sites, which should not exceed two regions in addition to a three-to-four day visit to Washington, DC at the end of the tour. Programming in Washington should include a half-day briefing session at the United States Information Agency. Grantee institutions should consult closely with USIA in planning the Washington itinerary. Details of the academic and tour programs may be modified in consultation with the Branch for the Study of the U.S. following the grant award.

Proposed Budget: Applicants must submit a comprehensive line item budget for which specific details are available in the application packet. The total USIA-funded budget must not

exceed $192,500. USIA-funded administrative costs as defined in the application packet must not exceed $45,000. Applications requesting more than $45,000 for administrative costs, and/or more than $192,500 for total institute costs to USIA, or that do not allocate these costs consistent with the budget instructions will not be considered. Organizations submitting proposals are urged to cost share program and administrative expenses to the greatest degree possible. Participant international travel costs will be covered by USIA.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. All eligible proposals will also be reviewed by the appropriate geographic area office, and the budget and contracts offices. Proposals may also be reviewed by the Agency's Office of General Counsel. Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for cooperative agreement awards resides with USIA's contracting officer.

Review Criteria

Technically eligible applications will be reviewed competitively according to the following criteria:

1. Overall quality.

A. The content, significance, definition, organization and academic rigor of the proposed program (including the follow-on tour) and its appropriateness to program objectives.

B. Evidence of careful planning.

C. The program or project should be representative of current expert knowledge in the field, and should be consistent with the requirements of the Bureau's legislative charter, meeting the highest professional qualitative standards of achievement.

2. Institutional capacity. Adequacy of proposed resources, including faculty, library and other research and scholarly resources; housing availability, and other institutional support important to a collegial setting, should be adequate and appropriate to achieve the program goals.

3. Experience of professionals and staff assigned to the program with foreign educators; institution's track record with international exchange programs.

4. Evaluation and follow-up.

A. Adequacy of plan for an evaluation at the conclusion of the institute by the grantee institution.

B. Adequacy of provisions made for "multiplier effect," *i.e.*, future follow-up and networking between grantees and appropriate U.S. scholarly organizations and institutions.

5. Evidence of strong on-site administrative and managerial capabilities (with specific discussion of how managerial and logistical arrangements will be undertaken).

6. Availability of local and state resources for the orientation, institute, and follow-on tour.

7. Cost effectiveness. The overhead and administrative components of grants, as well as salaries and honoraria, should be kept as low as possible. All other items should be necessary and appropriate. In-kind contributions should be maximized.

Notice

The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. Final awards cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about March 30, 1993. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: December 3, 1992.

Barry Fulton,

Acting Associate Director, Bureau of Educational and Cultural Affairs.

[FR Doc. 92-29774 Filed 12-9-92; 8:45 am]

BILLING CODE 8230-01-M

DEPARTMENT OF VETERANS AFFAIRS

Loan Guaranty: Percentage To Determine Net Value

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: This notice provides information to participants in the Department of Veterans Affairs (VA) loan guaranty program concerning the percentage to be used in determining whether the Secretary will accept conveyance of a foreclosed property. The new percentage is 14.16 percent.

EFFECTIVE DATE: The new percentage is effective October 9, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Leonard A. Levy, Assistant Director for Loan Management (261), Loan Guaranty Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420. (202) 233-3668.

SUPPLEMENTARY INFORMATION: VA regulations concerning the payment of loan guaranty claims are set forth at 38 CFR 36.4300, et seq. The formulas for determining whether VA will offer the lender an election to convey the property to VA are set forth at 38 CFR 36.4320. A key component of this is the "net value" of the property to the Government, as defined in 38 CFR 36.4301. Essentially, "net value" is the fair market value of the property, minus the total of the costs the Secretary estimates would be incurred by VA resulting from the acquisition and disposition of the property for property taxes, assessments, liens, property maintenance, administration and resale. Each year VA reviews the average operating expenses incurred for properties acquired under 38 CFR 36.4320 which were sold during the preceding three fiscal years and the average administrative cost to the government associated with the property management activity. Administrative cost is based on the average holding time for properties sold during the preceding fiscal year. Property improvement expenses are estimated on an individual case basis at the time the net value is estimated. Public Law 102-389, the Departments of Veterans Affairs, Housing and Urban Development, and Independent Agencies Appropriations Act for Fiscal Year 1993, approved October 6, 1992, requires a change to the net value formula this year to include an item which was not included in prior years. For Fiscal Year 1993, VA must also include in the net value calculation an amount equal to the gain or loss experienced by VA on the resale of acquired properties.

VA annually updates the "net value" percentage and publishes a notice of the new percentage in the **Federal Register**. For Fiscal Year 1992, the percentage was 10.94 percent. For Fiscal Year 1993, the percentage will be 14.16 percent, based upon the operating expenses incurred, exclusive of estimated property improvement expenses which are accounted for separately in each case, for Fiscal Years 1990, 1991, and 1992, and property resale experience for

Fiscal Year 1992. This new percentage can be broken down as 3.04 percent attributable to resale experience and 11.12 percent to the other enumerated expenses. Accordingly, VA will subtract 14.16 percent from the fair market value of the property to be foreclosed in order to arrive at the "net value" of the property to VA. This new percentage will be used in "net value" calculations made by VA on and after October 9, 1992.

Approved: November 19, 1992.

Anthony J. Principi,

Acting Secretary of Veterans Affairs.

Sunshine Act Meetings

Federal Register
Vol. 57, No. 238
Thursday, December 10, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL ELECTION COMMISSION

"FEDERAL REGISTER" NUMBER: 92–29512

PREVIOUSLY ANNOUNCED DATES AND TIMES: Tuesday, December 8, 1992, 10:00 a.m., meeting closed to the public.

This meeting has been cancelled.

DATE AND TIME: Tuesday, December 15, 1992 at 10:00 a.m.

PLACE: 999 E Street, NW., Washington, DC (Ninth Floor).

STATUS: This meeting will be open to the public.

ITEMS TO BE DISCUSSED:

Correction and Approval of Minutes
Title 26 Certification Matters
Election of Chairman
Election of Vice Chairman
Administrative Matters

DATE AND TIME: Tuesday, December 15, 1992, will convene after the open meeting.

PLACE: 999 E Street, NW., Washington, DC.

STATUS: This meeting will be closed to the public.

MATTER BEFORE THE COMMISSION:

Compliance matters pursuant to 2 U.S.C. 437g.
Audits conducted pursuant to 2 U.S.C. 437g, 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration
Report on Priortization
Internal personnel rules and procedures or matters affecting a particular employee

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Press Officer, Telephone: (202) 219–4155.

Delores Hardy,

Administrative Assistant.

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

TIME AND DATE: 10:00 a.m., December 21, 1992.

PLACE: 5th Floor, Conference Room, 805 Fifteenth Street, NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Approval of the minutes of the last meeting.
2. Thrift Savings Plan activity report by the Executive Director.
3. Review of KPMG Peat Marwick audit reports:

"Pension and Welfare Benefits Administration Survey of Federal Retirement

Thrift Saving Plan Inactive Accounts and Proposed Abandoned Account Policies at the United States Department of Agriculture, Office of Finance and Management, National Finance Center."

"Pension and Welfare Benefits Administration Review of the Thrift Savings Plan Billing Process at the United States Department of Agriculture, Office of Finance and Management, National Finance Center."

4. Review of Hewitt Associates "Defined Contribution Outsourcing Feasibility Study."

5. Ethics briefing.

CONTACT PERSON FOR MORE INFORMATION: Tom Trabusso, Director, Office of External Affairs, (202) 523–5660.

Dated: December 8, 1992.

Francis X. Cavanaugh,

Federal Retirement Thrift Investment Board.

Corrections

Federal Register
Vol. 57, No. 238
Thursday, December 10, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 145

[Docket No. 026–2]

National Poultry Improvement Plan and Auxiliary Provisions

Correction

In rule document 92–29461 beginning on page 57338 in the issue of Friday, December 4, 1992, make the following correction:

§ 145.42 [Corrected]

On page 57341, in the third column, in amendatory instruction 12 to § 145.42, in the first line, "147.42" should read "145.42".

BILLING CODE 1505–01–D

COPYRIGHT ROYALTY TRIBUNAL

37 CFR Part 304

[Docket No. 92–2–PBRA]

1992 Adjustment of the Public Broadcasting Royalty Rates and Terms

Correction

In proposed rule document 92–28563 beginning on page 55494 in the issue of Wednesday, November 25, 1992, make the following corrections:

1. On page 55495, in the third column, in the second full paragraph, in the seventh line, "37 CFR 304.104" should read "37 CFR 304.10"; and in the third line from the bottom of the same paragraph, insert "(" before "1991)".

2. On page 55496, in the third column, in the last paragraph, in the third line, remove "the" the first time it appears.

3. On page 55497, in the 1st column, in the 36th line, "photograph" should read "photography".

§ 304.5 [Corrected]

4. On page 55498, in the first column, in § 304.5(e), in the first line, "The" should read "A".

§ 304.7 [Corrected]

5. On the same page, in the third column, in § 304.7(b)(1), the second paragraph designated "(ii) In the event * * *" should be designated "(iii) In the event * * *".

6. On page 55499, in the second column, in § 304.7(e)(1), in the ninth line from the bottom, "prepared" was misspelled.

Part II

Office of Personnel Management

5 CFR Part 591

Cost-of-Living Allowances (Nonforeign Areas) and Report on 1991/1992 Determination Surveys; Proposed Rule and Notice

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 591

RIN 3206–AF13

Cost-of-Living Allowances (Nonforeign Areas)

AGENCY: Office of Personnel Management.

ACTION: Notice of proposed rulemaking.

SUMMARY: OPM proposes to increase certain cost-of-living allowance (COLA) rates paid to General Schedule, Postal Service, and selected other Federal employees in several nonforeign areas—namely, Guam, the Commonwealth of the Northern Mariana Islands, parts of Hawaii, and part of the Virgin Islands. The proposed adjustments are based on living cost surveys conducted during the summer of 1991 and the winter of 1992. The surveys were conducted by Runzheimer International for OPM under contract.

OPM proposes to adjust only those rates that would increase. Rates that would otherwise decrease will remain unchanged as required by a general provision in the Treasury, Postal Service, and General Government Appropriations Act of 1992. Without this general provision, a total of 10 rates in 7 allowance areas would decrease.

As background to the proposed rate adjustments, OPM is publishing a separate **Federal Register** notice immediately following this proposed rulemaking.

DATES: Comments must be received on or before February 8, 1993.

ADDRESSES: Send or deliver comments to Phyllis G. Foley, COLA Program Manager, Office of Compensation Policy, Personnel Systems and Oversight Group, Office of Personnel Management, room 7H38, 1990 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Phyllis G. Foley, (202) 606–3710.

SUPPLEMENTARY INFORMATION: The proposed increases in COLA rates are summarized in the table below:

PROPOSED INCREASES IN COLA RATES

Allowance area/category	Current rate	Proposed rate
City and County of Honolulu, Hawaii:		
Commissary/exchange	12.5	15.0
County of Maui and County of Kalawao, Hawaii:		
All employees	20.0	22.5
Territory of Guam and Commonwealth of the Northern Mariana Islands:		
Local pricing	12.5	15.0
Commissary/exchange	0.0	7.5
St. Thomas and St. Jonn, the Virgin Islands:		
All employees	12.5	15.0

It should be noted that OPM published final regulations in the **Federal Register** of December 9, 1992 that expand the Guam allowance area to include the Commonwealth of the Northern Mariana Islands.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulation will only affect Federal agencies and employees.

List of Subjects in 5 CFR Part 591

Government employees, Travel and transportation expenses, Wages.

U.S. Office of Personnel Management.

Douglas A. Brook,

Acting Director.

Accordingly, OPM proposes to amend 5 CFR part 591 as follows:

PART 591—ALLOWANCES AND DIFFERENTIALS

Subpart B—Cost-of-Living Allowance and Post Differential—Nonforeign Areas

1. The authority citation for subpart B of part 591 continues to read as follows:

Authority: 5 U.S.C. 5941; E.O. 10000, 3 CFR, 1943–1948 Comp., p. 792; E.O. 12510, 3 CFR, 1985 Comp., p. 338.

2. Appendix A of subpart B is revised to read as follows:

Appendix A of Subpart B—Places and Rates at Which Allowances Shall be Paid

This appendix lists the places where a cost-of-living allowance has been approved and shows the allowance rate to be paid to employees along with any special eligibility requirements for the allowance payment. The allowance percentage rate shown is paid as a percentage of an employee's rate of basic pay.

Geographic coverage/allowance category	Authorized allowance rate (Percent)
State of Alaska:	
City of Anchorage and 50 mile radius by road:	
Local retail	25.0
Commissary/exchange	17.5
City of Fairbanks and 50 mile radius by road:	
Local retail	25.0
Commissary/exchange	20.0
City of Juneau and 50 mile radius by road:	
Local retail	25.0
Commissary/exchange	25.0
Rest of the State:	
All employees	25.0
State of Hawaii:	
City and County of Honolulu:	
Local retail	22.5
Commissary/exchange	15.0
County of Hawaii:	
All employees	15.0
County of Kauai:	
Local retail	17.5
Commissary/exchange	17.5
County of Maui and County of Kalawao:	
All employees	22.5
Territory of Guam and Commonwealth of the Northern Mariana Islands:	
All locations:	
Local retail	15.0
Commissary/exchange	7.5
Commonwealth of Puerto Rico:	
All locations:	
Local retail	10.0
Commissary/exchange	0.0
The Virgin Islands:	
St. Croix:	
All employees	12.5
St. Thomas and St. John:	
All employees	15.0

Definitions of Allowance Categories

The following definitions of the allowance categories identified in the tables in this appendix shall be used to determine employee eligibility for the appropriate allowance rate:

Allowance category	Definition
Local Retail	This category includes those employees who purchase goods and services from private retail establishments.
Commissary/Exchange.	This category includes those employees who shop at private retail establishments, but who, as a result of their Federal civilian employment, also have unlimited access to commissary and exchange facilities. This category is established only in those allowance areas that have these facilities.

Note: Eligibility for access for military commissary and exchange facilities is determined by the appropriate military department. If an employee is furnished with these privileges for reasons associated with his or her Federal civilian employment, he or she will have an identification card that authorizes access to such facilities. Possession of such an identification card—i.e., one issued by reason of his or her

Federal civilian employment—is sufficient evidence that the employee uses the facilities.

BILLING CODE 6325–01–M

OFFICE OF PERSONNEL MANAGEMENT

Report on 1991/1992 Surveys Used To Determine Cost-of-Living Allowances in Nonforeign Areas

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: This notice publishes the Report to OPM on Living Costs in Selected Nonforeign Areas and in the Washington, DC Area, June 1992, prepared by Runzheimer International under Government contract OPM–90–0705. This report provides the basis for the increases in certain cost-of-living allowances (COLA's) being proposed by OPM in the proposed rulemaking immediately preceding this notice.

DATES: Consistent with the deadline on comments for the proposed rulemaking immediately preceding this notice, OPM requests that comments on the report be submitted on or before February 8, 1993.

ADDRESSES: Send or deliver comments to Phyllis G. Foley, COLA Program Manager, Office of Compensation Policy, Personnel Systems and Oversight Group, Office of Personnel Management, room 7H38, 1990 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Phyllis G. Foley, (202) 606–3710.

SUPPLEMENTARY INFORMATION: Under 5 CFR 591.206(c), COLA survey summaries must be published in the **Federal Register**. Accordingly, OPM is publishing the complete Report to OPM on Living Costs in Selected Nonforeign Areas and in the Washington, DC Area, June 1992, produced by Runzheimer International. The Runzheimer report describes the surveys that were conducted for OPM in the summer of 1991 in Hawaii, Guam, Puerto Rico, and the Virgin Islands and in the winter of 1992 in Alaska. It also explains in detail methodologies, calculations, and findings.

1. COLA Survey Findings

Based on its 1991/1992 living cost surveys, Runzheimer computed index values of relative living costs in allowance areas using an index scale where the living costs of the Washington, DC, area are set at 100. (See the Executive Summary of the June 1992 Runzheimer report accompanying this notice.) OPM notes that the 1991/1992 surveys continue to show that current COLA rates are above the levels otherwise warranted in most allowance areas. However, the Treasury, Postal Service, and General Government Appropriations Act of 1992 (Pub. L. 102–141) bars any reduction in COLA rates through December 31, 1995. Thus, the only rate adjustments to be made are rate increases, as described in the proposed rulemaking immediately preceding this notice.

2. Comments Received and Changes Made to the COLA Surveys

In preparing for these surveys, OPM instructed Runzheimer to make several changes in the items and communities surveyed. These changes took into consideration many of the comments that OPM received from employees on the earlier 1990 Runzheimer report, which OPM published in the **Federal Register** on February 26, 1991 (56 FR 7902). That report dealt with allowance area living cost surveys conducted by Runzheimer in the summer of 1990, which were the first surveys conducted using the new methodology OPM adopted as a result of earlier litigation. OPM received approximately 7,000 comments on the 1990 Runzheimer report. These comments are summarized and evaluated below.

General Comments

Most of the commenters were Federal employees, and most were concerned about the impact of deep reductions in COLA rates. They cited various financial commitments, such as home purchase, that were made assuming COLA rates would be relatively stable.

As already noted, the Treasury, Postal Service, and General Government Appropriations Act of 1992 (Pub. L. 102–141) prohibits OPM from reducing COLA rates through December 31, 1995. Furthermore, if OPM once again were authorized to reduce COLA rates, it has authority under Executive Order 10000 and 5 CFR 591.211 to reduce COLA rates gradually when the decrease is due to changes in the methodology used to determine living costs. OPM's philosophy is to be very deliberate in making any adjustments to COLA rates.

Many commenters believed significant reductions would cause recruitment and retention problems. OPM is concerned about the potential impact of COLA changes on the Government's ability to recruit and retain a well-qualified workforce. OPM notes, however, that the Government has several effective pay authorities designed to meet recruitment and retention problems.

Many commenters thought that significant reductions would have an adverse effect on the local economy of the allowance area. OPM's deliberate approach and the authority to implement substantial reductions gradually should minimize the impact any future COLA reductions might have on the local economy.

A large number of commenters stated that the survey was conducted during unusual periods in the local economy. Several examples were offered. Many people noted that the Alaska economy was in recession during the survey and that the survey results reflected these atypical conditions. Residents of the Virgin Islands noted the destruction caused by Hurricane Hugo and its impact on the local economy. Other commenters stated that the Gulf crisis had affected prices, particularly gas and oil prices.

OPM recognizes that local economies are affected by unique conditions. For example, the 1990 Runzheimer report noted that the destruction caused by Hugo was still evident in the Virgin Islands and that it had created housing shortages that complicated data collection.

OPM believes that as more surveys are conducted, a base of information will develop that will enable the comparison of survey results from one year to the next. Indications of trends in local economic conditions will emerge. As we better understand these trends, we may find ways in which such changes can be taken into consideration in determining COLA rates, if appropriate.

Over one hundred commenters suggested that pay be set according to local prevailing salaries rather than according to living costs. Many of these people noted that Federal blue-collar employees covered by the Federal Wage System did not receive COLA but rather had pay set according to local prevailing rates.

OPM believes that serious consideration should be given to alternatives to COLA, and locality pay may be a particularly viable alternative.

Many commenters asked that OPM involve employees in the survey process. OPM agrees that employee involvement is desirable. To this end, we will survey Federal employees in the near future to gather data on their housing costs and living patterns. The survey will ask where employees live, what type of home they have, whether they rent or own, what their rental or mortgage payment is, and other questions related to housing. The survey also will ask employees other questions related to shopping, commuting, transportation, medical care, and education.

The employee survey is planned as a one-time survey to obtain information that will be used to improve the COLA methodology. The results of the survey will not be used directly to adjust COLA

rates, but rather to improve, refine, and validate the living cost model.

Some commenters found the report too complex and lengthy. Others asked that more information be provided. At OPM's request, Runzheimer strived to strike a balance between providing a report that was too technical and one that was overly simplistic. On the basis of the comments we received overall, OPM believes that a proper balance was achieved.

Some commenters inquired about the statistical validity of the survey. They suggested that Runzheimer explain how the sample was drawn and report additional statistics, such as the standard deviation.

Runzheimer used a type of stratified sampling to obtain prices. Communities were selected to represent places where Federal employees and other persons with incomes similar to Federal employees were apt to live. Within these communities, major outlets were identified and surveyed on a random basis. In many cases, universe surveys were conducted because there were so few major outlets within the community.

Additional statistics could be computed concerning the survey results. However, including this information in the report would make the report longer and more complex—something OPM wishes to avoid.

One commenter criticized OPM for delegating to Runzheimer the authority to implement OPM regulations. OPM did not delegate such authority. OPM worked closely with Runzheimer to implement the regulations. Runzheimer expertise and advice was invaluable, but OPM retained all decision-making authority.

This commenter also stated that COLA rates should include an additional 5 percentage points in consideration of "non-monetary" costs. As OPM stated in the **Federal Register** notice of January 16, 1990, (56 FR 1372), OPM does not believe that adding 5 percent to the calculated allowance rates based on conjecture would be consistent with the requirements of Executive Order 10,000.

Several commenters stated that OPM should publish all of the survey data (e.g., basic price data, outlet identification or specific data sources) in the report. OPM disagrees for two reasons. First, we are concerned about integrity of the COLA program and future surveys. Making public all information would seriously undermine our ability to conduct surveys in the future. Second, publishing this volume of information is not practical and would make the report far too complex.

It should be noted, however, that OPM provided additional information to those who requested it. This information included the regression results used to develop the model and a detailed summary of prices collected. OPM will continue to make such information available upon request in the future.

Comments on the Overall Living Cost Model

Over one thousand commenters stated that Washington, DC, should not be the base area for comparisons of living costs. The use of this area is required by law, i.e., section 5941 of title 5, United States Code.

Some commenters found that the distinctions between the Part I and Part II methodologies confusing. The Part I methodology incorporated minor changes Runzheimer made concerning the survey methodology. The part II methodology conformed precisely with OPM's regulations. OPM asked Runzheimer to show the results of both methodologies (i.e. Part I and Part II) in its 1990 report so that the methodologies could be compared.

In the June 1992 report being published with this notice, Runzheimer used, at OPM's request, only the methodology prescribed in regulation (i.e., the Part II methodology). This has simplified this year's report and should reduce confusion.

Many commenters noted that Runzheimer surveyed Anchorage, Fairbanks, and Juneau, Alaska, but not other areas in Alaska. They asked how COLA rates would be set for these other areas.

In the winter 1992 survey, OPM asked Runzheimer to survey Nome, Alaska (in addition to the other three cities) to represent other areas in Alaska. Nome was selected because of its remote location, relative population size, and number of Federal employees in the area. The June 1992 report provides the results of the Nome living cost survey.

Many commenters were confused about the purpose of the survey of commissaries and exchanges. They believed that the data collected at these facilities were used to set all COLA rates. This was not the case.

As prescribed by § 591.207 of title 5, Code of Federal Regulations, the commissary and exchange data were used to determine COLA rates only for employees who have unlimited access to commissaries and exchanges by virtue of the Federal civilian employment. Few Federal employees have such access.

Many commenters from Alaska stated that the survey was conducted during the wrong time of year. They stated that prices were at their lowest during August and September and that a survey conducted during the winter months would be more appropriate.

OPM changed the timing of the Alaska surveys from the summer months to the winter months. The latest Alaska surveys were conducted in February 1992.

Over 700 commenters, particularly those from Puerto Rico, pointed out that COLA is taxable in many allowance areas. For example, both the State of Hawaii and the Commonwealth of Puerto Rico tax COLA. Many commenters believed that such tax should be included in the COLA survey.

Among the recommendations Runzheimer makes in its June 1992 report is a recommendation to include income taxes. In light of this recommendation and the significant number of comments we received regarding income taxes, OPM plans to research the issue further in the coming year.

Many commenters stated that the representative salary levels selected for the model were too low and not representative of the total family incomes of typical Federal employees.

OPM directed Runzheimer to select dollar amounts that reflected typical Federal salaries, *not* total income levels. We believed this to be appropriate because COLA is paid on the basis of Federal pay, not total family income. OPM realizes, however, that it also may be appropriate to analyze living costs using average household income. One of the questions OPM will ask on the forthcoming employee survey deals with total family income. OPM will reassess the model after analyzing the results of the employee survey.

One commenter stated that Runzheimer's use of three income levels at which living costs were measured was not justified in light of the cost and complexity this added. The use of three income levels conformed with the requirement in 5 CFR 591.205(b)(1) that living costs be measured at several income levels. OPM agrees, however, that it may be desirable to simplify the model and will give this matter further study.

Many comments, particularly from Puerto Rico and Alaska, stated that the family size (2.6 persons) reflected in the COLA model was too small. That family size is the average of all families nationwide that participated in the Bureau of Labor Statistic's (BLS) 1988 Consumer Expenditure Survey (CES). Runzheimer used the CES to determine the component, category, and item weights.

OPM regulations (5 CFR 591.205(b)(1)) require the use of consumer expenditure data at several income levels for a standard family size. This family size should reflect that typical of all areas, including the Washington, DC, area and, therefore, we believe that use of the average family size derived from the CES is appropriate. However, we will reexamine this issue after analyzing the results of the upcoming employee survey.

Many commenters stated that the use of the nationwide CES data was inappropriate. Some cited newspaper and magazine articles that indicated that consumers in some allowance areas allocate their incomes differently compared with average U.S. consumers.

Consumer expenditure patterns differ among areas. Neither Runzheimer nor OPM, however, know of a published source of comprehensive consumer expenditure data, cross tabulated by geographic area and income level, that is the type required for the COLA model by 5 CFR 591.205(b)(1). BLS publishes CES data for selected major metropolitan areas, including Anchorage, Honolulu, and Washington, DC; but these data are not available by type of expenditure and income level. Furthermore, BLS does not publish data for any of the other cities or metropolitan areas in the other allowance areas.

Several commenters noted that Runzheimer said it used the Laspreyes methodology for calculating indexes. The commenters correctly pointed out that the Laspreyes method uses base weights and that Runzheimer did not use the Washington, DC, area CES data as weights.

The characterization of the indexes as "Laspreyes indexes" may have been technically inappropriate. However, both OPM and Runzheimer believe that the use of national CES data as weights does not invalidate price comparisons. More significantly, as noted above, there are no detailed CES data for the DC area. Therefore, a pure application of the Laspreyes method was not possible.

A few commenters recommended that OPM use other indexing methods. The Paasche Index and Fisher's Ideal Index were two suggested. In terms of the COLA program, the Paasche method is identical to the Laspreyes method except that Paasche would use allowance area weights and Laspreyes would use base area (ideally, Washington, DC, area) weights. Fisher's Ideal Index is based on the geometric mean of the Laspreyes and Paasche indexes. However, because CES data are not available for each allowance area by income level, it is not possible to apply either the Paasche or the Fisher's Ideal indexes.

Several commenters asked about the edits Runzheimer used and how these edits affected the indices. Data edits are a common part of survey analyses. The main purpose is to ensure the integrity of the survey and to spot data that should be double checked. Runzheimer applied this type of edit; but because Runzheimer uses professional data collectors, few edits were required.

Several commenters asked why Runzheimer surveyed more locations in the Washington, DC, area than in any of the allowance areas. The Washington, DC, metropolitan area is larger, in population terms, than any of the allowance areas. Therefore, to adequately measure living costs in the DC area, Runzheimer had to collect more data.

Some commenters from Puerto Rico questioned the survey of Mayaguez. A few commenters thought Ponce should be surveyed instead of Mayaguez. Others stated that the geographic weights used to combine survey data were inappropriate.

The weights Runzheimer used in its 1990 survey were based on OPM's analyses of the distribution of Federal employees by duty station in Puerto Rico. OPM found that approximately 70 percent of the employees worked in the greater San Juan-Caguas metropolitan area and that 30 percent were west of that area. Although Federal employment was widely dispersed on the western end of the island, OPM's statistics indicated that more employees worked closer to the Mayaguez area than the Ponce area. Therefore, OPM asked Runzheimer to survey both San Juan and Mayaguez and apply the weights (70 and 30 respectively) to the data collected. The same weighting formula was used in the 1991 survey.

Comments on the Goods and Services Component

Many commenters believed that Runzheimer surveyed the wrong goods and services or should have surveyed more goods and services. Most of the items suggested were of regional importance. For example, commenters in Alaska recommended the survey of parkas, snow blowers, and other items common in cold climates. To the extent practicable, OPM has revised the survey to include many of the items suggested. In Alaska, for instance, several new items were added to the survey, including snow blowers, boots, and parkas.

A large number of commenters cited the lack of locally available goods and services, and many commenters said that they had to purchase items by catalog. At OPM's request, Runzheimer increased the number of items priced via catalog in the summer 1991 and winter 1992 surveys. Catalog pricing took into consideration the additional costs of shipping and excise taxes where applicable. This type of pricing proved effective for certain types of items, particularly in the less populated areas; and OPM plans to consider making greater use of catalog pricing in the future.

Some commenters believed that OPM should include the cost of items commonly purchased in the allowance area but not include the cost of that item if it is not commonly purchased in the Washington, DC, area. Snowmobiles might be an example of this type of item.

Under 5 CFR 591.205(b)(1)(i), exact brands and models are priced in each location whenever possible. This provision was adopted in consideration of the settlement of *Hector Arana, et al., v. the United States.* These regulations do not allow the survey of an item in an allowance area and the omission of that item in the reference area survey.

Apparently, many commenters were unaware of some of the items included in the survey. Several asked that OPM add goods or services that were already part of the survey. The most common example was child care. Nearly 500 commenters asked that OPM survey day care costs.

In the 1990 survey and again in 1991/1992 survey, Runzheimer priced the cost of full-time (8 hours per day, 5 days a week) day care, as well as baby sitting services. A complete description of each item surveyed was published in Appendix 5 of the 1990 report (see 56 FR 7934–7937). Appendix 2 of the June 1992 report contains a complete description of the items surveyed in 1991 and 1992.

Over 300 commenters stated that OPM should have considered college and university education costs; and nearly 1,000 commenters, mainly from Puerto Rico, believed OPM should have considered the cost of private education in grades K through 12. At OPM's direction, Runzheimer did not survey the costs of K–12 or college education because educational usage and opportunities vary significantly among locations. As part of a separate research project, OPM asked Runzheimer to research the availability and cost of these types of educational opportunities in the allowance areas and in the Washington, DC, area. OPM is currently analyzing the results of Runzheimer's research.

Comments on the Housing Component

Approximately one-fourth of the commenters thought that OPM should survey Federal employees to obtain their housing costs in a manner similar to that used under the COLA program in the 1970's and 1980's. OPM believes that the current process, which uses quantity and quality specific comparisons, more closely conforms with the intent of the settlement of *Arana* v. *United States*. As noted earlier, however, OPM plans to survey Federal employees on a one-time basis to obtain information on their housing and living patterns. OPM will use the results of this survey to make improvements to the living cost surveys and methodology as appropriate.

A large number of commenters from Alaska stated that they had purchased or refinanced their homes when housing values were relatively high but that since that time housing values had decreased. They felt that the survey did not reflect their costs because the survey covered only current home sales.

OPM is aware that home values in Alaska have changed markedly over the past decade. In 1990, we asked Runzheimer to collect housing data as of 1984 as well as the then current housing data. In the summer 1991 and winter 1992 surveys, we asked Runzheimer to collect historical data on all of the years between 1984 and 1990, as well as current data. The historical data are included in Appendix 9 of the June 1992 Runzheimer report.

As noted in both the 1990 report and the June 1992 report, neither OPM nor Runzheimer has data on home tenure that allows us to use the historical housing information. Home tenure, however, is one of the questions OPM is asking Federal employees in the forthcoming employee survey. OPM plans to analyze the feasibility of using the results of the employee survey to weight the historical housing data and include it with current housing data in future COLA analyses.

Several commenters believed that Runzheimer chose inappropriate living communities in which to survey housing costs. Paradise Park, which is located in Hawaii County, Hawaii, was cited frequently as an example of an inappropriate community. Additional examples were cited in several other allowance areas.

In response to these comments, OPM asked Runzheimer to research new communities in several allowance areas and several changes were made. For example, Paradise Park was dropped from the survey and Kailua Kona was added. Runzheimer discusses the research and changes in section 4.2.3 of the June 1992 report. As Runzheimer recommends, OPM will revisit the issue of community selection after analyzing the results of the forthcoming employee survey.

Many commenters from Hawaii also were concerned that Runzheimer may have obtained housing costs for leasehold sales instead of fee simple sales. A leasehold sale is one in which the homeowner does not own the land but rather leases it from the landowner. Runzheimer surveyed only fee simple sales in Hawaii. Leasehold sales were not included.

Another housing issue frequently mentioned was the high cost of home maintenance due to tropical storms and salt air or severe cold. At OPM's direction, Runzheimer also researched home maintenance issues and made selected changes to the survey. The research and changes are discussed in section 4.2.4.4 of the Runzheimer report. In addition, OPM has included in the employee survey several questions dealing with home maintenance and will further review this issue after the results of the employee survey have been analyzed.

A large number of commenters, particularly those from Alaska, noted the high cost of utilities in the allowance areas. Since the 1990 survey of Alaska was conducted during the summer, many commenters apparently believed that Runzheimer obtained only the utility usage for those months. This is not the case.

In each allowance area and in the Washington, DC, area, Runzheimer contacted utility companies and fuel oil dealers to obtain the annual utility costs. This took into consideration seasonal differences in rates and consumption. Thus, although the survey was conducted during the summer, the utility costs reflected both summer and winter usage and rates.

Many commenters noted that real estate taxes were high in their areas. In each area, Runzheimer surveyed real estate taxes and included these costs as part of the housing component costs.

Comments on the Transportation Component

Many commenters stated that rough terrain, salt air, and/or harsh weather increased automobile maintenance costs in the allowance areas and caused cars to depreciate faster. Commenters also noted that cold weather and rugged terrain reduced gas mileage.

In 1991, at OPM's request, Runzheimer researched the maintenance and fuel economy issues. Indeed, Runzheimer found that some items, such as constant velocity joint boots, need more frequent replacement in some of the allowance areas. Runzheimer also found that gas mileage also was affected by climate, particularly by cold weather. At OPM's direction, Runzheimer took many of these factors into consideration in calculating the indices shown in the June 1992 report. OPM also plans to ask Federal employees about their transportation costs in the forthcoming employee survey.

Many commenters from Puerto Rico noted that the excise tax on cars and many other items was very high in that area. Other commenters, particularly in Alaska, noted that they paid vehicle registration fees.

In surveying the cost of items, Runzheimer priced the final cost to the consumer. This cost included any excise tax or sales taxes paid directly or indirectly. In determining transportation costs, Runzheimer also included the cost of personal property taxes and vehicle registration fees in those areas that assess such taxes and fees.

Over a thousand commenters stated that municipal public transportation was not available in their area or not comparable with municipal public transportation in the Washington, DC, area. Many examples were offered. Some commenters stated that the systems in their areas provided only limited service. Others stated that their municipal systems were unreliable.

After researching issues concerning municipal public transportation systems in each allowance area, OPM decided to drop the survey of municipal public transportation. Runzheimer did not include it in the June 1992 report.

Over fifteen hundred commenters noted that Runzheimer did not survey air transportation costs. Many of the commenters stated that air travel was the only practical means of transportation outside their immediate area.

In light of these comments, OPM directed Runzheimer this year to price the cost of air travel from each allowance area and the Washington, DC, area to a common point (Los Angeles) within the contiguous 48 States. OPM will also ask employees about their travel in the upcoming Federal employee survey.

Comments on Miscellaneous Component

By regulation, the Miscellaneous Component is comprised of health care, gifts, contributions, savings and investments, retirement, and life insurance. Nearly all of the comments

OPM received on this component were related to health care.

Many commenters cited the high cost of medical care and the need to travel to other areas to obtain medical treatment. Runzheimer surveyed several typical medical items and services, and the costs of these items were included in the determining of relative living costs. OPM realizes, however, that some types of medical treatment are not available in every allowance area and that the living cost model does not take into consideration the additional costs that a small portion of the Federal population incurs in obtaining medical services outside the area.

Therefore, as with the educational opportunities issues, OPM contracted with Runzheimer to research the availability and cost of medical procedures in each of the allowance areas and in the Washington, DC, area. As part of this study, Runzheimer took into consideration the cost of air travel, lodging, and meals for the patient and a companion in computing the cost of medical treatment that can only be obtained outside an area. OPM is currently analyzing the results of Runzheimer's research. OPM is also asking Federal employees about medical expenses and related travel in the forthcoming employee survey.

U.S. Office of Personnel Management.

Douglas A. Brook,

Acting Director.

Report to OPM on Living Costs in Selected Nonforeign Areas and in the Washington, DC Area

June 1992.

Executive Summary

This report is the second living-cost comparison study produced by Runzheimer International for the Office of Personnel Management (OPM) under contract OPM–90–0705. The OPM contract required Runzheimer to:

(1) Survey living costs in twelve (allowance) areas and the Washington, DC, area, and

(2) Compare living costs between the areas and the DC area.

To determine living costs in the identified areas and build this report, Runzheimer researched over 3,000 outlets and gathered more than 8,500 price quotes.

For ease of interpreting the research results, we display the outcome of the comparisons as living-cost indexes in the table below. In addition, the table shows living-cost indexes for federal employees who have unlimited access to commissary and exchange facilities by virtue of their employment.

FINAL COST COMPARISON INDEXES

Allowance area	Local pricing	Commissary and exchange
Anchorage, Alaska	104.53	101.44
Fairbanks, Alaska	106.96	104.19
Juneau, Alaska	108.01	NA
Other Areas in Alaska*	125.90	NA
Guam	114.10	107.01

FINAL COST COMPARISON INDEXES—Continued

Allowance area	Local pricing	Commissary and exchange
City & Cnty of Honolulu, Hawaii	118.98	113.98
Hawaii Cnty, Hawaii	112.26	NA
Kauai Cnty, Hawaii	117.38	NA
Maui Cnty, Hawaii	121.82	NA
Puerto Rico	100.10	99.57
St. Croix, Virgin Islands	107.94	NA
St. Thomas, Virgin Islands	114.25	NA

*As represented by Nome, AK.
NA = Not Applicable.

In response to comments OPM received on the 1990 living-cost report, OPM asked Runzheimer to make several changes to the surveys and the survey process. One significant change was the timing of the Alaska surveys, which were conducted in the winter—February 1992—rather than the summer, when the 1990 data were gathered. Runzheimer surveyed all other areas in the late summer of 1991. To ensure that price comparisons with the Washington, DC, area correlated in terms of seasonal timing, Runzheimer surveyed it during both seasons. Consequently, this report describes the results of the 1991 summer surveys and the 1992 winter surveys.

Other survey changes requested by OPM include:

- New living communities for Hawaii and Puerto Rico;
- New items for pricing, including air travel costs, catalog sales, and more fresh meats, fruits and vegetables.

We discuss the community and item changes in appropriate sections throughout this report.

Report to OPM on Living Costs in Selected Nonforeign Areas and in the Washington, DC, Area

1. Introduction

1.1 Report Objectives

This comprehensive report culminates the data-gathering and research work conducted in 1991 and 1992 as required by Task 2 of contract OPM–90–0705 between the Office of Personnel Management (OPM) and Runzheimer International. The report details the findings of Runzheimer International's research and analysis of over 3,000 outlets and more than 8,500 price quotes to determine living-cost comparisons between selected areas and the Washington, DC, area.

Task 1 under the contract was to work with OPM to design a model to estimate comparative living costs among the respective areas. On February 26, 1991, OPM published in the **Federal Register** the model and the results of the first living-cost surveys conducted under that model. However, as this report will show, Runzheimer and OPM continue to refine and improve technical aspects of the research and analysis process.

Some readers may note similarities between this year's and last year's reports. Although Runzheimer and OPM added and changed many priced items and, in some cases, the communities surveyed, the basic approach continues to conform with OPM regulations. Therefore, the basic methodology remains unchanged from the first study and report.

Rather than assume readers' familiarity with last year's report, Runzheimer chose to present a complete, free-standing report. Consequently, we not only describe changes made to the survey and the results obtained but also repeat the explanation of the living-cost model and survey from last year's report.

As noted above, Task 2 of the contract required collection and analysis of cost data specified in the economic model developed by Runzheimer, in consultation with OPM.

The analyses show the comparative cost differences between the listed allowance areas and the Washington, DC, area:

1. Anchorage, Alaska
2. Fairbanks, Alaska
3. Juneau, Alaska
4. Other Areas in Alaska (as represented by Nome, Alaska)
5. Guam
6. City and County of Honolulu, Hawaii
7. Hawaii County, Hawaii
8. Kauai County, Hawaii
9. Maui County, Hawaii
10. Puerto Rico
11. St. Croix, Virgin Islands
12. St. Thomas, Virgin Islands

By law, Washington, DC, is the base or "reference" area for the nonforeign area COLA program.

Under OPM regulations, federal employees who have unlimited access to commissaries and post exchanges due to their civilian employment by the government may be paid at a different allowance rate than other federal employees. This regulation does not apply to federal employees who have access for other reasons—e.g., being married to active or retired military personnel.

Task 2 of the OPM contract also required Runzheimer International to calculate comparative living costs in the areas listed below and the Washington, DC, area for federal employees who have access to military commissaries and post exchanges.

1. Anchorage, AK
2. Fairbanks AK
3. Guam
4. City and County of Honolulu, HI
5. Puerto Rico

1.2 Other Reports under Separate Cover

In February 1991, OPM published in the **Federal Register** Runzheimer's 1990 report, which fulfilled contractual requirements to that point. In response to comments received following publication, OPM contracted with Runzheimer to a) undertake additional special research and b) develop two questionnaires for a survey of federal employees.

The special research projects focused on the availability and cost of:

- Medical services in the allowance areas and in the Washington, DC area;
- College and university education in the allowance areas and in the DC area; and
- K through 12 public and private education in Puerto Rico and in the DC area.

The reports on these research projects can be found under separate cover.

Also contained in a separate report is an analysis of the statistical and procedural considerations involved in the survey of federal employees' living patterns and housing costs. Bound with the report are two camera-ready questionnaires, which OPM has chosen to administer as one, combined questionnaire. Both Runzheimer and OPM believe that demographic and expenditure data obtained from federal employees will assist in evaluating and improving the procedures used to set COLAs.

1.3 Historical Housing Data

In 1990, Runzheimer collected both current and 1984 housing data in each allowance area and in the Washington, DC area, as required by contract. In 1991 and 1992, at OPM's request, Runzheimer expanded the housing database by researching and adding data for 1985, 1986, 1987, 1988, and 1989, as well as current housing data and historical mortgage interest rates. These data can be found in Appendix 9.

Because neither OPM nor Runzheimer has suitable home-tenure information to enable meaningful and reliable combining and application of the data in the COLA model, OPM instructed Runzheimer not to use the historical housing data in computing the indexes. OPM plans to analyze the feasibility and appropriateness of using information provided by federal employees in the forthcoming survey to blend the historical housing data with current housing data.

1.4 Changes in This Year's Survey

As noted earlier, Runzheimer and OPM added and changed many items for pricing. To enhance this year's analysis, Runzheimer and OPM also included additional communities to survey. Some new items added to the survey include air travel, catalog sales, and more fresh meats, fruits and vegetables. New communities were included in Hawaii, Guam, and Puerto Rico. We discuss these changes where applicable in the report and in Appendix 3.

1.5 Project Time Schedule

The Office of Personnel Management awarded contract OPM–90–0705 to Runzheimer International on June 6, 1990. The original contract scheduled completion of all work and documentation for the second option year by no later than November 22, 1991.

Because of comments OPM received on the 1990 living-cost surveys from Members of Congress, federal agencies, employees, and employee representatives, OPM changed the timing of the Alaska living-cost surveys from the summer to the winter months. February was selected as the most appropriate month for the survey because the timing avoided price variations that might occur during the holiday seasons. The other allowance areas, referred to in this report as the "tropical allowance areas," were again surveyed during the summer months.

Because of the timing change for the Alaska survey, OPM requested that the contract deadline be moved, and Runzheimer agreed. The due date for the final report containing both tropical and Alaskan-area survey results was set for June 8, 1992. After its review of the draft report, OPM asked Runzheimer to make additional calculations related to public transportation. (See section 5.1.) This resulted in the change of the report due date to June 17, 1992.

1.6 Pricing Period

Runzheimer collected data for the tropical allowance areas (and the Washington, DC, area) in August, September, and October of 1991, pricing most items during September. In August, our research associates priced durable goods, such as cars, and, in October, items such as homeowners insurance, which depend on the pricing of other items (i.e., housing).

Runzheimer collected price data for the Alaskan allowance areas (and, again, the Washington, DC, area) in February 1992. As with the summer surveys, however, our research associates collected price data for items dependent upon the pricing of other items slightly later (i.e., in March 1992).

1.7 Living Cost Components

In accordance with federal regulations, expense components Runzheimer costed to develop analyses, comparisons, and the report were:

1. Housing and Housing Related Expenses
2. Transportation
3. Consumption Goods and Services
4. Miscellaneous Expenses

Runzheimer factored sales, excise and property taxes into the analysis where applicable. However, in keeping with last year's report, we did not factor federal, state and local income taxes into the analysis. Because income taxes significantly affect living-cost analyses, Runzheimer suggests that OPM consider researching the inclusion of income taxes in the future.

Educational opportunities vary significantly among locations in terms of availability, quality, and other factors. Runzheimer analysts and OPM officials agreed that, without additional information, attempts to measure cost differences in education in the selected areas would be highly subjective or would not add to the integrity of the model. Consequently, Runzheimer undertook the special educational study mentioned in section 1.2. OPM and Runzheimer are evaluating the results of that research and analysis. In addition, OPM plans to ask federal employees about education costs and choices in the forthcoming employee survey.

2. Overall Model

2.1 Measurement of Living-Cost Differences

The most common and most widely accepted way to measure the living-cost differences between and among locations is to select representative items that people purchase in these locations and to calculate the respective cost differences, combining them according to their importance to one another (as measured by relative percentage of expense). Runzheimer applied this fundamental methodology to compare the living costs in each of the allowance areas with the living costs in the Washington, DC area.

To move from this basic concept to computing comparative living costs between each allowance area and the Washington, DC area, Runzheimer followed five main processes or steps:

Step 1 Identify the segment of the population for which this analysis is being targeted (i.e., the target population).

Step 2 Determine how these people spend their money.

Step 3 Select items to represent the expense categories for which these people spend their money.

Step 4 Conduct pricing surveys of the selected items in each area.

Step 5 Analyze cost ratios for the selected items and aggregate them according to the relative importance of each item.

2.1.1 Target Population: Federal Employees

Runzheimer's living-cost model measures living-cost differences for non-military federal employees having annual base salaries between $10,000 and $80,000, the salary range of the 1990 General Schedule of the Federal Government. Because living-cost differences may vary depending on an employee's income level, Runzheimer designed its analytical model to identify living costs at three income levels.

To determine the income levels that most accurately represent the federal employee population for the 1991 analysis and report, Runzheimer used the salary distribution of all General Schedule employees as of March 31, 1990, which OPM supplied. After analyzing the array of salary data, Runzheimer picked the midpoints of the lower, middle and upper thirds of the distribution as its three income levels ($18,000, $28,400 and $45,200 respectively).

Runzheimer recognizes that it applied the same income levels for this report as it did for the first. We acknowledge that one might obtain slightly different results by using current salary distributions. However, use of a new or different distribution would affect the weights employed to combine expenditures and calculate the indexes. Both Runzheimer and OPM believe that it is necessary to mitigate this effect. Therefore, neither the employment weights, derived from the salary distributions, nor the Consumer Expenditure Survey (CES) weights, described in 2.1.2 below, were changed for this year's analyses.

Runzheimer believes that, over time, new weights should be incorporated into the computational process. The timing of such changes should be balanced against the need to stabilize results so that indexes do not fluctuate from changes in weights rather than changes in relative prices. In the future, for example, OPM may wish to use total family income, derived from the proposed federal employee survey, in place of federal salaries, which are currently used to determine income levels and employment weights. If OPM

introduces this change, the shift should occur gradually.

2.1.2 Determination of Expenditure Patterns

2.1.2.1 *Source of Expenditure Data.* Conforming with last year's process, Runzheimer used the "prepub" statistical reports from the 1988 CES dated February 13, 1990 (see Appendix 1) as the basis for weighting expenditure patterns. For the reasons discussed above (see section 2.1.1), Runzheimer and OPM decided not to alter these weights. However, Runzheimer recommends that OPM implement a system to enable gradual introduction of changes in CES weights.

2.1.2.2 *Income Level Adjustments.* Because the CES reflected 1988 expenditure levels, Runzheimer adjusted the three 1990 incomes to 1988 levels before beginning the expenditure analysis. To calculate estimated 1988 income levels, Runzheimer used the average percentage salary increases of federal employees for the two-year period in question as supplied by OPM officials (4.1% increase 1988–89 and 3.6% increase 1989–90, resulting in a 7.85% two-year increase). This adjustment reduced the 1990 income levels to estimated 1988 levels of $16,700, $26,300, and $41,900.

2.1.2.3 *Family Size Considerations.* A family size of 2.6 was inherent in the weighting scheme Runzheimer employed to price all allowance areas. Derived from CES research, the number represented an average for the nation.

2.1.2.4 *Analysis of the 1988 Consumer Expenditure Survey.* From the 1988 CES, Runzheimer used the statistical report entitled "Table 2. Income before Taxes," which listed average expenses for families earning similar incomes, organized into eight income ranges. Runzheimer analyzed these data to develop typical spending patterns for the three income profiles identified in 2.1.2.2. (The table below displays the results of the analysis.)

Seven income ranges closely matched these three income profiles:

$10,000 to $14,999
$15,000 to $19,999
$20,000 to $29,999
$30,000 to $39,999
$40,000 to $49,999
$50,000 and over
All respondents combined

The 1988 CES grouped expenses into small, logical families of items. For example, the report divided money spent by families on beef into four groups: Ground beef, roast, steak and other beef. The steak and roast groupings were further separated into small clusters of items (e.g., sirloin and round steak, chuck and round roast).

Drawing on this survey of expenditure data, Runzheimer sorted the item groupings into the four main cost components specified in the OPM regulations: Consumption goods and services, transportation, housing, and miscellaneous expenses. Runzheimer observed that families in the lower income ranges spent more of their money, as a percentage of total expenses, on goods and services and housing than families in higher income ranges. Also, families spent approximately the same percentage of their total expenses on transportation, regardless of income. Consequently, the miscellaneous component—which includes such things as medical-care expenses, contributions, gifts to non-family members, pension funds, long-term savings and investments, and life insurance premiums,—increased as a percentage of total expenses as income increased.

To develop accurate and defensible weighting patterns for the three income levels, Runzheimer performed linear regression analysis on the selected 1988 CES data. Listed below are the results of Runzheimer's analysis for the income ranges listed on the preceding page:

COMPONENT EXPENSES EXPRESSED AS A PERCENTAGE OF TOTAL EXPENSES

Income level 1991	Income level 1988 (est.)	Goods & services	Housing	Transpor-tation	Misc.	Total
$18,000	$16,700	39.59	24.35	20.76	15.30	100.00
$28,400	26,300	39.15	23.48	20.33	17.04	100.00
$45,200	41,900	38.74	22.66	19.94	18.66	100.00

Runzheimer further sorted goods and services into ten categories and used linear regression techniques to provide accurate ratios of renters to homeowners at each income level. Statistics on these component groupings appear later in this report.

2.2 General Formulae and Applications

An "index" is a mathematical way of comparing one price (or set of data) to another. For example, if a price index for a can of green beans is 110, that means that a can of green beans costs 10% more in the pricing area (i.e., allowance area) than in the reference area (i.e., the Washington, DC, area).

Runzheimer computed indexes for hundreds of items. To combine these indexes, Runzheimer applied weights from the CES that reflected the relative amount consumers normally spend on the items. For example, the price of a can of green beans has a lower weight than the price of a pound of apples because, according to the CES, people generally spend more on apples than canned green beans.

Runzheimer employed an indexing methodology known as Laspeyres to derive total cost indexes for each of three income levels and for each costed location. As applied to living-cost research, the Laspeyres index reflects the expenditure patterns of the people in the reference area (i.e., the Washington, DC, area) to weight the prices. Because detailed CES data by income level are not published for the Washington, DC area, Runzheimer used nationwide CES data to compute weights. Consequently, Runzheimer did not technically apply the Laspeyres index methodology in its pure form. Nevertheless, Runzheimer firmly believes that this nuance does not invalidate the price comparisons presented in this report.

As described in the example above and in greater detail in sections 3.1 and 6.2, Runzheimer applied the Laspeyres methodology to compute price indexes for the Goods and Services and the Miscellaneous Expenses components. For the Transportation and the Housing components, Runzheimer used a combination of a cost-build-up approach and the Laspeyres methodology to compute component indexes. We describe this dual process for Housing and Transportation in further detail in sections 4.5 and 5.4 respectively.

In conformance with § 591.205(c) of title 5 of the Code of Federal Regulations, Runzheimer followed a five-step process to derive the overall total indexes for each allowance area. First, Runzheimer used the CES data and the income levels described in

section 2.1.2.4 above to derive for each income level the amount of money consumers typically spend on each component. These amounts appear in the table below and in Appendix 13.

TYPICAL CONSUMER EXPENDITURES BY INCOME LEVEL AND COMPONENT

Income level	Goods & services	Housing	Transportation	Misc.	Total
Lower	$7,126	$4,383	$3,737	$2,754	$18,000
Middle	11,119	6,668	5,774	4,839	28,400
Upper	17,510	10,242	9,013	8,434	45,200

Note: Values may not total because of rounding.

Second, for each allowance area, Runzheimer multiplied the values above by the component indexes for the allowance area. Because the Housing component consisted of two indexes (one for owners and another for renters), we produced two sets of total relative costs—one for owners and another for renters.

Third, for each allowance area and income level, Runzheimer combined the total relative costs for homeowners and renters using the proportion of homeowners and renters as identified in the CES to weight the costs. (See section 4.2.1.) This produced an overall, average, relative living cost at each income level in each allowance area.

Fourth, for each allowance area, the overall, average relative costs by income level were combined using Federal employment weights based on the employment at each income level in the allowance area. Applying the same allowance-area employment weights, Runzheimer computed an overall, average cost for the reference area.

The last step was to divide the overall, average relative cost for the allowance area by the overall, average cost for the reference area to produce the final index. (See Appendix 13 for the calculations for each index.)

2.3 Data Collection Process

As noted earlier, Runzheimer obtained price information on over 8,500 items from over 3,000 outlets. To accomplish this important research effort, we selected the most efficient and effective information-gathering approaches possible. This section describes the various approaches.

2.3.1 In-house Research Staff

Runzheimer research personnel at its corporate headquarters in Rochester, Wisconsin, played a major role in all data collection activities. These professionals:

- Contacted manufacturers, trade associations, governmental agencies, and retail establishments to identify suitable items to price;
- Contacted professionals in the real estate business in each of the costed locations to obtain general information as well as specific rental rates and home market values;
- Conducted pricing surveys on site and by telephone for many items;
- Served as a vital liaison for field researchers;
- Performed hundreds of quality control checks once the data had been collected (these checks often involved verification of the survey data through telephone calls as well as comparing current data-gathering results with those from the 1990 survey); and
- Analyzed and computed the category, component and total comparative cost indexes.

2.3.2 Field Researchers—"Research Associates"

Collection of most price data was best accomplished through personal visits to retail outlets (e.g., grocery, clothing, furniture). For these activities, Runzheimer hired residents of each allowance area as independent contractors ("research associates"). For years, when measuring living costs for its clients, Runzheimer has applied this approach to data collection in over 80 countries worldwide.

For this project, Runzheimer supplemented its existing research-associate network to cover each of the allowance areas and the Washington, DC area adequately. To avoid any real or perceived conflicts of interest, Runzheimer did not hire persons as research associates who were either employees of the federal government, or who had immediate family who were employees of the federal government.

2.3.3 On-site Visits by Runzheimer Research Personnel

Full-time Runzheimer research professionals travelled to selected allowance areas to supervise data-collection activities and perform various quality-control checks on the data as necessary. Each such visit took place during the pricing period.

The researchers visited living communities within the allowance areas to look at housing accommodations personally and to talk with local real estate professionals. They also visited numerous retail outlets to verify item quality, selection and price levels in general.

In addition, these researchers met with Runzheimer's research associate(s) to answer any data-collection questions and to provide any additional training and instruction as necessary.

2.4 Editing and Quality Control Procedures

Runzheimer's extensive experience in measuring living-cost differences enabled us to establish editing and quality-control procedures at all stages of collecting and analyzing data. All data provided by research associates were manually reviewed by analysts prior to being entered into Runzheimer's computer system. Data elements were subsequently checked through software programs.

Federal regulations in § 591.205(b)(1)(i), title 5, Code of Federal Regulations, state that, "Whenever possible, exact brands and models are priced in each location." Every effort was made to satisfy this objective. (See section 3.3 for a discussion of brand and model selection.) Nevertheless, in a number of the allowance areas, the exact brands and models were either not readily available or not available at all. In these instances, editing decisions and substitution were needed.

Runzheimer defines "editing" as the removal and/or replacement of a price quote based on consistent and logical criteria. In all areas, Runzheimer was concerned that items of lesser (or greater) quality then the item specified might inadvertently be included in the analysis and bias the results. Therefore, any price quote that varied significantly from other price quotes for the item was flagged, verified, and, if necessary, eliminated from the analysis.

For example, Runzheimer's review of the prices for women's clothes collected

in the Virgin Islands revealed artificially low prices for dresses. Upon investigation, we found that less expensive sundresses had been priced because they were popular and abundant. We "threw out" the lower prices derived from these dresses and substituted prices for "dresses that could be worn in the office" to allow a more reasonable item comparison between the allowance-area prices and those in the Washington, DC area.

Removing an item from a location analysis causes redistribution of its weight to other items in its subcategory (or category when no subcategory exists). Consequently, whenever possible, Runzheimer avoided removing an unpriced item from a location analysis. When the review process unearthed a missing price for an item, Runzheimer resurveyed to obtain a price wherever possible.

2.5 Pricing Surveys in Puerto Rico

Through federal employment distribution data provided by OPM, Runzheimer determined that 70% of the non-military federal personnel employed in Puerto Rico work at facilities within 10 miles of the city of San Juan. The remaining 30% was distributed throughout Puerto Rico without a particular concentration. However, most of these remaining employees generally appeared to live closer to Mayaguez than any other large Puerto Rican city. Therefore, with OPM'S approval, Runzheimer surveyed Mayaguez in addition to San Juan. To combine the prices from both cities, Runzheimer used a 70% San Juan, 30% Mayaguez weighting.

2.6 Pricing Surveys in Hawaii County

OPM provided similar employment data for Hawaii County. Federal employment distribution data revealed that 80% of the non-military federal personnel work in the Hilo area, and the remaining 20% in the Kailua Kona area. Thus, to combine prices from both cities, Runzheimer used an 80% Hilo, 20% Kailua Kona weighting.

2.7 Surveying the Washington, DC, Area

OPM defined the Washington, DC, area in the federal regulations as the Washington DC–MD–VA Metropolitan Statistical Area. Because federal employees who work in this area reside in Virginia, in Maryland, and in the District of Columbia, Runzheimer selected retail outlets and living communities from all three. Runzheimer's model gave equal weight to the average prices in each geographic area.

Because of the size and diversity of the Washington, DC, area, Runzheimer conducted substantially more pricing surveys there than in other areas. For the goods and services component, Runzheimer generally surveyed to obtain six times as many price quotes in the Washington, DC, area as in the typical allowance area. For the housing, transportation and miscellaneous expense components, data collection was generally triple that of the typical allowance area.

3. Consumption Goods and Services

3.1 Component Overview

Based on the CES data, the goods and services component consisted of ten categories of family expense:

Food at Home
Food Away from Home
Tobacco
Alcohol
Furnishings & Household Operations
Clothing
Domestic Services
Professional Services
Personal Care
Recreation

To aid in quality control and analysis of future pricings, Runzheimer further subdivided four of the largest categories—food at home, furnishings and household operations, clothing, and recreation—into subcategories. Specific examples of products and services from these four subdivided categories can be found below. These examples only represent a minor portion of the total number of items (products and services) Runzheimer priced within each subdivided category.

EXAMPLES OF SUBCATEGORIES AND ITEMS SURVEYED IN THE FOUR MAJOR GOODS AND SERVICES CATEGORIES

Goods and services category	Subcategories and items surveyed (examples)
Food at Home.	Meats—Pork Chops, Whole Chicken, Ground Beef.
	Dairy—Milk, Cheddar Cheese.
	Cereals & Breads—Cookies, Spaghetti, Cake.
	Fruits & Vegetables—Apples, Frozen Peas, Fresh Oranges.
	Groceries—Coffee, Ketchup, Margarine.
Furnishings and Household Operations.	Services—Moving, Appliance Repair.
	Supplies—Toilet Tissue, Laundry Soap.
	Household Textiles—Bath Towel.
	Furniture—Living Room Chair.
	Major Appliances—Kitchen Range, Refrigerator.
	Housewares & Small Appliance—Two-slice Toaster.
	Misc. Household Eqpt.—Hammer, Electric Drill, Snow Blower[1], Lawn Trimmer[2].
Clothing	Men's and Boy's—Boy's Jeans, Man's Jeans, Man's Parka[1].
	Women's and Girl's—Woman's Slacks, Girl's Blouse, Girl's Jeans.
	Infant's—Disposable Diapers.
	Footwear—Man's Shoes.
	Apparel Products and Services—Coin Laundry.
Recreation	Fees and Admissions—Bowling, Golf[2], Downhill Skiing[1].
	TV, Radio and Eqpt.—Video Rental.
	Pets—Pet Food.
	Entertainment—All Terrain Vehicle[1], Board Game.
	Reading—Magazine.

[1] Priced in Alaska and Washington, D.C., areas only.
[2] Priced in tropical areas and Washington, D.C., area only.

From its ten categories of expense (which include the four subdivided categories above), Runzheimer selected a marketbasket of items on which to base its goods and services analysis. A "marketbasket" is a selected group of products and services that represent hundreds or even thousands of other items. Pricing every item available to consumers in a given locale would be impossible and inefficient.

Runzheimer selected typically purchased items and weighted these according to their relative importance in terms of consumer expenditure patterns. Each marketbasket item represented a specific group of related expense items. Using CES data, we determined the relative importance (weight) of each item. We compared the average price of each marketbasket item in each allowance area with the average price in the Washington, DC, area. The price differences (expressed as indexes) were aggregated based on the item, subcategory and category weightings, resulting in a total goods and services component index at each income level. Marketbaskets were slightly different among allowance areas to reflect regional purchasing patterns more closely.

However, goods and services price comparisons between an allowance area and the Washington, DC, area always used the same marketbasket. Therefore, while it may not be appropriate to compare living costs among allowance areas, all comparisons between an allowance area and the DC area are valid.

OPM directed Runzheimer to include catalog pricing and reflect applicable shipping costs for selected items. As Runzheimer identified items either unavailable or difficult to find in each area, we compiled a list of five catalog items to survey. Runzheimer researchers

then priced the selected items for the area survey. (See Appendix 3 for a description of these items.)

In each allowance area (except Puerto Rico and Hawaii County), Runzheimer requested three price quotes for each item (and sometimes more than three) from the local economy—one from each of three different outlets. In Puerto Rico, Runzheimer doubled the sample size by obtaining three price quotes for each item in both the San Juan and Mayaguez areas. Likewise in Hawaii County, Runzheimer doubled the sample size by obtaining three price quotes for each item in both Hilo and Kailua Kona. (See Appendix 2 for a complete description of marketbasket items.)

3.2 Marketbasket Research

3.2.1 Expenditure Research—Category Weightings

Runzheimer tabulated the expense data from the 1988 Consumer Expenditure Survey according to the ten categories of goods and services. As in the component analysis, Runzheimer used the expense data from the seven most appropriate income ranges as input into a linear regression analysis. From that analysis, Runzheimer calculated the category weightings for each income level as listed below:

CATEGORY WEIGHTINGS EXPRESSED AS A PERCENTAGE

Category	Lower	Middle	Upper
Food at Home	25.52	22.38	19.35
Food Away from Home	15.95	16.09	16.23
Tobacco	3.13	2.54	1.96
Alcohol	2.92	2.79	2.67
Furnishings & Hsld. Op	14.35	15.95	17.49
Clothing	14.24	14.93	15.59
Domestic Service	1.78	1.79	1.81
Professional Services	5.77	5.84	5.91
Personal Care	3.57	3.47	3.38
Recreation	12.77	14.22	15.61
Totals	100.00	100.00	100.00

3.2.2 Expenditure Research—Subcategory and Item Weightings

Runzheimer also drew upon the expense data from the 1988 CES to determine proper subcategory and item weightings and to identify marketbasket items. Logical groupings of family expenditures provided the basis for subcategory and item weights. Unlike category weightings, which vary by income level, subcategory and item weighting are computed from national aggregate expenditures only (i.e., all three income levels used the same set of subcategory and item weightings) as this approach is most common in similar public and private sector cost-of-living analyses.

Runzheimer's expenditure research process included procedures to ensure that no marketbasket item had an overwhelmingly large or insignificantly small item weighting.

3.3 Marketbasket Item Specifications

From each logical expense grouping, Runzheimer selected one or more marketbasket items to represent all items in the grouping. When selecting specific items for the marketbasket, Runzheimer worked to satisfy these three criteria:

- Items should be readily available in all locations if possible or should be items of local significance (e.g., snow blower).
- Item price levels should logically represent the price levels of unselected items in the "logical grouping."
- Items should have the same or nearly the same application in all locations.

Appendix 2 lists Runzheimer's marketbasket items. Once an item was selected, Runzheimer's research analysts identified the specific brand and/or model/size of each item available in all (or most) locations. This involved contacting manufacturers, trade associations, retail establishments, etc. For some items, isolating specifications was quite straightforward because of their nature (e.g., bread, sirloin steak, nonprescription pain reliever). Changes from the 1990 to the current items selected for pricing in the Goods and Services or Miscellaneous categories have been identified in Appendix 3, along with explanation for the changes.

3.3.1 Exchange and Commissary Expenditure Research

Runzheimer used the same marketbasket items to price commissaries and exchanges as used for the local pricings. We obtained one price quote for marketbasket items found in these facilities. Runzheimer did not, however, gather data on other military facility services (e.g., barber shop, movie theater, golf course, doctor, dentist).

Runzheimer did not assume that people with access to military facilities made all purchases in these facilities. Instead, we used OPM's 1980 Living Pattern Surveys of federal employees to determine the percentage of purchases that families typically make in military facilities versus local outlets. For example, as the following table shows, in Fairbanks, 61.3% of Food at Home is purchased at a PX or commisssary. These percentages were used to aggregate the local and commissary/exchange prices into one set of appropriate, blended prices. (The blended prices were compared to the local prices in the Washington, DC, area just as each allowance area's local prices were.)

PERCENTAGES OF PURCHASES MADE AT PX/COMMISSARIES

Category	Allowance area				
	Fairbanks	Anchorage	Guam	Honolulu	San Juan
Food at Home	61.3	66.2	70.0	52.7	29.1
Food Away	81.0	71.0	64.0	84.0	65.0
Tobacco	53.0	47.0	76.0	73.0	64.0
Alcohol	46.2	44.3	64.5	44.2	32.7
Furniture and Household Op	17.3	18.3	43.7	34.0	10.7
Clothing					
Domestic Service					
Professional Services					
Personal Care	59.5	36.0	49.3	33.3	7.3
Recreation	49.7	33.7	49.7	32.7	15.7

3.4 Goods and Services Data Collection Procedures

3.4.1 Data Collection Materials

Runzheimer collected data with OMB-approved data collection materials (see Appendix 5). All Runzheimer-developed worksheets conformed to the OMB approved materials.

3.4.2 Outlet Selection

Proper outlet selection is crucial to measuring living-cost differences accurately because misjudgment can seriously affect survey results. Runzheimer paid particular attention to choosing appropriate outlets, focusing on three key guidelines to ensure proper outlet selection.

First, for areas that had numerous outlets from which to choose, Runzheimer identified targets in several different geographic areas. For example, in the Washington, DC, area, Runzheimer selected outlets in and around six different geographic areas: that is, two areas in Virginia, two in Maryland and two in the District of Columbia.

Runzheimer's second guideline was that for any one marketbasket item, all outlets be similar in type. For example, Runzheimer surveyed two of the three food items in full-service grocery stores and the third food item in a warehouse-type grocery store in all locations. Gathering prices from all convenience stores in one location and all grocery stores in another would have distorted price comparisons.

The last guideline involved the diversity of outlets in Runzheimer's sample. We believed that pricing different items in different types of outlets more accurately portrayed living-cost differences. For example, for efficiency, Runzheimer could have priced all clothing items in department stores. However, to incorporate price levels at other types of outlets that sell clothing items, whenever possible, Runzheimer surveyed some items in men's and women's clothing stores, some items in department stores, other items in shoe stores and still other items in discount department stores.

Runzheimer's research analysts selected outlets by combining their own expertise with these resources:

- Personal experience of Runzheimer on-site research associates and travelling researchers;
- Informal telephone interviews with knowledgeable residents in each area;
- Yellow pages sections of area telephone books; and
- Area chambers of commerce and information bureaus.

With new businesses constantly appearing (and old ones disappearing), outlet selection will be an ongoing process. Also, one can expect a portion of outlets to refuse to participate every year. Therefore, updating Runzheimer's outlet sample is a necessary and important part of each pricing survey.

3.5 Inclusion of Sales and Excise Taxes

For all items subject to sales tax, the appropriate amount of tax was added prior to analysis. Runzheimer also included all applicable sales, property and excise taxes to items that were part of other living-cost components. For example, automobile purchase costs in Puerto Rico include an excise tax based upon vehicle type and dealer's acquisition cost. Runzheimer included this tax in computing the total purchase price of a vehicle in Puerto Rico. (See section 5, Transportation.)

Runzheimer gathered applicable information on taxes by contacting appropriate sources of information in the allowance areas, such as the Excise Tax Officer of the St. Thomas Bureau of Internal Revenue. Runzheimer also drew upon appropriate tax publications, such as the State of Maryland's *Sales and Use Tax Laws and Regulations*, the "General Excise Tax Law" (Chapter 237) of the *Hawaii Tax Reports*, and the *Uniform Sales Tax*, "Ordinance Section 69.05," of the City/Borough of Juneau.

3.6 Goods and Services Survey Results

In section 2.2 of this report, Runzheimer presented a detailed explanation of the economic model used to analyze the price data. As it applies to goods and services, the approach involved comparing the average prices of marketbasket items in each allowance area with those in the Washington, DC, area. The resulting price ratios were aggregated into subcategory and then category indexes using the expenditure weightings derived from the 1988 CES.

Appendix 4 contains tables showing the ten category indexes, the three weighting patterns, and the three total consumption goods and services indexes for each allowance area. The Washington, DC, area does not require a table because it is, by definition, "the reference location" where all category and component indexes equal an index of 100.

4. Housing

4.1 Component Overview

The housing component consists of expenses related to owning or renting a dwelling. These include mortgage or rent payments, utilities, real estate taxes, homeowner's or renter's insurance, home maintenance and telephone.

At each of the three income levels, Runzheimer measured annual housing costs under the two main housing categories: home ownership and rental.

4.2 Housing Model

4.2.1 Expenditure Research

Section 2.1.2.4 describes how Runzheimer analyzed the 1988 CES to identify the portion of expenses attributable to each of the four components. Runzheimer also used this survey to determine the national average ratio of families who own, as opposed to rent, their residences. Using the expense data from the seven most appropriate income ranges as input into a linear regression analysis, Runzheimer calculated own and rent weights as listed in the following table:

OWN/RENT WEIGHTINGS
(In percent)

Category	Income levels		
	Lower	Middle	Upper
Homeowner[1] ..	37.10	46.91	62.86
Renter	62.90	53.09	37.14
Totals	100.00	100.00	100.00

[1] With mortgage.

Runzheimer excluded expenditure data for homeowning families without a mortgage because they were not typical of homeowners in the base area or in the allowance areas with the largest concentrations of federal employees.

The 1988 CES was also used to identify which home-maintenance items to price and to establish the relative importance of those items.

4.2.2 Development of Housing Profiles

To compare housing costs accurately in all locations, Runzheimer constructed a model to measure housing costs under six different circumstances; that is, we identified six typical housing profiles and reasonably and logically matched these profiles to three income levels, as shown in the table below. Runzheimer used these standard profiles in all areas to measure equivalent housing units.

HOUSING PROFILES

Income level	Renter profile	Owner profile
Lower	1 bedroom .	800—900—1200 sq. ft.,[1] 4–2–1[2]
Middle	2 bedrooms	1000—1300—1600 sq. ft., 5–3–1.5
Upper	3 bedrooms	1400—1700—2300 sq. ft., 7–3–2

[1] Defined as minimum, reference, and maximum-size housing in square feet.

[3] Secondary criteria, not available in all areas, defined as "Total rooms—Bedrooms—Baths." Total rooms excludes bathrooms, hallways, entrance areas and closets but includes bedrooms, living room, family room, kitchen, formal dining room and den/study. The secondary criteria were used whenever possible to reduce the amount of overlap among the income profiles.

In the original model, Runzheimer developed a more stringent definition for each housing profile. These definitions were found to be too restrictive, particularly in the smaller areas, and if the definitions were applied rigorously, very few sales or rental data could be obtained. In the 1991 and 1992 surveys, Runzheimer modified the profile definitions to improve the amount of data that could be used while keeping to OPM's requirement that the costs for similar housing be compared between the allowance areas and the Washington, DC, area.

4.2.3 Living Community Selection

Except as noted below, Runzheimer surveyed the same living communities this year as it did last year. In selecting communities last year, Runzheimer used information received from real estate sources to designate communities as "appropriate" for lower, middle and/or upper income profiles, or not appropriate at all. Usual reasons why a community might be deemed "inappropriate" were if the typical housing accommodations were either too poor in quality or too luxurious or if not enough homes were being bought and sold or rented to establish accurate, average price levels. Although real estate contacts generally did not know average salary levels of typical residents, most were able to compare communities and judge whether one was more "upscale" than another based on residents' various occupations and other qualitative factors.

Runzheimer contacted real estate brokers, residential appraisers and other knowledgeable real estate professionals in each area to obtain information on the predominant age(s), size(s) and type(s) of housing in various communities and housing subdivisions. When available and appropriate, Runzheimer identified at least six communities (two at each income level) in each allowance area. However, this goal was not achievable in many of the smaller allowance areas. For the Washington, DC, area, Runzheimer selected at least nine communities (three at each income level) in which to gather renter and homeowner data.

This year, in light of the comments OPM received on Runzheimer's 1990 report of living-cost comparisons, OPM asked Runzheimer to study and report on the advisability of adding several additional communities to the living-cost surveys. After considerable research, Runzheimer and OPM made the following changes:

1. For the San Juan, Puerto Rico, homeowner pricing at the middle income level, the community of Toa Baja was dropped and the VA Hospital area was chosen as a replacement.
2. In Hawaii County, Paradise Park was dropped for homeowner pricing at the lower and middle income levels and replaced by Hilo. The Kailua Kona area was added for homeowner and renter pricing at all three income levels.
3. In Honolulu, for homeowner pricing at the high income level, the community of Kaneohe was dropped and Kailua was added.

At OPM's request, Runzheimer also investigated the appropriateness of using Eagle River, Alaska, as a substitute community for North or South Anchorage. Runzheimer determined through data analysis and on-site observation that Eagle River was not any more suitable for pricing than North or South Anchorage. Therefore, the Anchorage survey did not include Eagle River.

For homeowner pricing at the High income level in Guam, Runzheimer recommended replacing the community of Jonestown with the community of Dededo, which was a more affordable market. The 1991 sales data from Jonestown reported prices for 1,700 square-foot homes (the house size used for the upper income group) in excess of $400,000, nearly twice the average sales price reported in the 1990 survey. Runzheimer contacted local real estate professionals to investigate this dramatic price shift. As a whole, these professionals viewed the Jonestown market for single-family, detached homes as relatively exclusive and in excess of the upper income range used for the OPM study. Subsequent to these conversations, Runzheimer sent one of its most experienced central office research specialists to Guam to observe the housing situation first-hand. This researcher confirmed the opinions reported by the local real estate professionals and determined that Dededo was a more appropriate community to survey.

Runzheimer believes that the forthcoming employee survey data could provide valuable information for determining which communities to survey. Runzheimer recommends that OPM consider revisiting community selection after the results of the employee survey have been analyzed.

A table of living communities used for pricing can be found in Appendix 6.

4.2.4 Identification and Quantification of Housing-Related Expenses

From the 1988 CES, Runzheimer identified and categorized housing-related expense items into one of five groups:

- Utilities,
- Real estate taxes,
- Owners/renters insurance,
- Maintenance, and
- Telephone.

4.2.4.1 *Utilities.* For this study, Runzheimer classified electric, heat (oil or gas), water and sewer as utilities. Although most utility companies had ready access to current charges per unit of consumption and average consumption patterns for all households, very few (if any) separated consumption patterns by number of family members in a household or by size/type of accommodation.

Runzheimer focused on average annual consumption experience per household, gathering this information from utility companies serving each allowance area and the Washington, DC, area. Combining this consumption data with current utility rates, Runzheimer computed average annual utility costs for each of electric, gas or oil (whichever Runzheimer found to be more widely used, if used at all), water and sewer. Runzheimer then assigned this average consumption pattern to the homeowner profile at the middle income level.

Because some utility costs vary by size of house and yard, Runzheimer calculated a multiplier consistent with the standard home sizes to arrive at utility rates for the other five profiles. The table below shows the standard sizes and utility factors for each profile. The standard sizes roughly equate to the reference size of each profile. The formula to calculate each multiplier was:

Multiplier=1+(.5×(Standard square feet−1300)/1300)

The resulting utility multipliers are listed below:

Utility multipliers

Income level	Renter profile		Owner profile	
	Sq. ft.	Multiplier	Sq. ft.	Multiplier
Lower	600	.73	900	.85
Middle	900	.85	1,300	1.00
Upper	1,100	.92	1,700	1.15

4.2.4.2 *Real Estate Taxes.* Real estate tax formulas do not always translate directly into actual taxes paid by typical property owners. And, in some cases, formulas are applied in such a way as to make it nearly impossible to recreate accurate tax rates.

For this study, Runzheimer contacted the city assessor in each area to obtain real estate tax information for the homeowner living communities. Runzheimer encountered some very confusing real estate tax information. For example, last year Runzheimer found that taxes in San Juan were assessed based on the value of the home as of 1957. Homes built after 1957 were either "adjusted" back to the 1957 time frame or assessed in some other fashion.

As was done last year, Runzheimer checked the calculated real estate tax amounts by checking actual taxes paid by property owners. Whenever Runzheimer was not able to reconcile the formulas with actual taxes paid, we gathered sufficient data on actual taxes paid to develop an average ratio for taxes paid to current home values. This ratio was then applied to the average home value in that community to obtain an average real estate tax amount for the desired homeowner profile.

4.2.4.3 *Owners/Renters Insurance.* Runzheimer gathered insurance-rate information for the allowance areas for both renter and homeowner profiles. Just as last year, these rates represented coverage for structure and contents for homeowners but contents only for renters. In addition to gathering insurance rate data, Runzheimer (at OPM's request) expanded its contact with local insurance agents to investigate the prevalence of additional homeowner/renter coverages for floods and earthquakes. Runzheimer estimates from its research that insurance coverages for such disasters were purchased by less than 10% of the populace in the Alaskan or tropical allowance areas. Therefore, Runzheimer did not consider these additional riders.

Runzheimer notes that the proposed federal employee survey will obtain information on employee purchases of these additional riders. Therefore, OPM may wish to revisit this issue after completing its analysis of the survey results.

4.2.4.4 *Maintenance.* Many factors were involved in measuring the cost of maintaining a home, including area climate, architecture and building materials, and the cost of maintenance materials and labor. This year, in consultation with OPM, Runzheimer added the following items to enhance the pricing for household maintenance commodities: Fire extinguisher, bathroom caulking and kitchen faucet. Pest control service was priced in every allowance area except Nome, Alaska, where sources indicated it wasn't necessary.

Additionally, this year, OPM instructed Runzheimer to conduct special research in Alaskan allowance areas to determine the frequency with which residents must purchase services necessitated by winter weather conditions. Runzheimer contacted service providers in each Alaskan allowance area performing the following functions:

- Furnace service,
- Service for frozen pipes and sewers,
- Roof cleaning and replacement,
- Septic tank pumping and replacement,
- Repairs for frost heave damage,
- Painting and weatherstripping,
- Snow removal from roofs, driveways and access roads,
- Basement service for excessive moisture, and
- Sales of backup generators.

Runzheimer's research revealed that only two of the aforementioned services are utilized annually in Alaska: Snow removal, which, according to Runzheimer's sources, most residents perform themselves, and furnace service (check). The incidence of backup generators was reported to be less than 5% of the households in each Alaskan allowance area. Therefore, Runzheimer did not include any of these additional items in the Alaska living-cost surveys.

However, as noted in the discussion of insurance (above), the proposed federal employee survey asks questions about home maintenance. Runzheimer recommends that OPM review issues relating to home maintenance after the results of the employee survey have been analyzed.

Runzheimer developed maintenance costs based on the cost of maintenance materials and labor rates in each area. Runzheimer's approach to maintenance was the same as the approach to goods and services, as explained below.

Runzheimer used expenditure data from the 1988 CES to identify the national average home-maintenance expense, the maintenance items to survey, and the appropriate item weighting. For renters (since most if not all maintenance items were included in rent), maintenance costs for the three renter profiles were not included.

To compute home-maintenance cost differences between each allowance area and the Washington, DC, area for the homeowner profiles, Runzheimer obtained prices for selected building materials and labor rates for maintenance work to measure this small but noteworthy element of home ownership. Next, to establish reference-location maintenance expense, Runzheimer assigned the national average expense per household to the middle-income homeowner profile.

Logically, maintenance costs for larger homes would be greater than costs for middle-sized homes, while costs for smaller homes would be less. Therefore, in this study, Runzheimer applied the same homeowner multipliers used in the utilities model for the lower and upper income profiles (.85 and 1.15 respectively) to recognize differences in maintenance costs due to house size.

4.2.4.5 *Telephone.* Telephone expenses consisted of local service charges, possible additional charges for local calls, and charges for any long distance calls. To measure estimated expenses for local service and local calls, where available, Runzheimer surveyed the cost of touch-tone service with unlimited calling. (In Mayaguez, 120 local calls per month was used because unlimited calling was not available.)

To estimate long distance charges in all areas, Runzheimer surveyed the cost of three ten-minute direct dial calls per month to large U.S. mainland cities (i.e., Los Angeles, Chicago, and New York City). Last year, Runzheimer obtained charges for the evening rate. This year, at OPM's request, Runzheimer measured the price of a call placed in the survey area at the time of day necessary to be received in the respective city at 8 p.m.

local time. In many areas, this resulted in pricing a combination of daytime and evening-rate calls.

4.3 Housing Data Collection Procedures

4.3.1 Homeowner Data Collection

In the homeowner data-gathering phase, Runzheimer obtained sale prices of homes (called "comparable sales") that sold in 1991 that matched the housing profiles in that area. In the communities that were identified (see section 4.2.3), Runzheimer tried to obtain all of the recent comparable sales that matched the housing profiles. As was done last year, Runzheimer contacted knowledgeable and helpful real estate professionals in each location and/or used national real estate subscription and listing services.

The amount of data obtained depended on the number of home sales in the community and the availability of square footage and other information. This in turn is dependent on the size of the community, the economic conditions, the quality and quantity of the realty data available, and the willingness and ability of local realty professionals and assessor offices to provide data. In Anchorage, for example, Runzheimer was able to obtain 60 comparable sales at the middle income level because the area is relatively large, the real estate market was active, and data on home size and type were available. In St. Croix and Guam, on the other hand, Runzheimer found that the realty market was relatively small, sales were slow, and data were limited. Additional data-collection issues relating to the Virgin Islands are discussed in greater detail below.

Just as last year, Runzheimer research personnel traveled to profiled communities to observe first hand the comparability of homes in one area versus another and whether individual housing units were appropriate for the profiled income levels.

This year, when comparing current data with that gathered for the initial living-cost report, Runzheimer noticed an anomaly in home-market value pricing for Mayaguez, Puerto Rico, between 1990 and 1991. Although the housing market did not experience a downturn in value between pricings, Runzheimer's research yielded a price drop at all three income profiles. After closer examination, Runzheimer housing analysts discovered polarized home-price data from Mayaguez in 1990.

In 1990, two individual data sources had provided home-sale data to Runzheimer from segments of the Mayaguez market that differed markedly in price and quality.

These data were then averaged to produce Mayaguez housing values.

In 1991, a Runzheimer representative travelled to Mayaguez and conducted additional interviews with local real estate professionals and discovered (not surprisingly) that the high values came from more exclusive homes and thus were inappropriate to include with the Mayaguez sample. Accordingly, Runzheimer did not incorporate prices from the data source who had supplied the inappropriate data. The result was an apparent drop in value, due, however, to absence of the prices for the exclusive homes, not to actual market experience. In future pricings, Runzheimer will visit Mayaguez again to ensure that appropriate homes are priced.

Aside from Mayaguez, Runzheimer had concerns about the adequacy of housing data from the Virgin Islands of St. Thomas and St. Croix. Just as it had found in developing the 1990 report for OPM, Runzheimer again found that the Virgin Islands had two distinct housing markets—one relatively exclusive market for affluent retirees and tourists and another, more affordable market for working-class residents. Runzheimer gathered data from both markets in an attempt to get a true picture of housing costs in the Virgin Islands.

Another recurring obstacle to measuring home prices in the Virgin Islands was the difficulty of obtaining data on both housing markets from local realtors and appraisers. Runzheimer found that realtors generally did not monitor the smaller, less profitable working-class market. Therefore, Runzheimer relied on information from the local assessor's office. Though this proved difficult and time-consuming to gather, Runzheimer believes it was able to obtain better information this year than it had in the previous survey.

Runzheimer noted that many of the homes in St. Thomas and St. Croix have basement apartments. Although these rental units could generate income that would offset relatively high mortgage payments, Runzheimer did not attempt to impute an income stream for these units.

Hurricane Hugo was a factor that mainly affected the rental market in the Virgin Islands. Although the physical effects of Hurricane Hugo are not evident as they were in 1990, the rental market is still limited due to the destruction caused by the hurricane. Until the stock of rental units is built-up, the rental market will remain very tight; which affects availability, price, and quality.

4.3.2 Historical Homeowner Data Collection

OPM requested Runzheimer to obtain information on the appreciation/depreciation of homes in each allowance area for 1985 through 1989. (Historical housing data are provided in Appendix 9.) For the majority of the years analyzed, Runzheimer was able to obtain actual historical home sales data in all locations except Mayaguez, St. Thomas, St. Croix, Nome, and the Maryland and Virginia suburbs of Washington, DC. In the four allowance areas, Runzheimer contacted local real estate professionals who advanced their opinions and observations regarding home-value trends in their area.

The historical housing information did not influence the final results, which were based only on recent comparable sales. Neither Runzheimer nor OPM has sufficient information to weight the historical housing data to represent the typical tenure of homeowners. Rather than subjectively assign equal or varied weights to each year's data, OPM chose to wait until the results of the forthcoming employee survey are analyzed and, if appropriate, use that information to weight the historical housing data. Runzheimer agrees with this decision.

4.3.3 Renter Data Collection

In some cases, the same realtors and brokers who assisted in our profiling phase were very active in the rental markets as well. When this occurred, Runzheimer obtained current rental rates and fees for our profiled apartments, townhouses and houses from these sources.

Runzheimer also contacted rental management firms that operated apartment complexes matching the profile specifications. In large metropolitan areas, such as the Washington, DC, area where rental complexes abound, our housing analysts conducted telephone surveys to obtain current rental information.

4.4 Housing Analysis

4.4.1 Homeowner Data Analysis

One of the most important factors relating to the price of a home is the number of square feet of living space. For each income profile in each allowance area and the Washington, DC, area, Runzheimer computed that average price per square foot for the comparables. Except as noted below, Runzheimer used this value times the reference square footage for the profile

to determine the average home value for the profile.

As discussed in part in section 4.3.1 above, Runzheimer experienced difficulties in obtaining housing data in some areas. For example, despite several efforts to obtain more detailed information from various sources, Runzheimer was able to obtain very few comparable sales with square footage information for home sales in the Maryland suburbs of Washington, DC. Neither Runzheimer nor OPM believed it was desirable to remove the influence of Maryland housing data from the survey, but the date were insufficient to determine accurately housing prices at the profile reference sizes.

Therefore, with OPM's concurrence, Runzheimer adjusted the 1990 Maryland prices by the overall change in the housing prices for the District of Columbia and the Virginia suburbs of Washington, DC. Both Runzheimer and OPM believe that the real estate markets in the DC area are interrelated and that prices generally move in tandem.

Similar adjustments were required for some profiles in other areas. For instance, when data at one income profile were sparse and the results appeared incongruous with the market trends at the other profiles, Runzheimer adjusted the previous year's data by the rate of increase observed in the profiles with adequate comparable sales data. These adjustments were made only when the current comparable sales data were unreliable. Runzheimer then applied objective criteria developed by OPM.

Once an average price was determined for the reference size home at each profile in each area, Runzheimer calculated the annual mortgage payment (principle plus interest) for each profile home. To obtain current mortgage interest rates in each area, Runzheimer contacted real estate professional and lending institutions. Runzheimer used this information to compute the payment for a typical 30-year mortgage, 20% down, 80% financed.

4.4.2. Rental Data Analysis

For each area and at each income profile, Runzheimer calculated the arithmetic average of the monthly rental rates that matched the rental housing profiles. As with the homeowner data, however, the rental data at some profiles in selected areas were sparse and produced results inconsistent with the rental price trends at the other profile levels. When this occurred, Runzheimer generally used the rate of change in the profiles with adequate rental data to adjust the 1990 rental average for the profile. Just as was done with the homeowner data, these adjustments were made only when the current rental data were unreliable. In such cases, Runzheimer used objective criteria developed by OPM.

The monthly rental averages determined above were multiplied by 12 to compute the annual rental housing costs.

4.4.3 Analysis of Housing-Related Expenses.

Because section 4.2.4 covers the identification and quantification of housing-related expenses, these topics are not repeated here.

However, it should be noted that Runzheimer incorporated home sale prices from this study into the calculations of real estate taxes and homeowner's insurance, which depend upon the value of the home.

4.5 Housing Survey Results

In the above sections, Runzheimer describes how it measured the costs for utilities, real estate taxes, insurance, maintenance, telephone, rents, and homeowner mortgages. Appendix 7 shows the cost of each of these items, for renters and homeowners separately, in each allowance area and in the Washington, DC, area. For the Puerto Rico and Hawaii County allowance areas, the costs are shown separately for Mayaguez and San Juan and Hilo and Kailua Kona respectively.

Appendix 8 compares the total cost of these items in each allowance area with the total cost of the same items in the Washington, DC, area. Again, there are separate comparisons for renters and homeowners. Also, for the Puerto Rico and Hawaii County allowance areas, separate tables show the composite costs weighted by the respective federal employment distributions. (See sections 2.5 and 2.6 for discussion of employment weighting in these two allowance areas.)

The final housing-cost comparisons take the form of indexes that are used in Appendix 13 to derive the total, overall index for owners and renters. (Refer to section 2.2 for a discussion of the general formulae and how the component indexes are combined.)

4.6 Future Considerations

Runzheimer believes that the housing analyses are accurate and appropriate for the samplings and methodologies employed. OPM has reviewed these analyses and finds them in full conformance with regulations. This does not mean, however, that improvements cannot be made. In Maryland, for example, Runzheimer will change its strategy for housing-data collection in the next round of living-cost surveys in an attempt to obtain more information on square footage and room count. Runzheimer is currently discussing with OPM this and other issues related to housing-data collection.

Also, Runzheimer notes that the proposed federal employee survey should provide extensive and invaluable data on actual employee housing patterns and costs. The survey will provide information on where employees live, whether they rent or own their homes, when they purchased their homes, what their homes are like, and so on. This information will enable OPM to review, verify, and improve the living-cost model. Runzheimer encourages federal employees to participate fully in this important survey.

5. Transportation

5.1 Component Overview

The transportation component consisted of expenses related to private and public transportation. The private transportation category contained expenses related to owning and operating a car in each area. The public transportation category focused on the cost of air fares from each location to a common point within the contiguous 48 states.

Last year, Runzheimer surveyed the cost of municipal transportation (fares for vans, buses, or trains) to determine the cost of public transportation. This year, at OPM's request, Runzheimer provided OPM with detailed information on the availability and type of public transportation in the allowance areas. Upon review of these materials, OPM decided to discontinue the survey of municipal transportation because the systems in most allowance areas were not comparable to those in the Washington, DC, area. Runzheimer supports this decision. In place of municipal transportation, OPM asked Runzheimer to survey the cost of air transportation.

As was done last year, Runzheimer used national average expenditure data to combine the private and public transportation relative cost differences between each allowance area and the Washington, DC, area to arrive at a total transportation component index. (See section 5.4.)

5.2 Private Transportation Methodology

Runzheimer determined that an accurate and reasonable approach to measure transportation costs was to select and analyze three commonly

driven vehicles (a domestic auto, an import auto and a truck) in all areas.

New vehicles were the basis for developing the transportation-cost calculations. Although Runzheimer could have developed costs from the premise that "identical" used vehicles would be purchased from auto dealers in each location, Runzheimer believed that costing new vehicles reduced the potential for inconsistencies due to value judgements concerning used vehicles.

5.2.1 Vehicle Selection and Pricing

As mentioned above, Runzheimer selected and priced a domestic auto, an import auto, and a truck as the basic vehicle types to cost in all locations. We based our selection of these vehicle types on their popularity in the United States as demonstrated by owner registration data.

To select a specific make and model within each vehicle type, Runzheimer identified the top-selling models in each car class. For these models, Runzheimer's research associates collected new vehicle prices. At each auto dealership in the sample, Runzheimer recorded the suggested retail prices of the three vehicles plus any additional charges, such as shipping, excise tax, dealer prep, and additional dealer markup. Runzheimer used these suggested retail prices (and not negotiated prices) in the analysis.

The three vehicles selected for analysis were:

Domestic Vehicle—Ford Taurus GL 4 door sedan 2.5L 4 cyl

Truck—Chevrolet S10 Blazer 4X4 2 door 4.3L 6 cyl

Import Vehicle—Honda Civic DX 4 door sedan 1.5L 4 cyl

The Honda Civic was not available in Guam (because Hondas in Guam were shipped from Japan and the Civic was not manufactured in Japan in 1991). However, Runzheimer estimated annual costs for the Civic in Guam based on prices of other, available Honda models. Runzheimer priced 1991 models in the summer survey and 1992 models in the winter survey.

All vehicles were equipped with standard options, such as automatic transmission, AM/FM stereo radio and air conditioning. This year, at OPM's request, Runzheimer also priced snow tires, engine-block heaters, and heavy-duty batteries in all of the Alaskan locations. (At OPM's request, Runzheimer conducted a study relating to tires. See section 5.2.5.)

Car dealers in the Washington, DC, area did not recommend vehicle rustproofing. However, it was suggested or recommended in allowance areas. Therefore, we included rustproofing as an add-on "option" in allowance areas, but not in the Washington, DC, area.

5.2.2 Vehicle Trade Cycle

Calculating the cost to own and operate a vehicle requires that two important factors be determined: miles driven and time period of ownership. In the automobile industry, these two factors are known collectively as a vehicle's "trade cycle." The trade cycle is stated as a length of time either in months or years, and the total number of miles driven in that time period (e.g., four-year, 60,000-mile trade cycle). This information is required to compute annual costs related to fuel, oil, tires, maintenance and depreciation.

Conforming with the previous living-cost report, Runzheimer used a four-year 60,000-mile trade cycle in all areas based upon the following information:

- The Internal Revenue Service has used this trade cycle for many years to compute the allowable cents-per-mile reimbursement rate for persons who drive their personal vehicle for business purposes.
- The four-year time period coincides with the typical length of a vehicle loan.
- U.S. Department of Energy statistics for 1988 show that the U.S. average for number of vehicle miles driven was: 18,595 per household and 10,246 miles per vehicle.

Runzheimer has been unable to find conclusive statistics on average annual miles driven per vehicle in any allowance area. In 1991, Runzheimer contacted car dealers to obtain their observations on average odometer mileage on trade-in vehicles and informally asked other residents of each area for their opinions.

From the opinions gathered, we concluded that, in most cases, the average annual miles driven in allowance locations appeared to be less than or equal to 15,000. In the Washington DC, area, the opinions of those contacted indicated an average annual mileage of 15,000 or more. Therefore, without definitive statistics to prove otherwise, Runzheimer set a standard—used last year as this year—of 15,000 miles per year, which results in a four-year, 60,000-mile trade cycle.

Runzheimer notes that the number of miles driven annually is one of the questions OPM is asking on the proposed federal employee survey. Runzheimer recommends that OPM revisit the issue of annual mileage after analyzing the results of the employee survey.

5.2.3 Fuel Performance and Type

To establish average fuel-performance ratings, Runzheimer selected the "city driving" figures published by the Environmental Protection Agency (EPA). Runzheimer chose the "city" instead of "highway" figures because all locations contained considerable stop-and-go driving patterns. All vehicles included in this study used regular unleaded fuel. Runzheimer obtained self-service cash prices, and substituted full-service when self-service was not available.

This year, at OPM's request, Runzheimer expanded its research on fuel-performance factors in all of the allowance areas and in the Washington DC, area. Specifically, we included in our analysis the factors of temperature, road surface, and gradient to arrive at fuel-performance adjustment percentages in each allowance area.

5.2.3.1 *Impact of Temperature upon Fuel Performance.* Runzheimer consulted two published sources to perform this analysis: *Passenger Car Fuel Economy: EPA and Road* and *The Weather Almanac* (Ruffner & Blair). Miles-per-gallon performance varies by ambient temperature. The lower the temperature, the fewer miles-per-gallon and vice versa. In the EPA study, the temperature at which no adjustments to fuel performance occurs is 77°F. Below that temperature, miles-per-gallon achieved drops; above 77°, miles-per-gallon achieved improves. To measure the effect of temperature on miles-per-gallon for each allowance area, Runzheimer researched average monthly temperatures as reported in *The Weather Almanac.*

In each location and for each month, Runzheimer assigned the appropriate shortfall factor from the EPA study based on the average monthly temperature for each given location. For example, if the average monthly temperature was 35°, the shortfall in miles-per-gallon would be 0.876. After assigning factors to each month, Runzheimer averaged the twelve factors for each location. The results of these calculations are shown in section 5.2.3.4.

5.2.3.2 *Impact of Road Surface upon Fuel Performance.* For its analysis, Runzheimer assumed that federally controlled roadways are typically composed of concrete and/or high-load asphalt and that locally controlled roadways are typically composed of low-load asphalt. EPA's research indicates that cars are generally more fuel-efficient on the firmer, high-load surfaces than on the softer, low-load surfaces.

Although traffic patterns and road usage certainly vary among areas, Runzheimer could find no relevant studies of these issues. Therefore, Runzheimer assumed that federally controlled roadways generally support twice the traffic of locally controlled roadways on the premise that federally controlled roads typically have twice the lanes of locally controlled roads.

In each allowance area, Runzheimer researched the total mileage falling into either the federal or local categories. For example, Hawaii contains 1,456 miles of federally controlled roads and 2,606 miles of locally controlled roads. The number-of-lanes assumption allowed Runzheimer to increase federal road mileage by a factor of two.

Runzheimer applied the average low-load asphalt factor of 0.94 (which reflects dry, wet, and snowy conditions) to the local mileage percentage and the average concrete and/or high-load asphalt factor of 0.97 to the federal mileage percentage to create a weighted average factor for each area. These weighted factors ranged from 0.96 to 0.98, depending on the area. The Washington, DC, area was assigned a factor of 1.00 on the premise that the vast majority of traffic in that area travels on dry, high-load surfaces. (See section 5.2.3.4. for application of this factor in estimating overall miles-per-gallon.)

5.2.3.3 *Impact of Gradient upon Fuel Performance.* Runzheimer consulted EPA's *Passenger Car Fuel Economy: EPA and Road* to determine the effect of local topography (i.e., gradient) upon fuel efficiency. EPA provides mileage factors based upon various gradients ranging from less than 0.5% (essentially flat) to greater than 6% (steep).

Runzheimer reviewed the topographic features of each area and found a wide range of road conditions. However, Runzheimer was unable to find information on the types of terrain drivers typically encounter in each area or the number of miles drivers travel in each type of terrain.

Lacking such information, Runzheimer assumed that drivers in the allowance areas generally travel roads having approximately the same gradients that are found on average in the United States. Applying the information from EPA's research, Runzheimer computed a fuel-performance factor of 0.981 for this type of driving. This factor was assigned to each allowance area. Runzheimer assigned a factor of 1.00 to the Washington, DC, area on the premise that the vast majority of traffic in that area travels on major freeways and highways having less than a 3.0% grade. (See section 5.2.3.4 for application of this factor in estimating overall fuel efficiency.)

5.2.3.4 *Overall Impact upon Fuel Performance.* Runzheimer applied the results of the analyses described above to "localize" or make geographically sensitive adjustments to the EPA average ratings and establish reasonable fuel-performance ratings for each allowance area.

In the table below, the factor 1.00 means that no adjustment to EPA fuel performance is appropriate. A factor of less than 1.00 means that the estimated gasoline mileage in the area is less than the EPA average. For example, the total adjustment factor for Fairbanks/Nome is 0.80. This means that the estimated gasoline mileage in Fairbanks and Nome is 80% of the EPA estimated average. Note that the adjustment factor for Washington, DC, area (0.94) indicates that average gasoline mileage in that area is below the EPA estimate.

SUMMARY OF FUEL-PERFORMANCE ADJUSTMENTS

Location	Temperature	Road surface	Gradient	Total
Guam	0.99	0.98	0.98	0.95
Hawaii	0.99	0.98	0.98	0.95
Puerto Rico	1.01	0.98	0.98	0.97
Virgin Islands	1.01	0.98	0.98	0.97
Washington, D.C.	0.94	1.00	1.00	0.94
Anchorage	0.88	0.96	0.98	0.83
Fairbanks/Nome	0.85	0.96	0.98	0.80
Juneau	0.89	0.96	0.98	0.84

Note: These adjustments compound. That is, the Total adjustment is the result of multiplying the three individual factors together for each location/area.

5.2.4 Vehicle Maintenance

With OPM's concurrence, Runzheimer selected the 6 most common maintenance service/repair jobs performed on vehicles as the basis for vehicle maintenance analysis:

- Tune-up,
- Oil change,
- Automatic transmission fluid change,
- Flush/fill coolant,
- Muffler installation, and
- CV joint boot.

The recommended frequency of performing each of these jobs was combined with the prices charged by local dealers and service stations to compute an estimated annual maintenance expense.

This year, OPM directed Runzheimer to research the appropriateness of additional maintenance requirements for vehicle ownership in the Alaskan allowance areas. Specifically, Runzheimer researched three additional maintenance items:

- Windshield damage,
- Winterization, and
- CV joint boots

Runzheimer contacted auto service managers, local service managers, service advisors, and mechanics to obtain this information.

Runzheimer found a wide range of opinions regarding windshield repair and replacement. Although damage apparently occurs more frequently to windshields in Alaska than in the Washington, DC, area (in part due to the prevalence of graveled roads in Alaska), Runzheimer was able to obtain only subjective information on how frequently windshields were repaired or replaced and what portion of the expenses was paid by insurance companies. OPM viewed Runzheimer's research results as inconclusive and as such, instructed Runzheimer not to price this item.

Runzheimer's research on winterization requirements revealed that while some procedures differ from those found in warmer climates, i.e., greater ratio of antifreeze to water mix, no additional measures are taken in any Alaskan allowance areas to winterize a vehicle. Thus, at Runzheimer's recommendation, OPM elected not to price this item as well.

On the other hand, Runzheimer's research of CV joint boot replacement revealed varying replacement cycles between Alaskan allowance areas: Anchorage—every 45,000 miles (3

years), Fairbanks—every 15,000 miles (1 year), Juneau—every 45,000 miles (3 years) and Nome—every 30,000 miles (2 years). The cost of replacement for all three vehicle types was factored into the indexes based upon the life cycle of the replacement. For example, 100% of the cost was included for Fairbanks because research indicated annual replacement was the norm. Only 50% of the cost was included for Nome where research indicated biennial replacement.

5.2.5 Tires

In 1991, Runzheimer investigated why tires might wear out sooner in one area over another. Runzheimer contacted tire manufacturers, transportation agencies (road conditions and composition varied in different areas), and retail tire dealers. The research revealed that various factors (e.g., road quality/state of repair, road composition) caused tread life (the average number of miles a tire is expected to last) to be less in allowance areas than in the Washington, DC, area. Based on these findings (some of which were quantitative), Runzheimer based tire expenses on a 40,000-mile tread-life in allowance areas, and a 55,000-mile tread-life in the Washington, DC, area.

This year, OPM directed Runzheimer to research the prevalence of snow and studded tires and, if appropriate, to determine the cost to purchase and install studs on a vehicle in each Alaskan allowance area. Runzheimer contacted tire companies and local service centers to gather this information. Runzheimer's research indicated that four extra snow tires, with studs, would be required for all three vehicles in Anchorage, Fairbanks, and Juneau. For Nome, Runzheimer's research revealed that mud and snow tires would be appropriate for the S10 Blazer but not the other two vehicles because all-season radials were reported to be the norm: (Most of the driving in Nome occurs within a very confined area). Therefore, Runzheimer surveyed the cost of extra wheels, extra tires, and installing studs for all vehicles in Anchorage, Fairbanks, and Juneau and for the S10 Blazer only in Nome.

5.2.6 License and Registration Fees, and Miscellaneous Tax

Runzheimer obtained information regarding appropriate license and registration fees, and miscellaneous taxes (i.e., personal property tax and motor vehicle registration tax) from each area. One-time fees and miscellaneous taxes were divided equally over each vehicle's four-year trade cycle. Sales and excise taxes were included in the purchase price of each vehicle (see section 5.2.7.). Ongoing fees and taxes were included as part of the annual costs.

5.2.7 Depreciation

From Runzheimer's experience, the single largest annual expense related to owning and operating newer vehicles is vehicle depreciation, the lost value of the vehicle as it ages and is driven. To calculate the trade cycle of a vehicle, and the residual value of the used vehicle when it is traded or sold, Runzheimer divides the difference between the purchase price and the residual value by the number of years the vehicle is owned to compute the average annual depreciation.

In the depreciation equation, Runzheimer used suggested retail prices, plus any additional charges, such as shipping, excise tax, dealer prep, and additional dealer markup. (Runzheimer did not believe that negotiated prices could be collected on an equitable basis.) As discussed earlier, the trade cycle was determined to be four years, 60,000 miles. Runzheimer research indicated that residual values were the same in all areas except Fairbanks and Nome. This research effort is explained below.

Runzheimer was aware that several firms and associations tracked and published weekly or monthly used-car and used-truck wholesale auction prices. Some firms even published projections of the future value of today's new vehicles. Most publications provided several residual values for each vehicle, depending on its condition at the time of trade-in (e.g., clean, average, rough). Several common publications of this type were *Black Book, Kelley Blue Book, Automotive Market Report,* and *NADA* (National Automobile Dealers Association). Unfortunately, these sources only tracked auction prices for vehicles sold in the contiguous 48 states and then published broad-based average residual values for each vehicle.

To get specific information from sources knowledgeable about the used vehicle markets in allowance areas, Runzheimer contacted auto dealers and financial institutions in these areas. Most of the sources with whom Runzheimer spoke said that they used the above-mentioned publications as guides, just as dealers and financial institutions across the United States used them.

Except for Fairbanks and Nome, Runzheimer found no conclusive evidence that used vehicles in allowance areas were (on average) worth more or less than used vehicles in the Washington, D.C., area. Therefore, we reported the same used vehicle prices in all areas (except Fairbanks and Nome). An appropriate and logical source for these values was the *Black Book Official Finance/Lease Guide* for 1990 vehicles. For Fairbanks and Nome, Runzheimer used 90% of the *Black Book* projected residual values to reflect rougher conditions.

It should be noted for clarification that identical residual values did not translate into identical depreciation amounts in all locations. Depreciation amounts were higher in allowance areas than in the Washington, DC, area because new vehicle prices in all allowance areas were higher. For example, new vehicle prices in Anchorage were closest to Washington, DC, prices, averaging 6% more, while prices in Puerto Rico were the highest, averaging 39% more than Washington, DC, prices.

5.2.8 Finance Expense

Runzheimer included the average annual cost of financing a vehicle in the total cost of private transportation. Runzheimer surveyed financial institutions in each area for their auto-loan interest rates using a 48-month loan length with 80% financing as the basis in all locations.

5.2.9 Vehicle Insurance

Runzheimer measured the cost of auto insurance in each location. To determine the type of coverage to price, Runzheimer contacted insurance agents in each area to obtain information on the typical policy. Listed below is the most common coverage—surveyed in Alaska, Hawaii, and the Washington, DC, area.

Bodily Injury—$50,000/$100,000
Property Damage—$25,000
Medical—$5,000
Uninsured Motorist—$50,000/$100,000
Comprehensive—$100 Deductible
Collision—$250 Deductible

Runzheimer found that insurance coverage differed somewhat in Guam, Puerto Rico, and the Virgin Islands. Therefore, the coverage surveyed in these areas varied slightly from that listed above.

In 1990, Runzheimer identified the most "popular" automobile insurance companies by analyzing market-share reports compiled by an industry rating bureau. The policy described above was then priced again this year for each location. Two or three price quotes were obtained for each area and averaged together to produce the final number for this component in each allowance area.

5.3 Public Transportation Methodology

Responding to comments received last year on the publication in the **Federal Register** of Runzheimer's 1990 report, OPM asked Runzheimer to survey the cost of air fares as they relate to recreational travel. Runzheimer used the Apollo reservation system to price the lowest available round-trip air fare from each allowance area and the Washington, DC, area to Los Angeles, California. Los Angeles was selected because it is a common point approximately equidistant from most of the allowance areas and the Washington, DC, area. The cost of the trip from each allowance area to Los Angeles was compared with the cost of the trip from the Washington, DC, area to Los Angeles to compute the public transportation category indexes. (See Appendix 11.)

5.4 Transportation Survey Results

As described in section 5.2 above, Runzheimer measured the costs for gasoline, maintenance, tires, taxes, licensing, depreciation, finance, and insurance for three types of automobiles in each allowance area and in the Washington, DC, area to determine typical private transportation costs. Appendix 10 shows the cost of each of these items in each area. As with the housing costs, private transportation costs for the Puerto Rico and Hawaii County allowance areas are shown separately for Mayaguez and San Juan, Puerto Rico, and Hilo, and Kailua Kona, Hawaii, respectively. These data are combined to produce composite costs for each allowance area using the respective federal employment distributions. (See sections 2.5 and 2.6 for a discussion of employment weighting in these two areas.)

As described in section 5.3 above, Runzheimer also measured the cost of recreational air travel from each allowance area and from the Washington, DC, area to a common point within the contiguous 48 states. Appendix 11 shows the cost of these air fares and their relationship to the cost for the Washington, DC, area. Again, there are separate calculations for the sub-areas in the Puerto Rico and Hawaii County allowance areas.

Appendix 10 compares the total cost of the private transportation items for each vehicle in each allowance area with the total cost of the same items in the Washington, DC, area. Appendix 10 also shows how the private and public transportation indexes were combined using expenditure weights derived from the CES data to produce final transportation indexes.

The final transportation indexes are used in Appendix 13 to derive the total overall index. (Refer to section 2.2 for a discussion of the general formulae and how the component indexes are combined.)

6. Miscellaneous Expenses

6.1 Component Overview

The miscellaneous expense component consists primarily of four unrelated groups of expenses:

- Medical care,
- Contributions (including gifts to non-family members),
- Personal insurance, and
- Savings and investments (including pensions).

Runzheimer believed that certain expense items in this component should not be measured in such a way as to reflect living-cost differences between locations. For example, Runzheimer considered contributions to be a personal choice and included in all locations as a constant amount. Through research into all of the expenses of this component, Runzheimer determined that expenses related to personal insurance, savings and investments, and pensions should be held constant as well, for reasons discussed in section 6.2.2.

To measure the miscellaneous component expenses, Runzheimer constructed a pricing methodology similar to the one used in the goods and services component. Runzheimer selected representative items for medical care, priced them in all areas, and then computed a miscellaneous component index based on the relative importance of costed items/categories held constant.

6.2 Miscellaneous Expense Model

6.2.1 Expenditure Research

From the 1988 CES, Runzheimer tabulated the miscellaneous expense data into logical expense groupings and then determined appropriate item weighting. The table on the following page lists the professional services that Runzheimer selected to price and their weightings:

MISCELLANEOUS EXPENSE CATEGORIES AND WEIGHTINGS

Categories	Income level (percent)		
	Lower	Middle	Upper
Medical Care	43.41	31.56	22.40
Contributions (including gifts)*	12.38	14.90	16.85
Personal Insurance & Pensions*	44.21	53.54	60.75
Totals	100.00	100.00	100.00

*Held constant.

6.2.2 Miscellaneous Expense Methodology

As stated in section 2.2, Runzheimer used the Laspeyres indexing methodology to compute the miscellaneous expense component index. For groups of items held constant, the model assumed a price ratio between the allowance area and the Washington, DC, area equal to 100.00%.

Runzheimer defined "savings and investments" as the portion of a family's budget that was targeted for long-term financial security. Money stored in a savings or investment vehicle for future expenditures (of goods and services, housing, or transportation) was accounted for in the other component weightings. Based on this reasoning, within the miscellaneous expense component, Runzheimer equated long-term savings and investments with money spent on pensions and other retirement vehicles.

In section 6.1, we noted that expenses related to personal insurance were held constant for all locations. Runzheimer came to this conclusion after contacting life insurance companies and OPM officials in 1990. The life insurance companies contacted indicated that policies written (and premiums charged) to persons within the United States and its territories did not vary due to location. Runzheimer's research and discussions with OPM officials also indicated that, in general, federal employees in all areas received similar or identical benefits packages—any variations were due to personal preference. Therefore, Runzheimer believed, and OPM concurred, that holding these types of expenses constant was appropriate.

6.3 Miscellaneous Expense Data Collection Procedures

Medical care items were surveyed consistent with the approach used in the goods and services component. For quality-control purposes, Runzheimer used its in-house research staff to conduct much of this survey. Medical care item prices were gathered as part of the goods and services pricing.

The following medical-care items were surveyed in each allowance area and in the Washington, DC area:

- Nonprescription pain reliever
- Prescription drugs
- Vision check
- Dental service
- Doctor visit
- Hospital room
- Health insurance

Runzheimer computed a price index for each item in each allowance area by comparing the local average price with the Washington, DC average price. These indexes were combined using weights derived from the CES to compute a Medical Care composite category index for the allowance area.

For areas in which employees may have purchasing privileges at commissaries and exchanges, Runzheimer computed separate Medical Care indices using the weighting factors below. As with the commissary/exchange factors used in the Goods and Services component, these factors were based on the results of OPM's 1980 Living Pattern Surveys of federal employees.

PX/COMMISSARY SPENDING PATTERNS (PERCENTAGE)

Category	Allowance Area				
	Fairbanks	Anchorage	Guam	Honolulu	San Juan
Medical Care	72.3	66.3	59.0	46.3	9.3
Cash Contribution	0.0	0.0	0.0	0.0	0.0
Personal Ins./Pension	0.0	0.0	0.0	0.0	0.0

The only medical item priced at commissaries and exchanges was the nonprescription pain reliever. Therefore, the difference between the local retail and commissary/exchange Medical Care indexes is very small.

As with other components, Runzheimer notes that the pending federal employee survey will obtain information on medical services. OPM may wish to review the composition of the Medical Care component after the analyses of the employee survey results are complete.

6.4 Miscellaneous Expense Survey Results

Appendix 12 contains the results of our data collection and index calculations. The reader will note that the relatively large weighting for personal insurance/pensions and cash contribution, which are held constant, significantly dampens the effect of the cost differences between the allowance areas and the Washington, DC area.

Section 2.2 describes how the Miscellaneous component indexes are combined with the other component indexes to derive the final index for each area.

7. Final Results

7.1 Component and Total Comparative Cost Indexes and Amounts

The components and weightings and indexes, and the total comparative cost indexes, appear below. Appendix 13 shows how each index was derived from the various component indexes.

FINAL COST COMPARISON INDEXES

Allowance area	Local pricing	Commissary & exchange
Anchorage, Alaska	104.53	101.44
Fairbanks, Alaska	106.96	104.19

FINAL COST COMPARISON INDEXES—Continued

Allowance area	Local pricing	Commissary & exchange
Juneau, Alaska	108.01	NA
Other Areas in Alaska*	125.90	NA
Guam	114.10	107.01
City & Cnty of Honolulu, Hawaii	118.96	113.98
Hawaii Cnty, Hawaii	112.26	NA
Kauai Cnty, Hawaii	117.38	NA
Maui Cnty, Hawaii	121.82	NA
Puerto Rico	100.10	99.57
St. Croix, Virgin Islands	107.94	NA
St. Thomas, Virgin Islands	114.25	NA

*As represented by Nome, AK.
NA=Not Applicable.

7.2 General Comments

Runzheimer has attempted to bring fairness and accuracy to the results of this study. The scope of this engagement has become more comprehensive by virtue of the special research projects, seasonal pricings, expanded marketbasket pricings, employee questionnaire development and other enhancements mentioned throughout this text.

Runzheimer believes that living cost research is a dynamic process, not a static one, and that continued interaction with OPM will aid the process and improve accuracy.

7.3 Recommendations

Scattered throughout this report, Runzheimer identified several opportunities for improving the quality of the survey instruments and the survey process. For ease of reference, we summarize them here and provide additional recommendations.

1. *Federal Employee Survey:* Runzheimer urges OPM to finalize the questionnaires prepared by Runzheimer and conduct the survey of federal employee housing and living patterns as soon as possible. Throughout this report, the reader will have noted the importance of this invaluable research in refining living-cost comparisons in the future. Runzheimer encourages federal employees to participate in this vital survey.

2. *Income Taxes:* Income taxes significantly affect living-cost analyses. Consequently, Runzheimer believes that OPM should consider researching the inclusion of income taxes in the future.

3. *Salary Levels and Employment Distributions:* Runzheimer recognizes that it applied the same salary levels and federal employment weights in this report as it did in the first. We believe, however, that new salaries and weights should be incorporated into the computational process over time. The timing of such changes should be balanced against the need to stabilize results so that the indexes do not fluctuate due to changes in weights rather than changes in relative prices.

4. *Consumer Expenditure Survey Data:* Conforming with last year's process, Runzheimer used the Bureau of Labor Statistics' "prepub" statistical reports from the 1988 Consumer Expenditure Survey (CES). Runzheimer recommends, however, that OPM implement a system to enable gradual introduction into the model of changes as reflected by the CES results.

5. *Catalog Pricing:* Runzheimer found that obtaining prices of selected items through catalog sales was effective and appropriate, particularly in the smaller areas. OPM may wish to broaden the use of catalog pricing in these areas and for items where comparable brands are not widely available.

6. *Housing Data:* Runzheimer believes there is a need to obtain better housing data in several locations. How this can be accomplished within the cost

limitations of the current contract is an issue Runzheimer needs to discuss further with OPM.

7. *Community Selection:* Runzheimer believes that the forthcoming federal employee survey could provide valuable information for determining which communities to survey in each area. Runzheimer recommends that OPM revisit community selection after the results of the employee survey have been analyzed.

8. *Renter and Homeowner Insurance:* At OPM's request, Runzheimer researched the purchase of special insurance riders by renters and homeowners. The research suggested that these additional riders are not common. However, Runzheimer recommends that OPM review the issue of insurance coverage after the results of the employee survey have been analyzed.

9. *Home Maintenance Items:* Runzheimer conducted special research for OPM on home maintenance items necessitated by winter conditions in Alaska. The research suggested that no changes were required in the housing model. As with insurance, however, Runzheimer recommends that OPM re-examine home maintenance requirements in all of the allowance areas after the results of the employee survey have been analyzed.

10. *Historical Housing Data:* Between the data collected during the 1990 survey and that collected in the current survey, OPM now has housing data for the period from 1984 through 1991. Unfortunately, neither Runzheimer nor OPM has sufficient information concerning home tenure to weight these data and analyze them objectively. Runzheimer notes that the employee survey will ask about home tenure, and we recommend that OPM consider using information from the employee survey, if appropriate, to analyze the historical housing data.

11. *Annual Miles Driven:* Runzheimer has been unable to find conclusive statistics on average annual miles driven per vehicle in any allowance area or the Washington, DC, area. Again, we note that the number of miles driven annually is one of the questions on the employee survey, and we recommend that OPM revisit the issue of annual mileage after analyzing the survey results.

12. *Continued Involvement:* Runzheimer encourages OPM to continue to be fully involved in the day-to-day research and survey operations. We believe that close cooperation between Runzheimer and OPM improves the living-cost comparisons by ensuring data integrity and conformance with OPM regulations.

APPENDIX 1—CONSUMER EXPENDITURE SURVEY (CES)

[By Income Before Taxes: Average annual expenditures and characteristics of all consumer units. Consumer Expenditure Survey 1988, Feb. 13, 1990]

Item	June 7, 1990 in dollars and percent						
	Total complete reporting	$10,000 to $14,999	$15,000 to $19,999	$20,000 to $29,999	$30,000 to $39,999	$40,000 to $49,999	$50,000 and over
Number of consumer units (in thousands)	81,354	9,433	8,219	14,586	10,901	7,198	12,209
Number of sample interviews	30,900	3,500	3,107	5,496	4,119	2,849	4,983
Consumer unit characteristics:							
Income before taxes[1]	$28,540	$12,320	$17,373	$24,591	$34,375	$44,331	$74,234
Income after taxes[1]	26,149	11,892	16,345	22,963	31,660	40,100	66,345
Average number of persons in consumer unit	2.6	2.2	2.5	2.7	2.9	3.2	3.1
Age of reference person	46.9	50.1	46.5	44.7	43.2	42.3	45.3
Average number in consumer unit:							
Earners	1.4	0.9	1.2	1.5	1.8	2.0	2.1
Vehicles	2.0	1.4	1.9	2.2	2.6	2.7	3.1
Children under 18	0.7	0.6	0.7	0.7	0.9	1.0	0.8
Persons 65 and over	0.3	0.5	0.4	0.3	0.2	0.1	0.1
Percent distribution:							
Male	66	57	64	71	78	82	87
Female	34	43	36	29	22	18	13
Homeowner with mortgage	38	15	26	36	52	64	76
Homeowner without-mortgage	24	32	26	25	18	14	14
Renter	39	53	47	39	30	21	11
Black	11	12	10	10	5	6	4
White and other	89	88	90	90	95	94	96
Elementary (1–8)	11	17	12	8	5	2	3
High school (9–12)	44	51	54	48	42	40	24
College	44	31	34	44	53	58	73
Never attended and other	1	1	1	0	0	0	0
At least one vehicle owned	86	84	91	95	96	97	97
Average annual expenditures	26,389.07	16,788.64	19,558.35	24,886.36	31,659.60	37,562.00	52,320.19

Specifications	For each vehicle, obtain the following information, length, wheelbase, tires, curb weight, horsepower, fuel type and fuel performance (mpg).
Depreciation	For each vehicle, compute the residual value after 12, 24, 36 and 48 months respectively.
Gasoline	For each station name/brand, price regular unleaded self-service and regular unleaded full-service.
Vehicle Maintenance	For each vehicle, price a tune up, an oil change, an automatic transmission fluid change, a coolant-flush/fill, a muffler/tail pipe and CV joint boot replacements (Alaska only).
Tires	Price a P175/70R13, Eagle GT+4, #111–895–234 for the Honda Civic. Price a P205/70R14, Eagle GT+4, #111–135–244 for the Ford Taurus L. Price a P205/R15, Eagle GT+4, #111–707–486 for the Chevrolet S10 Blazer. In Guam, Goodyear tires were unavailable, used the average of two comparable brands.
License and Registration	For each vehicle, price title fee, passenger vehicle registration fees, plate fees, inspection fees, administration/clerical/other fees, and local added fees. Specify if one-time or annual. List any exceptions if the Blazer is not registered as a passenger vehicle.
Miscellaneous Tax	For each vehicle, price miscellaneous tax. Tell how rate is determined, give formula for new vehicle purchase, give formula for subsequent year (2 to 5) and explain billing.
Autombile Finance	Obtain the rate for a 4 year loan based on a down payment of 20 percent. Assume the loan applicant is a current bank customer who will make payments by cash/check and not by automatic deduction from the account.
Autombile Insurance	For each vehicle, price insurance coverage identified below. Assume that vehicles are used in commuting 15 miles/day, 12,000 miles/year and that the driver is a 35-year-old married male with no accidents or violations in the last 5 years. When there is a geographic difference, obtain rates for two different living communities. Include related expense fees and taxes.
Round-Trip Airfare	Price for lowest cost round trip ticket to Los Angeles. Disregard restrictions.

APPENDIX 3—Goods and Services/ Miscellaneous Pricing Changes

Listed below are changes we made to the September 1991 OPM pricing for Goods & Services and Miscellaneous Components. In addition, per OPM's request, Runzheimer verified that each pricing area included one warehouse grocery store if one was available in the area. The changes can also be seen by comparing 1990 pricing materials to 1991 pricing materials.

The following items were added to the Marketbasket at the request of OPM: fresh fish, fresh oranges, fresh lettuce, fresh celery, insulated underwear and all-terrain vehicle.

The following items were priced by catalog: Man's suit, man's jacket, woman's jacket, man's parka, woman's parka, window shade and lawn trimmer. This change was made to accommodate a request by OPM to price items by catalog.

The type of outlet priced was changed for the following items to better reflect availability.

Item	From	To
Two-Quart Casserole	Department Store	Hardware Store.
China	Hardware Store	Department Store.
Vacuum	Hardware Store	Department Store.
Pen	Pharmacy	Discount Store.

Brand names or "variety" were added to the following items: OPM requested Runzheimer specifically add brand names to the following items as a quality check: apples, cigarettes, man's dress shirt, boy's jeans, boy's shirt, woman's dress, woman's blouse, woman's slacks, woman's sweater, girl's dress, girl's blouse, infant's sleeper and woman's shoes.

Additional brand or model choices were added to the following items to ensure accurate substitutions: Spaghetti, washing machine, kitchen range, refrigerator, appliance repair and toaster.

Size or number of units priced was changed on the following items to better reflect availability: White bread, cereal, snack food, tetracycline and frozen peas.

Brands and/or descriptions were changed or enhanced on the following items to better reflect availability: Man's shoes, ground beef, frozen peas, pain reliever, cake, magazine, jewelry, pen, hospital room, dentist visit, bedroom group and audio cassette.

The following item was changed because of quality variance between locations:

New Item	Previous Item
Canned Ham	Pre-Cooked Ham.

The following item was changed because of a lack of availability between locations:

New Item	Previous Item
Potting Soil	Lawn Fertilizer.

Appendix 5—Nonforeign Area Cost-of-Living Allowances Price Survey Data Collection Procedures

Survey Description

The following information will be provided to the participants verbally or in writing. Participants who are familiar with the program and the survey may be provided with less information as appropriate.

Purpose. The Federal Government pays Cost-of-Living Allowances (COLA) in Alaska, Hawaii, and certain U.S. territories and possessions. Living cost differences are determined by comparing costs of goods, services, housing, transportation, and other items in the allowance area with the cost of the same or similar items and services in the Washington, DC area. The U.S. Office of Personnel Management (OPM) is responsible for the operation of the COLA program.

Data Collection. OPM, or its representatives, conducts annual Price Surveys to determine living cost differences. Local governments, retail outlets, realty firms, and businesses providing professional and other services to be surveyed are identified through the use of full-scale Background Surveys, conducted approximately once every five years. Participation in the Price Surveys is voluntary. Data are collected by telephone and/or personal interview.

Wherever practical and appropriate, the price of each good or service is obtained from at least three outlets in each allowance area and at least six outlets in the reference area (i.e., the Washington, DC, area). Realty data may be obtained from one or multiple sources, as appropriate.

Confidentiality. All data collected are used only for the purposes described above. The Government pledges to hold all micro or "raw" data collected in confidence. Names of participating businesses and institutions may be released. Names of individuals are not released. Summary data will be made available to the public only to the extent that micro data cannot be associated with data sources.

Public Burden Information. Public burden reporting for this collection of information is estimated to vary from 1 to 20 minutes per response. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestion for reducing this burden to Reports and Forms Management Officer, U.S. Office of Personnel Management, 1900 E Street, NW., room 6410, Washington, DC 20415; and to the Office of Management and Budget, Paperwork Reduction Project (3206–0199), Washington, DC 20503.

Nonforeign Area Cost-of-Living Allowances Price Survey Data Collection Procedures

Interview Guidelines

Three types of information are collected in price surveys: price of goods and services, rental prices and related information, and home owner prices and related information. The following are the typical interview questions used to collect these data.

Price Information Collection

1. What is the regular (non-sale) price of _____(a specific item or service)?

Examples of items include, but are not limited to:

Chuck Roast, Bone In.
Price per pound. Average size package (e.g., not a 'family' or 'bonus' pack).
1st Choice: Arm pot roast.
2nd Choice: Eye roast.

Peas, Frozen.
Price for 10 ounce package.
1st Choice: Bird's Eye.
2nd Choice: Major brand of equivalent quality.

Men's Jeans.
Price for one pair of blue jeans.
1st Choice: Levi's #501 jeans.
2nd Choice: Equivalent quality jeans.

Automobile, New.
'Sticker' price of current year model Honda Civic DX, four door sedan, 1.5 liter, four cylinder engine. (Price options, fees, financing, and taxes separately.)

Example of services include, but are not limited to:

Restaurant Service.
Price of seafood platter—mixed seafood (e.g., not 'steak and lobster' or 'crab leg' platter). If salad and side dish not included with entree, price house salad and baked potato or order of french fries. Include price of coffee, tax, and 15 percent tip.

Film Developing.
Price to process and print 35 millimeter, 24 exposure, 100 ASA color roll film. Single prints only, standard size and finish.

Doctor, Office Visit.
Typical fee, after the initial visit, for an office visit when medical advice or simple treatment is all that is needed. Do not include the charge for a complete physical examination, injections, medication, laboratory tests, or similar services.

Oil Change.
Price of a regular oil change including oil and filter for a current year model Honda Civic DX sedan, 1.5 liter, 4 cylinder engine.

2. Prices of many of the items can be obtained "off-the-shelf" without assistance. Occasionally, when a specific item is not available, assistance from sales or other personnel may be required to identify and

price substitution items of comparable quality and quantity.

3. Prices of most services are obtained by telephone or personal interview. A few services are priced with little or no assistance. For example, prices may be obtainable from a displayed price schedule, list, or menu.

Housing Component—Rental Information Collection

1. Describe the location, size, layout, number and types or rooms, and square footage of your rental units.

2. Are they apartments, duplexes, town houses, detached houses, or other types of units? Describe.

3. Are there additional amenities (e.g., pool, sauna, tennis courts, gym)? If so, describe.

4. What is the monthly rent? What is the amount of the security deposit (if any)? What other kinds of fees or assessments are there?

5. Are utilities included? Which ones? If you can, please provide information on average monthly or annual costs of utilities paid by tenants.

6. Are term leases usually required? What are the conditions and penalties associated with the lease?

7. Are there any special restrictions or other factors we should know about (e.g., seasonal tourist trade)?

Housing Component—Information Collection for Comparable Sales

1. Describe the location, size, layout, number and types or rooms, and square footage of some your recent home sales.

2. Were they condominiums, duplexes, town houses, detached houses, or other types of dwellings? Describe.

3. Were there any atypical characteristics (e.g., extra large lot sizes, beach front, desirable/undesirable locations)?

4. Are there additional amenities provided by the developer, homeowners association, or similar community group (e.g., pool, sauna, tennis courts, gym)? If so, describe facilities and charges.

5. What was the selling price and date of sale?

6. What are the real estate taxes?

7. Do you have any data on utilities relating to those homes?

8. In the past year or so, what has been the average appreciation rate of property in this community? Looking back over the past six years, has this rate changed? How?

9. Describe current market conditions (e.g., soft, booming, so-so). How has this affected housing prices? Describe the housing market over the past six years.

10. Are there any special considerations or other factors we should know about (e.g., retirement/tourist trade) that might affect the housing market in this community?

Nonforeign Area Cost-Of-Living Allowances Background Survey Data Collection Procedures

Survey Description

The following information will be provided to the participants verbally or in writing. Participants who are familiar with the program and the survey may be provided with less information as appropriate.

Purpose. The Federal Government pays Cost-Of-Living-Allowances (COLA) in Alaska, Hawaii, and certain U.S. territories and possessions. Living cost differences are determined by comparing costs of goods, services, housing, transportation, and other items in the allowance area with the cost of the same or similar items and services in the Washington, DC, area. The U.S. Office of Personnel Management (OPM) is responsible for the operation of the COLA program. OPM, or its representative, conducts annual surveys to determine living cost differences. OPM conducts full-scale Background Surveys approximately once every five years to review the appropriateness of items, services, and businesses covered in the annual Price surveys. Elements of the Background Survey may be repeated annually on a limited basis as part of the maintenance of and preparation for the annual Price Surveys.

OPM uses the Background Survey to identify the services, items, quantities, outlets, and locations that will be surveyed to collect living cost data within the allowance areas and the Washington, DC, area. The Background Survey also is used to collect information on local trade practices, consumer buying patterns, taxes and fees, and other economic characteristics related to living costs.

Data Collection. Full-scale Background Surveys are conducted approximately once every five years. OPM identifies major manufacturers, local governments, retail outlets, realty firms, and businesses providing professional services to be surveyed on the basis of business volume and local prominence. Participation is voluntary. Data are collected by telephone and/or personal interview.

Confidentiality. All data collected are used only for the purposes described above. The Government pledges to hold all micro or "raw" data collected in confidence. Names of participating businesses and institutions may be released. Names of individuals are not released. Summary data will be made available to the public only to the extent that micro data cannot be associated with data sources.

Public Burden Information. Public burden reporting for this collection of information is estimated to vary from 5 minutes to 30 minutes per response. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestion for reducing this burden to Reports and Forms Management Officer, U.S. Office of Personnel Management, 1900 E Street, NW., room CHP 500, Washington, DC, 20415 and to the Office of Management and Budget, Paperwork Reduction Project (3206–0199), Washington, DC, 20503.

Nonforeign Area Cost-of-Living Allowances Background Survey Data Collection Procedures

Interview Guidelines

Seven types of information are collected in background surveys. Information is collected on products and services, outlet availability and usage, transportation, local taxes and fees, mortgage, real estate, and other topics related to the measurement of living costs (e.g., specialized information from local chambers of commerce, colleges, and universities). The following are the typical interview questions used to collect these data.

Product or Service Information

1. As a major manufacturer/supplier of _____(a specific product or service, e.g., women's apparel), please identify your items/services that are most popular (e.g., your 'volume sellers').
2. Which of these items are apt to be readily available in the following geographic locations: Alaska (i.e., Anchorage, Fairbanks, and Juneau); Hawaii; Guam; Puerto Rico; the Virgin Islands; and Washington, DC, and suburbs?
3. If the items or services are not universally available, are there other items or services that are of similar function, quality, quantity, size, and type that can be substituted?
4. Is there anything else we should know about your product or service? Are there recommendations you wish to make that would help us in our data collection?

Outlet Availability and Usage (Retail)

1. What is your product or service? What is the address(es) of your establishment(s)? If you have multiple locations, which locations have the greatest sales volumes (i.e., are most utilized by consumers)?
2. What are your store/office hours? Do these vary by location?
3. Is your full line of products or services available at all locations?
4. Is there anything else we should know about your outlet(s) or recommendations you wish to make?

Transportation Information—Private and Public Services

1. What type of transportation services do you provide (e.g., taxi, bus, subway)?
2. What geographic areas do you service? Which routes are 'typical' or most heavily utilized?
3. What is your rate structure? Does it vary by time of day or season?
4. Is there anything else we should know about transportation usage and services in your area? Are there recommendations you wish to make about our data collection?

Transportation Information—Private Use and Maintenance

1. What types of driving are most common in your area? What is the annual distance driven?
2. What types of roads and highways are common in your area? What are the road surfaces and conditions?
3. Are there unusual climatic or other factors that affect the fuel economy, maintenance, and depreciation of vehicles?
4. Is there anything else we should know about private transportation usage and maintenance in your area? Are there suggestions or recommendations you wish to make?

Local Taxes and Fees

1. What types of taxes, licenses, or fees does your State, territory, or local jurisdiction levy on real estate; personal property; sales (including sales of property); automobiles; utilities; or other goods, services, or transactions?
2. Who levies these taxes, licenses or fees (i.e., State, territory, county, city, other jurisdiction)?
3. What are the rates or schedules for these? How often and when are they levied? Do the rates/schedules vary by location, season, or other factors?
4. Is there anything else we should know about taxes and fees in your area? Are there suggestions or recommendations you wish to make?

Mortgage Information

1. What forms of home financing are most common in _____(the allowance area or Washington DC metropolitan area)? (Do not include second mortgages.)
2. What are the typical conditions and limitations on loans?
3. What is the typical amount(s) of down payment required? What are the terms and rates?
4. Are there special subsidies or other practices that influence home financing in your area?
5. Looking back 6 years, what types of changes have occurred that affect home financing?
6. Is there anything else we should know about home financing in your area? Are there suggestions or recommendations you wish to make that would help us in our data collection?

Real Estate Information

1. What is the availability of housing in _____(the allowance area or Washington DC metropolitan area)? Of principal interest is housing for typical salary and wage earners (as distinguished from retirees, tourists, or other special groups) for persons with low, moderate, and high incomes.
2. Describe the communities within your area in which persons _____(specify occupation/income characteristics) typically live. If appropriate, identify separate communities for renters and home owners. Where are these communities located relative to the major Federal activities in the area?
3. Describe the type of housing (e.g., apartment, condominium, town house, detached house).
4. For each type of housing, what are the usual number of rooms, bedrooms, baths, total square footage, lot size, type of construction, and similar characteristics?
5. What types of utilities are available and typically used in these communities: sewer, water, natural gas, electricity, other?

6. Are there any unusual factors that might affect maintenance requirements in your area?

7. Looking back six years, describe the changes that significantly affected the housing market (both rental and owner markets).

8. Is there anything else we should know about the housing market in your area? Are there suggestions or recommendations you wish to make concerning our data collection?

Other Types of Information

Occasionally, it is necessary to collect information from colleges, universities, chambers of commerce, trade associations, and other groups on specific subjects relating to the analysis of living costs. For example, a university known to be involved in home energy research may be contacted to determine whether there are consumption data by region or allowance area that could have application in the COLA program.

When such data are collected, the purpose and basic structure of the interview will follow the patterns shown above. The substance, however will vary with the subject matter.

Part III

Environmental Protection Agency

40 CFR Part 82
Protection of Stratospheric Ozone; Refrigerant Recycling; Proposed Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 82

[FRL-4542-8]

Protection of Stratospheric Ozone; Refrigerant Recycling

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: In this document, EPA proposes regulations under section 608 of the Clean Air Act (the Act) that would establish a recycling program for ozone depleting refrigerants recovered during the servicing and disposal of air conditioning or refrigeration equipment. The proposed regulations would require persons servicing air conditioning and refrigeration equipment to observe certain service practices that reduce refrigerant emissions and would establish equipment and off-site reclaimer certification programs. In addition, EPA would require that ozone depleting compounds contained "in bulk" in appliances be removed prior to disposal of the appliances, and that all air conditioning and refrigeration equipment, except for small appliances and room air conditioners, be provided with a servicing aperture that would facilitate recovery of the refrigerant. These proposed regulations should significantly reduce emissions of ozone depleting refrigerants and therefore aid U.S. and global efforts to minimize damage to the ozone layer.

DATES: Written comments on the proposed rule must be received on or before January 22, 1993. A public hearing is scheduled for December 23, 1992 in the EPA Auditorium, located at 401 M St., SW., Washington, DC.

ADDRESSES: Comments should be submitted in duplicate to the attention of Air Docket No. A-92-01 at: U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. The Public Docket is located in room M-1500, Waterside Mall (Ground Floor), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC. Dockets may be inspected from 8 a.m. until 12 noon, and from 1:30 p.m. until 3 p.m., Monday through Friday. A reasonable fee may be charged for copying docket materials.

FOR FURTHER INFORMATION CONTACT: Debbie Ottinger, Stratospheric Ozone Protection Branch, Global Change Division, Office of Atmospheric and Indoor Air Programs, Office of Air and Radiation, ANR-445, 401 M Street SW., Washington DC 20460. (202) 233-9200.

The Stratospheric Ozone Information Hotline at 1-800-296-1996 can also be contacted for further information on weekdays from 10:00 to 4:00, Eastern Time.

SUPPLEMENTARY INFORMATION: The contents of today's preamble are listed in the following outline:

I. Background
- A. Ozone Depletion
- B. Montreal Protocol and EPA's Implementing Regulations
- C. Excise Tax
- D. London Amendments to the Protocol
- E. Advance Notice of Proposed Rulemaking Regarding Recycling
- F. Clean Air Act Amendments of 1990

II. Section 608 of the Clean Air Act

III. Today's Proposed Rule
- A. Equipment Affected
- B. Factors Considered in the Development of this Proposal
- C. Overview of Proposed Requirements
- D. Public Participation
- E. Definitions and Interpretations
- F. Required Practices
  1. Evacuation of air conditioning and refrigeration equipment
  2. Leak repair
  3. Disposition of Recovered Refrigerant
  4. RCRA Regulations Regarding the Management of CFCs and CFC-Contaminated Wastes
  5. Handling Multiple Refrigerants in Recycling and Recovery Equipment
- G. Certification of Recycling and Recovery Equipment
  1. Standards for recovery and recycling machines intended for use with air conditioning and refrigeration equipment except small appliances
  a. Recovery efficiency
  b. Refrigerant recovery rates
  c. Low loss fittings
  d. Purge loss
  e. Volume-sensitive shut-off
  2. Standards for recovery machines intended for use with small appliances
  3. Possible standards for recycling and recovery machines used with equipment identical to MVACs
  4. Testing of recycling and recovery equipment intended for use on air conditioning and refrigeration equipment except small appliances
  5. Testing of recycling and recovery equipment intended for use on small appliances
  6. Effective Dates and Grand Fathering Provisions
- H. EPA Promotion of Service Technician Competence
  1. Curriculum or Test Content
  2. Administration
  3. Possible Need for Mandatory Certification
- I. Certification by Owners of Recycling or Recovery of Equipment
- J. Certification of Reclaimers
- K. Recordkeeping Requirements
- L. Safe Disposal Requirements
- M. Servicing Apertures
- N. Possible exemption from regulatory requirements for refrigerant uses for which no high-efficiency recovery technology exists

IV. Possible Future Rulemakings to Implement Section 608

V. Summary of Supporting Analyses
- A. Regulatory Impact Analysis
- B. Regulatory Flexibility Analysis
- C. Paperwork Reduction Act

I. Background

A. Ozone Depletion

The stratospheric ozone layer protects the earth from the penetration of harmful ultraviolet (UV-B) radiation. On the basis of scientific evidence, a national and international consensus exists that certain man-made halocarbons, including chlorofluorocarbons (CFCs), halons, carbon tetrachloride, and methyl chloroform, must be restricted because of the risk of depletion of the stratospheric ozone layer through the release of chlorine and bromine. To the extent depletion occurs, penetration of UV-B radiation increases, resulting in potential health and environmental harm including increased incidence of certain skin cancers and cataracts, suppression of the immune system, damage to plants including crops and aquatic organisms, increased formation of ground-level ozone and increased weathering of outdoor plastics.

The original theory linking CFCs to ozone depletion was first proposed in 1974. Since then, the scientific community has made remarkable advances in understanding atmospheric processes affecting stratospheric ozone science. Model predictions in the late 1980s suggested that continued use of CFCs would lead to substantial ozone depletion in the middle of the next century. Despite the sophistication of these models, scientists did not predict the extent of the decrease in stratospheric ozone over Antarctica that was first reported in 1985. This seasonal loss of ozone over the south pole became known as the "Antarctic Ozone hole".

More recent studies have continued to deepen concern over stratospheric ozone loss. In 1988, the results of an international assessment of ozone trends were published in the Executive Summary of the Ozone Trends Panel Report. In addition to the ozone hole, this report stated that analysis of total-column ozone data showed measurable downward trends from 1969 to 1988 of 3 to 5 percent in the northern hemisphere in the winter. In early 1991, new scientific evidence from satellite data indicated a year-round loss of stratospheric ozone over the northern mid-latitudes during the past decade of 3 to 5 percent. This amount is 2 times

greater than past studies suggested and has raised the concern that ozone depletion appears to be occurring faster than theoretical models had predicted. A scientific assessment published in October, 1991 showed for the first time stratospheric ozone depletion in summertime over the continental United States. Most recently, analyses of atmospheric chemistry in the northern hemisphere have indicated that an ozone hole similar to the one in the antarctic could appear in the arctic. These analyses also imply that ozone depletion at the northern mid-latitudes could accelerate.

A more detailed discussion of the background of the ozone depletion problem, the scientific evidence regarding the issue, and the health and environmental effects of ozone depletion can be found at 56 FR 49548 (September 30, 1991).

B. Montreal Protocol and EPA's Implementing Regulations

In September 1987, the United States and 22 other countries signed the Montreal Protocol on Substances that Deplete the Ozone Layer (the Protocol). As originally drafted, the Protocol called for production and consumption of certain CFCs (CFC–11, 12, 113, 114, 115) and halons (Halon–1211, –1301 and –2402) to be frozen at 1986 levels beginning July 1, 1989, and January 1, 1992, respectively, and for the CFCs to be reduced to 50 percent of 1986 levels by 1998. To date, 76 nations representing well over 90% of the world's production capacity for CFCs and halons have signed the Montreal Protocol. EPA promulgated regulations implementing the requirements of the 1987 Protocol through a system of tradeable allowances. EPA apportioned the allowances to producers and importers of ozone depleting substances (controlled substances) based on their 1986 level of production and importation. It then reduced the allowances for the controlled substances according to the schedule specified in the Protocol. (See 56 FR 49548 (September 30, 1991) for a more detailed discussion of the Protocol and EPA's regulations to implement the phaseout of ozone-depleting substances.)

C. Excise Tax

As part of the Omnibus Budget Reconciliation Act of 1989, the U.S. Congress levied an excise tax on the sale of CFCs and other chemicals that deplete the ozone layer, with specific exemptions for exports and recycling. The tax has operated as a complement to EPA's regulations limiting production and consumption by increasing the costs of using virgin controlled substances. As a result of the tax, there is an added incentive for industry to shift away from controlled substances and to increase recycling activities. The tax has also stimulated the market for alternative chemicals and processes. The original excise tax was amended in 1991 to include methyl chloroform, carbon tetrachloride and other CFCs regulated by the amended Montreal Protocol and title VI of the Clean Air Act.

D. London Amendments to the Protocol

Since the signing of the Protocol in 1987, additional scientific evidence became available indicating that depletion of the stratospheric ozone layer was occurring more quickly than had been anticipated. In response to this evidence (i.e. the 1988 Ozone Trends Panel Report), the Parties to the Protocol at their meeting in London in June 1990 amended the Protocol schedule for CFCs and halons to require a complete phaseout by January 1, 2000. Methyl chloroform and carbon tetrachloride were added to the list of ozone depleting substances, with carbon tetrachloride phased out by January 1, 2000 and methyl chloroform phased out by January 1, 2005.

The parties also passed a non-binding resolution regarding the use of hydrochlorofluorocarbons (HCFCs). HCFCs have been identified as interim substitutes for CFCs because they add much less chlorine to the stratosphere than fully halogenated CFCs. The Parties were concerned, however, that rapid growth in the amount of use of these chemicals over time would still pose a threat to the ozone layer. As a result, the resolution calls for the phaseout of HCFCs by 2020 if feasible and no later than 2040 in any case.

E. Advance Notice of Proposed Rulemaking Regarding Recycling

On May 1, 1990, EPA published an advance notice of proposed rulemaking (ANPRM, 55 FR 18256) addressing issues related to the development of a national CFC recycling program. This notice emphasized that recycling is important because it would allow the continued use of equipment requiring CFCs for service past the year in which CFC production is phased out, thereby eliminating or deferring the cost of early retirement or retrofit of such equipment. The Agency continues to believe that the continued use of these substances in existing equipment that recycling would allow can serve as a useful bridge to alternative products while minimizing disruption of the current capital stock of equipment.

The ANPRM asked for comment on the feasibility of recycling in various CFC end uses and also asked for comment on methods, such as a deposit/refund system, that could be employed to encourage recycling. The Agency received 110 public comment letters in response to the ANPRM. In general, most commenters recognized the need for recycling to be established to help efforts to protect the ozone layer and to provide a source of refrigerant to service existing capital equipment after the phaseout of CFC production is complete.

F. Clean Air Act Amendments of 1990

The Clean Air Act Amendments of 1990, signed November 15, 1990, include requirements for controlling ozone-depleting substances that are generally consistent with, but in some cases more stringent than those contained in the Montreal Protocol as revised in 1990. For the substances covered by the revised Protocol's control measures, title VI of the Act calls for a phaseout of CFCs by January 1, 2000 with deeper interim reductions and, in the case of methyl chloroform, an earlier phase out date (2002 instead of 2005). For the HCFCs, title VI requires use restrictions, a production freeze in 2015 and a phaseout in 2050. EPA issued a temporary final rule on March 6, 1991 implementing the production and consumption limits contained in the Act for calendar year 1991. (See 56 FR 9518.) The Agency published proposed regulations for 1992 and beyond on September 30, 1991 (See 56 FR 49548).

In addition to the phaseout of ozone depleting substances, title VI includes a variety of other provisions intended to reduce emissions of ozone-depleting substances. Section 608, the foundation for the regulations proposed today, provides for EPA to promulgate regulations to achieve the "lowest achievable level" of emissions of ozone-depleting substances and to maximize recycling of such substances. Section 608 also bans the knowing venting of ozone-depleting substances during the maintenance, service, repair, or disposal of appliances and industrial process refrigeration. Section 609 establishes a specific program requiring the recovery and recycling of refrigerant used in motor vehicle air conditioners, specifically requires training and certification of technicians, and restricts the sale of small containers of CFCs. Other title VI sections call for mandatory labelling, a ban on nonessential products, and a program to review the safety of alternatives to class I and class II substances.

II. Section 608 of the Clean Air Act

Section 608 of the Clean Air Act, as amended in 1990, provides the legal basis for this rulemaking. It requires EPA to establish a comprehensive program to limit emissions of ozone depleting substances during their use and disposal.

Section 608 is divided into three subsections. In brief, the first requires regulations to reduce the use and emission of class I substances (CFCs, halons, carbon tetrachloride, and methyl chloroform) and class II substances (HCFCs) to the lowest achievable level, and to maximize the recycling of such substances. The second subsection requires that the regulations promulgated pursuant to subsection (a) contain requirements concerning the safe disposal of class I and class II substances. Finally, the third subsection establishes self-effectuating prohibitions on the venting into the environment of class I or class II substances, and eventually their substitutes, during servicing and disposal of air conditioning or refrigeration equipment.

In particular, subsection (a) of section 608 requires EPA to promulgate regulations "establishing standards and requirements regarding the use and disposal" of both class I substances and class II substances. The regulations required are to "reduce the use and emission of such substances to the lowest achievable level" and are to "maximize the recapture and recycling of such substances." Subsection (a) calls for EPA to promulgate such regulations with respect to "the use and disposal of class I substances during the service, repair, or disposal of appliances and industrial process refrigeration" by January 1, 1992. (Appliance is defined by section 601(1) as "any device which contains and uses a class I or class II substance as a refrigerant and which is used for household or commercial purposes, including any air conditioner, refrigerator, chiller, or freezer." EPA believes that motor vehicle air conditioners (MVACs) are included within the scope of the term "appliance" but that the servicing regulations promulgated pursuant to section 609 of the Act eliminate the need to promulgate servicing regulations for MVACs under section 608. MVACs, however, will be subject to disposal regulations proposed today under section 608.) These regulations were to become effective by July 1, 1992. Paragraph (2) of subsection (a) expands the scope of the recycling and emission reduction regulations by requiring EPA to promulgate additional regulations by November 15, 1994, that establish standards and requirements regarding the use and disposal of both class I and class II substance not covered by the initial set of regulations, i.e., all other uses of class I and class II substances. These regulations are to go into effect not later than 12 months after their promulgation. Subsection (a) further provides that the regulations promulgated pursuant to it may include requirements to use alternative substances, to minimize the use of class I or class II substances, or to promote the use of safe alternatives to class I and class II substances.

Subsection (b) of section 608 requires that the regulations under section 608(a) establish standards and requirements for the safe disposal of class I and class II substances. These are to include (1) requirements that such substances contained "in bulk in appliances, machines, or other goods" be removed prior to the disposal of such items or their delivery for recycling; (2) requirements that "any appliance, machine or other good containing a class I or class II substance in bulk" be "equipped with a servicing aperture or an equally effective design feature which will facilitate the recapture of such substance;" and (3) requirements that products in which a class I or class II substance is an "inherent element" be disposed of "in a manner that reduces, to the maximum extent practicable, the release of such substance into the environment."

The provisions of subsections (a) and (b) ultimately (by November, 1994) apply to all uses of class I and class II substances, including air conditioning and refrigeration, solvents, foam blowing, and fire control. However, these subsections focus first on the use and disposal of refrigerants during the service, repair, or disposal of air conditioning or refrigeration equipment.

Refrigerants also receive special emphasis in subsection (c) of section 608, which provides in paragraph (1) that, effective July 1, 1992, it is "unlawful for any person, in the course of maintaining, servicing, repairing, or disposing of an appliance or industrial process refrigeration, to knowingly vent or otherwise knowingly release or dispose of" class I or class II refrigerants in a manner that "permits such substances to enter the environment." Certain de minimis releases are exempted from this self-effectuating prohibition. As discussed below in section III. D, EPA is proposing that, once the requirements of the regulations proposed today go into effect, "de minimis releases" be interpreted to mean releases that occur when the recycling and recovery requirements of this regulation are followed. Section 608(c)(2) extends the prohibition on venting to substances that are substitutes for class I and class II refrigerants effective November 15, 1995, unless the Administrator determines that such venting or releases do not pose a threat to the environment. The Agency notes that since MVACs are covered by the term "appliance," the servicing and disposal of MVACs is subject to the prohibition on venting.

Today's notice, proposing refrigerant recycling and safe disposal requirements, is a major step in the implementation of section 608. EPA research indicates that in all air conditioning or refrigeration sectors, emissions during servicing and disposal of equipment account for between 50 and 94 percent of total emissions during the life cycle of the equipment (Regulatory Impact Analysis: the National Recycling and Emission Reduction Program, (RIA)). The recovery and recycling requirements proposed today should sharply reduce emissions during servicing and disposal, bringing total potential emissions from 41,000 metric tons per year to approximately 15,000 metric tons per year (RIA). (These figures are weighted by ozone depletion potential; unweighted figures are higher). In those sectors where leakage during use accounts for a significant percentage of total emissions, EPA will evaluate the need to establish standards to minimize emissions during this life cycle stage. Finally, EPA will evaluate the need to regulate non-refrigerant applications of class I and class II compounds under section 608. These regulations may include requirements for emission-reducing engineering controls and work practices and/or requirements to use alternative substances in those uses for which substitutes exist. In determining whether or not to take further action under section 608, EPA will consider the incremental costs and benefits of such action.

III. Today's Proposed Rule

A. Equipment Affected

Today's proposed rule applies to the servicing and disposal of most air conditioning and refrigeration equipment, including household air conditioners and refrigerators, commercial air conditioners and chillers, commercial refrigeration, industrial process refrigeration, refrigerated transport, and air conditioning in vehicles not covered by EPA's regulations under section 609 of the Clean Air Act (which apply to the service of motor vehicle air

conditioners, or MVACs). The proposed rule also applies to the disposal of MVACs. Following is a description of the major categories of equipment that will be affected by the rule:

Household Refrigeration. This category consists of refrigerators and freezers intended primarily for household use, though they may be used outside the home (e.g., in an office). In terms of the number of units currently in operation, this is the largest sector affected by this rule, with an estimated 159 million units. The amount of refrigerant (charge) in each of these units, however, is quite small relative to the charge in equipment in other sectors, ranging from six ounces to approximately one pound of CFC–12. The quantity of refrigerant in this sector that is available for recycling at servicing and disposal is estimated to be approximately 6,000 metric tons per year. (This and other estimates in this section are based on figures from 1990.) This makes up approximately 17% of the total available from the sectors affected by this rule when these quantities are weighted by the ozone depletion potentials (or ODPs) of the refrigerants. Because servicing is relatively rare in this sector, approximately 90% of this 17% would be recovered at disposal.

Other Refrigerated Appliances. Other refrigerated appliances include dehumidifiers, vending machines, ice makers, and water coolers. These equipment types have charge sizes and service characteristics similar to those in the Household Refrigeration sector. The total number of units of these types in current operation is approximately 43 million units. The quantity of refrigerant in this sector that is estimated to be available for recycling at servicing and disposal is 700 metric tons per year, which makes up approximately two percent of the total available from the sectors affected by this rule.

Residential Air Conditioning This sector includes window units, packaged terminal air conditioners, central air conditioners, light commercial air conditioners, and heat pumps. There are approximately 133 million units in this sector, making it the second largest. The residential air conditioning sector is similar to the household refrigeration and other appliances sectors because the equipment stock is large, the equipment is infrequently serviced, and charge sizes are small (4–7 pounds). The quantity of refrigerant in this sector that is available for recycling at servicing and disposal is estimated to be 1600 metric tons per year (when weighted by the ozone-depletion potential of the refrigerant), which makes up approximately five percent of the total available from the sectors affected by this rule. This figure is lower than that for household refrigeration because residential and light commercial air conditioning relies exclusively upon HCFC–22, which has approximately five percent of the ozone-depletion potential of CFC–12.

Transport Refrigeration. The Transport Refrigeration sector consists of refrigerated ship holds, truck trailers, railway freight cars, and other shipping containers. With only approximately one million transport refrigeration units currently in use, this sector is relatively small. Trailers, railway cars, and shipping containers are commonly charged with CFC–12. Ship holds, on the other hand, rely on HCFC–22 and ammonia. The average charge size in this sector is approximately 18 pounds, which is relatively small compared to all but household sectors. The quantity of refrigerant in this sector that is estimated to be available for recycling at servicing and disposal is 1900 metric tons per year, which makes up approximately five percent of the total available from the sectors affected by this rule. Unlike equipment in the household sectors, equipment in the transport refrigeration sector is usually serviced every year. Thus, refrigerant recovered and recycled at servicing would account for approximately 25% of the total recovered and recycled in this sector.

Retail Food. The retail food sector includes refrigerated equipment found in supermarkets, convenience stores, restaurants, and other food service establishments. The equipment includes small reach-in refrigerators and freezers, refrigerated display cases, walk-in coolers and freezers, as well as large parallel systems. Convenience stores and restaurants typically use stand-alone refrigerators, freezers, and walk-in coolers. In contrast, supermarkets usually employ large parallel systems, which connect many display cases to a central condensing unit by means of extensive refrigerant piping. Because the piping required to connect all of the cases may be miles long, these systems can contain charges of over 500 pounds. Charges are typically CFC–12, CFC–502, or HCFC–22. The estimated total stock of retail food equipment is approximately 2.5 million units. The quantity of refrigerant in this sector that is estimated to be available for recycling at servicing and disposal is 9,000 metric tons per year, which makes up approximately 26% of the total available from the sectors affected by this rule.

Because of the large charge sizes and frequency of servicing in the retail food sector, EPA believes that recycling in the sector is already widespread.

Cold Storage Warehouses. Cold storage warehouses are used to store meat, produce, dairy products, and other perishable goods. There are approximately 665 million cubic feet of refrigerated space in cold storage warehouses throughout the United States. This sector is similar to the retail food sector, but its equipment is serviced even more frequently (up to four times each year) and can be charged even more frequently (up to four times each year) and can be charged with even greater quantities of refrigerant. The quantity of refrigerant in this sector that is estimated to be available for recycling at servicing and disposal is 80 metric tons per year, which makes up less than one percent of the total available from the sectors affected by this rule. As in the retail food sector, EPA believes that recycling is already widespread in this sector.

Commercial Comfort Air Conditioning. Chillers are used to regulate the temperature and humidity in offices, hotels, shopping centers, and other large buildings. There are approximately 167,000 units currently installed, making this sector the smallest one affected by the recycling rule in terms of stock size.

There are three major types of chillers: Centrifugal, reciprocating, and screw. Each of these is named for the type of compressor employed. Centrifugal chillers, used to cool areas ranging from 30,000 to 600,000 square feet, are generally the largest and can be charged with up to 900 kg (about 2000 pounds) of refrigerant. These chillers may use CFC–11, CFC–12, CFC–500, or HCFC–22. (Recently, centrigual chillers utilizing HCFC–123 have been introduced to the market; however, these new chillers currently have a very small fraction of the market and are therefore not included in this analysis.) Reciprocating chillers, used to cool areas of less than 30,000 feet, are generally the smallest and typically contain charges of about 160 pounds of CFC–12 or HCFC–22. Screw chillers are used to cool areas from 30,000 to 100,000 square feet and are charged with about 500 pounds of HCFC–22. All of the systems are serviced frequently. The quantity of refrigerant in this sector that is available for recycling at servicing and disposal is estimated to be 5200 metric tons per year, which makes up approximately 14% of the total available from the sectors affected by this rule.

Chillers are long-lasting relative to most air conditioning and refrigeration equipment. Most will last over 20 years

and some will last 30 years or more. EPA believes that recovery and recycling is already common in the chiller sector due to the large charges of refrigerant involved.

Industrial Process Refrigeration

The industrial process refrigeration sector includes industrial ice machines and ice rinks, as well as many complex, customized systems used in the chemical, pharmaceutical, petrochemical, and manufacturing industries. Equipment in this sector is often critical to the continuous production of valuable materials. As a result, industrial process equipment is usually designed, manufactured, and installed with special care to minimize down-time for servicing and repair.

This sector uses a variety of refigerants, including CFC–11, CFC–12, CFC–500, CFC–502, and HCFC–22. Charge sizes can be very large, ranging from 750–3000 lbs for ice rinks, and rising as high as 20,000 lbs for built-up centrifugal units. The quantity of refrigerant in this sector that is available for recycling at servicing and disposal is estimated to be 2000 metric tons per year, which makes up approximately six percent of the total available from the sectors affected by this rule. Due to the high reliability of industrial process equipment, servicing is uncommon, and most recovery will occur at disposal. EPA believes that recycling is already common in this sector.

Motor Vehicle Air Conditioners (MVACs)

Motor vehicle air conditioners (MVACs) include air conditioners in automobiles and trucks. These recycling regulations only affect the disposal of MVACs, because the servicing of MVACs is covered by regulations implementing section 609 of the Clean Air Act Amendments. Nevertheless, with approximately 119 million MVACs currently on the road, this sector is one of the largest sectors affected by the recycling rule. Most MVACs used CFC–12, but some now use HFC–134a.

MVACs have the highest leakage rates of refrigerant charges of any equipment type affected by the Recycling Rule. Only 40 percent of all MVACs still contain a refrigerant charge at disposal. The original charge, moreover, is small (two to four pounds). However, the quantity of refrigerant in this sector that is available for recycling at disposal is estimated to be 9000 metric tons per year, which makes up approximately 25% of the total available from the sectors affected by this rule.

Comfort Cooling in Vehicles Other Than Trucks and Automobiles

Although the servicing of MVACs is covered by regulations implementing section 609 of the Act, the servicing (and disposal) of air conditioners in other vehicles, such as trains, airplanes, ships, buses, construction equipment, and farm vehicles would be covered by these recycling regulations. Due to the lack of data available on the cooling systems used in these applications, these uses were not analyzed. However, the quantity of refrigerant available for recycling from this sector is expected to comprise only a small fraction of the total available from the sectors affected by this rule.

B. Factors Considered in the Development of this Proposal

Section 608 of the Clean Air Act provides the statutory basis for the standards and requirements contained in these proposed regulations. The statutory standards against which the regulations concerning the use and disposal of ozone-depleting substances are to be measured is whether they "reduce the use and emission of such substances to the lowest achievable level" and "maximize the recapture and recycling of such substances." EPA believes that, in the context of recycling, these standards are complementary, i.e., that maximizing recycling will also mean reducing the use and emission of these substances to the lowest achievable level. EPA also believes that these standards bear a relationship to the de minimis releases permitted notwithstanding the general prohibition on venting or other releases contained in section 608(c). In other words, emissions that occur while complying with EPA's recovery and recycling requirements, which achieve the lowest achievable level of emissions, will only be de minimis releases.

In applying the statutory standards concerning use, emissions, and recycling, EPA is taking into account both technological and economic factors. The phrases "lowest achievable level" and "maximize recycling" are not defined in the Act. EPA does not believe that these standards are solely technological in nature, but rather contemplate a role for economic factors in determining the lowest "achievable" level of emissions and maximum amount of recycling. EPA notes that section 608(a)(3) specifically refers to the use of safe alternatives pursuant to section 612, which sets out the policy that "to the maximum extent practicable, class I and class II substances shall be replaced" by other chemicals, products, or manufacturing processes. Terminology such as "maximum extent practicable" allows for the consideration of economic factors. EPA also notes that in other provisions of the Clean Air Act, similar terms have been used that contemplate the incorporation of cost and economic factors. See, e.g., section 202(a)(3)(A)(i) (providing for emissions standards for heavy-duty vehicles that "reflect the greatest degree of emission reduction achievable through the application of technology which the Administrator determines will be available * * * giving appropriate consideration to cost, energy, and safety factors"); section 213(a)(3) (using similar language in the context of emission standards for non-road engines). Thus, in EPA's view, there is nothing inherent in the use of the terms "achievable" or "maximize" that precludes the consideration of economic factors.

Furthermore, this view is consistent with the legislative history of section 608. In a statement made on the floor of the House of Representatives shortly before passage of the Clean Air Act Amendments of 1990, Representative Ralph Hall stated that: "In promulgating regulations [under section 608] the Administrator shall take into account the extent to which emissions reductions can be achieved, the costs and benefits of implementing available controls, and the time before which certain uses may no longer rely on the covered substances." (Cong. Rec. H 12907 (Oct. 26, 1990).) See also statement of Rep. Walgren (Cong. Rec. 12937 (Oct. 26, 1990).)

The stringency of the regulations promulgated to implement these standards will also be affected by the amount of leadtime between their date of promulgation and their effective date. The longer the leadtime, the more time there will be for technological innovations and development to occur, thereby permitting the establishment of more stringent standards. Conversely, shorter leadtimes necessitate standards based more on the degree of emission control and performance achievable by equipment already available or equipment that will be available in the near future. With respect to the present set of regulations, the leadtime is necessarily short as section 608(a)(1) provides for an effective date of July 1, 1992, for the regulations covering the use and disposal of class I substances used in appliances and industrial process refrigeration. (This date also coincides with the effective date of the venting prohibition contained in section 608(c) for releases of class I and class II refrigerants from appliances and

industrial process refrigeration.) Moreover, for regulations authorized by section 608(a)(2), the initial effective date must be within 12 months of promulgation.

EPA has considered these factors in developing these regulations, and the Agency believes that it has designed a program that will achieve the lowest achievable level of emissions and maximize recycling, taking into account in an appropriate manner the technology available, costs, benefits, and the leadtimes involved. Through extensive discussions with industry representatives and environmental organizations, EPA has attempted to identify significant emissions and methods for controlling them during the repair, service, and disposal of air conditioning or refrigeration equipment. In many cases, the proposed requirements would mandate activity already being undertaken by standard-setting and equipment certification organizations in the heating, ventilation, air conditioning, and refrigeration (HVAC/R) sector. They are also very similar to the steps being taken to recycle refrigerant in MVACs, an area where recycling has been successfully implemented.

EPA has attempted to develop a regulatory program that accommodates the wide variety of sizes and types of equipment subject to this regulation. In setting its efficiency standards for recycling and recovery equipment, EPA has considered among other factors both the charge size and frequency of servicing for different types of equipment. In general, as charge size and frequency of servicing increase, potential emissions increase, and higher recovery efficiencies are justified. For instance, the household refrigeration and other refrigerated appliances categories that combine to make up the "small appliances" category in today's proposed rule have tiny charges and are serviced infrequently. Under today's proposed rule, recovery equipment in this category would be subject to a standard that requires recovery of between 80 and 90% of the refrigerant (depending upon whether or not the compressor of the small appliance is operational). On the other hand, equipment containing more than 50 lbs of charge would be subject to a standard that requires recovery of over 99% of the refrigerant. Equipment standards are discussed in detail in section III.F.

EPA has also considered typical methods of disposal in developing these regulations. Under this proposal, equipment that is typically dismantled on-site before disposal (retail food refrigeration, cold storage warehouse refrigeration, chillers, and industrial process refrigeration) must have the refrigerant removed and recovered in accordance with EPA's proposed requirements for servicing. For these types of equipment, the persons who perform servicing usually also perform disposal. This is generally not the case, however, for smaller items such as household refrigerators and freezers, room air conditioners, and motor vehicle air conditioners. This equipment is disposed of by consumers and generally enters the waste stream with the charge intact. EPA is proposing special safe disposal requirements for this equipment, which would make the final person in the disposal chain (e.g., a scrap metal recycler) responsible for ensuring that refrigerant has been recovered from equipment before the final disposal of the equipment. Equipment covered by these requirements also includes dehumidifiers, water coolers, and other relatively portable equipment in addition to household refrigerators and freezers and MVACs. EPA's safe disposal program is discussed in detail in section III.L.

Although EPA is not expressly required to include class II substances in the recycling regulations to become effective on July 1, 1992, EPA is proposing to include class II substances in today's proposed rule for a number of reasons. First, the prohibition on venting that became effective on July 1 covers both class I and class II substances, and EPA considers it desirable to provide a clear, consistent framework for fully implementing the prohibition on venting for all refrigerants. The agency believes that this framework will minimize confusion and maximize compliance with the prohibition. Second, the goals of this regulation, to minimize refrigerant emissions and to help ensure that a supply of high-quality refrigerant is available to service equipment in the future, apply to both class I and class II refrigerants. Without specific requirements, recycling may proceed improperly, leading to excessive HCFC emissions, contamination of refrigerant, and damage to equipment. Third, most technicians routinely work with both types of refrigerants and therefore would need the equipment to handle refrigerants in accordance with the rule even if class II substances were not included. Industry representatives on the STOPAC Subcommittee for Recycling agreed with this rationale and with the inclusion of class II substances in the regulation. While EPA's Regulatory Impact Analysis (RIA) does not now explicitly calculate the incremental net benefits of addressing class II substances in this regulation (as opposed to in a regulation to be promulgated by November, 1994), the final RIA will address this issue. EPA requests comment on the costs and benefits of including class II substances in the regulation.

C. Overview of Proposed Requirements

EPA's proposal has three main elements, which, taken together, satisfy the criteria of section 608 concerning recycling, emissions reduction, and disposal. First, the Agency would require technicians servicing and disposing of air conditioning and refrigeration equipment to observe certain service practices that reduce refrigerant emissions. Second, EPA would establish equipment and reclaimer certification programs. These would have the goals of verifying (1) that all recycling or recovery equipment sold was capable of minimizing emissions and (2) that reclaimed refrigerant on the market was of known and acceptable quality to avoid equipment failures from contaminated refrigerant. Third, to implement the safe disposal requirements of section 608, EPA would require that ozone depleting refrigerants in appliances, machines, and other goods be removed from those items prior to their disposal, and that all air conditioning and refrigeration equipment except for small appliances and room air conditioners be provided with a servicing aperture that would facilitate recovery of the refrigerant. In addition to the three main elements of its proposal, EPA is requesting comment on the need for EPA involvement in technician education.

In order to allow the regulated community sufficient time to come into compliance with the certification requirements, EPA proposes to phase them in over a period of twelve months. In addition, the Agency proposes to "grandfather in" equipment meeting certain minimum requirements set forth in Section III. These grandfathering provisions are intended to encourage the regulated community to begin recycling as soon as possible using available equipment rather than delaying action until certified equipment is available.

Section 608(a) of the Act specifies an initial effective date for these regulations of July 1, 1992. EPA recognizes that, due to the fact that these regulations have not been proposed until today, a July 1, 1992 effective date is not possible for most portions of them. For certain portions of them, however, a July 1, 1992, effective

date would still be possible, albeit retroactively. EPA believes that a July 1, 1992 effective date is appropriate for the provision of the proposed regulations prohibiting the venting of refrigerants because the prohibition on venting contained in section 608(c) of the Act is self-effectuating and went into effect on July 1, 1992, notwithstanding the lack of final regulations under section 608. For other portions of the regulations, EPA is proposing various effective dates in order to allow sufficient lead time for the affected industry to comply. EPA requests comment on what the appropriate effective dates would be for the different provisions of the regulations, taking into account the amount of leadtime necessary to comply with these new regulatory requirements and the proposed grandfathering provisions. EPA also requests comment on the feasibility and implications of adopting a retroactive effective date in the final regulations.

D. Public Participation

EPA has worked extensively with outside groups in developing this proposal. In particular, the Agency has established and has met repeatedly with the Subcommittee for Recycling and Emissions Reduction of EPA's Stratospheric Ozone Protection Advisory Committee (STOPAC). The STOPAC is a Federal Advisory Committee chartered in 1989 under the Federal Advisory Committee Act, 5 U.S.C. App. section 9(c), to provide independent counsel to EPA on specific issues affecting the international negotiations and domestic implementation of the Montreal Protocol. Since the enactment of the Clean Air Act Amendments in 1990, the STOPAC has also provided advice on the implementation of Title VI of this legislation. The Subcommittee for Recycling has over 50 members representing air conditioning and refrigeration equipment manufacturers, wholesalers, services, and users, manufacturers of recycling and recovery equipment, refrigerant manufacturers and reclaimers, educational organizations, state and local governments, and environmentalists. To date, EPA has met with members of the Subcommittee six times: The Subcommittee as a whole has met twice, and smaller groups have met to discuss equipment certification, technician certification, reclaimer certification and safe disposal. Summaries of these meetings are available in the public docket for this rulemaking.

EPA has also worked with the air conditioning and refrigeration industry's primary standards-setting organizations, the Air Conditioning and Refrigeration Institute (ARI) and the American Society of Heating, Refrigeration and Air-Conditioning Engineers, Inc. (ASHRAE), in developing its proposal. Wherever appropriate, EPA has incorporated standards and guidelines from these organizations into the proposed rule. Examples of incorporated standards include the ARI Standard 700–1988, Specifications for Fluorocarbon Refrigerants, (Appendix A to the proposed regulations), and the ARI Standard 740–1991, Performance of Refrigerant Recovery, Recycling, and/or Reclaim Equipment, (Appendix B to the proposed regulations). EPA has also considered the ASHRAE Guideline 3, Reducing Emission of Fully Halogenated Chlorofluorocarbon (CFC) Refrigerants in Refrigeration and Air-Conditioning Equipment and Applications, in developing its proposed rule.

In addition to convening the Subcommittee for Recycling, EPA has met with various industry representatives to gather data on refrigerant emissions, to better understand current industry practices, and to discuss a range of technical issues. The data on refrigerant emissions were used to update EPA's vintaging analysis, which analyzes emissions by equipment type and life cycle stage (e.g., manufacturing, use, servicing, or disposal). This analysis has been used to calculate the potential costs and benefits of this rule and to identify opportunities for further emissions reductions. The data used in the analysis is presented in the Regulatory Impact Analysis (RIA) for this proposal, also available in the public docket. Industry groups that have provided or commented on data include appliance manufacturers, chiller manufacturers and services, industrial process refrigeration manufacturers and users, commercial refrigeration manufacturers and users, refrigerated transport manufacturers, servicers and users, and manufacturers and users of comfort air cooling systems for commercial vehicles.

E. Definitions and Interpretations

Active Recovery Device

Recovery devices used with refrigerators and freezers and other small appliances can be divided into two main types: Active and passive. While active equipment has its own compressor to pump refrigerant out of the refrigerator system, passive equipment relies solely upon the compressor in the small appliance and/or the pressure of the refrigerant in the appliance to recover the refrigerant. EPA proposes to define these two types of equipment accordingly. The distinction is important because active and passive recovery devices differ in their recovery efficiencies and other performance characteristics, and EPA is proposing different certification standards for them.

Appliance

The Act defines "appliance" as "any device which contains and uses a class I or class II substance as a refrigerant and which is used for household or commercial purposes, including any air conditioner, refrigerator, chiller, or freezer." In today's proposed rule, EPA is proposing that this language also be used in the regulatory definition of appliance.

EPA interprets the Act's definition of appliance to include all the sectors of air conditioning and refrigeration equipment described under section III.A. above, including household refrigerators and freezers (which may be used outside the home), other refrigerated appliances, residential and light commercial air conditioning, transport refrigeration, retail food refrigeration, cold storage warehouses, commercial comfort air conditioning, motor vehicle air conditioners, comfort cooling in vehicles not covered under section 609, and industrial process refrigeration. (In sections 608(a) and 608(c) the Act refers specifically to "industrial process refrigeration," a term that is not defined. EPA believes that all refrigeration equipment categorized as industrial process refrigeration in section III.A. above also falls within the broad statutory definition of "appliance.")

The Act's definition of "appliance" has one minor limitation: The reference to the use of devices for "household or commercial purposes." While these purposes encompass virtually all uses of devices containing and using refrigerants, EPA does not believe that they encompass devices containing and using refrigerants that are designed for and used solely in a military application. Thus, the Act's definition of appliance does not appear to include, for example, a refrigeration unit designed only for and used only in a nuclear submarine. If, however, the refrigeration equipment used in a military application is identical to equipment used in a commercial application, then it is covered by the Act's definition. For example, a room air conditioner used on a military base is still considered an appliance even through the use of that particular piece of equipment may not be for commercial

or household purposes. Similarly, although a refrigerator in some other government facility is not used for household or commercial purposes, that refrigerator is still considered an appliance because that identical kind of equipment is used for household or commercial purposes in other contexts.

This interpretation is consistent with section 118 of the Act, which provides that "[e]ach department, agency, instrumentality of executive, legislative, and judicial branches of the Federal Government * * * shall be subject to, and comply with, all Federal, State, interstate, and local requirements, administrative authority, and process and sanctions respecting the control and abatement of air pollution in the same manner, and to the same extent as any non governmental entity." Section 618 of the Act explicitly provides that the requirements of Title VI concerning the protection of the stratospheric ozone layer "shall be treated as requirements for the control and abatement of air pollution within the meaning of section 118."

Although EPA believes that equipment designed and used exclusively for military purposes falls outside the definition of "appliance," EPA believes that it has the authority under section 608(a)(2) to regulate the use and emissions of refrigerant from such equipment. EPA requests comment on whether it should pursue such regulation.

Approved Equipment Testing Organization

EPA proposes to define Approved Equipment Testing Organization as any organization which has applied for and received approval from EPA to test recycling and recovery equipment.

Certified Refrigerant Recycling Equipment

EPA proposes to define Certified Refrigerant Recycling Equipment as equipment certified by an approved testing organization to meet EPA's final standards or equipment purchased before [6 months after publication of the final rule] that meets EPA's standards for grandfathered equipment.

High pressure Appliance

Because the physical properties of high, very high, intermediate, and low pressure refrigerants differ, EPA proposes to establish somewhat different requirements for technicians and equipment servicing high, very high, intermediate, and low pressure appliances. EPA proposes to define high-pressure appliances as appliances that uses a refrigerant with a boiling point between −50 and 0 degrees Centigrade at atmospheric pressure (29.9 inches Hg). This definition would include equipment using CFCs 12, 500, and 502, and HCFC 22.

Intermediate-pressure Appliance

EPA proposes to define intermediate-pressure appliances as appliances that use a refrigerant with a boiling point between 0 and 10 degrees Centigrade at atmospheric pressure (29.9 inches Hg). This definition would include appliances using CFC–114 and possibly blends of CFC–114 and other refrigerants.

Low Loss Fitting

EPA is proposing to require that recovery or recycling machines manufactured after [6 months after publication of the final rule], possess low loss fittings or positive shutoff devices. EPA proposes to define low loss fitting as any device that is intended to establish a connection between hoses, air conditioning and refrigeration equipment, or recovery or recycling machines and that is designed to close automatically when disconnected, minimizing the release of refrigerant from hoses, air conditioning or refrigeration equipment, and recovery or recycling machines.

Low-pressure Appliance

EPA proposes to define low-pressure appliances as appliances that use a refrigerant with a boiling point above 10 degrees Centigrade at atmospheric pressure (29.9 inches Hg). This definition would include appliances using CFCs 11 and 113, and HCFC 123.

Passive Recovery Device

As discussed above in the explanation of the term "active recovery device," EPA proposes to define a passive recovery device as a device that relies solely upon the compressor in a small appliance and/or upon the pressure of the refrigerant inside a small appliance to remove the refrigerant into an external container.

Person

EPA is proposing to require that refrigerant transferred between air conditioning or refrigeration equipment owned by different persons must be fully reclaimed. EPA proposes to define person as any individual or legal entity, including an individual, corporation, partnership, association, state, municipality, political subdivision of a state, Indian tribe, and any agency, department, or instrumentality of the United States, and any officer, agent, or employee thereof. This is identical to the definition used in the regulations concerning the production and consumption of ozone-depleting substances (40 CFR 82.3(r)).

Process Stub

EPA is proposing to require that small appliances and room air conditioners sold after July 1, 1993, be provided with a process stub to facilitate removal of the refrigerant at servicing. The Agency is proposing to define process stub as a length of tubing that provides access to the refrigerant inside a small appliance or room air conditioner and that can be resealed at the conclusion of repair or service.

Reclaim

EPA is proposing to adopt a slightly modified form of ASHRAE's definition of "reclaim." According to ASHRAE, to reclaim refrigerant is to:

> Reprocess refrigerant to new product specifications by means which may include distillation. Will require chemical analysis of the refrigerant to determine that appropriate product specifications are met. This term usually implies the use of processes or procedures available only at a reprocessing or manufacturing facility.

EPA is refining this definition to refer specifically to the ARI Standard 700–1988, Specifications for Fluorocarbon Refrigerants (included as Appendix A to the proposed rule) for the "New product specifications" and also for the appropriate type of chemical analysis to ensure that these specifications are met. For the Agency's purposes, the most important part of the definition of reclaim is the requirement to chemically analyze the final product to verify purity. Without such analysis and verification, the Agency will not consider refrigerant to have been reclaimed.

Recover

EPA also proposes to adopt ASHRAE's definition of "recover:" to remove refrigerant in any condition from a system without necessarily testing or processing it in any way.

Recycle

Although the Act's usage of the term "recycle" is very broad, encompassing, for instance, the term "reclaim" as defined above, EPA proposes to define the term more narrowly in its regulations. Once again, EPA is proposing to adopt ASHRAE's definition, with minor changes. ASHRAE states that to recycle is to:

> Clean refrigerant for reuse by oil separation and single or multiple passes through devices, such as replaceable core filter-driers, which reduce moisture, acidity and

particulate matter. This term usually applies to procedures implemented at the field job site or at a local service shop.

The key difference between "recycle" and "reclaim" is that the former does not involve chemical analysis of the product. Recycling essentially encompasses all types of treatment of refrigerant that do not involve such chemical analysis. As explained in a later section of this notice, EPA is proposing to require that all refrigerant changing hands must be fully reclaimed, implying that the vast majority of recycling will take place on site as opposed to at a local service shop.

Small Appliance

EPA is proposing to define as "small appliance" air conditioning or refrigeration equipment containing less than one pound of charge during normal operation. Equipment containing less than one pound of charge includes household refrigerators, household freezers, dehumidifiers, vending machines, and water coolers. EPA is also proposing special servicing and safe disposal requirements for these items. EPA requests comment on using the one-pound quantity to define them.

Technician

EPA is proposing a number of requirements that apply to technicians. EPA proposes to define technician as any person who performs maintenance, service, or repair to air conditioning or refrigeration equipment that could reasonably be expected to release CFCs or HCFCs into the atmosphere, e.g., installers, contractor employees, in-house service personnel, and in some cases, owners. Technician also means any person disposing of air conditioning or refrigeration equipment except for small appliances.

Very High Pressure Equipment

EPA proposes to define very-high pressure equipment as air conditioning and refrigeration equipment that uses a refrigerant with a boiling point below 50 degrees Centigrade at atmospheric pressure. This definition would include equipment using refrigerants 13 and 503.

F. Required Practices

EPA is proposing to require persons servicing or disposing of air conditioning and refrigeration equipment to observe certain service practices that minimize emissions of ozone depleting refrigerants. The most fundamental of these practices is the requirement to recover refrigerant rather than vent it to the atmosphere. As noted above, the knowing venting of class I or class II refrigerant during servicing or disposal (except for de minimis releases that accompany a good faith effort to recycle) is expressly prohibited by section 608(c) of the Act after July 1, 1992.

EPA proposes to define venting as any release to the environment of a class I or class II substance that takes place with the knowledge of the technician during the maintenance, servicing, repairing, or disposal of air conditioning or refrigeration equipment. De minimis releases, as discussed below, are not considered venting.

As noted above, section 608(c)(1) of the CAA prohibits the knowing venting of class I and class II substances from appliances or industrial process refrigeration during servicing and disposal. However, that section exempts "de minimis" releases associated with good faith attempts to recapture and recycle or safely dispose of these substances from the prohibition. In their statement prior to the passage of the Clean Air Act Amendments of 1990, the Senate managers explained that, "The exception is included to account for the fact that in the course of properly using recapture and recycling equipment, it may not be possible to prevent some small amount of leakage." (Congressional Record S16948 (October 26, 1990)). From this statement and the statutory text, EPA considers it appropriate to conclude that emissions accompanying the proper use of recapture and recycling equipment would generally be considered "de minimis." EPA therefore proposes to define as "de minimis" those emissions that take place at servicing and disposal when:

(i) The required practices set forth in § 82.158 of this proposed regulation are observed and when recovery or recycling machines that meet the requirements set forth in § 82.158 of this proposed regulation are used, or

(ii) The requirements of the MVAC regulation (40 CFR part 82 subpart B) are observed.

Such emissions represent the lowest achievable level of emissions, but because the requirements for recovery and recycling machines would vary somewhat from sector to sector and because the charge sizes involved vary considerably from sector to sector, the quantities considered de minimis would also vary from sector to sector.

1. *Evacuation of air conditioning and refrigeration equipment.* EPA proposes that before air conditioning and refrigeration equipment is opened for maintenance, service, or repair, the refrigerant in either the entire system or the part to be serviced (if the latter can be isolated) must be transferred to a system receiver (a component of the system that is designed to hold excess refrigerant charge and that can be used to hold the charge during servicing or repair) or to a certified recycling or recovery machine. The same requirements would apply to equipment that is to be disposed of, except for small appliances, room air conditioners, and MVACs, whose disposal is covered by Section III.L below. In order to ensure that the maximum amount of refrigerant possible is captured rather than released, EPA is proposing to require that air conditioning and refrigeration equipment be evacuated to or below specified levels of vacuum. The Agency has considered a number of factors in developing these levels, including the technical capabilities, ease of use, and costs of recycling and recovery equipment, the possible impact of evacuation on the air conditioning and refrigeration equipment, the servicing times that would be unnecessary to achieve different vacuums, and the amounts of refrigerant that would be released under different evacuation requirements and their predicted impact on the ozone layer (and indirectly, on human health and the environment). Characteristics of recycling and recovery equipment are discussed in more detail in section III.G; servicing times and the possible impact of evacuation on air conditioning and refrigeration equipment are discussed in section a. below.

The required level of evacuation would vary depending upon the type of equipment to be serviced or disposed of and the date of manufacture of the recovery or recycling machine (i.e., whether it met certification requirements for new equipment or had been grandfathered). For small appliances, the requirements would also vary depending on the capacities of the recovery system used under the circumstances (e.g., with an operating vs. a nonoperating refrigerator compressor).

a. Evacuation requirements for air conditioning and refrigeration equipment besides small appliances. When recovery and recycling machines manufactured or imported after [6 months after publication of the final rule], are employed for recovery, EPA is proposing to require evacuation to 0 inches of vacuum, 10 inches of vacuum, 20 inches of vacuum, 25 inches of vacuum, or 29 inches of vacuum, depending on the size and type of air conditioning or refrigeration equipment being serviced. If grandfathered recovery or recycling devices are used, EPA proposes to require evacuation to 0

inches of vacuum in very high pressure systems, 4 inches of vacuum in high pressure systems, and 25 inches of vacuum in low pressure systems and in systems utilizing CFC 114, because the grandfathered equipment may not be capable of achieving higher levels (see Section III.G.). The table below lists requirements for evacuation (pressure readings) for each type of air conditioning and refrigeration equipment and for certified and grandfathered recovery and recycling machines.

TABLE 1.—REQUIRED LEVELS OF EVACUATION FOR AIR CONDITIONING OR REFRIGERATION EQUIPMENT EXCEPT FOR SMALL APPLIANCES

Type of air conditioning or refrigeration equipment	Inches of Vacuum	
	Using recovery or recycling equipment manufactured before [6 mos. after publication of final rule]	Using recovery or recycling equipment manufactured on or after [6 mos. after publication of final rule]
High pressure equipment with a charge of less than 50 pounds ...	4	10
High pressure equipment with a charge of more than 50 pounds ...	4	20
Very high pressure equipment	0	0
Intermediate pressure equipment	25	25
Low pressure equipment	25	25 mm Hg*

*Pressures below 25 inches of vacuum are typically measured in millimeters (mm) or microns (μ) of mercury absolute rather than in inches of mercury vacuum. At standard sea-level atmospheric pressure (29.9 inches of mercury absolute), 25 mm of mercury absolute is approximately equal to one inch of mercury absolute or 29 inches of mercury vacuum. EPA proposes to use the absolute rather than relative measure here not only because this is the standard industry practice but because 29 inches of vacuum cannot physically be attained in areas where atmospheric pressure typically falls very near or below 29 inches of mercury absolute (e.g., areas at high elevation, such as Denver, Colorado).

i. Impact of vacuums on high-pressure air conditioning or refrigeration equipment. Some industry representatives on the STOPAC Subcommittee expressed concern that drawing vacuums on high-pressure equipment could have two adverse effects: (1) If air conditioning or refrigeration equipment is leaky, drawing a vacuum on the equipment may pull air and moisture into the equipment and from there into the recycling or recovery device, contaminating refrigerant and in some instances, limiting the depth of vacuum that can be achieved; and (2) when air conditioning and refrigeration equipment is opened for service after a vacuum has been drawn, air and moisture are drawn into the system in greater amounts than they are if the interior of the system is at atmospheric pressure. If these contaminants are not removed from the system, they can corrode equipment and cause it to fail.

As discussed below in section III.F.1.d., the Agency has attempted to provide for situations involving leaky equipment. Influxes of air and moisture caused by opening a system whose interior pressure is lower than atmospheric pressure may be addressed in two ways, according to industry sources. First, such influxes may be prevented by breaking the vacuum with dry nitrogen. This method, however, requires technicians to carry heavy nitrogen cylinders, a procedure that may be impractical for servicing equipment located on rooftops or other difficult to reach areas. Second, air and moisture may be removed from a system by drawing a second, deeper vacuum on the system after it is repaired. However, although drawing a second vacuum is standard industry practice, the time involved in drawing a deep vacuum discourages many technicians from achieving a vacuum deep enough to remove all the air and moisture that may have entered the system. Thus, a number of service companies recommend that their technicians evacuate high pressure systems only to atmospheric pressure, minimizing the intrusion of air and moisture.

EPA requests comment on the option of requiring technicians who service small high pressure systems, particularly those utilizing HCFC–22, to evacuate these systems only to atmospheric pressure. As is discussed further in section III.G. below, the Agency is generally willing to consider less stringent standards for equipment utilizing HCFC–22 because HCFC–22 has approximately five percent of the ozone depletion potential of CFCs 11 and 12. However, EPA believes strongly that larger systems and systems utilizing high-pressure refrigerants besides HCFC–22 should be evacuated to levels below atmospheric pressure. Large systems utilizing CFC–12 in particular may still contain several pounds of refrigerant at atmospheric pressure; for instance, a bank of compressors in a grocery store with a charge of 500 pounds of CFC–12 (a common quantity) will contain over 10 pounds of refrigerant at atmospheric pressure. For these and similar systems, EPA believes the quantity of refrigerant recovered by pulling a deeper vacuum justifies the extra labor required either to break the vacuum with nitrogen or to pull a second vacuum deep enough to remove all the air and moisture that may enter a system below atmospheric pressure. The Agency requests comment on this rationale and on the levels of vacuum proposed above.

ii. Servicing Times. EPA has also considered the amount of time technicians would have to spend on the job in order to achieve certain vacuums. Each additional unit of vacuum takes longer than the preceding one to achieve. Hence, a recovery or recycling machine that can achieve a 10 inch vacuum in a system in 15 minutes may require another 15 minutes to reach 12 inches, then another 15 minutes to reach 13 inches, etc. However, EPA discussions with industry indicate that in general, the vacuums specified above can either be achieved within a reasonable time period while the technician is on the job or overnight. (Evacuations of large systems are often performed overnight.) EPA requests comment on this finding.

b. Evacuation requirements for small appliances. For reasons discussed further in section EPA's proposed evacuation requirements for small appliances would depend upon whether an active recovery device (with a pump) or a passive recovery device (without a pump) were employed for refrigerant recovery.

Technicians using active recovery devices to recover refrigerant would be required to reduce system pressure to one atmosphere (0 psig) (equivalent to 90% capture of refrigerant at 70 F) in the sealed system. Because the recovery efficiency of passive recovery device is less dependent on a pressure reading than on a specific procedure, technicians using passive systems would be required to adhere to the servicing procedure certified for that recovery system. Certification of passive recovery devices and recovery procedures are discussed in more detail in section III.G.

c. Removal of entrained refrigerant from oil. In some cases, significant amounts of oil are left behind in a system after refrigerant has been recovered. In these cases, simply drawing the vacuums specified in table 1 above may not recover a high percentage of the refrigerant, because a large percentage of the refrigerant in a system may be entrained in the compressor oil. For instance, at 80 degrees F and atmospheric pressure, 50% of the volume of oil in a low pressure chiller is typically made up of refrigerant. EPA has two concerns regarding oil contaminated with refrigerant: (1) The refrigerant may be released once the system is opened and

the oil is exposed to the air, and (2) the eventual combustion of the oil (a common method of disposal) may create toxic compounds. The latter concern has led EPA to classify oil containing certain concentrations of CFCs or HCFCs as an off-specification fuel under its RCRA regulations. (Classification of oil as an off-specification fuel is discussed in more detail in section III.E.3.) The Agency has similar concerns regarding oil removed from the compressor during an oil change.

There are a number of methods for recovering refrigerant entrained in oil The ASHRAE Guideline 3 mentions two, recommending:

> When removing oil from the compressor, it is recommended that the crankcase be pumped down to atmospheric pressure to remove dissolved refrigerant prior to exposing the oil to the atmosphere. Refrigerant in solution may be further reduced by use of crankcase heaters (ASHRAE Guideline 3–1990, p. 7).

The Trane company has determined that through the use of heat and vacuum, refrigerant concentrations in centrifugal chiller oil can be reduced to one percent or lower.

Recent discussions with industry representatives indicate that these methods can be time-consuming and therefore costly. For instance, if a heat pump or air conditioner is not operational, it can take up to 24 hours for a crankcase heater to warm up fully, and the Trane method for removing low-pressure refrigerant from oil can take several days. In addition, the equipment necessary for transporting the oil and extracting the refrigerant can be cumbersome.

EPA requests comment on the potential of oil in the various industry sectors to emit CFCs and HCFCs during or after servicing, and on whether it would be appropriate to require technicians to follow procedures to extract refrigerant from oil before exposing the oil to the atmosphere or disposing of the oil. Are there methods for removing most if not all of the refrigerant that can be implemented relatively quickly? When would such methods be applied? Should they be required even for operations such as oil sampling, which involve withdrawing only a small fraction of the oil in a system? Are any of the current methods for removing refrigerant from oil powerful enough to reduce refrigerant concentrations below the levels that trigger designation as an off-specification fuel (4,000 ppm)? If so, even a somewhat complicated refrigerant recovery procedure may be preferable to generation of material that is difficult to dispose of.

EPA could require that refrigerant be extracted from oil when ease of recovery, high oil volumes, and/or high refrigerant concentrations made the effort worthwhile. One relatively simple approach would be to require technicians to hold the system at a vacuum for a period of time that would vary depending upon the type and size of equipment. As refrigerant evaporated out of the oil, the system pressure would rise. The technician would then be required to pump the system back down to the specified vacuum before opening the system for service. (Adding heat to the system could expedite this process.) Such a requirement would have the additional benefit of permitting any remaining liquid refrigerant in the system to evaporate and be recovered.

d. Evacuation of leaky equipment. Industry representatives on the STOPAC Subcommittee of recycling noted that in some cases, large leaks made it impossible to draw a deep vacuum on high-pressure air conditioning or refrigeration equipment. In such cases, EPA proposes to allow high pressure equipment to be evacuated to 0 psig (atmospheric pressure) instead of to the levels above. A large leak would be defined as one that lowers the pressure of a high pressure system to less than two atmospheres (60 inches of mercury absolute). Industry members stated that leaks smaller than this would not prevent evaluation to the level specified in Table 1 (Memorandum from Deborah Ottinger to the Record, "Meeting Between EPA and ASHRAE Representatives," November 19, 1992). EPA requests comment on this proposal.

2. *Leak Repair.* Although EPA will consider developing comprehensive regulations to reduce refrigerant leakage during equipment use in the next phase of rulemaking under section 608, the Agency requests comment on whether it should include in this rule a requirement to repair substantial leaks. Such a provision could require technicians servicing equipment that leaks more than 35% of its charge per year to find and repair the leak within some period of time, perhaps 30 days after the leak's discovery. While technicians would not be required to inspect for leaks outside of their normal servicing procedures, they would be required to repair leaks that they become aware of during such procedures (e.g., by noting that the charge was low by 35% or more). This provision would be an emergency, stop-gap measure to ensure that technicians repaired large leaks instead of repeatedly "topping off" systems with new refrigerant. A number of industry representatives have stated that the latter practice remains common, despite the increasing cost of refrigerant.

The Agency is suggesting the 35% figure because research on emissions from equipment in different sectors shows that this is five percentage points above the typical annual leak rate in the most leak-prone sectors. Rather than adopt a standard based on the annual leak rates in the leakiest sectors, however, EPA could establish different criteria for different sectors. For example, technicians would be required to repair leaks in chillers if they released more than 15% of the charge annually (chillers typically leak 10% of their charge per year), but they would not have to repair leaks in the retail food sector unless they released more than 35% of the total charge annually (refrigeration in the retail food sector typically leaks 30% of the charge per year). By using the typical leak rate of a given sector as a bench mark, the Agency is assuming that it represents an industry standard for the amount of leakage from normally maintained and operated equipment. Leaks that are significantly higher than this benchmark should be worth repairing according to most service technicians in the sector. While this approach falls short of establishing a lowest achievable level of emissions to the extent that typical industry practice falls short of that level, it would reduce leaks until needed additional analysis can be performed and regulations establishing lowest achievable levels of emissions during operation of equipment are promulgated.

3. *Disposition of Recovered Refrigerant.* EPA proposes to allow technicians considerable flexibility in the disposition of recovered refrigerant. The one restriction (besides the prohibition on venting) that EPA proposes to impose is that refrigerant transferred between equipment owned by different persons must be reclaimed. As discussed above in the Definitions Section, "reclaimed" means that the refrigerant is cleaned to the ARI 700–1988 standard of purity (Appendix A) and is chemically analyzed to verify that it meets this standard. (Technically, the refrigerant need not be reprocessed if chemical analysis shows that it already meets the ARI 700 standard of purity; however, this is seldom expected to be the case.) EPA proposes to implement this restriction by prohibiting the sale or offering for sale of class I and class II refrigerants that do not meet the ARI 700 Standard. In this requirement, EPA would codify the industry recommendation for refrigerant moved off-site. In fact, the requirement would apply the standard of purity set forth in

ARI 700 somewhat less restrictively than ARI itself, which states that the standard is intended for refrigerant transferred between any two pieces of equipment, even if they are owned by the same person. Under this proposed regulation, refrigerant moved between equipment owned by the same person, corporation, or governmental entity would not need to be either tested or treated. Thus, for instance, grocery store chains could move refrigerant from equipment in one store to equipment in another without treating it.

EPA proposes to focus on changes in ownership of refrigerant because such transfers introduce uncertainties into the marketplace regarding the purity of the refrigerant. Manufacturers of air conditioning and refrigeration equipment on the STOPAC Subcommittee for Recycling states that unless used refrigerant were chemically analyzed, there was a significant risk of contaminated or mixed refrigerant entering the market and ultimately damaging equipment on a large scale. Refrigerant reclaimers have reported finding a wide range of contaminants in used refrigerants delivered to them. Many of these contaminants (including other refrigerants) are not removed by standard recycling machines. EPA is concerned not only with the damage that contaminated refrigerant could cause, but with the reduction of consumer confidence in the quality of recycled refrigerant that might result. Slackened demand could lead to the stockpiling (and ultimately, the venting) of unwanted used refrigerant.

When refrigerant is moved from one piece of equipment to another but ownership does not change, the risks to equipment are still present, but a single owner is in the position to evaluate those risks and they do not present a problem for a market in which other consumers are purchasing the used refrigerant.

EPA is particularly concerned that, in the absence of a requirement to reclaim refrigerant before selling it to a new owner, these recycling requirements could encourage the development of "recycling centers" that accepted used refrigerant from a wide variety of sources without analyzing it. In such cases, uncertainty regarding the origin and purity of the refrigerant would be compounded by the participation of an intermediate party. In addition, if a recycler unknowingly mixed contaminated refrigerant into a larger batch, the potential for harm would be multiplied accordingly. Consolidation of batches also increases the likelihood of mixing different refrigerants. In either of these cases, the recycled refrigerant would be rendered unusable, making its release (either through damage to equipment or deliberate venting) far more likely. EPA requests comment on the likelihood that without regulation, recycling centers would arise and lead to the release of refrigerants into the environment.

EPA recognizes that private parties will continue to face strong incentives to ensure adequate refrigerant purity in the absence of any federal regulation. Purchasers of refrigerant have always had the incentive to ensure refrigerant purity; yet with the expected increase in refrigerant recycling, the cost of ensuring purity might increase. The risks by contaminated refrigerant may consist of damage to private property, specifically, potential harm to equipment caused by moisture-, acid-, or oil-contaminated refrigerant, decreases in equipment operating efficiency caused by mixed refrigerant, and loss of refrigerant caused by system rupture or irreversible contamination (e.g., mixture of CFC–12 and HCFC–22). These types of risks impose potential costs upon the private parties that would purchase reclaimed refrigerant, and so these parties would be expected to take steps to ensure purity to a level adequate for the intended use. Equipment owners, for example, could undertake a range of actions to ensure adequate refrigerant purity: Purchase used refrigerants only from reputable suppliers or technicians, insist upon contract provisions specifying technician or supplier guarantees to repair any equipment damaged by contaminated refrigerant, insist that used refrigerant meet some purity standard less stringent than ARI 700, or only use refrigerant that is fully certified to meet ARI 700.

The degree to which the purchasers of used refrigerant would undertake these actions will depend upon their awareness of the risks posed by contaminated or mixed refrigerants. Because the potential damage to equipment might only occur after months or years of operation, consumer awareness of the risks could trail actual equipment damage. This problem of inadequate information could, however, be addressed through EPA and industry efforts to educate potential consumers of refrigerants. EPA solicits public comment on the adequacy of the private party actions described above and potential EPA and industry educational efforts in minimizing the harm that may result from damage to private equipment from contaminated or mixed refrigerants.

Some members of the STOPAC subcommittee for recycling suggested that EPA address cross-contamination concerns through a less stringent requirement than requiring reclamation of all refrigerant transferred between owners. One alternative would be to require reclamation only when refrigerant was moved between equipment of different types. Such a restriction would allow contractors servicing a single type of equipment to consolidate and transport the refrigerant to their shops for "off-site" recycling. The contractors could then sell the refrigerant to other customers using the same type of equipment, but sales of recycled refrigerant to anyone but end-users would be prohibited. This requirement would be especially advantageous for contractors who service small equipment, for instance, home unitary air conditioners (central air conditioning units) utilizing HCFC–22. While recycling machines are capable of processing 50 pounds of refrigerant at once, the charge in home unitary air conditioners ranges between four and seven pounds. Thus, allowing contractors to consolidate refrigerant would permit them to use their recycling machines more efficiently than they could if they were required to process each owner's refrigerant separately. Moreover, because 1–2 pounds of refrigerant is usually left behind in recycling equipment after each job is complete, substantial mixing occurs even with on-site recycling. The purity gained by allowing only on-site recycling may therefore not justify the additional expense that this option entails.

However, although transfers of refrigerant between similar pieces of equipment are less likely to lead to cross-contamination than transfers between different types of equipment, EPA has several concerns about this option. First, if limited off-site recycling is permitted, it may be difficult to distinguish between legitimate and illegal use of the recycling machines. Recycling centers selling refrigerant to walk-in customers may find it easy to masquerade as contractors recycling refrigerant only to recharge their customer's equipment. Second, defining "types" of equipment within which transfers of refrigerant could proceed may present problems. Should distinctions be based on size, possession of hermetic vs. open-drive compressors, or some other characteristic? Third, there is no industry standard for the ability of recycling machines to clean refrigerant. While the ARI 740 Standard for Recycling Equipment includes a test for cleaning ability, it does not set any minimum level of performance in this

area. Thus, there is currently no guarantee that an individual recycling machine is capable of removing even those contaminants, such as acid and water, that recycling machines are theoretically capable of removing. In the future a "clean-up" standard may be developed; with EPA's encouragement, ARI has taken preliminary steps in this direction. If and when such a standard is developed, EPA will view off-site recycling with more confidence.

EPA requests comment on the option of permitting limited off-site recycling. Could the Agency design its program in such a way as to prevent the development of "Recycling centers" that do not analyze the refrigerant they sell? How? What criteria would EPA use to distinguish between equipment types? Finally, should even limited off-site recycling be permitted in the absence of a "clean-up" standard for recycling equipment?

Some members of the STOPAC argued that EPA should allow sales of recycled (as opposed to reclaimed and therefore, chemically analyzed) refrigerant as long as the refrigerant is labelled as such. However, since the label would only indicate that the refrigerant had been used, not what its chemical contents were, EPA does not believe that a labelling requirement would sufficiently inform the purchaser of refrigerant of the risks associated with its use. This rule will dramatically increase the volume of used refrigerant on the market, and many purchasers will not be familiar with the hazards that may be associated with used refrigerants that have not been analyzed, e.g., residuals from hermetic motor burnouts, improper identification, incompatibility of lubricants, etc. Thus, EPA believes that the integrity of the market for used refrigerant is best served by requiring that the purity of the refrigerant be chemically verified before refrigerant is sold to a new owner.

Refrigerant that is not sold to a new owner would not have to meet any standard of purity under section 608. When refrigerant is returned to the equipment from which it is removed, it is frequently not necessary either to test or to treat the refrigerant. ASHRAE Guideline 3–1990 states, "refrigerant withdrawn from equipment so that routine service or major overhaul can be performed can usually be returned to the equipment without reprocessing," and this guidance was confirmed by several members of the STOPAC Subcommittee for Recycling. As long as recovered refrigerant does not change hands, therefore, EPA considers it reasonable to leave treatment to the discretion of the service technician.

4. *RCRA Regulations Regarding the Management of CFCs and CFC-Contaminated Wastes.* This section is intended to give an overview of EPA's hazardous waste regulations as they affect refrigerant recovery, recycling, and reclamation. Throughout this section the terms recovery, recycling, and reclamation are used as defined previously in section III.D. of today's proposed rule and not as defined in the Resource Conservation and Recovery Act (RCRA).[1] The regulations described in this section are not part of this rulemaking. Individuals with questions regarding them should call the RCRA Hotline at 1–800–424–9346 or 701–920–9810.

a. Refrigerants. Due to a previous rulemaking (see 56 FR 5910, February 13, 1991) and the July 28, 1989, **Federal Register** notice clarifying the applicability of RCRA Subtitle C regulations to CFC refrigerants (54 FR 31335), used CFC refrigerants from totally enclosed heat transfer equipment, including mobile air conditioning systems, mobile refrigeration, and commercial and industrial air conditioning and refrigeration systems that use chlorofluorocarbons as the heat transfer fluid in a refrigeration cycle are not hazardous wastes provided the refrigerant is recycled or reclaimed for further use. If these CFCs are not recycled or reclaimed, it is the generator's responsibility to test the waste or apply knowledge of the waste to determine whether the waste exhibits a characteristic of hazardous waste (see 40 CFR Part 262 for standards applicable to generators of hazardous waste, especially 40 CFR 262.11, "Hazardous waste determination"). In the July 28, 1989, notice, EPA concluded that, in circumstances where something outside the realm of normal practice may cause a CFC refrigerant to exhibit a characteristic (e.g., compressor burnout), generators may need to determine, using testing or knowledge, whether the waste is hazardous. EPA was concerned that CFCs may break down at high compressor temperatures, forming hydrochloric acid, and may exhibit the characteristic of corrosivity. If the spent refrigerant is mixed with a listed or characteristic hazardous waste (e.g., degreasing fluid or solvent), then the mixture may also be hazardous.

b. *Byproducts of Refrigerant Recovery and Recycling.* Two of the byproducts of refrigerant recovery and recyling may be hazardous waste: Used oil and used replaceable core filter driers. Generators of single and multiple pass through devices such as replaceable core filter-driers are subject to the RCRA hazardous waste determination requirement (40 CFR 262.11). If the generator determines that the spent pass through device is a hazardous waste, then it must be managed in accordance with RCRA Subtitle C requirements.

As part of the CFC recycling process, used oil is separated from the CFCs. Used oils that are removed from refrigeration units and that are contaminated with CFCs are exempt from the rebuttable presumption of mixing with hazardous waste. The rebuttable presumption of mixing, however, applies to used oil contaminated with CFCs that have been mixed with used oil from processes other than refrigeration units. (See 40 CFR 279.10(b)(ii)(B) and 40 CFR 279.44(c)(2). Thus, generators of used oil that is contaminated with CFCs from refrigeration units may wish to keep this oil separate from other used oil and retain records documenting the source of the oil. (Such recordkeeping, however, is not required.)

Used oil separated from CFCs during refrigerant recycling is subject to the newly finalized part 279 requirements for recycled used oil management standards (57 FR 41566, September 10, 1992). If used oil is destined for disposal, the generator has the responsibility to test or apply knowledge to determine whether the used oil exhibits one or more of the characteristics of hazardous waste. (See 40 CFR part 279, subpart I, Standards for use as a Dust Suppressant and Disposal of Used Oil.)

Used oils that remain after the CFC recovery step and that are recycled are subject to 40 CFR part 279 requirements as applicable. Under RCRA subtitle C regulations, used oil that is recycled by being burned for energy recovery is subject to 40 CFR part 266, subparts E and H. The 40 CFR part 266, subpart E requirements are included in new part 279 of 40 CFR. (See 40 CFR part 279, subparts B, G, and H.)

(1) Used Oil Fuel Specifications. Used oil that fails to meet used oil fuel specifications in the new 40 CFR 279.11 and 279.60(c) (current 40 CFR 266.40(e)[2]) may be burned only in

[1] As stated in RCRA regulations, material is "recycled" if it is used, reused, or reclaimed (40 CFR 261.1(c)(7). A material is "used or reused" if it is either employed as an ingredient (including use as an intermediate) in an industrial process to make a product or employed in a particular function or application as an effective substitute for a commercial product (40 CFR 261.1(c)(5)). A material is "reclaimed" if it is processed to recover a usable product, or if it is regenerated (40 CFR 261.1(c)(4)).

[2] Used oil that exceeds any of the following specification levels is considered to be "off-

industrial boilers and furnaces, as defined in 40 CFR 261.10 and 266.41(b). Under the new 40 CFR 279.63(b) (current 40 CFR 266.40)c)), used oil to be burned for energy recovery that contains more than 1,000 ppm of total halogens is presumed to be hazardous waste because it has been mixed with halogenated hazardous waste listed in 40 CFR part 261, subpart D (e.g., F001, which includes chlorinated fluorocarbons used as solvents). Used oil that contains greater than 1,000 ppm total halogens for which the presumption cannot be rebutted or used oil for which the generator chooses not to rebut the presumption is subject to regulation under subpart H of 40 CFR part 266, Hazardous Waste Burned in Boilers and Industrial Furnaces. The presumption may be rebutted by showing that the used oil does not contain concentrations in excess of 1,000 ppm of halogenated hazardous constituents listed in 40 CFR part 261, appendix VIII or that the constituents are only hazardous waste generated by conditionally exempt small quantity generators subject to 40 CFR 261.5.

Appendix VIII of 40 CFR part 261 identifies CFCs used as solvents as a hazardous constituent. Thus, a chemical analysis may indicate that used oil containing a spent CFC (in concentrations exceeding 1,000 ppm) used as a refrigerant (rather than as a solvent), is a hazardous waste under the rebuttable presumption at 40 CFR 279.11 and 279.60(c), (current 40 CFR 266.40(e)) when, in fact, the CFCs are not derived from a listed hazardous waste. Demonstrating that the CFCs in the used oil result from a refrigerant use rather than from mixture with a listed hazardous waste may rebut the presumption. Once used oil from refrigeration units is mixed with used oil from other sources, one way to rebut the presumption could be to maintain records of chemical analysis for each generated wastestream, although EPA does not require this chemical analysis and recordkeeping. Then, non-refrigerant wastestreams containing CFCs could be eliminated from acceptance for commingling with used oil destined for burning for energy recovery as a used oil fuel.

(2) Used Oil Fired Space Heaters. As discussed in 40 CFR 278.23 (a) and 40 CFR 279.62 (a) and (b) (current 40 CFR 266.44(b)), owners and operators of used oil-fired space heaters that burn used oil fuel under the provisions of § 266.41(b)(2) are exempt from notification requirements of Section 3010 of RCRA. Off-specification used oil fuel may be burned for energy recovery in used oil-fired space heaters provided that: the heater burns only used oil that the owner or operator generates or used oil received from do-it-yourself oil changers who generate used oil as household waste; the heater is designed to have a maximum capacity of not more than 0.5 million Btu per hour; and the combustion gases from the heater are vented to the ambient air. For example, the generator could be the owner of the refrigeration equipment as well as the service person or company who, in servicing the equipment, collects the used oil. Then, the service person or company may burn the used oil provided that the owner or operator can successfully rebut the presumption at 40 CFR 279.66(a) (current 40 CFR 266.40(c)).

c. Refrigerant Reclamation. Used oil separated from CFCs during reclamation is managed in the same manner as used oil separated from CFCs during recycling (see Refrigerant Recycling section). The generator has the responsibility to determine whether residuals (including used oil) generated during reclamation are hazardous. If the residuals consist of a mixture of CFCs, used as refrigerants, and other solvents listed in 40 CFR part 261, subpart D, then the residuals from CFC reclamation would be a listed hazardous waste (see 40 CFR 261.3(a)(2)(iii)). If the residuals from CFC reclamation exhibit one or more of the characteristics of hazardous waste, then the residuals are a characteristic hazardous waste (see 40 CFR part 261, subpart C).

d. Used Refrigerant Oil. Thus far, this portion of the preamble has provided an overview of RCRA regulations with respect to refrigerant CFCs that have been recovered or will be recycled or reclaimed. Used oils, drained from refrigeration units, will be subject to the same regulations discussed above for used oils separated from CFCs during recycling and reclamation. For an additional discussion of regulations applicable to used oil and used oil filters, see 57 FR 21524, May 20, 1992.

5. Handling Multiple Refrigerants in Recycling and Recovery Equipment. Under ordinary circumstances, one to two pounds of refrigerant may be left behind in a recycling or recovery device after the device is discharged back into the original equipment or into another container. Unless it is removed from the recovery or recycling machine using special methods, this refrigerant will contaminate the next batch of refrigerant recovered by the machine. If the first and second refrigerants are different (e.g., HCFC–22 and CFC–12), this mixture will become unusable, and will have to be disposed of.

EPA requests comment on whether or not it should require technicians to remove residual refrigerant from recycling and recovery machines when these machines are switched between refrigerants. Methods that may be used to remove residual refrigerant include evacuation using a second recovery device, heating the condenser of the recovery or recycling machine using a heat gun, or cooling the container (and/or tubing to it) to which the recovery or recycling machine is evacuated. Another option that would prevent mixture of refrigerants would be to require separate condensers for each refrigerant on recovery or recycling machines intended for use with multiple refrigerants. This, however, would increase the cost of the recovery or recycling machines. EPA requests comment on the effectiveness and practicality of procedures for evacuating refrigerants from recycling and recovery devices.

G. Certification of Recycling and Recovery Equipment

In order to ensure that recycling and recovery equipment on the market is capable of limiting emissions of CFCs and HCFCs, EPA is proposing that recovery and recycling equipment manufactured or imported on or after [6 months after publication of the final rule], be tested and certified by an EPA-approved laboratory or organization. The Agency proposes to require verification of performance in two areas that affect total recovery efficiency: (1) Vapor recovery efficiency and (2) efficiency of noncondensable purge devices on recycling machines. In addition, EPA is proposing to require that equipment and hoses be fitted with shutoff valves or low-loss fittings.

In addition to the initial testing, manufacturers would have to have their equipment models tested or inspected at least once every three years to ensure that no changes had been made to the design that might prevent the equipment from meeting EPA requirements. Such "follow-up" programs are standard in equipment testing programs throughout industry. Manufacturers and importers would also have to place a label on each piece of certified equipment indicating that it is certified and showing which organization tested and certified it. This label would inform both consumers (technicians) and EPA enforcement personnel that the equipment met EPA standards.

---

specification" used oil under 40 CFR 266.40(e): Arsenic—5 ppm, Cadmium—2 ppm, Chromium—10 ppm, Lead—100 ppm, Flash Point—100°F minimum, Total Halogens—4000 ppm.

1. Standards for Recovery and Recycling Machines Intended for Use With Air Conditioning and Refrigeration Equipment Except Small Appliances

a. *Recovery efficiency.* In developing proposed levels of evacuation, EPA has considered the technical capabilities, ease of use, and costs of recycling and recovery equipment, the servicing times that would be necessary to achieve different vacuums, and the amounts of refrigerant that would be released under different evacuation requirements and their predicted impact on the ozone layer (and therefore, on human health and the environment). The Agency has attempted to evaluate these factors in both the short and the long term, considering the capabilities of both existing and possible future equipment. Often the factors are interrelated; for instance, more powerful recovery and recycling machines are often more expensive, but they also reduce the time that the technician must spend evacuating the system.

The relationship between the depth of vacuum drawn and the percentage of refrigerant that is recovered by recycling or recovery equipment varies from refrigerant to refrigerant. For HCFC–22, a vacuum of approximately 9 inches of mercury must be drawn in order to recover 99 percent of the refrigerant in the system. For CFC–12, vacuum of approximately 17 inches must be drawn to recover 99 percent of the refrigerant. For low-pressure refrigerants, such as CFC–11 and HCFC–123, much deeper vacuums must be drawn in order to achieve 99 percent recovery; for instance, a vacuum of 28 inches must be achieved in order to recover 99 percent of the CFC–11 in a system.

EPA surveyed manufacturers of recovery and recycling machines in order to ascertain the technical capabilities, prices, and availability of the equipment. Recycling and recovery machines can be divided into six major categories, depending upon the type of air conditioning or refrigeration equipment that they are intended to service. These categories include recovery or recycling machines intended to service: (1) Small appliances (discussed in section III.F.2 below), (2) high-pressure equipment with a charge of less than 50 pounds (e.g., residential and light commercial air conditioning), (3) high-pressure equipment with a charge of more than 50 pounds, (4) intermediate pressure equipment, (5) low-pressure equipment and (6) very high pressure equipment. Each of these categories varies in price and ability to draw vacuum. In addition, portability is of steadily lessening importance as one moves from the first to the fifth categories.

EPA's survey indicated that currently available recovery and recycling machines intended for use with small high-pressure equipment are capable of drawing vacuums of between 9.9 and 29.8 inches of Hg vacuum. The more efficient equipment appears to be competitively priced; while models drawing approximately 10 inches of mercury ranged in price between $4,180 and $17,493, models drawing over 29 inches of mercury ranged in price between $1,316 and $6,700 (RIA). (The price of recovery and recycling machines appears to depend more on recovery rates, capacity, and number of refrigerants handled than on recovery efficiency.)

However, the survey showed that the more efficient equipment probably could not be available in large quantities by the time the equipment certification requirements become effective. This result has been confirmed by a number of representatives of industry on the STOPAC Subcommittee for Recycling, who have stated that most models of recovery and recycling machines currently on the market are incapable of drawing more than 10 inches of vacuum without risking damage to the machine's compressor. According to these representatives, the relatively light, small recovery and recycling machines intended for use with small high pressure systems usually have hermetic compressors, which tend to overheat when drawing deep vacuums. This equipment also has difficulty working against the large difference in pressures (compression ratio) that must be overcome in order to achieve deeper vacuums. Thus, EPA is proposing to require that recovery or recycling machines intended for use with small high-pressure systems are able to draw a 10-inch vacuum.

Some industry representatives have stated that most recovery or recycling machines currently available would have difficulty drawing more than a 4-inch vacuum on equipment using HCFC–22, because compression ratios at deeper vacuums become quite large for HCFC–22. The Agency requests comment on the alternative of requiring recovery or recycling machines intended for use with small systems using HCFC–22 to draw a 4-inch vacuum. EPA is willing to consider a less stringent standard for recycling and recovery machines used with small systems utilizing HCFC–22 not only because of technical limitations but because HCFC–22 has only approximately five percent of the ozone-depletion potential of CFC–11 and CFC–12.

If more efficient equipment becomes widely available, EPA may evaluate the need for a higher standard for small, high-pressure equipment in the more distant future. EPA requests comment on the possible future availability of portable, cost-effective recovery and recycling machines able to draw more than 10 inches of vacuum and the costs of requiring such equipment. Not only does EPA's survey indicates that the technology exists, but some industry members have stated that recovery and recycling machines utilizing open-drive, two-stage compressors would be able to achieve deep vacuums without significantly compromising portability or increasing cost.

Recovery and recycling machines used to evacuate larger high-pressure systems are capable of drawing vacuums of between 15 and 29 inches, according to EPA's survey. These machines are typically larger and more powerful than machines used with residential equipment because larger charge sizes necessitate both higher recovery rates and higher recovery efficiencies. In addition, portability is of somewhat less importance for large commercial than for residential applications because technicians in large commercial applications are less likely to have to carry recycling and recovery equipment up ladders and through narrow doorways. Because EPA's survey indicated that the majority of equipment currently available in this application draws vacuums closer to 20 inches than to 29 inches, EPA is proposing to require equipment in this application to draw a vacuum of 20 inches. EPA requests comment on this proposal and on the current and future availability of recovery or recycling machines intended for use with large high pressure equipment that can draw vacuums of more than 20 inches. As with recovery and recycling machines intended for use with smaller equipment, EPA may consider setting a stricter standard for recovery and recycling machines used with large equipment in the future.

EPA's survey indicated that recovery and recycling machines used to service low-pressure centrifugal chillers are capable of drawing vacuums between 25.5 and 29.8 inches. The survey examined equipment in the two most common capacities for this application, 1,600 pounds and 3,400 pounds. For both the 1,600 and 3,400 pound capacities, the most efficient equipment is somewhat more expensive than the least efficient equipment; however, in both cases it possesses other features

besides high efficiency that are probably important to price (e.g., a high horsepower motor and a high recovery rate). More important, the social costs avoided by using the more efficient equipment (i.e., the damage to human health and the environment that would be caused by refrigerant released by the less efficient equipment) outweigh the price difference (Regulatory Impact Analysis). Thus, EPA is proposing to require that recovery or recycling machines intended for use with low pressure equipment reduce the system pressure to 25 mm of Hg (generally equivalent to a vacuum of 29 inches). EPA requests comment on this proposed level of evacuation.

EPA considered defining low-pressure equipment to include equipment utilizing CFC-114, but the physical characteristics and special applications of this refrigerant appear to justify a separate classification, "intermediate pressure equipment." CFC-114 has a vapor pressure between those of low-pressure refrigerants and those of high-pressure refrigerants. At a given level of evacuation, therefore, a higher percentage of 114 is recovered than would be recovered of CFC 11. Evacuation to 25 inches of Hg vacuum represents recovery of over 99% of the refrigerant in a 114 chiller. EPA is therefore proposing that CFC–114 and other intermediate pressure refrigerants (e.g., blends of CFCs–114 and –12) be evacuated to 25 inches of vacuum. The Agency requests comment on this proposal.

The requirements described above for high-pressure equipment would apply to equipment utilizing refrigerants 12, 22, 500, and 502. Refrigerants 13 and 503 are used in very low temperature applications and have very high pressures at ambient temperatures (e.g., 500 psia at 75 degrees F). Evacuating these refrigerants to the vacuums proposed for high pressure refrigerants would require recycling and recovery equipment to work against very high compression ratios, and over 99% of a very high pressure refrigerant can be recovered by evacuating it to atmospheric pressure. Thus, the standards and equipment appropriate for the recovery and recycling of the high pressure refrigerants are not appropriate for very high pressure refrigerants. ARI has recommended that EPA require evacuation of R–13 and 503 to atmospheric pressure (At 75 degrees F), and EPA is proposing to adopt this recommendation. ARI has also noted that an especially strong recovery container will be needed to recover these very high pressure refrigerants. EPA requests comment on the procedures, equipment, and level of evacuation appropriate for recovering or recycling very high pressure refrigerants.

Following is a table listing the evacuation levels that must be achieved by the various types of recovery and recycling equipment.

TABLE 2.—LEVELS OF EVACUATION WHICH MUST BE ACHIEVED BY RECOVERY OR RECYCLING MACHINES INTENDED FOR USE WITH AIR CONDITIONING OR REFRIGERATION EQUIPMENT

[Except for Small Appliances]
[Manufactured on or after (6 months after publication of the final rule)]

Type of air conditioning or refrigeration equipment with which recovery or recycling machine is intended to be used	Inches of vacuum
High Pressure Equipment with a Charge of Less than 50 Pounds.	10
High Pressure Equipment with a Charge of More than 50 Pounds.	20
Very High Pressure Equipment	0
Intermediate Pressure Equipment	25
Low-pressure Equipment	25 mm Hg

A few types of recycling and recovery equipment do not use an on-board compressor to remove refrigerant from the air conditioning or refrigeration equipment. One model that has been brought to EPA's attention relies on the system compressor to evacuate the refrigerant, similar to the passive recovery devices used to evacuate refrigerators and freezers (discussed below). Another model uses an inert gas to push refrigerant out of the system and into the recovery device. EPA requests comment on how to evaluate the recovery efficiency of these two and other possible devices.

The Agency is concerned that it would not be possible to ensure the performance of the first type of equipment because that performance would depend upon the system compressor, which would vary from job to job. The worst case would arise when the system compressor was not operating at all, in which case the efficiency of the equipment would probably be quite low. Although the technician in such a situation could theoretically return to his shop to pick up a recovery or recycling machine with an on-board compressor, EPA is concerned that this process would prove too time-consuming to depend upon in practice. EPA requests comment on these issues.

Because the second type of equipment does not depend upon any external equipment during the recovery process, it should be possible to use laboratory tests to gauge its recovery efficiency in the field. One method of measuring the efficiency might be to use a mass-balance approach, weighing the recovery equipment and the air conditioning or refrigeration equipment before and after the recovery procedure and subtracting the mass of the introduced inert gas. Such a method would require that the refrigerant be distinguishable from the inert gas. EPA could approve the equipment if it achieved at least the recovery efficiency of comparable compressor-bearing equipment (between 98.5–99.5%). Although EPA is not proposing this method at this time, the Agency requests comment on this method of ensuring the recovery efficiency of this and other types of recovery or recycling equipment.

b. *Refrigerant recovery rates.* Some representatives of industry on the STOPAC Subcommittee for Recycling have encouraged EPA to set minimum standards for liquid and vapor recovery rates, arguing that technicians will be less tempted to interrupt a swift recovery than a slow one (Letter from Bruce Siebert, the Trane Company, to Deborah Ottinger, Office of Air and Radiation, August 14, 1991). EPA is not proposing minimum recovery rates as a lead option in today's proposed rule. The Agency believes that, given the proposed requirements for evacuation and the growing value of refrigerant, contractors and technicians have sufficient incentive to purchase equipment with recovery rates adequate for their needs. However, EPA requests comment on the need for minimum recovery rates and on what those recovery rates might be for different types of air conditioning and refrigeration equipment.

c. *Low loss fittings.* Low loss fittings or positive shutoff connections prevent refrigerant from escaping from hoses and equipment during connection and disconnection of recovery and recycling machines. EPA analysis indicates that shutoff valves for both high-pressure and low-pressure systems are cost-effective, and in the case of low-pressure systems, actually save the user money (RIA). EPA is therefore proposing to require that hoses on recovery and recycling machines be equipped with low loss fittings. EPA requests comment on this proposal.

d. *Purge loss.* Most recycling machines (but not recovery machines) are equipped with air purge devices, which vent air and other noncondensable contaminants from refrigerant. Because some refrigerant tends to vaporize and mix with the air, some refrigerant also escapes during the purging process. EPA is proposing to limit the quantity of refrigerant that

could be allowed to escape during purging to 5% of the quantity being recycled (under the conditions of the ARI 740 test for recovery and recycling machines). Preliminary EPA analysis indicates that this is probably the most demanding standard that most existing recycling machines can meet (RIA). However, some industry representatives have stated that competitively priced machines are capable of meeting a higher standard, perhaps 3%. Because even 2% of a large charge can be a significant amount (2% of a thousand-pound charge is 20 pounds), EPA is considering a 3% (or still lower) limit as an alternative. Another alternative would be to require gradually higher standards over time, beginning with 5%, and decreasing that quantity by one percent per year until a level of two or three percent is achieved. EPA requests comment on the current and future availability, technical capacities, and costs of more efficient purge devices for recycling machines and on the appropriate limits for percentage of refrigerant released during the air purging process.

e. *Volume-sensitive Shut-off.* Some members of the STOPAC Subcommittee for Recycling have recommended that EPA include a requirement that storage cylinders on recycling and recovery equipment be equipped with a switch that would automatically stop the recovery operation when 80% of the available volume in the storage section contains liquid refrigerant at 70 degrees F. This is a safety feature that would prevent overfilling of storage vessels; filling beyond the recommended maximum level of 80% can lead to explosion of the cylinder when its temperature rises to levels common in storage areas during the summer. EPA is not proposing to make possession of such a device a requirement for equipment certification in its lead option, but the Agency requests comment on this option. The Agency specifically requests comment on the cost and reliability of volume-sensitive switches.

2. Standards for Recovery Machines Intended for Use With Small Appliances

a. *Recovery efficiency.* EPA is proposing somewhat less stringent recovery efficiency standards for household refrigerators, household freezers, and other small appliances containing less than one pound of refrigerant, such as vending machines, dehumidifiers, and water coolers. In this sector charge sizes are small and servicing is rare, making total emissions during servicing low relative to those in other sectors. High recovery efficiencies in the home refrigerator sector are accordingly less likely to justify the cost of highly efficient recovery equipment. In many cases, service shops perform service requiring entrance into a sealed system of a refrigerator only once or twice a year. For these shops, investment in a several thousand dollar recovery machine with a 99% total efficiency rather than a recovery system costing hundreds of dollars (or less) with a 90% efficiency would avoid the emissions of less than two ounces of refrigerant per year, or less than ten ounces of refrigerant over the five year lifetime of typical recovery equipment. EPA does not believe that the environmental impact of these emissions would justify the expense of the more efficient machine.

There are several different recovery devices designed specifically for use with household refrigerators and freezers. These designs can be divided into two main types: active and passive. Active equipment, like most recovery equipment intended for use on larger systems, has its own compressor to pump refrigerant out of the refrigerator system. Passive equipment relies upon the compressor in the refrigerator and/or the pressure of the refrigerant to recover the refrigerant. Passive equipment usually requires a smaller capital investment than active equipment, but it is also usually less efficient. While a pump can consistently deliver efficiencies above 90%, passive technologies generally have efficiencies of approximately 90% when they are used with an operating refrigerator compressor, and between 60–80% when they are used with a non-operating compressor.

EPA has analyzed the cost-effectiveness of four different recovery systems, one active and three passive (RIA). These are the GE Pump (active), and the Whirlpool Bag, the Amana Carbon Adsorption System, and the chilled cylinder (passive). EPA investigated both the private and social costs of each system, considering equipment costs (both capital and operating), technician time, and equipment efficiencies. Private and social costs are expressed respectively in $/job and $/kg of CFC recovered. For most of the recovery technologies, these costs decline as the number of jobs a shop performs per year rises, because fixed capital costs are spread out over a larger volume.

EPA's analysis shows that for shops performing less than 20 jobs per year, passive technologies are the most cost-effective from both private and social perspectives. On the other hand, for shops performing more than 50 jobs per year, the active technology is the most cost effective from both perspectives. This is because one-time capital costs make up a relatively large percentage of total costs for the pump, and these capital costs do not increase with the number of jobs. Because efficiency is a factor in determining social costs, the more efficient pump is the also most cost-effective from a social perspective for shops performing between 20 and 50 jobs per year. For a private perspective, passive technologies are less expensive in this range, but only marginally so. For instance, the least expensive technology for shops performing 20 jobs per year (the Whirlpool Bag) was estimated to cost approximately $11.00 per job, while the GE pump was estimated to cost approximately $14.00 per job.

This analysis suggests that more efficient active systems should be mandated for shops servicing more than 20 systems a year. However, this result is sensitive to initial assumptions regarding (1) the efficiency of the equipment, which, especially for passive systems, can vary considerably depending upon the conscientiousness of the technician, (2) the price of the equipment, which is likely to change, (3) servicing times, which may vary considerably between technologies (EPA's analysis assumed that servicing times were roughly equal for all systems but the chilled cylinder), and (4) the utilization rate of the equipment, which may vary according to not only the number of jobs a shop performs per year but the ability of each shop's personnel, trucks, and other equipment to specialize in sealed system service. Relatively small changes in any of these parameters could alter the outcome of the analysis, and the most likely changes in the last two parameters would tend to reverse the conclusions. Thus, EPA is proposing to allow shops servicing small appliances to use either active or passive recovery devices, as long as those devices meets the minimum standards set forth in the paragraph below, and as long as the technician adheres to the servicing procedures specified for that equipment. However, EPA requests comment on the option of requiring that shops performing service on more than 20 (or some other appropriate figure) sealed systems per year use a pump rather than one of the passive systems to recover refrigerant. EPA also requests comment on the proposed one-pound limitation, on this analysis, and on the other regulatory options presented here.

EPA is proposing that minimum standards for total recovery efficiency for passive systems be set at 90% when

used with an operating refrigerator compressor and 80% when used with a nonoperating refrigerator compressor. As noted previously, passive equipment is generally capable of meeting these standards. The conditions under which the recovery device achieves these efficiencies in the test situation must reflect those that can be realistically implemented in the field.

EPA has some special concerns regarding carbon adsorption as a recovery technology. EPA's information indicates that it is difficult to recover adsorbed CFCs in a form suitable for reclamation, implying that adsorbed CFCs may seldom be recovered or reused. If CFCs remain bound to the carbon, they do not pose any immediate environmental concerns, but they are no longer available to a market where they will soon be in great demand. If CFCs escape from the carbon over time, they also pose an environmental threat. In either of these cases, the value of the adsorbed CFCs is considerably less than that of CFCs that are recovered in a manner that allows them to be reclaimed, indicating that carbon adsorption should be discouraged. EPA requests comment on the practicality of reclaiming adsorbed CFCs, on the fate of adsorbed CFCs that are not recovered and reclaimed, and on whether carbon adsorption should be permitted as a recovery technology.

3. Possible Standards for Recycling and Recovery Machines Used With Equipment Identical to MVACs

Some of the air conditioners that would be covered by this proposed rule are identical to MVACs, but they are not covered by the MVACs rule under section 609 of the Act because they are used in vehicles that are not defined as "motor vehicles." These air conditioners include many systems used in boats, airplanes, construction equipment, and farm vehicles. Like MVACs in cars and trucks, these air conditioners typically contain two to three pounds of CFC–12 and use open-drive compressors to cool the passenger compartments of vehicles. As currently written, today's proposed rule would apply the standards discussed above for recovery and recycling equipment used with small high pressure systems to recovery and recycling equipment used with these MVAC-type air conditioners. EPA believes, however, that the standards for recycling and recovery equipment that EPA has adopted in its section 609 regulations (57 FR 31241, July 14, 1992) could be applied instead to recycling and recovery equipment used with MVAC-type air conditioners. EPA believes that the regulations under section 609, which are discussed in 57 FR 31241, satisfy the statutory standards of section 608 regarding the maximization of recycling and reduction of emissions. Were EPA to adopt these standards (and the accompanying certification program) in its section 608 regulations, manufacturers of equipment that is intended specifically for use with MVAC-type air conditioners and that is certified under the section 609 regulations would not have to recertify that equipment under the ARI Standard 740 in order to market it for use with MVAC-type equipment covered by section 608. In other respects, the servicing of MVAC-type equipment in vehicles that are not defined as "motor vehicles" would be covered by these regulations rather than EPA's section 609 regulations. EPA requests comment on this alternative.

4. Testing of Recycling and Recovery Equipment Intended for Use on Air Conditioning and Refrigeration Equipment Except Small Appliances

EPA is proposing to require testing of recovery and recycling equipment for the above performance characteristics by a third party approved by EPA. At present, EPA is aware of two major equipment testing programs underway: The ARI certification program under ARI Standard 740 (Appendix B to the proposed regulations) and the Underwriters Laboratories (UL) program under ARI Standard 740 and UL 1963 (not to be confused with UL's program for testing recycling and recovery equipment intended for use with MVACs under UL 1963). EPA is proposing a modified version of these programs as the one that approved recovery and recycling equipment testing organizations would have to use. The ARI and UL programs use a laboratory test protocol to measure the performance of equipment in a number of different areas, including vapor recovery efficiency, purge loss, liquid recovery rate, vapor recovery rate, and ability to clean refrigerant (in recycling machines). Except in the area of purge loss, where refrigerant emissions are limited to 5% of the total charge, no maximum or minimum performance requirements need to be met for equipment to be certified under ARI's current program. Under the modified program proposed by EPA, equipment would be certified only if it could achieve the vacuums specified, limited purge losses to 5% (or other percentage that EPA adopted in the final rule), and was equipped with positive shut-off fittings.

ARI and UL test one unit of each make and model to verify performance initially. Both programs also take measures to verify that equipment manufactured over the long term continues to perform as rated. Each year, ARI tests one unit each of one third of the models certified under its program. This means that over a three-year period, ARI tests a sample of each make and model that it certifies. UL conducts periodic inspections of equipment at manufacturing facilities to ensure that models have not undergone design changes that may affect their performance.

Following these industry precedents, EPA's proposed program would require manufacturers to have equipment testing organizations test one unit of each make and model initially and then conduct periodic retests or inspections (at least once every three years) to ensure the continued performance of each model line. (Equipment certified under the ARI or UL programs prior to promulgation of the final rule would not have to be retested in order to be initially certified under the rule if the first set of tests demonstrated that the equipment met EPA requirements.)

If previously certified equipment failed a follow-up test or inspection, the approved equipment testing organization would be required to inform EPA of this fact, and the certification for that equipment would be revoked or suspended after allowing the manufacturer an opportunity to respond. In general, EPA has the authority to revoke or suspend any certification granted under the provisions of section 608. If the Agency determines that a person or entity has violated the regulations, or if the Agency has knowledge that a person or entity is incapable of fulfilling the requirements of the regulation the Agency would revoke or suspend any certification previously granted. In the case of minor violations, the Agency may act to suspend certification for a given period of time. However, in the case of serious or repeat violations, the Agency may determine that revocation of certification is warranted. In the event of a revocation of certification, the affected model of recycling or recovery equipment could no longer be manufactured, and the affected technician, owner of recycling or recovery equipment, or reclaimer could no longer do business.

In addition to ARI and UL, other testing organizations have indicated an interest in setting up their own programs to certify performance to EPA's specifications. EPA would be willing to approve any equipment

certification program that can demonstrate that it (1) possesses thorough knowledge of the standards as they appear in § 82.158 and ARI–740–1988 (Appendix B), (2) possesses the equipment described in ARI–740–1988 to test performance in the areas of concern, (3) possesses expertise in equipment testing, (4) has developed a program to verify the performance of certified recycling or recovery equipment manufactured over the long term, including either retests of equipment or inspections of equipment at manufacturing facilities, and (5) is not financially or otherwise interested in the outcome of the testing. Organizations seeking approval to be equipment certifiers should contact EPA.

In addition to the requirements above, equipment testing organizations would be required to submit lists of approved equipment to EPA annually. They would also be required to inform EPA within 30 days of the certification of a new model of equipment or of the failure of a previously certified model of equipment.

EPA is proposing third-party certification because it represents the most reliable method of obtaining an accurate and objective evaluation of equipment performance. Third-party certification is more likely than self-certification to yield consistent results across brands, and third-party certifiers have the opportunity to refine their test methods. Third-party certification is also likely to be reasonably priced; given the array of respected testing organizations that have expressed an interest in certifying recovery and recycling machines, EPA expects the certification market to be competitive.

EPA has considered two other options for implementing its equipment performance requirements. One option would be to require manufacturers to test their own equipment according to ARI Standard 740 or another EPA-approved testing protocol. Like third-party certification, this self-certification would have to statistically verify the performance of equipment manufactured over the long term. Manufacturers would retain the option of having their equipment certified by a third party if this were more cost-effective or attractive for some other reason. Self-certification could save manufacturers money in some cases (though the need to develop and maintain laboratory facilities would seem to put this option out of reach of all but the largest companies). However, EPA is not proposing self-certification as its lead option because third-party certification offers a more objective and still practical alternative. EPA requests comment on the option of self-certification by equipment manufacturers.

Another option would be to eliminate pre-market testing programs altogether but to hold manufacturers and contractors legally responsible if inspections show that recovery and recycling machines are not performing to EPA specifications. The chief attraction of this option is that it eliminates the costs of equipment testing, lowering manufacturers' prices and enabling technicians to cut costs further by building their own equipment. However, it does so at the considerable risk of allowing inadequate and/or leaky equipment onto the market. EPA requests comment on the no-certification option.

In order to inform practical purchasers of the certification status of recovery or recycling equipment, EPA proposes to maintain a list of approved equipment that will be made available to interested persons.

5. Testing of Recycling and Recovery Equipment Intended for Use on Small Appliances

The ARI 740 test method, which is designed to simulate recovery from larger air conditioning and refrigeration equipment, is not applicable to most of the technologies (both passive and active) that have been developed for recovering CFCs from small appliances. This is because the mixing chamber intended to simulate the refrigeration system in ARI 740 is much larger than the systems on small appliances and therefore could be only partially evacuated by systems that could fully evacuate a small appliance. Thus, if recovery and recycling machines intended for use on small appliances are to be evaluated, a different test method must be devised.

The main purpose of this test method would be to provide an accurate measure of the recovery efficiency of both passive and active recovery devices in conjunction with both operating and nonoperating refrigerator compressors. General Electric has developed such a method, which could calculate the percentage of a known charge of CFC refrigerant removed and captured from a test stand refrigeration system and delivered to a container suitable for shipment to a CFC reclaimer. The test involves weighing the test stand, the recovery device, and the shipping containers before and after recovery. Each recovery system would be tested following the manufacturer's written directions for use of that system in the field. (In this sense, recovery procedures would be certified along with recovery equipment, and failure to observe these procedures in the field would constitute a violation of this regulation.) EPA is proposing to adopt this test method as appendix C to this proposed rule. EPA requests comment on the accuracy and reliability of this method.

As would be the case for recovery and recycling machines intended for use with other air conditioning and refrigeration equipment, recovery devices intended for refrigerators would be certified by a third party. An organization interested in becoming an EPA-approved certifier would have to demonstrate that it (1) consistently followed appendix C to test performance in the area of concern, recovery efficiency, (2) possessed the facilities to verify the performance of long-term production, and (3) was not financially or otherwise interested in the outcome of the testing. Organizations seeking approval to be equipment certifiers are encouraged to contact EPA as soon as possible. The Agency requests comment on this option.

6. Effective Dates and Granfathering Provisions.

EPA is proposing that, while manufacturers would begin to certify recovery and recycling equipment to the new standards as of July 1, 1992, the statutory effective date, manufacturers will have until [6 months after publication of the final rule], to certify all of their equipment to the new standards. Based on EPA's analysis of the manufacturer's capabilities to produce such equipment, EPA believes that this lead time is sufficient. EPA requests comment on making certification mandatory for all equipment manufactured six months after publication of the final rule.

EPA also proposes to "grandfather" recycling and recovery equipment sold before [6 months after publication of the final rule], it meets certain minimum requirements. Equipment intended for use with high-pressure refrigerants (except for refrigerants in small appliances) would have to be able to evacuate systems to four inches of vacuum; equipment intended for use with low-pressure refrigerants would have to be able to evacuate systems to 25 inches. (Equipment intended for use with very high pressure refrigerants would have to be able to evacuate systems to 0 inches of vacuum, or atmospheric pressure, as in the proposed requirements effective after [6 months after publication of the final rule]). Depending upon the refrigerant, these evacuation levels are equivalent to

total recovery efficiencies of between 97 and 99 percent. EPA's surveys of equipment manufacturers indicate that most recycling and recovery equipment in use is capable of achieving, but not exceeding, these levels. Although owners of recovery and recycling equipment purchased before [6 months after publication of the final rule], would not have to certify their equipment, EPA reserves the right to test the equipment using a pressure gauge.

TABLE 3.—LEVELS OF EVACUATION WHICH MUST BE ACHIEVED BY RECOVERY OR RECYCLING MACHINES INTENDED FOR USE WITH AIR CONDITIONING OR REFRIGERATION EQUIPMENT

[Except for Small Appliances]

Manufactured Before [6 Months After Publication of the Final Rule]

Type of air conditioning or refrigeration equipment with which recovery or recycling machine is intended to be used	Inches of vacuum
High Pressure Equipment with a Charge of Less than 50 Pounds	4
High Pressure Equipment with a Charge of More than 50 Pounds	4
Very High Pressure Equipment	0
Intermediate Pressure Equipment	25
Low-pressure Equipment	25

Recovery devices intended for use with small appliances would have to be able to recover 80% of the refrigerant in the small appliance in order to be grandfathered. This standard would apply to both active and passive devices. As above, EPA reserves the right to verify performance of grandfathered recovery devices, in this case using the test protocol set forth in appendix C.

EPA is proposing to grandfather equipment for two reasons. First, the Agency does not wish to penalize those who have taken the initiative to begin recycling before it is required by law. Second, EPA recognizes that certified equipment will probably not be available for all those interested in purchasing it until after the July 1, 1992 prohibition on venting goes into effect. Thus, requiring technicians to purchase certified equipment in addition to equipment that they purchase to meet the prohibition on venting would impose an unfair burden on those who made a good-faith effort to comply with the prohibition and, in fact, would tend to delay purchase of recovery and recycling equipment. EPA's analysis indicates that the benefits of beginning to recycle a few months sooner outweigh small differences in the efficiency of recycling and recovery equipment over the typical five-year lifetime of the equipment. For instance, if a technician began using recovery equipment with a capture efficiency of 97 percent in April, 1992, his refrigerant emissions between April of 1992 and April of 1997 would be half as great than they would be if he waited until July, 1992 to purchase recovery equipment with a capture efficiency of 99 percent. (See "Analysis of Benefits of Early Purchase of Recycling or Recovery Equipment" in the public docket.)

One additional requirement that EPA is considering for grandfathered equipment is possession of low-loss fittings. EPA requests comment on whether most equipment currently in use is equipped with low-loss fittings and on the cost of retrofitting equipment with such fittings.

Because the environmental benefits of using grandfathered as opposed to certified recovery or recycling equipment decrease and ultimately become environmental costs if the equipment is used much longer than five years, EPA is considering the option of requiring that grandfathered equipment be retired on or before July 1, 1997. After that date, all technicians would have to use equipment that had been tested by an approved equipment testing organization to meet the stricter requirements that go into effect on [6 months after publication of the final rule]. Manufacturers of recycling and recovery equipment indicate that most recycling and recovery machines will wear out in approximately five years in any event. EPA requests comment on this option. EPA also requests comment on its grandfathering proposal generally.

H. EPA Promotion of Service Technician Competence

EPA considers an educated technician workforce to be important to a successful recycling and recovery program. Proper education can reduce refrigerant emissions during equipment servicing and disposal in two ways. First, technicians aware of legal requirements and of the environmental impact of CFC and HCFC emissions are more likely to recycle, and second, technicians aware of correct recycling techniques are more likely to recycle properly, avoiding unnecessary refrigerant emissions. EPA recognizes that technicians and their employers have strong private incentives to obtain proper education and training, including increased productivity and conservation of (valuable) refrigerant, and decreased likelihood of equipment damage, refrigerant contamination, and legal penalties. However, EPA is asking for comment on whether it should promote, assist, or require demonstration of competence of technicians in refrigerant recycling and recovery.

The air conditioning and refrigeration industry has affirmed the value of training in reducing refrigerant emissions. The ASHRAE Guideline 2, Reducing Emission of Fully Chlorofluorocarbon (CFC) Refrigerants in Refrigeration and Air-Conditioning Equipment and Applications, states, "training of operators and mechanics is the first line of defense for minimizing refrigerant loss," and notes, " for service technicians, the required practices are of such significant importance that persons in these segments of the industry should have some additional education, training, or both." Members of the STOPAC Subcommittee on Recycling have repeatedly emphasized the importance of training to an effective recycling program. In response to these concerns, a number of industry, organizations have already established training programs in refrigerant recycling and recovery.

EPA's research indicates that the majority of technicians servicing air conditioning and refrigeration equipment today have little experience working with recovery and recycling equipment. Although recycling has been common for several years in sectors with large charge sizes, such as chillers and industrial process refrigeration, most technicians in the household refrigeration and household air conditioning sectors had not recycled CFCs or HCFCs until very recently, when the venting prohibition went into effect. The total quantity of refrigerant that can potentially be recycled in these sectors represents 25% of the total of the sectors in this rule. For technicians in these sectors, technician education is important because it informs them of the legal requirements of the venting prohibition and of these regulations and introduces them to appropriate procedures for recycling and recovery. These procedures include connecting recycling and recovery equipment correctly, avoiding mixture and subsequent release of refrigerants, storing refrigerant safely, and choosing effective leak-testing methodologies.

In addition to its environmental benefits, proper technician education in recycling and recovery has a number of private benefits for technicians, contractors, and/or equipment owners. It encourages conservation of refrigerant, a valuable and increasingly scarce material, and it helps to protect air conditioning and refrigeration equipment by reducing improper servicing techniques and refrigerant contamination. It is also likely to increase technicians' speed and

productivity. Moreover, training in legal requirements and safe handling of refrigerants may reduce costs from fines and on-the-job injury. Finally, less tangible but essential to firms with a high public profile, proper technician education can enhance the image of a firm as a professional and environmentally responsible organization.

EPA has not conducted an independent study of the benefits and costs of technician training; however, the Program Director for the CFC recovery and recycling education program at Ferris State University, a leading national vocational technical university, noted that thorough training can result in significant private savings. Specifically, Ferris State estimated training can:

- Save 30–50% of the time needed for each job over initial jobs by familiarizing technicians with appropriate procedures for use and maintenance of equipment in one structured course;
- Improve productivity by one hour per service job over the long term;
- Improve leak detection work, by choosing the appropriate method (halogen, halide, etc.), eliminating waste and 2 to 3 hours per job;
- Avoid improper piping/soldering techniques (trained technician would be less likely to create hazardous conditions resulting in a loss of refrigerant and the time required to remedy the problem);
- Preserve HVAC/R and recovery/recycling operating capacity by training technicians in the proper procedures for avoiding mixing refrigerants (in a typical residential system containing 3 lbs of refrigerant, mixing would result in one hour of lost labor, refrigerant loss, and the cost of distillation and/or destruction of a trial mixture @ $3.00/lb (current estimated price), leading to costs of at least $70–80 each time refrigerants were erroneously mixed;
- Preserve equipment by training in proper oil application (using inappropriate oils would require that a technician flush out the system, requiring 8 to 10 hours of work and $460 to $560 in costs for a residential system).

Thus, there are significant incentives for private entities to ensure that technicians are properly educated in refrigerant recycling and recovery. A number of organizations have begun to respond to these incentives by establishing and/or participating in private training programs. Many of these organizations are nationally known manufacturers of equipment that employ or license technicians to service equipment under warranty; others are independent training organizations such as vocational schools and industry trade organizations. Organizations that have developed training programs in refrigerant recycling and recovery include the Trane Company, York, Lennox, the Air Conditioning Contractors of America (ACCA, with Ferris University), the Refrigeration Service Engineers Society (RSES), and the United Association of Plumbers and Pipefitters (UA). These groups are part of an extensive industry training infrastructure; ARI estimates that there are approximately 1,200 training programs for HVAC/R technicians in the U.S. A large number of these programs have begun to train their students in proper methods for refrigerant conservation, including recovery and recycling, and ARI itself has incorporated a unit on environmental safety principles into its curriculum guide for HVACR instructors.

EPA is not proposing a mandatory training or certification requirement as its lead option. However, as discussed in section d. below, the Agency is requesting comment on this option. In the absence of a mandatory program, the Agency believes that it may play an important role through a voluntary program that recognizes those who provide and participate in training that meets certain minimum standards. Thus, the Agency plans to establish a voluntary certification program whereby private sector certification programs could request EPA review and approval based on the minimum qualifications described below.

The core elements EPA is considering for its voluntary certification program include the following:

1. *Curriculum or Test Content.* Certification tests should include certain basic elements, such as the environmental impact of CFCs and HCFCs, safety guidelines regarding their handling, legal requirements regarding their use and disposal, and appropriate techniques of recycling and recovery. Because different recycling and recovery techniques are appropriate for different types of air conditioning and refrigeration equipment, EPA is considering a program with four types of certification: one for technicians servicing small appliances with a charge of less than one pound (refigerators, freezers, dehumidifiers, etc.), one for technicians servicing high-pressure equipment with a charge between 1 pound and 50 pounds, one for technicians servicing high-pressure equipment with a charge of more than 50 pounds, and one for technicians servicing low-pressure equipment. EPA requests comment on this approach.

2. *Administration.* a. *Test Development.* EPA requests comment on two options for defining minimum test requirements. Under the first option, EPA would work with industry representatives to develop a bank of test questions. Approved technician certification programs would then assemble tests by choosing subsets of the questions (e.g., 50 from 200 total). Used the second option, each organization interested in becoming an EPA-approved certifier would develop a test (or tests) that covered the required material and would submit the test along with its administrative information to EPA for approval.

b. *Technician Certification Program Approval.* Organizations seeking to participate in EPA's voluntary certification program would arrange for the administration of tests under controlled conditions, collect and objectively grade tests, issue certificates and keep records of certification. In order to qualify for EPA's voluntary program, the organization would have to demonstrate to EPA that it met the criteria outlined below. If EPA approved the organization, its name would be added to a list of EPA-approved certifying organizations that would be published regularly.

Although any organization would be able to apply to become an approved certifier, EPA plans to give priority in its review process to national organizations able to reach large numbers of people. Any group, such as a union shop or vocational school, could perform training. The Agency encourages smaller training organizations to develop their own training programs but to obtain tests from national groups, setting up an infrastructure similar to that used for administering other standardized tests.

i. *Test Preparation, Grading and Evaluation.* Private organizations seeking EPA approval of their technician certification programs would have to be able to demonstrate the ability to generate, track, and grade tests. In order to minimize cheating and ensure objective grading, EPA would require certification organizations to produce multiple versions of examinations and to ensure that tests are graded by an entity or individual who receives no benefit from the outcome of the testing. Some industry representatives have suggested that EPA require certifiers to possess that evaluation software and automated grading equipment; EPA requests comment on whether such requirements are necessary.

ii. *Proctoring.* EPA believes that proctoring would be appropriate for testing of technicians working on all but the smallest equipment (e.g., small appliances with less than one pound of refrigerant). Certifying organizations would be required to designate at least one proctor registered and approved by the program for each testing event. The proctor would have to take measures to verify the identity of technicians taking tests and to ensure that tests are completed honestly by each technician. The proctor could not receive any benefit from the outcome of the testing other than a fee for proctoring.

For technicians servicing small appliances, mail-in tests similar to those permitted under the MVACs program could be administered. EPA requests comment on its proctoring requirements and on its plan to exempt technicians servicing small appliances from those requirements.

iii. *Test Security.* To qualify for EPA's voluntary certification program, an organization would also have to demonstrate the ability to ensure the confidentiality and security of the test.

iv. *Proof of Certification.* Finally, to obtain EPA's approval for the voluntary program, certifying organizations would be required to issue some type of proof that a technician had successfully passed the relevant levels in an EPA-approved test. Such proof would enable technicians to prove and employers or customers to verify certification.

EPA would reserve the right to revoke certification privileges if an organization failed to meet any of the other requirements for approval as a certifier.

c. *Grandfathering.* As mentioned above, some organizations have already begun to train, test, and unofficially "certify" technicians. Under its planned voluntary program, EPA will endeavor to establish guidelines that allow grandfathering of program participants at the request of the testing organization so long as the organization obtains approval of its program and supplies past participants with any supplementary materials needed to bring their training into conformance with final requirements.

3. *Possible Need for Mandatory Certification.* EPA is concerned that in some cases, private incentives may not be sufficient to bring about the socially desirable level of training of technicians. In evaluating whether a requirement for mandatory training is necessary, it is appropriate to compare the anticipated costs of such a requirement with its anticipated benefits, remembering that some training will occur without a requirement. The costs of a training or testing requirement include the lost time as well as the instruction and testing costs of those who would not have pursued training or testing without the requirement. The benefits of a training or testing requirement include the private benefits (cited above) that accrue to those who would not have pursued training or testing without the requirement, and the net public benefits that result from increased or more effective compliance with recycling requirements. These public benefits consist chiefly of avoided damage to human health and the environment (e.g., avoided cataracts and skin cancers), less the costs of recycling and recovery (e.g., recycling equipment and labor). If a training requirement would bring about an increase in compliance whose net benefits outweighed the costs of the requirement, then it should be required.

The value of recovered refrigerant on the market is a clear and immediate private incentive to recover and recycle. However, even this incentive is not likely by itself to be sufficient to achieve the socially desirable levels of recycling and training. First, particularly in the short run, some technicians will not be aware that there are techniques that can cost-effectively increase the efficiency of recycling. Thus, they will neither seek training in these techniques nor recapture enough refrigerant to realize the full potential private profits of refrigerant recovery. Second, although the price of refrigerant is rising, that price still does not reflect the full social cost (i.e., damage to human health and the environment) associated with refrigerant release. Thus, if the private benefits of refrigerant recovery are limited to the value of the refrigerant, those benefits fall short of the social benefits of recovering refrigerant, and technicians will not be willing to spend as much to capture refrigerant as it will cost society to release it. Technicians, therefore, are not likely to capture the socially desirable quantity of refrigerant without some type of additional incentive (e.g., regulation). Where charge sizes are large enough to make recovery cost-effective from a private perspective, recovery will be less than socially optimal, and where charge sizes are too small to make recovery cost effective from a private perspective, recovery will not occur at all.

As discussed above, however, the value of recovered refrigerant is not the only private incentive to recycle or to obtain training. Other private incentives include avoidance of fines for breaking the law, avoidance of damage to equipment, avoidance of injury, avoidance of damage to the environment (to some extent), and avoidance of negative publicity (or desire for positive publicity). The importance of the legal incentive depends upon knowledge of legal requirements, the perceived likelihood of enforcement action in the event of a violation, and the perceived likely severity of that action. EPA's experience with implementing the venting prohibition has shown that legal requirements and enforcement efforts are both frequently misinterpreted to be more lax than they are, a misimpression that certification could correct. Although the Agency is engaged in an extensive outreach effort to clarify the current and possible future requirements of section 608, this may or may not be sufficient to inform the regulated community fully of its responsibilities and potential liabilities under the law.

Avoiding injury or damage to equipment can be powerful private incentives for training. Once again, however, their effectiveness depends upon perceived risk. Because recycling is a new activity in some of the most populous sectors, many technicians and their employers may not be aware of the risks of overfilling recovery cylinders (explosion) or of mixing the refrigerants in them (equipment damage). Thus, they may not seek training intended to help them to avoid these risks. At the same time, the nature of these risks makes training essential; because the consequences of overfilling cylinders and mixing refrigerants seldom appear immediately, a great deal of damage can be done by the time there is any sign of it to discourage repetition of the error.

The relationship between action and consequence is even less direct for the impact of refrigerant release on the environment. To the extent that a technician perceives that environmental change affects himself and his family, environmental concerns can also become private incentives. Unfortunately, the negative effect of CFCs and HCFCs is a relatively difficult environmental concept to convey. Unlike many other pollutants, refrigerants neither smell nor look unpleasant; indeed, stratospheric ozone, its depleters, and ultraviolet radiation are all invisible. The health and environmental impacts of ozone depletion, such as skin cancer and cataracts, manifest themselves only slowly, and the greatest expected impacts lie decades in the future. While EPA and other Federal agencies are involved in a massive effort to convey the risks of refrigerant release and ozone depletion, pamphlets and advertisements alone do not guarantee that this information is being absorbed

and retained by all or even most technicians.

Related to all of the above incentives is the incentive of public image. For instance, to the extent that a company (or technician) underestimates the probability of enforcement or equipment damage in the event of negligent recycling, it underestimates the impact of these consequences on its reputation. However, the importance of public image as an incentive probably varies with the visibility of the firm. Positive or negative publicity is more likely to occur when a company's name is well-known in the first place, and larger companies have more resources to devote to maintaining a reputation. For a two-man company that operates marginally and that relies upon a clientele for whom price is paramount, a positive public image may simply not yield enough immediate benefits to justify the costs of recycling or training.

As the above discussion shows, the effectiveness of these incentives depends upon the extent to which they are perceived as costs or benefits by technicians or their employers. That, in turn, depends upon the information that the technicians and employers already possess and upon the priorities of the firm. Because they have fewer resources to begin with, small firms and in-house technicians are likely to devote fewer resources to monitoring industry trends and requirements than large manufacturing or service firms. Thus, they may be relatively isolated and poorly informed. As a consequence, some smaller firms may not surpass the critical informational threshold that enables them to perceive the benefits of recycling and training without intervention.

The training programs in recycling of which EPA has become aware have generally been developed by large manufacturers and by national educational and trade associations. The participation of technicians from smaller companies in these programs is difficult to estimate. However, many of the industry representatives of the STOPAC Subcommittee for Recycling expressed concern that without a mandatory certification requirement, many technicians working in-house or for small service firms would neither receive appropriate training nor comply with these regulations. The Trane Company estimated that only 35 to 55 percent of these technicians would comply with recycling requirements if certification were not required. Trane also estimated that at present, between 50 and 70 percent of the air conditioning servicing industry is not sufficiently trained. Moreover, although numerous training programs have arisen over the last year to address refrigerant recycling, it could be argued that many of these programs have arisen in anticipation of an EPA requirement for technician certification, especially since the MVACs regulation under section 609 of the Act has such a requirement. If EPA does not pursue a training requirement, participation in these programs may decline.

EPA requests comment on whether mandatory certification of technicians is necessary or desirable. A mandatory certification program could be very similar in form to the voluntary program described above. In addition, EPA could restrict sales of refrigerant to certified technicians in order to encourage full participation in training programs and ensure that only qualified individuals handled refrigerant. (Alternatively, a sales restriction could be tied to some other qualification, such as state or local licensing or an employer ID number.)

I. Certification by Owners of Recycling or Recovery Equipment

EPA is proposing to require owners of recycling or recovery equipment, including contractors and other business entities responsible for air conditioning and refrigeration equipment servicing (such as building owners with in-house service personnel), to submit a signed statement to the nearest EPA Regional office by [90 days after publication of the final rule], that they possess sufficient certified recovery and recycling equipment to perform on-site recycling or recovery. In addition to the name and address of the contractor, the statement would have to include the manufacturer, date of purchase, model number, and serial number of the equipment. EPA anticipates that forms for this certification will be frequently provided by equipment manufacturers.

In addition to the self-certification outlined above, EPA has considered several options for administering equipment owner certification. One option would be direct certification by EPA, which would require the equipment owner to submit substantiating documentation of equipment certification. EPA would then mail a certificate to the equipment owner. While this option might result in somewhat greater assurance of compliance with the regulations, the Agency is not proposing this option because the large number of equipment owners and other business entities that would have to be reviewed and sent certificates make it impractical. (Estimates of the number of contractors in the U.S. range from 22,000 to 45,000.) Another, similar option would be to require the equipment owner to submit such documentation to an approved third-party certifier, but EPA is not aware of any potentially interested organizations. Thus, although EPA recognizes that self-certification is not the most reliable method for insuring equipment owner compliance with these regulations, other methods do not appear practical. EPA believes that its proposed approach, involving a signed statement, will nonetheless provide a useful mechanism for increasing compliance with these rules.

J. Certification of Reclaimers

In order to provide some assurance of the quality of reclaimed refrigerant on the market, EPA proposes to certify reclaimers. Similar to the proposed certification of recycling and recovery equipment owners, reclaimer certification would involve a signed statement from the reclaimer stating that it (1) returns refrigerant to at least the standard of purity set forth in the ARI Standard 700, (2) verifies this purity using the methods set forth in ARI Standard 700, (3) disposes of wastes from the reclamation process proposed in accordance with applicable laws and regulations. In order to limit potential emissions during reclamation, reclaimers could release no more than 1.5 percent of the refrigerant during the reclamation process.

These proposed requirements have emerged from meetings with reclaimers and other interested parties. As discussed in section III, the ARI 700 standard is a purity standard set by the Air Conditioning and Refrigeration Institute to ensure that refrigerant is free of contaminants that can damage air conditioning and refrigeration equipment. The requirement to dispose of wastes properly is important because in some instances, the reclamation process can generate hazardous wastes.

Reclaimers on the STOPAC Subcommittee for recycling estimated that releases during a well-controlled reclamation process range between one and two percent of the quantity of refrigerant received by the reclaimer. One reclaimer measured these losses and found them to be 1.2 percent of original quantity. According to reclaimers on the STOPAC, most releases take place during transfers of refrigerant between shipping containers and reclamation devices. Typically, reclamation itself takes place in a closed loop; refrigerant is not exposed to the atmosphere. Emissions that occur during this process result from sampling of refrigerant for purposes of analysis and from purging of noncondensables

(air and other gases with a boiling point lower than that of refrigerant). Both types of releases are likely to be small; typically, samples consist of 50 grams of refrigerant, and purging of noncondensables takes place through a cold trap that recondenses and traps most of the refrigerant mixed with the air. Although emissions from reclamation devices have not been quantified precisely, two reclaimers on the STOPAC subcommittee stated that they fall well under one percent of the quantity of refrigerant that enters the reclamation process. Based on this information EPA is proposing to limit emissions from reclaiming facilities to 1.5 percent of the refrigerant received by them. The Agency estimates that approximately one percent of the refrigerant would be released during transfers of refrigerant to and from reclamation devices, and approximately one-half of one percent would be released during the reclamation process itself. EPA requests comment on its proposal to limit emissions from reclaimers to 1.5 percent of the refrigerant received by them and on its supporting analysis.

In addition to the signed statement, the reclaimer would have to submit its name and address and a list of the equipment it employed to analyze the refrigerant. Reclaimers would also be required to maintain records of the names and addresses of persons sending them material for reclamation and the quantity of the material (the combined mass of refrigerant and contaminants) sent to them. On an annual basis, reclaimers would be required to keep records of the mass of material sent to them, the mass of refrigerant reclaimed, and the mass of waste products. These records are required to ensure that refrigerant releases are minimized during the reclamation process. Based on discussions with reclaimers, EPA believes that most reclaimers already keep such records. The Agency requests comment on this conclusion. If some of the proposed records are not typically kept already, EPA requests comment on the burden that the proposed additional recordkeeping would entail. EPA also requests comment on its proposed requirements for reclaimer certification in general.

EPA is considering another option for administering reclaimer certification: site inspections and/or sampling of refrigerant by EPA-approved parties. Such a third-party certification would be more reliable than the self-certification proposed above. At this time, no potential third-party certifier has established a reclaimer certification program; however, ARI has begun to develop one. EPA applauds and encourages these efforts, and in the future, could replace its reclaimer self-certification program with a requirement that reclaimers be certified by an approved third-party certifier, such as ARI. EPA requests comment on this alternative.

K. Recordkeeping Requirements

EPA has proposed the following recordkeeping requirements:

1. Equipment Certification Programs. EPA is proposing to require equipment certification programs to maintain records of equipment testing and performance in addition to a list of equipment that meets EPA requirements.

2. Wholesalers. Wholesalers would be required to maintain the usual business records of their refrigerant transactions, including the name of the buyer and the quantity sold.

3. Reclaimers. As discussed in section III.I, reclaimers would be required to maintain records of the names and addresses of persons sending them material for reclamation and the quantity of the material (the combined mass of refrigerant and contaminants) sent to them.

On an annual basis, reclaimers would be required to keep records of the mass of material sent to them, the mass of refrigerant reclaimed, and the mass of waste products. These records are required to ensure that refrigerant releases are minimized during the reclamation process. Based on discussions with reclaimers, EPA believes that most reclaimers already keep such records. Information on the material sent to the reclaimer, the mass of refrigerant reclaimed, and the mass of waste products would have to be reported annually.

4. Equipment Owners. Aside from equipment owner certification, EPA is not proposing any recordkeeping or reporting requirements for technicians or contractors in its lead option. However, the Agency requests comment on the need for and burden of three possible additional recordkeeping requirements.

The first would require persons servicing or disposing of air conditioning and refrigeration equipment to keep invoices of service calls, including information on the quantity of refrigerant sold, the type of equipment serviced, the procedure performed, the date, and the name, address, and telephone number of the equipment owner and the name of the technician who performed the service. This information could be useful in monitoring compliance with and enforcing the rule. However, because EPA believes that invoices already contain most of this information and are already kept for tax purposes, the Agency does not consider a special recordkeeping requirement necessary. Moreover, it is not clear that such a requirement would enable EPA inspectors to identify (1) service technicians who make no effort to recover or recycle or (2) service technicians who fail to fully recover or recycle refrigerant in accordance with these regulations. The one piece of information that may not always be included on invoices already is identification of the procedure performed. Identification of the procedure performed may be important because it may enable EPA inspectors to determine whether a procedure necessitated entrance into the air conditioning or refrigeration system. EPA requests comment on the usefulness of this information and the other information discussed above to EPA's compliance monitoring and enforcement efforts. EPA also requests comment on the extent to which invoices currently contain all of the above information and on the burden that a special recordkeeping requirement would entail.

The second recordkeeping provision would require service establishments to keep records of the quantity of refrigerant that is sent off-site for reclamation. If the service establishment acquires recover only equipment, the refrigerant must be reclaimed off-site. Records of the quantity sent off-site and the name and address of the reclamation facility would help EPA to verify that the refrigerant is reclaimed at an off-site reclamation facility and not vented to the atmosphere. However, EPA believes that service establishments are already likely to keep records of the quantity of refrigerant sent off-site for reclamation because used refrigerant is a valuable material. In addition, EPA is proposing to require reclaimers to keep records of material received. EPA requests comment on the usefulness of a requirement that service establishments keep records of the quantity of refrigerant sent for reclamation and on the incremental burden that such a recordkeeping requirement would involve.

The third provision would require businesses to maintain a record of the amount of refrigerant purchased and consumed each month. Together with the invoices and reclamation records, these records would help EPA to monitor the amount of refrigerant that is being lost the atmosphere (either through leakage during use or venting

during servicing) by the equipment serviced. A large quantity is unlikely to be accounted for by leakage alone. Once again, however, EPA believes that businesses already keep such records, and wholesalers would be required to keep records of the names and addresses of persons purchasing refrigerant and the quantity of refrigerant sold.

In sum, EPA is not proposing that these records be kept because EPA has not determined that the utility of the information would outweigh the burden of keeping it. In general, EPA requests comment on the usefulness of the above records to enforcement and compliance monitoring efforts, on the extent to which these records are already kept, and on the burden that these records would impose if they are not already kept. All business entities servicing, repairing or disposing of appliances must allow an authorized EPA representative entry onto the premises to inspect for compliance with these regulations.

L. Safe Disposal Program

1. Background

In the ANPRM published May 1, 1991 (55 FR 18256), the Agency requested comment on the feasibility of requiring recovery of ozone depleting substances from equipment at disposal. The Agency distinguished between the type of equipment that enters the waste stream with its refrigerant charge intact (refrigerators, home air conditioners, or automobiles) and equipment that typically is partially dismantled on-site by service technicians (large chillers, industrial process equipment). The Agency was concerned that disposal technicians (landfill operators, waste haulers) may be more difficult to monitor and less familiar with the needs and requirements of a recycling program than service technicians. The Agency also stated that recovery of refrigerant from obsolete equipment may provide a significant source of used refrigerant that could be re-used to service existing capital equipment.

Several comments on the ANPRM supported the idea of recovering these compounds. One commenter suggested appliance manufacturers incorporate recovery procedures that could be used when their technicians install new equipment and replace old equipment. A technician licensing or certification system coupled with a certification procedure to scrap processors was suggested by two commenters. Several commenters supported requiring the removal of CFCs from junked automobiles, although the state of New Jersey suggested that the financial feasibility of requirements on disposers be considered when designing the program.

On July 14, 1992 (57 FR 31242), the Agency published a final rule establishing requirements under section 609 of the Act for the servicing of motor vehicle air conditioners. In that notice, the Agency stated that the definition of service of motor vehicles did not extend to the removal of refrigerant from junked automobiles and that the Agency would develop requirements for removal of refrigerant under section 608 requirements. As noted in section III.a., the quantity of refrigerant in motor vehicle air conditioners junked each year is estimated to be 9000 metric tons, which makes up approximately 25 percent of the total quantity of refrigerant that is currently or could be recycled in all the sectors affected by this rule.

2. Scope

The proposed regulations in this section will focus upon the safe disposal of class I and class II refrigerants from equipment that enters the waste stream with the charge intact, i.e., equipment containing class I and class II refrigerant "in bulk." The Agency understands that the equipment that enters the waste stream with the charge of class I or class II refrigerant intact includes household refrigerators and freezers, MVACs, room air conditioners, dehumidifiers, water coolers, and some other relatively portable equipment. For all other refrigeration and air conditioning equipment, the refrigerant must be removed before dismantling of the equipment in accordance with the requirements concerning servicing discussed earlier.

Section 608(b)(3) states that the Agency is to develop requirements "that any product in which a class I or class II substance is incorporated so as to constitute an inherent element of such product shall be disposed of in a manner that reduces, to the maximum extent practicable, the release of such substances to the environment. If the Administrator determines that the application of this paragraph to any product would result in producing only insignificant environmental benefits, the Administrator shall include in such regulations an exception for such product." The Agency is aware that ozone depleting substances are present as an inherent element in the insulation foam used in buildings and appliances. At this time, however, EPA is not proposing requirements for either foam insulation used in buildings or insulation used in appliances.

With respect to foam that is an inherent element in buildings, EPA believes that such regulations are not required by section 608 of the Act at this time. In as much as the section 608(b) regulations are simply part of the section 608(a) regulations, they are subject to the deadlines contained in section 608(a). As section 608(a) requires only that regulations concerning appliances and industrial process refrigeration be promulgated at this time, it does not require regulations concerning the disposal of foam insulation that is an inherent element of buildings (which are neither appliances nor industrial process refrigeration). Furthermore, removing building insulation during the process of demolition is difficult and exceptionally resource intensive. The long average lifetime of buildings and the slow release of the CFCs throughout the lifetime of the insulation results in possible retrieval of only residual amounts of CFC. The Agency is not aware of any existing or developmental technology to remove CFCs from building insulation even if the insulation could effectively be removed. Consequently, even if building insulation were within the scope of the regulations at this time, EPA would not propose regulations requiring its removal because its removal is not currently practicable.

With respect to foam insulation in appliances, which are items covered by the subsection in section 608(a) requiring the regulations proposed today, the Agency is aware that the amount of ozone depleting substances that could be recovered from insulation in appliances may be generally equivalent to the amount of refrigerant in the equipment. For example, the Agency estimates that in 1990, over 10 million appliances entered the waste stream and approximately 1.21 to 2.93 MKg of CFC–11 in insulation could be recoverable, as compared to .4 to 2.0 Mkg of available CFC–12 refrigerant (these figures represent 0.6 to 1.9 percent of the total weighted CFR emissions in the U.S. in 1990). There are, however, significant technical and practical problems in attempting to retrieve CFC–11 from foam. The Agency is aware of the development and limited use of CFR–11 foam retrieval technology for appliances in Germany. However, this technology is prohibitively expensive ($1.5 million per retrieval machine) for widespread use in this country. As a consequence, the Agency does not believe the retrieval of CFCs from foam insulation in appliances is practicable at this time and, therefore,

the Agency is not proposing any regulations today. The Agency, however, will continue to monitor the development of technology in this area. The Agency requests comment on the need and feasibility of retrieving CFCs from insulation.

3. Regulatory Approach

Traditionally, state and municipal authorities have designed and implemented waste management programs, including disposal and recycling systems for used appliances and motor vehicles. The EPA would like to develop regulations to insure that the maximum amount of ozone depleting compounds are recovered before recycling or disposal of the used equipment by building on the waste disposal networks that currently exist. The Agency feels that regulatory flexibility in this area is essential for the success of the Safe Disposal Program. Thus, EPA is proposing a general requirement that refrigerant be recovered before disposal of equipment, but is not placing a requirement solely on one specific entity in the disposal chain. While the proposed regulations require refrigerant to be recovered prior to disposal, they contemplate that the entities that would be required at disposal may differ in different situations. Ultimately, however, it would be the responsibility of the final link in the chain to assure that the refrigerant has been removed.

The proposed regulations would also establish minimum program criteria to ensure that ozone depleting substances are not released during the disposal process. State and local governments may establish more stringent requirements than the federal program, if they wish.

4. Entities Covered

The nature of the waste disposal industry is such that a product is often handled by several different entities before reaching the final stage of disposal. Once a consumer has decided to dispose of an appliance or motor vehicle, the product enters the waste stream through a variety of collection systems. Often, municipal governments contract with waste haulers or companies to have appliances collected from residences. For appliances, the collectors bring the items to a storage facility such as a municipal landfill or waste transfer station. The declining space available at municipal landfills has caused most landfills to separate large white goods such as appliances from the landfill disposal stream. Many landfills may remove the capacitors from refrigerators or have them removed by a contractor or intermediate processor because of the concern for PCB contamination. The Agency believes that the entities which remove the capacitors could remove the refrigerant efficiently. Intermediate processors include appliance recycling firms and some municipal transfer stations.

For motor vehicles, the collectors often bring the machines to an intermediate processor where the valuable parts are salvaged. The Agency anticipates that these intermediate processors will remove the majority of ozone depleting substances from motor vehicles.

After all the useful parts are removed from an appliance or a motor vehicle by an intermediate processor, the remaining material is sold to a scrap recycling facility. Typically, a scrap recycler shreds and compacts the items. If the items still contain ozone depleting chemicals, then the shredding process will result in the venting of these compounds to the atmosphere.

Because of the variability in the disposal routes of these goods, the Agency considered the option of requiring recovery to occur without identifying the specific entities that would be held accountable for refrigerant recovery. From both a compliance and an enforcement perspective, however, not identifying any responsible party would create confusion and would not foster the recovery of ozone depleting substances.

Alternately, the Agency also considered the option of determining the specific entities that would be held responsible for recovery of refrigerant from specific types of equipment. For example, EPA could require that specific types of intermediate processors be held responsible for recovering refrigerant from refrigerators. While determining the specific entities would enhance the clarity of the Safe Disposal Program, the existing diversity of state and municipal waste disposal programs would mean that placing responsibility on certain links in the chain would disrupt existing practices in many instances. Also, specific requirements may result in inefficiency if a certain entity is required to remove refrigerant due to Federal requirements, while local circumstances result in more efficient refrigerant removal being possible by another entity in the waste disposal chain.

The Agency proposes today a program that accommodates the flexibility that is required due to the diversity of the disposal sector but nevertheless identifies the final link in the chain as the entity ultimately responsible for assuring that refrigerant has been removed. In this system the final processor of the motor vehicle or appliance (e.g., the scrap recycler) would be ultimately responsible for the removal of refrigerant. If these ultimate processors choose not to remove refrigerant or are unable to remove refrigerant because of the condition of the goods when they receive it (i.e., flattened automobiles), the processor would require that all appliances, machines and goods it accepts have already had refrigerant removed. Suppliers of the goods to the final processors would then remove the refrigerant or undertake the responsibility to assure that refrigerant is removed by an entity that precedes it in the disposal chain. Examples of suppliers that may be interested in removing the refrigerant include municipalities delivering appliances for recycling, automotive dismantlers salvaging valuable parts from automobiles, or large appliance dealers that remove used appliances when installing new appliances. The goal of this system is to provide the flexibility needed to permit the removal of refrigerant by the entity in the disposal chain that can accomplish the removal most efficiently.

The Agency wishes to stress that refrigerant is a valuable commodity and retrieving it from used goods and machines, if done efficiently, may be an economically profitable opportunity. As the venting of refrigerant during the disposal process and the sale of used refrigerant that is not reclaimed are prohibited, whomever recovers the refrigerant will need to sell the recovered refrigerant. Refrigerant should be sold to reclamation facilities to be purified to the ARI–700 purity level required before resale for use in refrigeration equipment. As the price for used refrigerant will only increase overtime due to the decreasing suppliers of new CFCs, the Agency believes that entities involved in disposal activities will have ample incentive to undertake CFC recovery activities.

5. Registration of Entities.

In order to assure compliance with the requirement that refrigerant recovery occurs before the ultimate disposal of appliances and motor vehicles, the Agency considered several options for the registration or establishments that perform the refrigerant removal activity. The first option considered would require no registration or certification of establishments performing the activity to the EPA. This option would provide no information about whether or not the activities are occurring, and no

identification of the entities undertaking the activities so that the Agency would more readily track compliance.

A one-time equipment registration system similar to the contractor certification system proposed for the servicing requirements was considered as a second option. This registration would generate the information on the entities performing recovery and the type of equipment they initially use.

Finally, the Agency considered an annual registration requirement similar to the business registration or licensing requirements that currently exist in many states. The annual requirement would include only equipment information and an estimate of the amount of refrigerant recovered in the previous year by establishments that perform refrigerant removal. If a state already required this information as part of annual licensing requirements that it had established for the types of entities that undertake disposal activities, such as scrap metal recyclers, landfill operators, or waste haulers, or as part of its own safe disposal program, EPA would not require separate reporting from entities in that state, but it would instead collect the information from the state programs. The third option would provide information to the Agency on the entities recovering CFCs and the amounts recovered. Such annual reporting for the disposal sector might be unduly burdensome, especially when compared to the one-time registration proposed for the servicing sector.

The Agency believes that the second option, requiring one time reporting to the Agency, is adequate for compliance purposes and does not place an undue burden on the disposal sector. When combined with the annual reporting by reclamation facilities on the amounts of refrigerant they purchase from service establishments and salvagers (section III.K.), the Agency will have adequate information on the volumes of refrigerant being recovered.

6. Certification to Final Processors

If the establishment responsible for the ultimate disposal of the equipment chooses not to remove refrigerant or is unable to remove it (for example, many scrap recyclers only receive crushed cars), the Agency proposes the option of a certification procedure between the final processor and the suppliers of the goods or machines stating that the ozone depleting chemical have been properly removed. The certification may be combined with a symbol or mark made on each piece of equipment that has had the refrigerant removed by the supplier. The Agency believes that this certification allows the final processors to continue to accept goods and machines for scrap recycling while assuring that their suppliers have removed refrigerant. The Agency is aware that this type of certification already exists in other contexts where scrap recyclers refuse to accept an appliance unless they also receive a certification that the appliance does not contain a capacitor. The certification would not be sent to the Agency.

The elements of the certification could vary based on the individual establishments involved. However, the Agency proposes that the final processors require suppliers to give the name and address of the person who recovered the refrigerant and the date refrigerant was recovered. The Agency suggests that final processors require marks indicating that each good or machine had been processed. The final processors should periodically inspect goods or machines to assure the supplier's certification has been made in good faith.

As in the case of the final processor that chooses not to remove refrigerant, the supplier to the final processor does not have to remove the refrigerant but the company must then assure, through an accompanying certification, that refrigerant has been removed earlier in the disposal chain.

7. Technician Training

The level of expertise required for recycling and recovery in the disposal sector may not be as high as that required in the servicing sector. The salvaging sector differs from servicing in that the technicians do not reintroduce refrigerant to equipment. While the concepts of recycling refrigerant and the purity standards that are appropriate for equipment are of vital importance to maintaining equipment, they are not necessary for the disposal of equipment. The disposal sector also differs from the servicing sector in that no trade associations or groups exist which represent the wide variety of technicians that may perform the refrigerant removal activity. The technicians involved in the removal of refrigerant may only perform this activity occasionally. Thus, training resources may not be as available to the disposal sector as they are to the servicing sector.

The Agency believes that the most appropriate training method for technicians in this case may be guidance documents developed by the Agency with the assistance of industry groups familiar with the methods of removing refrigerant from appliances and motor vehicles. This guidance would contain information on the environmental consequences of releasing refrigerant, refrigerant salvage techniques, the importance of not mixing different refrigerants, and the importance of selling the recovered substance to reclamation facilities for purification before reuse. Successful refrigerant removal programs that already exist could be profiled as examples of how municipal governments and others could implement programs. The Agency would distribute the documents, as would scrap metal recyclers and other processors who do not remove refrigerant themselves. Municipal governments would be both a target for the guidance document and a distributor of the document in their areas. EPA has had initial discussions with trade groups such as the Automobile Dismantlers Recycling Association (ADRA) and the Association of Home Appliance Manufacturers (AHAM) concerning the development of guidance documents. The Agency believes that a guidance document provided through the scrap metal recyclers will raise the awareness of the financial and environmental benefits of recovering ozone depleting substances and the guidance document can accommodate the variety of affected entities.

8. Performance Standards for Recovery Equipment

When developing options for the equipment that must be used in recovering refrigerant at disposal, the Agency considered extending the recovery equipment certification program for the servicing sector (see section III.G.1). The Agency is aware that the equipment that is currently available has been developed for the servicing sector and as a result, may not be appropriate for salvage. This is because, unlike the servicing sector, operations in the disposal sector frequently involve the evacuation of several pieces of equipment simultaneously. Moreover, entities involved in disposal are more likely than those involved in servicing to build equipment suitable for their specific circumstances. The Agency has knowledge of one firm, The Appliance Recycling Centers of America (ARCA), that has built equipment capable of retrieving refrigerant from ten appliances at one time and this allows the company to perform its salvage operations quickly and efficiently.

In order to provide assurance that recovery equipment used in disposal activities achieves a satisfactory level of performance without imposing a certification requirement unsuitable for

this sector, the Agency proposes to require that the equipment used to recover refrigerant from appliances and motor vehicles meet the same performance standards as those required for servicing equipment, except that passive systems would not be necessarily permitted for use with appliances at disposal. EPA is not, however, proposing to require certification of that equipment. This proposal allows individuals to develop their own equipment while setting requirements for the efficiency the Agency expects the equipment to meet. Any equipment intended for sale for use in salvaging operations must meet the efficiency standards and the Agency recommends independent laboratory tests to assure that the equipment complies with industry safety standards. These tests would be the same as those for equipment intended for service.

While the efficiency standard for appliances does allow for servicing use of passive equipment, (defined as equipment that does not use a compressor and is not itself capable of creating a vacuum), the standards proposed for recovery equipment under the safe disposal program do not include passive systems. The Agency does not believe that passive equipment has a large role for salvage because of the increased time needed to recover the substance. In addition, EPA is concerned that passive recovery would generally be less efficient at disposal than at servicing for two reasons. First, EPA believes that the compressors of refrigerators (and other small appliances) that are disposed of are generally less likely to be functioning than the compressors of refrigerators that are serviced (if only because it may be difficult to connect each disposed refrigerator to a power source), and passive recovery without a functioning refrigerator compressor is significantly less efficient than passive recovery with a functioning compressor. Second, recovery at disposal is far more likely than recovery at servicing to take place in low ambient temperatures, which could particularly affect passive systems relying solely on system pressure for their effectiveness (discussed below). However, EPA is also concerned that a requirement to use only active equipment for refrigerator disposal may make compliance more difficult and therefore less likely in some instances. The Agency requests comment on these concerns and on its proposal not to allow use of passive systems at disposal of small appliances.

An individual who tests refrigerant recovery methodologies under different conditions in Massachusetts reported to EPA that refrigerant recovery from systems using R–12 drops off sharply when the ambient temperature falls below 60 degrees F. At 32 degrees, typical recovery machines can recover only ten percent of the refrigerant, and at 0 degrees F, recovery efficiency drops essentially to 0. Thus, unless systems are heated, outdoor recovery during the winter months in most of the U.S. will recover only a tiny percentage of the refrigerant in the system. Methods that could raise recovery efficiency include applying heat to the system while it is outdoors or moving the system (e.g., the refrigerator) into a building whose ambient temperature is 60 degrees or more and allowing the system to come to temperature over some period of time (e.g., 24 hours). EPS requests comment on the practicality of these and other possible methods and on whether the Agency should prescribe one or more of these methods to guarantee 90 percent refrigerant recovery from disposing appliances during winter months.

M. Servicing Apertures

Section 608(b)(2) of the Act directs EPA to promulgate regulations requiring that any "appliance, machine, or other good containing a class I or class II substance in bulk shall not be manufactured, sold, or distributed in interstate commerce or offered for sale or distribution in interstate commerce unless it is equipped with a servicing aperture or an equally effective design feature" to facilitate removal of refrigerant at servicing and disposal. In today's notice, EPA is proposing to require that all air conditioning and refrigeration equipment containing more than one pound of refrigerant and manufactured after [6 months after publication of the final rule] be provided with a servicing aperture. All equipment containing less than one pound of refrigerant (e.g., household refrigerators and water coolers) and manufactured after [6 months after publication of the final rule] would have to be provided with the "equally effective design feature" of a process stub or "pigtail" from which refrigerant can be removed using a puncture valve.

Information from industry representatives on the STOPAC Subcommittee indicates that most if not all air conditioning and refrigeration equipment with more than one pound of charge is already provided with a servicing aperture. Similarly, refrigerators and other appliances containing less than one pound of refrigerant are already generally provided with stubs for refrigerant recovery. EPA expects that manufacturers will incorporate the required features of any other equipment by [6 months after publication of the final rule].

EPA considered requiring that refrigerators and other small appliances be equipped with a servicing aperture; however, an analysis submitted by appliance manufacturers indicated that the aperture and additional solder joints that would have to be installed along with it would significantly increase the likelihood of refrigerant leakage, canceling out any benefits gained by making the system slightly more accessible at servicing. (At present, both leaks and repairs requiring entrance into the sealed system are quite rare.) Moreover, in recognition of the unique situation posed by small appliances, ASHRAE recommends against installing servicing valves on refrigerators in its Guideline 3. The importance of minimizing potential leak points in small appliances is also supported by the current practice for removing refrigerant from them. This involves puncturing a specially designed protruding stub with a valve that attaches temporarily, facilitating refrigerant recovery and recharging. Instead of leaving the valve for potential future use after repairs are complete, the servicer removes the valve and reseals the system using a brazing torch. The servicing aperture analysis and supporting comments are available in the public docket (AHAM, July 2, 1991). EPA requests comment on this analysis and on its proposal to consider servicing stubs an "equally effective design feature."

Some industry representatives have noted that the present design and location of servicing apertures frequently makes recovery of refrigerant unnecessarily complicated. For instance, although the fastest method of recovering refrigerant is to remove as much as possible in the liquid state, the common location of servicing apertures at the compressor either prevents this or necessitates entry into the system at another point (e.g., the condenser outlet). An inconvenient design feature of many servicing apertures is the presence of a schrader valve, which must be removed before recovery begins or it will considerably slow the process.

EPA is considering requiring that servicing apertures be designed and located to maximize the ease of recovery. This might involve requiring the installation of servicing apertures at both the evaporator and the condenser outlet (or the lowest point on the system) and/or prohibiting the installation of schrader valves. EPA requests comment on these options.

N. Possible Exemption From Regulatory Requirements for Refrigerant Uses for Which No High-Efficiency Recovery Technology Exists

Over the past several months, EPA has been contacted by individuals servicing specialized air conditioning and refrigeration equipment who state that no high-efficiency recovery technology exists for the equipment that they service. For instance, one technician states that he repairs very high pressure refrigeration equipment used in quarantined laboratories and on hospital ships. According to this technician, the only active recovery device developed for use with very high pressure refrigerants requires the use of an air compressor that is too large to be moved into these areas. At the same time, it is impossible to remove equipment from these areas to be repaired in the technician's shop.

In order to avoid violating the prohibition on venting, the technician could use a passive technology (evacuated cylinders) to recover the refrigerant. EPA calculated that three evacuated, chilled, 45-pound cylinders are sufficient to capture approximately 87 percent of a 15 pound charge of R–503. However, the quantity of refrigerant that can be captured by each cylinder drops sharply after the third cylinder; a fourth cylinder captures approximately an additional nine percent of the refrigerant, a fifth, three percent, and a sixth, one percent. Achieving 99 percent efficiency, therefore, would add considerably to the time and difficulty of the job and may not be worthwhile. Moreover, as currently proposed, the certification program for recycling and recovery equipment used on systems with more than one pound of refrigerant precludes the use of passive equipment. Thus, although the technician could comply with the prohibition on venting, he would not be able to comply with the rule as proposed.

For refrigerant uses for which no high-efficiency recovery technology exists or is applicable, EPA believes that it may be appropriate to grant very limited exemptions to its regulatory requirements. In general, EPA believes that at least a passive recovery technology will be available for these refrigerant uses. However, the Agency could also consider granting exemptions to the prohibition on venting if no recovery technology at all was applicable to a certain refrigerant use.

The Agency could establish a procedure that would require individuals seeking exemptions to demonstrate that no high-efficiency technology (or no technology at all) was available to recover refrigerant from the equipment that they owned or serviced and that no existing high-efficiency technology could be adapted to this purpose. The burden of proof would lie on the person seeking the exemption. The Agency would also require information regarding the total quantity of refrigerant that would be released annually if an exemption were granted, including information on typical equipment charge sizes and total stock. Upon receipt of all required information, EPA would make its decision, considering the availability of technology and the quantity of refrigerant to be released. Exemptions might also be granted only for a limited period of time, subject to the continuing unavailability of a recovery technology.

EPA requests comment on the need for such an exemption procedure, on the general structure of the procedure described here, and on the Agency's legal authority to establish such a procedure. In particular, EPA requests comment on whether exemptions from the prohibition on venting would fall within the *de minimis* exemption provided in section 608(c) for de minimis releases associated with good faith attempts to recapture and recycle refrigerants or whether EPA could grant such exemptions pursuant to its general authority to exempt *de minimis* situations from statutory commands. See *Alabama Power Co.* v. *Costle*, 636 F. 2d 323, 360–61 (D.C. Cir. 1979).

IV. Possible Future Rulemakings To Implement Section 608

EPA has focused in this proposal on requirements concerning refrigerant recycling and recovery during servicing and disposal because of the significant near-term potential for emission reductions from improved servicing and disposal practices. However, as discussed earlier, the scope of section 608 extends beyond the servicing and disposal of equipment to encompass all life cycle stages, including manufacture and use.

In developing additional regulations aimed at achieving the "lowest achievable level" of emissions, the Agency will consider actions that facilitate an orderly transition out of first, class I compounds and then, class II compounds, consistent with achieving the goal of reducing emissions to the lowest achievable level. The Agency will examine the necessity of these regulations and, if necessary, will develop these regulations taking into account its on-going regulatory program (accelerated phaseout, nonessential product bans, recycling and recovery, and warning labels, and the safe alternatives program), the impact of the current excise tax on the use of these chemicals, and the incremental costs and benefits of regulations. (The President called for accelerating the phaseout of ozone-depleting compounds to the year 1996, and the Agency has developed a proposal that will end the production of these chemicals by the end of 1995. This proposal will appear in the **Federal Register** shortly.)

EPA is considering in the near-term using section 608 to address a number of potential problems that could slow transition away from class I substances used in refrigeration and air conditioning applications. Potential actions related to other class I applications and all class II substances are not required until November 1994 and therefore will be discussed in a notice EPA will publish at a later date. These additional regulations will be reviewed in light of the accelerated phaseout. A number of these issues have been raised during discussions held at past meetings of EPA's Stratospheric Ozone Protection Advisory Committee.

Additional near-term regulations under section 608 might be useful in the following contexts: (a) To expedite the transition from equipment that now uses class I substance as its refrigerant to new equipment that does not rely on class I substances; (b) to reduce emissions from existing refrigeration equipment that uses a class I substance; (c) to encourage timely retrofitting of existing equipment; and (d) to establish engineering controls to ensure that multiple refrigerants introduced into the marketplace to service existing equipment are not mixed. The following sections describe the rationale behind these possible actions and the sectors that might be affected.

a. New Equipment Phase-out Dates

In some applications, equipment that uses CFC alternatives may now or will soon be available but may be more expensive or require the use of higher priced alternatives. EPA expects that firms will continue to buy the equipment that uses the class I substance instead of the alternative as long as the alternative is more expensive.

To give a more concrete example of the above situation, EPA is aware that some equipment being sold today has been designed to use both CFCs and an HCFC or HFC alternative. However, because the price of CFCs (including the excise tax) is still considerably below the price of the alternatives, firms are continuing to use the CFCs to operate this equipment.

Section 608(a)(3) gives EPA the authority to "minimize use of class I or class II substances" and to require "use [of] alternative substances." EPA is considering proposing a rule under section 608 stating that the use of certain alternatives that have become available in the marketplace constitutes the "lowest achievable level" of emissions. Such a rule could prohibit the continued sale of equipment that requires a class I refrigerant and/or prohibit the use of a class I refrigerant in equipment that is compatible with an alternative. EPA is especially interested in whether a requirement to use alternatives should be used in the case of commercial and industrial air conditioning and chiller equipment. The Agency will consider both the costs and benefits of replacing class I refrigerants in specific uses before undertaking regulation. As noted above, EPA will also consider the effects of its ongoing regulatory program (including the latest phaseout schedule) and the latest excise tax in deciding whether further regulation is necessary.

b. Near-Term Emission Reduction Controls

EPA is also concerned about specific refrigeration and air conditioning applications where emissions of class I substances represent a significant source of total emissions for that sector. Commercial chillers and commercial refrigeration are two such sectors where technologies exist and service practices can be modified that would substantially reduce total emissions, thereby satisfying the requirements of section 608 to reduce emissions in these sectors to their "lowest achievable level." To some extent, the rising price of class I substances (driven both by the diminishing supply and by the increasing excise tax) will encourage equipment owners to undertake conservation measures without further regulations. However, actions to reduce emissions in these areas under section 608 could achieve important additional near-term reductions in emissions and also substantially reduce emissions over the longer-term. This would have economic as well as environmental benefits, postponing the retirement of existing equipment by conserving the limited supply of refrigerant.

In the case of commercial centrifugal chillers, the average refrigerant charge has been estimated to be 1250 pounds of CFC-11. Approximately 80,000 units are currently in use in the United States. Average emissions from a chiller have been estimated to be 24 percent of the charge per year, or roughly 312 pounds per year. Of this amount, EPA estimates that 15 percent or close to 50 pounds per year are emitted when non-condensable gases are purged from the system. (In all existing systems, CFC-11 is purged from the system along with the non-condensable gas.) With the addition of equipment that captures the CFCs from the outflow during the purge or reduces the amount of CFCs released as part of the purge, CFC losses from this source can be reduced by 95–99 percent. This equipment is now commercially available and in use.

Another source of emissions from chillers occurs during system start-up. During the system down-time, usually in winter months, air infiltrates the system. Upon start-up, it is necessary to vent the air. If this purge is performed improperly, large quantities of refrigerant can be released that can amount to as much as 25 percent of total annual emissions from this source. Equipment is now available that keeps the chillers pressurized during the time they are inactive and therefore eliminates the infiltration of air and the need to purge the system. Used in combination, both a more efficient purge and elimination of infiltration of non-condensable gases during down-time could achieve significant reductions in total emissions and demand for servicing chillers.

Commercial refrigeration (e.g., refrigeration units in supermarkets) is a second use application where emissions from existing capital equipment is significant. Supermarket systems are extremely susceptible to leaks, with losses of 30% of their charge annually not uncommon. One reason that leaks occur at this high rate is because refrigerant is typically piped around the store from the equipment room to the display cases. This requires long refrigerant lines with many valves and joints throughout the store. To reduce emissions during system use, the Agency will need to evaluate the costs and potential benefits of requiring leak detection equipment and other engineering means to reduce the leaks from fitting and pipe connections. In addition, improvements in servicing procedures can also have a large impact in reducing emissions in this sector and therefore future demand to service existing capital equipment.

EPA is seeking comments on the potential costs and benefits of requiring some or all of the above actions to reduce emissions from this sector.

c. Refrigeration and Air Conditioning Equipment Retrofit

The possible need to retrofit existing equipment to utilize an alternative refrigerant is another area where actions under section 608 may be required in order to ensure an orderly phase-out of class I substances consistent with achieving the lowest achievable level of emissions. Operators of existing capital equipment that requires a class I substance for servicing (e.g., chillers, commercial refrigeration, car air conditioners, etc.) will face a number of choices for servicing their equipment following the date of a production phase-out. They can either rely on class I substances that are made available from recycling or recovery at disposal, take steps to reduce emissions and therefore servicing needs of their existing equipment, retrofit their existing equipment to use an alternative, or replace their equipment with new equipment that utilizes an alternative. The choice (or combinations) among these options will depend on a number of factors, including the expected useful life of the capital equipment, the costs and benefits of steps to reduce emissions, the costs of retrofit options, and the price and continued availability of the class I substance.

If the existing equipment has a long expected useful life and can be made compatible with an alternative refrigerant through relatively minor modifications, then retrofitting the equipment may be the most economical method of adjusting to the phaseout. However, like equipment purchasing decisions, decisions on when to retrofit will be heavily influenced by the relative prices of the class I refrigerant and its alternative. As long as the alternative is more expensive than the CFC, there will be a disincentive to retrofit. Since the availability of a retrofit could qualify as a "lowest achievable level" of emissions under section 608, EPA will consider whether to utilize this section to accelerate retrofit of some types of equipment, reducing CFC emissions.

This requirement may have applicability in the following areas: the retrofit of CFC-11 centrifugal chillers to utilize HCFC-123 where exposure limits can be satisfied; the retrofit of CFC-12 auto air conditioners to use HFC-134a or an HCFC/HFC blend (e.g., HCFC-22, HFC-152a and HCFC-124); and the conversion of CFC-12 commercial refrigeration to use HCFC-22. EPA is seeking comment on the need for such a rule and whether it should apply to any or all of these applications or others not described in this notice.

d. Requirements for Use of a Service Refrigerant

Another issue that has been raised concerns potential problems with the use of alternative refrigerants either to

service equipment as a near "drop-in" (an alternative refrigerant that could be used in HVAC/R equipment with only minor modifications) or to service equipment that has undergone a retrofit. As class I substances are phased out, the requirements to service existing equipment with a non-class I alternative has led many companies to begin examining a wide range of "service refrigerants." EPA wants to encourage the development of alternatives that can be used to service existing equipment and intends to work closely with the affected industries to take steps to minimize any potential adverse effects of such alternatives.

In particular, concerns have been raised that in some cases an alternative for the service market may directly result in increased emissions of class I substances by interfering or disrupting recycling or recovery efforts. Furthermore, if appropriate safeguards are not taken, the mixing of different refrigerants could damage or destroy recycling or capital equipment, thereby resulting in release of refrigerant and substantial private economic losses. This would undermine the effectiveness of recycling efforts. As a result, unless proper safeguards are taken, the use of this "service refrigerant" could interfere with achieving the "lowest achievable level" of emissions and EPA could consider taking action under section 608 to ensure that appropriate measures are taken that allow for the effective use of any service refrigerant. EPA could also consider taking action under section 612 (safe alternatives) and under section 609 (motor vehicle recycling) to minimize or avoid any harmful environmental and economic impacts that could occur from the introduction of an alternative to servicing existing equipment that increases the risk of refrigerant release and subsequent environmental damage.

EPA requests comment on the need to regulate servicing refrigerants to minimize emissions, the potential costs and benefits of such a regulation, and the use of section 608 as the basis for such a regulation.

V. Summary of Supporting Analyses

A. Regulatory Impact Analysis

Executive Order No. 12291 requires the preparation of a regulatory impact analysis (RIA) for major rules, defined by the order as those likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, state or local government agencies, or geographic industries; or

(3) Significant adverse effects on competition, employment, investment productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The annualized costs for this proposal, $71 million, fall under $100 million. Therefore, the Agency has determined that this regulation does not meet the definition of a major rule under E.O. 12291. Nonetheless, due to the proximity of the costs of this rule to the $100 million threshold, the Agency has fulfilled the requirements of E.O. 12291 and prepared an RIA to assess the impact of the regulation (see Regulatory Impact Analysis: The National Recycling and Emission Reduction Program, April 8, 1992) which is available for review in the public docket for this rulemaking. This analysis is summarized below.

1. Baseline.

Since these regulations are being promulgated in addition to other regulations that affect the use of CFCs and HCFCs, the baseline for this analysis must reflect the state of affairs after the implementation of previous rules and before the implementation of the proposed rule. Two provisions of the Clean Air Act that must be considered when defining the baseline for these regulations are the phaseout of CFCs required by section 604 of the Act and the prohibition on venting contained in section 608(c), which is self-effectuating. For the purposes of the analysis, two variables were chosen to describe the effects of these provisions: the percentage of the market in which recycling and recovery would occur as a result of the provision (referred to as either market penetration or compliance); and the average recapture efficiency of the recycling or recovery methods that would be employed.

The CFC Phaseout has two important effects for the baseline: it affects the quantities of CFCs and HCFCs that need to be recycled and it makes recycling cost-effective for owners of equipment in certain sectors. As the CFC Phaseout restricts the supply of CFCs, their prices will rise. As a result, substitute chemicals will replace CFCs in new equipment and it will become less expensive to recycle the CFCs in existing equipment than to buy virgin CFCs to replace them. Sectors in which recycling is likely to occur under the phaseout include retail food, cold storage, chillers, and industrial process refrigeration. In this analysis, both market penetration and efficiency of equipment are expected to reach about 95% in these sectors under the phaseout. Various market inefficiencies and information shortfalls are assumed to prevent 100% market penetration; for instance, not recognizing the long-term economic benefits of recycling, some technicians may choose not to invest in recycling and recovery equipment. A recovery efficiency of ninety-five percent is assumed to be the level that is most cost-effective from a private (as opposed to a social) perspective.

The self-effectuating prohibition on venting required by section 608(c) can be considered a minimal requirement to recycle because chemicals must be recycled, or at least stored, if they cannot be vented. However, because the prohibition on venting does not in itself contain standards, maximum recovery efficiency and full compliance would not be expected under the prohibition alone. The likely rates or compliance in the household refrigeration, residential air conditioning, and transport refrigeration sectors would be estimated to reach approximately 80% under the prohibition alone, and efficiencies are estimated to range between 75 and 95% for these sectors.

Under the requirements of this recycling rule, recovery efficiencies are expected to range between 95 and 99%, depending upon the equipment requirements for each sector. Rates of compliance are expected to range between 95 and 99 percent in some sectors, and between 80 and 99 percent in others. EPA has calculated a range of costs and benefits for the rule depending upon the extent to which the rate of compliance rises relative to that under the venting prohibition. The lower bound costs and benefits assume that compliance rates remain the same as under the venting prohibition; the upper bound costs and benefits assume that compliance rates rise to 99%.

2. Costs

The costs of the phaseout and the prohibition on venting consist of the cost of the additional labor required to recycle or recover, the capital and operating costs of recovery and recycling equipment, and refrigerant storage costs. EPA estimates that the prohibition on venting will cost a total of approximately $4.8 billion over the 25-year period of the analysis. The costs of the recycling rule consist of the costs of certifying recycling and recovery equipment, recordkeeping costs, and refrigerant storage costs. To the extent that the recycling rule increases recycling rates, its costs also consist of the labor, capital, operating, and refrigerant storage costs associated with the increased recycling. If the recycling

rule is not assumed to increase recycling rates, its cost is estimated to be $29 million over the 25-year period of the analysis. If the rule is assumed to increase recycling rates, its cost is estimated to be $1.4 billion over the 25-year period.

3. Benefits

The benefits of the three provisions discussed above consist of the avoided damage to human health and the environment that would have occurred if, without regulation, ozone-depleting refrigerants had been released rather than recaptured. EPA's calculation of benefits includes the following: (1) Reduction in the incidence of melanoma and non-melanoma skin cancer cases and fatalities, (2) reduction in the incidence of cataract cases, (3) increases in the value of crops harvested due to reductions in both direct UV effects and indirect effects from tropospheric (ground-based) ozone, (4) increases in the value of fish harvested due to decreased levels of damaging UV radiation, and (5) decreased costs in protecting polymer products.

Emissions of ozone-depleting refrigerants drop when recycling rates or recycling efficiencies increase. Under the prohibition on venting, recycling rates are assumed to increase because recycling begins in the household refrigeration, residential air conditioning, and transport refrigeration sectors. Under the recycling rule, recycling efficiencies are assumed to increase because certification of recycling and recovery equipment increases the average efficiency of this equipment. In addition, recycling rates may increase under the recycling rule, decreasing emissions still further.

EPA estimates that the prohibition on venting alone will result in benefits that could be valued between $5.2 and $14.2 billion, depending upon whether each life saved is valued at $3 or $12 million. The additional benefits of the recycling rule range between $1 billion and $4 billion (depending upon recycling rates) if each life saved is valued at $3 million, and between $4 billion and $18 billion if each life saved is valued at $12 million.

These estimates of costs and benefits are based upon a discount rate of two percent for costs and benefits. EPA is revising the RIA to take into account a number of issues, including the possibility of using alternative discount rates for costs and benefits. The revised RIA will be available in the public docket.

B. Regulatory Flexibility Analysis

1. Purpose

The Regulatory Flexibility Act, 5 U.S.C. 601–612, requires that Federal agencies examine the impacts of their regulations on small entities. Under 5 U.S.C. 604(a), whenever an agency is required to publish a general notice of proposed rulemaking, it must prepare and make available for public comment an initial regulatory flexibility analysis (RFA). Such an analysis is not required if the head of an agency certifies that a rule will not have a significant economic impact on a substantial number of small entities, pursuant to 5 U.S.C. 605(b).

The Agency has performed an initial regulatory flexibility analysis and determined that this regulation is unlikely to have a significant impact on a substantial number of small businesses. The analysis is found in appendix A in the Regulatory Impact Analysis: The National Recycling and Emission Reduction Program and is available for review in the docket. The methodology and results of the analysis are presented below.

2. Methodology

To examine the impacts on small businesses, EPA characterized the regulated community by identifying the SIC codes that would be involved in the disposal of motor vehicle air conditioners and in the servicing, repair, and disposal of small appliances, residential air conditioning, and transport refrigeration. Firms in these sectors were divided into six segments: Appliance repair shops, air conditioning contractors, refrigerated transport service dealers, scrap yards and intermediate processors, automobile dismantlers, and autowreckers. Impacts on the retail food, cold storage, chiller, and industrial process sectors were not analyzed because refrigerant recycling and recovery is cost-effective from a private perspective in these sectors. For these sectors, the private costs associated with recycling and recovery are negligible or negative. In addition, two other sectors were excluded from the analysis: Vocational schools and municipal solid waste facilities. Data on vocational schools are scarce, and the proposed regulations, which affect only one aspect of vocational training, are not likely to have any significant impact on vocational schools. Similarly, the regulations are not likely to have a significant impact on municipal solid waste facilities because these facilities generally do not accept white goods such as refrigerators, freezers, and room air conditioners.

There was a disparity between the EPA and the Census Bureau estimates of the number of establishments in each of the six affected industry segments. In some areas, such as the appliance repair segment, the number of establishments estimated by EPA exceeded the number allocated to the corresponding SIC category. In others, such as the air conditioning contractor segment, EPA estimates fell below Census numbers for the corresponding SIC. The disparities in each category were largely a matter of definition. Because the Census Bureau assigns a business to a given SIC code based on the source of the majority of its sales receipts, an SIC code may not include many businesses that do only some work in the area of concern. At the same time, some SIC codes may prove overly inclusive, such as SIC 1711, "Plumbing, Heating, and Air Conditioning Contractors," which includes some establishments engaged only in plumbing work and not in the service or disposal of air conditioning equipment. In choosing the SIC codes that corresponded to segments of the potential regulated community, EPA's analysis focussed primarily on ensuring that each sector of the potential regulated community had a corresponding SIC code that accurately represented its structure. The fraction of businesses that would be defined as small (under the Small Business Act, or SBA) among the establishments identified by EPA in each segment was then assumed to be the same as the fraction of businesses that would be defined as small among those in the comparable SIC category.

After determining the number of entities in each industry segment that would be classified as small, the Agency examined the compliance costs initially incurred by firms and the extent to which these costs could be passed on to consumers. EPA then performed impact tests using sales, profits, and cash flow measures.

The costs incurred by a firm as a result of the proposed rule include the following elements: Labor costs, operating costs, capital costs, certification costs, and the avoided costs of purchasing virgin refrigerant. To estimate these costs, EPA used data on the quantity of air conditioning or refrigeration equipment in each of the affected sectors and on the frequency of service and disposal in each sector. EPA then divided affected businesses into those with under $1 million annual sales and those with over $1 million annual sales. This distinction is important because larger firms perform more service and disposal jobs than smaller firms and therefore incur higher

labor and operating costs. (The distinction bears no direct relationship to the SBA definition of small business.) Annual direct compliance costs per business ranged between $624 for small appliance repair shops and $36,932 for large autowreckers.

Under certain conditions, some portion of regulatory costs will be passed on to consumers. Since the proposed rule meets these conditions, businesses will not bear all regulatory costs. (For a complete discussion of regulatory costs incidence, please see appendix A to the RIA.) Microeconomic theory suggests that the ratio between the elasticity of demand for a good and the elasticity of supply for that good is roughly equivalent to the ratio between the producers' share of regulatory costs and the consumers' share of regulatory costs. The extent to which regulatory costs may be passed on to consumers, therefore, depends upon the relationship between the elasticity of demand and the elasticity of supply for the good in question. The elasticities of demand and supply are a measure of how demand for a good and supply of a good change in response to changes in price.

Although the factors that determine supply and demand elasticity can be complex, certain forces frequently play an important role in determining the character of supply and demand elasticity for a good. Generally, demand for a good will decrease when the price rises because consumers will choose to purchase substitutes for the good. However, if substitutes are nonexistent or expensive, consumers will have fewer alternatives to purchasing the original good, and demand will change very little. In this case, the demand elasticity for the good is low. Supply of a good will usually decrease when the price falls because it becomes less profitable to produce the good. However, if it is expensive to change the supply of the good (e.g., requires the retirement of valuable capital equipment), producers will have fewer alternatives to producing the good, and supply will change relatively little. In this case, the supply elasticity of the good is low.

When the demand elasticity for a good is low and the supply elasticity for the good is high, the majority of regulatory costs will likely be borne by consumers. EPA developed elasticity estimates for each segment of the regulated community. Demand elasticity estimates for the specific goods in question were not available. As a result, the Agency used estimates of demand elasticity in closely related industries as proxies for actual elasticity estimates. Since no estimates of supply elasticity were available, the Agency developed quantitative estimates of supply elasticity based on its understanding of the various segments of the regulated community.

EPA's analysis showed that demand was likely to be inelastic in all affected industry segments. For instance, demand for household appliance service is unlikely to fall significantly in response to a rise in price because (1) equipment such as the household refrigerator renders a service that is vital to most consumers, and (2) the few substitutes to appliance repair, such as purchase of a new appliance, are often expensive and impracticable. The situation is similar in the other service segments. In the disposal segments, demand is likely to be inelastic because consumers have few alternatives to disposing of appliances when these items are retired, and auto dismantlers and wreckers (who play the role of consumer in this transaction) have few substitutes for junked automobiles in their operations.

Elasticities of supply varied somewhat more. The appliance and residential air conditioning repair segments are likely to have high supply elasticities because entering these businesses requires a relatively low capital investment and moving into related areas (e.g., heating) is relatively easy. On the other hand, the supply elasticity of refrigerated transport service is lower because refrigerated transport service is highly specialized and entry into the industry entails substantial capital investment. Scrap yards and intermediate processors are likely to respond readily to price changes because they have a large degree of flexibility with regard to which type of appliances they choose to accept. Supplies of junked automobiles, however, are unlikely to change significantly in response to the prices offered for them.

Based on these estimates, EPA calculates that firms will bear between four percent (for scrap yards and intermediate processors) and 25 percent (for refrigerated transport service dealers) of the compliance costs associated with the proposed rule. Annual compliance costs borne by firms range between $39 for small appliance repair shops and $6,987 for large auto dismantlers. (Again, the term "large" is used here to refer to a large small business.)

To evaluate the significance of these costs, EPA performed impact tests using sales, profits, and cash flow measures. Existing EPA guidelines suggest that significant economic impacts on small businesses occur when any one of the following three criteria are satisfied (Environmental Protection Agency, Office of Policy, Planning, and Evaluation, Guidelines for Complying with the Regulatory Flexibility Act, Draft Document dated January 18, 1991.):

- Annual compliance costs exceed one percent of sales;
- Annual compliance costs exceed 10 percent of profits; or
- Annual debt-financed capital compliance costs exceed 20 percent of current cash flow.

These criteria make up a screening test used to assess initially the impacts likely to result from a proposed regulation. Should a "substantial number" of small business, defined as over 20 percent of affected small business, satisfy any of the criteria outlined above, EPA guidelines require that more detailed economic analysis be performed.

Many small establishments failed the profits and cash flow tests (that is, profits and cash flow were negative) before imposition of the regulation. These were thus determined to be in poor financial condition under the baseline and their continued failure of these tests was not attributed to the proposed rule. Any small entities not in poor financial condition under the baseline that failed any of the tests above were assumed to incur a significant impact under the proposed rule.

EPA's analysis showed that the proposed rule will have a significant impact on 16 percent of the affected small businesses. These small businesses may respond in a number of ways. They may (1) close as a result of the costs imposed by regulation, (2) avoid the costs imposed by the regulation by ceasing work on refrigeration and air conditioning equipment while continuing to provide other types of service, or (3) continue to service or dispose of affected equipment while incurring increased cost.

Available census and financial data suggest that most of the 16 percent will continue to service or dispose of affected equipment. EPA estimates that annual compliance costs borne by firms as a result of the proposed rule will actually exceed annual profits for approximately 2,500 small businesses. These 2,500 establishments comprise approximately 3 percent of all small businesses in the regulated community. Firms that incur annual compliance costs in excess of annual profits may be forced out of business or, alternatively, may elect to discontinue work that involves refrigeration or air

conditioning equipment. Firms whose annual compliance costs fall below their annual profits are likely to stay in business.

Where possible, EPA has attempted to minimize the economic impact of this regulation on small businesses. For instance, EPA is proposing less stringent standards for the recovery of refrigerant from small appliances, which are frequently repaired by one- or two-man service shops. These standards would permit the use of relatively inexpensive, passive, recovery devices. In addition, EPA is proposing fewer requirements and a more flexible program for the disposal of small appliances, room air conditioners, and MVACs because the industries that dispose of these items are unusually decentralized.

Moreover, this analysis probably overstated the potential impacts of regulation for two reasons. First, it estimated the combined impacts of both the section 608 recycling rule and the self-effectuating prohibition on venting. EPA estimates that for the residential air conditioning and household appliance sectors, 80 percent of recovery jobs can be attributed to the prohibition on venting, and for transport refrigeration, 50 percent of recovery jobs can be attributed to the prohibition. If this analysis had examined only the incremental impacts due to the recycling rule, the estimate of the percentage of small businesses affected significantly would have been reduced accordingly. Second, this analysis examined each industry segment in isolation, failing to account for interactions between competing industry sectors (e.g., service vs. disposal of appliance) that would tend to decrease costs borne by firms. Thus, the Agency certifies that this regulation will not have an impact on a significant number of small entities, pursuant to 5 U.S.C. 605(b).

C. Paperwork Reduction Act

The information collection requirements in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* An Information Collection Request document has been prepared by EPA and a copy may be obtained from Sandy Farmer, Information Policy Branch; EPA; 401 M St., SW. (PM–223Y); Washington, DC 20460 or by calling (202) 260–2740.

Public reporting burden for this collection of information is estimated to vary from 1 to 40 hours per response with an average of 2.3 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing the collection of information.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Chief, Information Policy Branch; EPA; 401 M St., SW.; Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA." The final rule will respond to any OMB or public comments on the information collection requirements contained in this proposal.

List of Subjects in 40 CFR Part 82

Administrative practice and procedure, Air pollution control, Reporting and recordkeeping requirements.

Dated: November 30, 1992.

William K. Reilly,

Administrator.

For the reasons set out in the preamble, part 82, title 40 of the Code of Federal Regulations is proposed to be amended as follows:

PART 82—PROTECTION OF STRATOSPHERIC OZONE

1. Authority: The authority citation for part 82 continues to read as follows:

Authority: 42 U.S.C. 7414, 7601, 7671–7671q.

2. Part 82 is amended by adding subpart F to read as follows:

Subpart F—Recycling and Emissions Reduction

Sec.

82.150 Purpose and scope.
82.152 Definitions.
82.154 Prohibitions.
82.156 Required practices.
82.158 Standards for recycling and recovery equipment.
82.160 Approved equipment testing organizations.
82.162 Certification by owners of recovery and recycling equipment.
82.164 Reclaimer certification.
82.166 Reporting and recordkeeping requirements.

Appendix A to Subpart F—Specifications for Fluorocarbon Refrigerants

Appendix B to Subpart F—Performance of Refrigerant Recovery, Recycling and/or Reclaim Equipment

Appendix C to Subpart F—Method for Testing Recovery Devices for Use With Small Appliances

Subpart F—Recycling and Emissions Reduction

§ 82.150 Purpose and scope.

(a) The purpose of this subpart is to reduce emissions of class I and class II refrigerants to the lowest achievable level at the service, maintenance, repair, and disposal of appliances in accordance with section 608 of the Clean Air Act.

(b) This subpart applies to any person servicing, maintaining, repairing or disposing of appliances except for persons servicing motor vehicle air conditioners. This subpart also applies to the disposal of motor vehicle air conditioners.

§ 82.152 Definitions.

(a) *Active Recovery Device* means a device that uses its own pump or compressor to pump refrigerant out of an appliance and into an external container.

(b) *Appliance* means any device which contains and uses a class I or class II substance as a refrigerant and which is used for household or commercial purposes, including any air conditioner, refrigerator, chiller, or freezer.

(c) *Approved Equipment Testing Organization* means any organization which has applied for and received approval from the Administrator pursuant to § 82.160.

(d) *Certified Refrigerant Recovery or Recycling Equipment* means equipment certified by an approved equipment testing organization to meet the standards in § 82.158 (b) or (d) or equipment manufactured before [6 months after publication of the final rule] that meets the standards in § 82.158 (c) or (e).

(e) *Disposal* means:

(1) The discharge, deposit, dumping or placing of any discarded appliance into or on any land or water;

(2) The disassembly of any appliance for discharge, deposit, dumping or placing of its discarded component parts into or on any land or water; or

(3) The disassembly of any appliance for reuse of its component parts.

(f) *High Pressure Appliance* means an appliance that uses a refrigerant with a boiling point between –50 and 0 degrees Centigrade at atmospheric pressure (29.9 inches of mercury). This definition includes but is not limited to appliances using refrigerants 12, 22, 500, or 502.

(g) *Intermediate Pressure Appliance* means an appliance that uses a refrigerant with a boiling point between 0 to 10 degrees Centigrade at atmospheric pressure (29.9 inches of mercury). This definition includes but is

not limited to appliances using CFC–114.

(h) *Low loss fitting* means any device that is intended to establish a connection between hoses, appliances, or recovery or recycling machines and that is designed to close automatically when disconnected, minimizing the release of refrigerant from hoses, appliances, and recovery or recycling machines.

(i) *Low Pressure Appliance* means an appliance that uses a refrigerant with a boiling point above 10 degrees Centigrade at atmospheric pressure (29.9 inches of mercury). This definition includes but is not limited to equipment utilizing refrigerants 11, 113, and 123.

(j) *Motor Vehicle Air Conditioner (MVAC)* means any motor vehicle air conditioner as defined in 40 CFR part 82 subpart B.

(k) *Opening an appliance* means any service, maintenance, or repair on an appliance that could be reasonably expected to release refrigerant from the appliance to the atmosphere unless the refrigerant were previously recovered from the appliance.

(l) *Passive Recovery Device* means a device that relies solely upon the compressor in a small appliance and/or upon the pressure of the refrigerant inside a small appliance to remove the refrigerant into an external container.

(m) *Person* means any individual or legal entity, including an individual, corporation, partnership, association, state, municipality, political subdivision of a state, Indian tribe, and any agency, department, or instrumentality of the United States, and any officer, agent, or employee thereof.

(n) *Process stub* means a length of tubing that provides access to the refrigerant inside a small appliance or room air conditioner and that can be resealed at the conclusion of repair or service.

(o) *Reclaim refrigerant* means to reprocess refrigerant to at least the purity specified in the ARI Standard 700–1988, Specifications for Fluorocarbon Refrigerants (Appendix A to 40 CFR part 82, subpart F) and to verify this purity using the analytical methodology prescribed in the ARI Standard 700–1988. In general, reclamation involves the use of processes or procedures available only at a reprocessing or manufacturing facility.

(p) *Recover refrigerant* means to remove refrigerant in any condition from an appliance without necessarily testing or processing it in any way.

(q) *Recycle refrigerant* means to extract refrigerant from an appliance and clean refrigerant for reuse without meeting all of the requirements for reclamation. In general, recycled refrigerant is refrigerant that is cleaned using oil separation and single or multiple passes through devices, such as replaceable core filter-driers, which reduce moisture, acidity, and particulate matter. These procedures are usually implemented at the field job site.

(r) *Small appliance,* means any appliance containing one pound of refrigerant or less during normal operation, including but not limited to household refrigerators, household freezers, dehumidifiers, vending machines, or water coolers.

(s) *Technician* means any person who performs maintenance, service, or repair that could reasonably be expected to release class I or class II, substances from appliances into the atmosphere, including but not limited to installers, contractor employees, in-house service personnel, and in some cases, owners. Technician also means any person disposing of appliances except for small appliances and room air conditioners.

(t) *Very High Pressure Appliance* means an appliance that uses a refrigerant with a boiling point below –50 degrees Centigrade at atmospheric pressure (29.9 inches of mercury). This definition includes but is not limited to equipment utilizing refrigerants 13 and 503.

§ 82.154 Prohibitions.

(a) Effective July 1, 1992, no person maintaining, servicing, repairing, or disposing of appliances may knowingly vent or otherwise release into the environment any class I or class II substance used as refrigerant in such equipment. De minimis releases associated with good faith attempts to recycle or recover refrigerants are not subject to this prohibition. Releases shall be considered de minimis if they occur when:

(1) The required practices set forth in § 82.156 are observed and recovery or recycling machines that meet the requirements set forth in § 82.158 are used, or

(2) The requirements set forth in 40 CFR Part 82, subpart B are observed.

The knowing release of refrigerant subsequent to its recovery from an appliance shall be considered a violation of this prohibition.

(b) Effective [30 days after publication of the final rule], no person may open appliances except MVACs for maintenance, service, or repair, and no person may dispose of appliances except for small appliances, room air conditioners, and MVACs:

(1) Without observing the required practices set forth in § 82.156; and

(2) Without using equipment that is certified for that type of appliance pursuant to § 82.158.

(c) Effective [6 months after publication of the final rule], no person may manufacture or import recycling or recovery equipment for use during the maintenance, service, or repair of appliances except MVACs, and no person may manufacture or import recycling or recovery equipment for use during the disposal of appliances except small appliances, room air conditioners, and MVACs, unless the equipment is certified pursuant to § 82.158 (b) or (d).

(d) Effective [6 months after publication of the final rule], no person shall alter the design of certified refrigerant recycling or recovery equipment in a way that would affect the equipment's ability to meet the certification standards set forth in § 82.158 without resubmitting the altered design for certification testing.

(e) Effective [90 days after publication of the final rule], no person may open appliances except MVACs for maintenance, service, or repair, and no person may dispose of appliances except for small appliances, room air conditioners, and MVACs, unless such person has certified to the Administrator pursuant to § 82.164 that such person has acquired, and is properly using, certified recovery or recycling equipment.

(f) Effective [90 days after publication of the final rule], no person may recover refrigerant from small appliances, room air conditioners, and MVACs for purposes of disposal of these appliances unless such person has certified to the Administrator pursuant to § 82.164 that such person has acquired, and is properly using, recovery equipment that meets the standards set forth in § 82.158 (i) and/or (j), as applicable.

(g) Effective [30 days after publication of the final rule], no person may sell or offer for sale for use as a refrigerant any class I or class II substance consisting wholly or in part of used refrigerant unless the class I or class II substance has been analyzed using the methods set forth in ARI 700–1988, Specifications for Fluorocarbon Refrigerants, and has been found to meet the standard of purity set forth in the same standard.

(h) Effective [90 days after publication of the final rule], no person may sell or offer for sale for use as a refrigerant any class I or class II substance consisting wholly or in part of used refrigerant unless the refrigerant has been reclaimed by a person who has been certified as a reclaimer pursuant to § 82.166.

(i) Effective [30 days after publication of the final rule], no person reclaiming

refrigerant may release more than 1.5% of the refrigerant received by them.

(j) Effective [six months after publication of the final rule], no person may sell or distribute, or offer for sale or distribution, any appliances, except small appliances and room air conditioners unless such equipment is equipped with a servicing aperture to facilitate the removal of refrigerant at servicing and disposal.

(k) Effective [six months after publication of the final rule], no person may sell or distribute, or offer for sale or distribution, any small appliance or room air conditioner unless such equipment is equipped with a process stub to facilitate the removal of refrigerant at servicing and disposal.

(l) Effective [30 days after publication of the final rule], no person may dispose of small appliances, room air conditioners, and MVACs without removing the refrigerant before they are disposed of, unless the refrigerant has been removed previously.

§ 82.156 Required practices.

(a) Effective [30 days after publication of the final rule], all persons opening appliances for maintenance, service, or repair must evacuate the refrigerant in either the entire unit or the part to be serviced (if the latter can be isolated) to a system receiver or a recovery or recycling machine certified pursuant to § 82.158. All persons disposing of appliances except for small appliances, room air conditioners, and MVACs must evacuate the refrigerant in the entire unit to a recovery or recycling machine certified pursuant to § 82.158.

(1) Persons opening appliances except for small appliances and MVACs for maintenance, service, or repair, and persons disposing of appliances except for small appliances, room air conditioners, and MVACs, must evacuate to the levels in Table 1, which depend upon the date of manufacture of the recovery or recycling machine and the type of appliance being evacuated.

TABLE 1.—REQUIRED LEVELS OF EVACUATION FOR APPLIANCES EXCEPT FOR SMALL APPLIANCES

Type of appliance	Inches of Hg vacuum	
	Using recovery or recycling equipment manufactured or imported before [six months after publication of the final rule]	Using recovery or recycling equipment manufactured or imported on or after [six months after publication of the final rule]
High pressure equipment with a charge of less than 50 pounds	4	10
High pressure equipment with a charge of more than 50 pounds	4	20
Very high pressure equipment	0	0
Intermediate pressure equipment	25	25
Low pressure equipment	25	25 mm Hg absolute

(2) Persons opening small appliances for maintenance, service, or repair must evacuate the refrigerant from these systems using a certified recovery device in accordance with the manufacturer's directions.

(b) The evacuation requirements in § 82.156(a) apply to leaking appliances except for high pressure appliances that contain a leak large enough to have reduced the equipment pressure to two atmospheres or less. In this case, the equipment must be evacuated to 0 psig.

(c) All recovery or recycling equipment shall be used in accordance with the manufacturer's directions.

(d) Effective [30 days after publication of the final rule], persons selling or offering for sale for use as a refrigerant any class I or class II substance consisting wholly or in part of used refrigerant must analyze the class I or class II substance using the methods set forth in ARI 700–1988, Specifications for Fluorocarbon Refrigerants, and verify that the class I or class II substance meets the standard of purity set forth in the same standard.

(e) Refrigerant may be returned to the equipment from which it is recovered or to other equipment owned by the same person without being recycled or reclaimed.

(f) Effective [30 days after publication of the final rule], persons disposing of small appliances, room air conditioning, or MVACs must either:

(1) recover any remaining refrigerant from the appliance in accordance with paragraph (g) or (h) of this section, as applicable; or

(2) verify that the refrigerant has been evacuated from the appliance previously. Such verification must include a signed statement from the person from whom the appliance is obtained that all refrigerant that had not leaked previously has been recovered from the appliance in accordance with paragraph (g) or (h) below, as applicable. This statement must include the name and address of the person who recovered the refrigerant and the date the refrigerant was recovered. The signed statement does not relieve the disposer of responsibility for recovering any refrigerant that remains in the appliance.

(g) All persons recovering refrigerant from MVACs for purposes of disposal of these appliances must reduce the system pressure to or below 102 mm of mercury vacuum, using equipment that meets the standards set forth in § 82.158(j).

(h) All persons recovering the refrigerant from small appliances and room air conditioners for purposes of disposal of these appliances must recover at least 90% of the refrigerant in the system, using equipment that meets the standards set forth in § 82.158(k).

§ 82.158 Standards for recycling and recovery equipment.

(a) Effective July 1, 1992, all manufacturers and importers of recycling and recovery equipment intended for use during the maintenance, service, or repair of appliances except MVACs or during the disposal of appliances except small appliances, room air conditioners, and MVACs shall begin to have such equipment certified by an approved equipment testing organization to meet the applicable requirement in paragraph (b) or (d) of this section. All recycling and recovery equipment manufactured or imported on or after [6 months after publication of the final rule] must be certified to meet these requirements.

(b) Equipment manufactured or imported on or after [6 months after publication of the final rule] for use during the maintenance, service, or repair of appliances except small appliances and MVACs or during the disposal of appliances except small appliances, room air conditioners, and MVACs must be certified by an approved equipment testing organization to meet the following requirements:

(1) In order to be certified, the equipment must be capable of achieving the level of evacuation specified in Table 2 below under the conditions of the ARI Standard 740–1991, Performance of Refrigerant Recovery,

Recycling and/or Reclaim Equipment (ARI 740–1991) (Appendix B to this subpart):

TABLE 2.—LEVELS OF EVACUATION WHICH MUST BE ACHIEVED BY RECOVERY OR RECYCLING MACHINES INTENDED FOR USE WITH APPLIANCES (EXCEPT FOR SMALL APPLIANCES) MANUFACTURED ON OR AFTER [6 MONTHS AFTER PUBLICATION OF THE FINAL RULE]

Type of appliance with which recovery or recycling machine is intended to be used	Inches of Hg vacuum
High Pressure Equipment with a Charge of Less than 50 Pounds	10
High Pressure Equipment with a Charge of More than 50 Pounds	20
Very High Pressure Equipment	0
Intermediate Pressure Equipment	25
Low-pressure Equipment	25 mm Hg absolute

The vacuums specified in inches of Hg vacuum must be achieved relative to an atmospheric pressure of 29.9 inches of Hg.

(2) The equipment must meet the minimum requirements for ARI certification under ARI 740–1991.

(3) The equipment must be equipped with positive shutoff connections on all hoses.

(4) If the equipment is equipped with a noncondensables purge device, the equipment must not release more than five percent of the quantity of refrigerant being recycled through noncondensables purging under the conditions of ARI 740–1991.

(c) Equipment manufactured or imported before [6 months after publication of the final rule] for use during the maintenance, service, or repair of appliances except small appliances and MVACs or during the disposal of appliances except small appliances, room air conditioners, and MVACs will be considered certified if it is capable of achieving the level of evacuation specified in Table 3 below when tested using a properly calibrated pressure gauge:

TABLE 3.—LEVELS OF EVACUATION WHICH MUST BE ACHIEVED BY RECOVERY OR RECYCLING MACHINES INTENDED FOR USE WITH APPLIANCES (EXCEPT FOR SMALL APPLIANCES) MANUFACTURED BEFORE [6 MONTHS AFTER PUBLICATION OF THE FINAL RULE]

Type of appliance with which recovery or recycling machine is intended to be used	Inches of Hg vacuum
High Pressure Equipment with a Charge of Less than 50 Pounds	4
High Pressure Equipment with a Charge of More than 50 Pounds	4
Very High Pressure Equipment	0

TABLE 3.—LEVELS OF EVACUATION WHICH MUST BE ACHIEVED BY RECOVERY OR RECYCLING MACHINES INTENDED FOR USE WITH APPLIANCES (EXCEPT FOR SMALL APPLIANCES) MANUFACTURED BEFORE [6 MONTHS AFTER PUBLICATION OF THE FINAL RULE]—Continued

Type of appliance with which recovery or recycling machine is intended to be used	Inches of Hg vacuum
Intermediate Pressure Equipment	25
Low-pressure Equipment	25

(d) Equipment manufactured or imported after [6 months after publication of the final rule] for use during the maintenance, service, or repair of small appliances must be certified by an approved equipment testing organization to meet the following requirements when used in accordance with the manufacturer's instructions under the conditions of appendix C of this subpart, Proposed Method for Testing Recovery Devices for Use with Small Appliances:

(1) Active equipment must be capable of recovering 90% of the refrigerant in the test stand whether or not the compressor of the test stand is operating.

(2) Passive equipment must be capable of recovering 90% of the refrigerant in the test stand when the compressor of the test stand is operating and 80% of the refrigerant when the compressor of the test stand is not operating.

(e) Equipment manufactured or imported before [6 months after publication of the final rule] for use with small appliances will be considered certified if it is capable of recovering 80% of the refrigerant in the system, whether or not the compressor of the test stand is operating, when used in accordance with the manufacturer's instructions under the conditions of appendix C of this subpart, Proposed Method for Testing Recovery Devices for Use with Small Appliances.

(f) Manufacturers and importers of equipment certified under paragraphs (b) and (d) of this section must place a label on each piece of equipment stating the following:

THIS EQUIPMENT HAS BEEN CERTIFIED BY [APPROVED EQUIPMENT TESTING ORGANIZATION] TO MEET EPA'S MINIMUM REQUIREMENTS FOR RECYCLING OR RECOVERY EQUIPMENT INTENDED FOR USE WITH [APPROPRIATE CATEGORY OF APPLIANCE].

The label shall also show the date of manufacture. The label shall be affixed in a readily visible or accessible location, be made of a material expected to last the lifetime of the equipment, present required information in a manner so that it is likely to remain legible for the lifetime of the equipment, and be affixed in such a manner that it cannot be removed from the equipment without damage to the label.

(g) The Administrator will maintain a list of equipment certified pursuant to paragraphs (b) and (d) of this section by manufacturer and model. Persons interested in obtaining a copy of the list should send written inquiries to the address in § 82.160 (a) of this subpart.

(h) Manufacturers or importers of recycling or recovery equipment must periodically have approved equipment testing organizations conduct either;

(1) Retests of certified recycling or recovery equipment; or

(2) Inspections of recycling or recovery equipment at manufacturing facilities to ensure that each equipment model line that has been certified under this section continues to meet the certification criteria. Such retests or inspections must be conducted at least once every three years after the equipment is first certified.

(i) An equipment model line that has been certified under this section may have its certification revoked if it is subsequently determined to fail to meet the certification criteria. In such cases, the Administrator or his designated representative shall give notice to the manufacturer or importer setting forth the basis for his determination. The manufacturer or importer shall have 90 days from receipt of the notice to request in writing reconsideration of the determination. The administrator or his designated representative shall respond to this request within 60 days.

(j) Equipment used to evacuate refrigerant from MVACs before they are disposed of must be capable of reducing the system pressure to 102 mm of mercury vacuum under the conditions of the SAE Standard, SAE J1990 (Appendix A to 40 CFR Part 82, Subpart B).

(k) Equipment used to evacuate refrigerant from small appliances and room air conditioners before they are disposed of must be capable of removing 90% of the refrigerant, whether or not the compressor of the test stand is operating, when used in accordance with the manufacturer's instructions under the conditions of appendix C to this subpart, Proposed Method for Testing Recovery Devices for Use with Small Appliances.

§ 82.160 Approved equipment testing organizations.

(a) Any equipment testing organization may apply for approval by the Administrator to certify equipment

pursuant to the standards in § 82.158 and appendices B and C of this subpart. The application shall be sent to:

§ 608 Recycling Program Manager, Stratospheric Ozone Protection Branch, ANR–445, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460

(b) Applications for approval must include written information verifying the following:

(1) The list of equipment present at the organization that will be used for equipment testing.

(2) Expertise in equipment testing and the technical experience of the organization's personnel.

(3) Thorough knowledge of the standards as they appear in § 82.158 and appendices B and/or C (as applicable) of this subpart.

(4) The organization must describe its program for verifying the performance of certified recycling and recovery equipment manufactured over the long term, specifying whether retests of equipment or inspections of equipment at manufacturing facilities will be used.

(5) The organization must have no conflict of interest and receive no direct or indirect financial benefit from the outcome of certification testing.

(6) The organization must agree to allow the Administrator access to records and personnel to verify the information contained in the application.

(c) If approval is denied under this section, the Administrator or his designated representative shall give written notice to the organization setting forth the basis for his determination.

(d) If at any time an approved testing organization is found to be conducting certification tests for the purposes of this subpart in a manner not consistent with the representations made in its application for approval under this section, the Administrator reserves the right to revoke approval. In such cases, the Administrator or his designated representative shall give notice to the organization setting forth the basis for his determination. The organization shall have 90 days from receipt of the notice to request in writing reconsideration of the determination. The Administrator or his designated representative shall respond to this request within 60 days.

§ 82.162 Certification by owners of recovery and recycling equipment.

(a) No later than [90 days after publication of the final rule], persons maintaining, servicing, or repairing appliances except for MVACs, and persons disposing of appliances except for small appliances, room air conditioners, and MVACs must certify to the Administrator that such person has acquired, and is properly using, certified recovery or recycling equipment. The owner or lessee of the recovery or recycling equipment may perform this certification for his or her employees. Certification shall take the form of a statement signed by the owner of the equipment or another responsible officer and setting forth:

(1) The name and address of the purchaser of the equipment;

(2) The name and address of the establishment where each piece of equipment is or will be located;

(3) The manufacturer name and model number, the date of manufacture, and the serial number of the equipment; and

(4) The certification must also include a statement that the equipment will be properly used in servicing or disposing of appliances and that the information given is true and correct.

(i) Owners or lessees of recycling or recovery equipment having their places of business in: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont; must send their certifications to: CAA § 608 Enforcement Contact, EPA Region I, Mail Code APC, JFK Federal Building, One Congress Street, Boston, MA 02203.

(ii) Owners or lessees of recycling or recovery equipment having their places of business in: New York, New Jersey, Puerto Rico, Virgin Islands; must send their certifications to: CAA § 608 Enforcement Contact, EPA Region II, Jacob K. Javits Federal Building, 26 Federal Plaza, Room 5000, New York, NY 10278.

(iii) Owners or lessees of recycling or recovery equipment having their places of business in: Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia; must send their certifications to: CAA § 608 Enforcement Contact, EPA Region III, Mail Code 3AT21, 841 Chestnut Building, Philadelphia, PA 19107.

(iv) Owners or lessees of recycling or recovery equipment having their places of business in: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee; must send their certifications to: CAA § 608 Enforcement Contact, EPA Region IV, 345 Courtland Street, NE, Mail Code APT–AE, Atlanta, GA 30365.

(v) Owners or lessees of recycling or recovery equipment having their places of business in: Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin; must send their certifications to: CAA § 608 Enforcement Contact, EPA Region V, Mail Code AT18J, 77 W. Jackson Blvd., Chicago, IL 60604–3507.

(vi) Owners or lessees of recycling or recovery equipment having their places of business in: Arkansas, Louisiana, New Mexico, Oklahoma, Texas; must send their certifications to: CAA § 608 Enforcement Contact, EPA Region VI, Mail Code 6T–AG, First Interstate Tower at Fountain Place, 1445 Ross Ave., Suite 1200, Dallas, TX 75202–2733.

(vii) Owners or lessees of recycling or recovery equipment having their places of business in: Iowa, Kansas, Missouri, Nebraska; must send their certifications to: CAA § 608 Enforcement Contact, EPA Region VII, Mail Code ARTX/ARBR, 726 Minnesota Ave., Kansas City, KS 66101.

(viii) Owners or lessees of recycling or recovery equipment having their places of business in: Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming; must send their certifications to: CAA § 608 Enforcement Contact, EPA Region VIII, Mail Code 8AT–AP, 999 18th Street, Suite 500, Denver, CO 80202–2405.

(ix) Owners or lessees of recycling or recovery equipment having their places of business in: American Samoa, Arizona, California, Guam, Hawaii, Nevada; must send their certifications to: CAA § 608 Enforcement Contact, EPA Region IX, Mail Code A–3, 75 Hawthorne Street, San Francisco, CA 94105.

(x) Owners or lessees of recycling or recovery equipment having their places of business in: Alaska, Idaho, Oregon, Washington; must send their certifications to: CAA § 608 Enforcement Contact, EPA Region X, Mail Code AT–082, 1200 Sixth Ave., Seattle, WA 98101.

(b) Certificates under paragraph (a) of this section are not transferable. In the event of a change of ownership of an entity that maintains, services, or repairs appliances except MVACs, or that disposes of appliances except small appliances, room air conditioners, and MVACs, the new owner of the entity shall certify within 30 days of the change of ownership pursuant to paragraph (a) of this section.

(c) No later than [90 days after publication of the final rule], persons recovering refrigerant from small appliances, room air conditioners, and MVACs for purposes of disposal of these appliances must certify to the Administrator that such person has acquired, and is properly using, recovery equipment that meets the standards set forth in § 82.158(i) and/or (j), as applicable. The owner or lessee of the recovery or recycling equipment may perform this certification for his or her employees. Certification shall take

the form of a statement signed by the owner of the equipment or another responsible officer and setting forth:

(1) The name and address of the purchaser of the equipment,

(2) The name and address of the establishment where each piece of equipment is or will be located, and

(3) The manufacturer name and model number, the date of manufacture, and the serial number of the equipment.

(4) The certification must also include a statement that the equipment will be properly used in recovering refrigerant from appliances and that the information given is true and correct. The certification shall be sent to the appropriate address in paragraph (a).

(d) Failure to abide by any of the provisions of this subpart may result in revocation or suspension of certification under paragraphs (a) or (c) of this section.

§ 82.164 Reclaimer certification.

Effective [90 days after publication of the final rule], persons processing used refrigerant for sale to a new owner must certify to the Administrator that such person will.

(a) Return refrigerant to at least the standard of purity set forth in ARI Standard 700–1988, Specifications for Fluorocarbon Refrigerants,

(b) Verify this purity using the methods set forth in ARI Standard 700–1988,

(c) Release no more than 1.5% of the refrigerant during the reclamation process, and

(d) Dispose of wastes from the reclamation process in accordance with all applicable laws and regulations. The data elements for certification are as follows:

(1) The name and address of the reclaimer;

(2) A list of equipment used to reprocess and to analyze the refrigerant; and

(3) The owner or a responsible officer of the reclaimer must sign the certification stating that the refrigerant will be returned to at least the standard of purity set forth in ARI Standard 700–1988, Specifications for Fluorocarbon Refrigerants, that the purity of the refrigerant will be verified using the methods set forth in ARI Standard 700–1988, that no more than 1.5% of the refrigerant will be released during the reclamation process, that wastes from the reclamation process will be properly disposed of, and that the information given is true and correct. The certification should be sent to the following address: § 608 Recycling Program Manager, Stratospheric Ozone Protection Branch (ANR–445), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

(e) Certificates are not transferable. In the event of a change in ownership of an entity which reclaims refrigerant, the new owner of the entity shall certify within 30 days of the change of ownership pursuant to this section.

(f) Failure to abide by any of the provisions of this subpart may result in revocation or suspension of the certification of the reclaimer.

§ 82.166 Reporting and recordkeeping requirements.

(a) All persons who sell or distribute any class I or class II substance for use as a refrigerant must retain invoices that indicate the name of the purchaser, the date of sale, and the quantity of refrigerant purchased.

(b) Approved equipment testing organizations must maintain records of equipment testing and performance and a list of equipment that meets EPA requirements. A list of all certified equipment shall be submitted to EPA annually, beginning [60 days after publication of the final rule].

(c) Approved equipment testing organizations shall submit to EPA within 30 days of the certification of a new model line of recyling or recovery equipment the name of the manufacturer and the name and/or serial number of the model line.

(d) Approved equipment testing organizations shall notify EPA if retests of equipment or inspections of manufacturing facilities conducted pursuant to § 82.158(h) show that a previously certified model line fails to meet EPA requirements. Such notification must be received within thirty days of the retest or inspection.

(e) Reclaimers must maintain records of the names and addresses of persons sending them material for reclamation and the quantity of the material (the combined mass of refrigerant and contaminants) sent to them for reclamation. Such records shall be maintained on a transactional basis.

(f) Reclaimers must maintain records of the quantity of material sent to them for reclamation, the mass of refrigerant reclaimed, and the mass of waste products. Reclaimers must report this information to the Administrator annually within 30 days of the end of the calendar year.

(g) Persons disposing of small appliances, room air conditioners, and MVACs must maintain copies of signed statements obtained pursuant to § 82.156(f)(ii).

(h) All records required to be maintained pursuant to this section must be kept for a minimum of three years unless otherwise indicated. Entities that dispose of appliances must keep these records on-site.

Appendix A to Subpart F—Specification for Fluorocarbon Refrigerants

This appendix is based on Air-Conditioning and Refrigeration Institute Standard 700—88:

Section 1. Purpose

1.1 *Purpose.* The purpose of this standard is to enable users to evaluate and accept/reject refrigerants regardless of source (new, reclaimed and/or repackaged) for use in new and existing refrigerating and air conditioning products within the scope of this standard includes all appliances defined in § 82.152(b).

1.1.1 This standard is intended for the guidance of the industry, including manufacturers, refrigerant reclaimers, repackagers, distributors, installers, servicemen, contractors and for consumers.

1.2 *Review and Amendment.* This standard is subject to review and amendment as the technology advances.

Section 2. Scope

2.1 *Scope.* This standard defines and classifies refrigerant contaminants primarily based on standard and generally available test methods and specifies acceptable levels of contaminants (purity requirements) for various fluorocarbon refrigerants regardless of source. These refrigerants are: R11; R12; R13; R22; R113; R114; R500; R502 and R503 as referenced in the ANSI/ASHRAE Standard "Number Designation of Refrigerants" (American Society of Heating, Refrigerating and Air Conditioning Engineers, Inc., Standard 34–78).

Section 3. Definitions

3.1 *"Shall", "Should", "Recommended",* or *"It is Recommended".* "Shall", "should", "recommended", or "it is recommended" shall be interpreted as follows:

3.1.1 *Shall.* Where "shall" or "shall not" is used for a provision specified, that provision is mandatory if compliance with the standard is claimed.

3.1.2 *Should, Recommended,* or *It is Recommended.* "Should", "recommended", or "it is recommended" is used to indicate provisions which are not mandatory but which are desirable as good practice.

Section 4. Characterization of Refrigerants and Contaminants

4.1 Characterization of refrigerants and contaminants addressed are listed in the following general classifications:

4.1.1 *Characterization*
- a. Boiling point
- b. Boiling point range

4.1.2 *Contaminants*
- a. Water
- b. Chloride ion
- c. Acidity
- d. High boiling residue
- e. Particulates/solids
- f. Non-condensables
- g. Other refrigerants

Section 5. Sampling, Test Methods and Maximum Permissible Contaminant Levels

5.1 The recommended referee test methods for the various contaminants are given in the following paragraphs. If alternate test methods are employed, the user must be able to demonstrate that they produce results equivalent to the specified referee method.

5.2 *Refrigerant Sampling.*

5.2.1 Special precautions should be taken to assure that representative samples are obtained for analysis. Sampling shall be done by trained laboratory personnel following accepted sampling and safety procedures.

5.2.2 *Gas Phase Sample.* A gas phase sample shall be obtained for determining the non-condensables by connecting the sample cylinder to an evacuated gas sampling bulb by means of a manifold. The manifold should have a valve arrangement that facilitates evacuation of all connecting tubing leading to the sampling bulb. Since non-condensable gases, if present, will concentrate in the vapor phase of the refrigerant, care must be exercised to eliminate introduction of air during the sample transfer. Purging is not an acceptable procedure for a gas phase sample since it may introduce a foreign product. Since R11 and R113 have normal boiling points at or above room temperature, noncondensable determination is not required for these refrigerants.

5.2.3 *Liquid Phase Sample.* A liquid phase sample, which may be obtained as follows, is required for all tests listed in this standard, except the test for non-condensables. Place an empty sample cylinder with the valve opened in an oven at 230°F [110°C] for one hour. Remove it from the oven while hot, immediately connect to an evacuation system and evacuate to less than 1 mm. mercury (1000 microns). Close the valve and allow it to cool.

5.2.3.1 The valve and lines from the unit to be sampled shall be clean and dry. Connect the line to the sample cylinder loosely. Purge through the loose connection. Make the connection tight at the end of the purge period. Take the sample as a liquid by chilling the sample cylinder slightly. Do not load the cylinder over 80 percent full at room temperature. This can be accomplished by weighing the empty cylinder and then the cylinder with refrigerant. The cylinder must not become completely full of liquid below 130°F (54.4°C). When the desired amount of refrigerant has been collected, close the valve(s) and disconnect the sample cylinder immediately.

5.2.3.2 Check the sample cylinder for leaks and record the gross weight.

5.3 *Refrigerant Boiling Point and Boiling Range.*

5.3.1 The test method shall be that described in the Federal Specification for "Fluorocarbon Refrigerants" BB–F–1421 B dated March 5, 1982, section 4.4.3.

5.3.2 The required values for boiling point and boiling point range are given in Table 1, "Physical Properties of Fluorocarbon Refrigerants and Maximum Contaminant Levels."

5.3.3 Gas chromatography (GC) is an acceptable alternate test method which can be used to characterize refrigerants. This is done by comparison to be known standards. Listed below are some readily available GC methods.

ALTERNATE GAS CHROMATOGRAPHY TEST METHODS

[See Appendix A for titles and sources]

Refrigerant	ICI	Dupont	Allied
R11	RSV/ALAB/CM3 and RSV/ALAB/CM4	F3205.165.01CW	G–11–7A
R12	RSV/ALAB/CM5	F3227.165.01CW(P)	G–12–7A
R13	RSV/ALAB/CM20	F3275.165.01CC(P)	—
R22	RSV/ALAB/CM8	F3290.165.01LV(P)	G–22–7A
R113	RSV/ALAB/CM6	F3297.165.01CC	GSVD–1A
R114	RSV/ALAB/CM21	F3306.165.01CC(P)	G–114–7A
R500	RSV/ALAB/CM5	F3327.165.01CW(P)	G–500–7A
R502	RSV/ALAB/CM8	F3333.165.01CC	G–502–7A
R503	RSV/ALAB/CM20	F3337.165.01CW(P)	G–503–7A

Note: Equivalent laboratory test methods may be available from other producers of these refrigerants.

5.4 Water Content

5.4.1 The Karl Fischer Test Method shall be used for determining the water content of refrigerant. This method is described in ASTM Standard for "Water In Gases Using Karl Fisher Reagent" E700–79, reapproved 1984 (American Society for Testing Materials, Philadelphia, PA). This method can be used for refrigerants that are either a liquid or a gas at room temperature, including Refrigerants 11 and 113. For all refrigerants, the sample for water analysis shall be taken from the liquid phase of the container to be tested. Proper operation of the analytical method requires special equipment and an experienced operator. The precision of the results is excellent if proper sampling and handling procedures are followed. Refrigerants containing a colored dye can be successfully analyzed for water using this method.

5.4.2 Water is a harmful contaminant in refrigerants because it causes freeze up, corrosion and promotes unfavorable chemical breakdown. The refrigerants covered in this standard shall have a maximum water content of 10 parts per million (ppm) by weight.

5.5 *Chloride Ions.* The refrigerant shall be tested for chlorides as an indication of the presence of hydrochloric or similar acids.

5.5.1 The test method shall be that described in the Federal Specification for "Fluorocarbon Refrigerants," BB–F–1421B, dated March 5, 1982, (U.S. General Services Administration) section 4.4.4 (silver nitrate reagent). This simple will detect HC1 and other halogens and requires only a 5 ml sample. The test will show noticeable turbidity at equivalent HC1 levels of about 25 ppm by weight or higher.

5.5.2 The results of the test shall not exhibit any sign of turbidity. Report the results as "pass" or "fail."

5.6 Acidity

5.6.1 The acidity test uses the titration principle to detect any compound that ionizes as an acid. The test requires about a 100 to 120 gram sample and has a lower detection limit of 0.1 ppm by weight.

5.6.2 The test method shall be per Allied approved analytical procedure "Determination of Acidity in Genetron® and Genesolve® Fluorocarbons," GP–GEN–2A (used by permission of Allied-Signal, Inc., Columbia Road and Park Avenue. P.O. Box 1139R, Morristown, New Jersey 07960), or DuPont procedure, "The Determination of Acid Number—Visual Titrimetric Procedure," FPL–3–1974 (used by permission of Freon Products Division E.I. duPont de Nemours and Co., Inc., Brandywine Building 13237, Wilmington Delaware 19898).

5.6.3 The maximum permissible acidity is 1 ppm by weight.

5.7 High Boiling Residue

5.7.1 High boiling residue will be determined by measuring the residue after evaporation of a standard volume of refrigerant at a temperature 50°F [10.0°C], above the boiling point of the sample using a Goetz tube as specified in the Federal Specification for "Fluorocarbon Refrigerants," BB–F–1421B, dated March 5, 1982. Oils and organic acids will be captured by this method.

5.7.2 The value for high boiling residue shall be expressed as a percentage by volume and shall not exceed the maximum percent specified in Table 1.

5.8 Particulates/Solids

5.8.1 During the Boiling Range test, a measured amount of sample is evaporated from a Goetz bulb under controlled

temperature conditions. The particulates/solids shall be determined by visual examination of the empty Goetz bulb after the sample has evaporated completely. Presence of dirt, rust or other particulate contamination is reported as "fail."

5.8.2 For details of the above test method, refer to the DuPont method for "Determination of Boiling Range, Residue, Particulates" F3200.037.01CW(P) (used by permission of Freon Products Division, E.I. duPont de Nemours and Co., Inc.).

5.9 Non-Condensables

5.9.1 Non-condensable gases consist primarily of air accumulated in the vapor phase of refrigerant-containing tanks. The solubility of air in the refrigerants liquid phase is extremely low and air is not significant as a liquid phase contaminant. The presence of non-condensable gases may reflect poor quality control in transferring refrigerants to storage tanks and cylinders.

5.9.2 The test method shall be that described in the Federal Specification for "Fluorocarbon Refrigerants," BB–F–1421B, dated March 5, 1982, section 4.4.2 (perchloroethylene method). Gas Chromatography, as described in 5.3.3 is an acceptable alternate test method.

5.9.3 The maximum level of non-condensable in the vapor phase of a refrigerant in a container shall not exceed 1.5 percent by volume.

5.10 Other Refrigerants

5.10.1 The amount of other refrigerants in the subject refrigerant shall be determined by one of the gas chromatographic methods described in 5.3.3 for the appropriate refrigerant.

5.10.2 The subject refrigerant shall not contain more than 0.5 percent by weight of other refrigerants (see Table 1).

Section 6. Reporting procedure

6.1 The source (manufacturer, reclaimer or repackager) of the packaged refrigerant should be identified. The fluorocarbon refrigerant shall be identified by its accepted refrigerant number and/or its chemical name. Maximum permissible levels of contaminants are shown in Table 1. Test results shall be tabulated in a like manner.

Section 7. Voluntary Conformance

7.1 *Voluntary Conformance.* Conformance to this standard is voluntary. However, any refrigerant specified as meeting these requirements shall meet all of the requirements given in this standard.

TABLE 1.—PHYSICAL PROPERTIES OF FLUOROCARBON REFRIGERANTS AND MAXIMUM CONTAMINANT LEVELS

	Refrigerants								
	R11	R12	R13	R22	R113	R114	R500	R502	R503

Appendix B to Subpart F—Performance of Refrigerant Recovery, Recycling and/or Reclaim Equipment

This appendix is based on Air-Conditioning and Refrigeration Institute Standard 740–91.

Section 1. Purpose

1.1 *Purpose.* The purpose of this standard is to establish methods of testing for rating and evaluating performance of refrigerant recovery, recycle, and/or reclaim equipment (herein referred to as equipment) for contaminant or purity levels, capacity, speed, and purge loss to minimize emission into the atmosphere of designated refrigerants.

1.1.1 This standard is intended for the guidance of the industry, including manufacturers, refrigerant reclaimers, repackagers, distributors, installers, servicemen, contractors and for consumers.

1.2 This standard is subject to review and amendment as the technology advances.

Section 2. Scope

2.1 *Scope.* This standard defines the test apparatus, test mixtures, sampling and analysis techniques that will be used to determine the performance ratings of recovery, recycling, and/or reclaim equipment for various refrigerants. It is not intended to guide the industry in defining required levels of contaminants of recycled/reclaim refrigerants used in various applications. These refrigerants are R 11: R 12; R 13; R 22; R 113; R 114; R 500; R 502; and R 503 as referenced in the ANSI/ASHRAE Standard "Number Designation of Refrigerants" (American Society of Heating, Refrigerating, and Air Conditioning Engineers, Inc., Standard 34–89).

Section 3. Definitions

3.1 *Recovered fluorocarbon refrigerant.* Refrigerant that has been removed from a system for the purpose of storage, recycling, reclamation or transportation.

3.2 *Recover.* To remove refrigerant in any condition from a system and store it in an external container without necessarily testing or processing it in any way.

3.3 *Recycle.* To reduce contaminants in used refrigerant by oil separation and single or multiple passes through devices which reduce moisture, acidity and particulate matter, such as replaceable core filter-driers. This term usually applies to procedures implemented at the field job site or at a local service shop.

3.4 *Reclaim.* To reprocess refrigerant to new product specifications, by means which may include distillation. Chemical analysis of the refrigerant will be required to determine that appropriate product specifications are met. This term usually implies the use of processes or procedures available only at a reprocessing or manufacturing facility.

3.5 *Standard Contaminated Refrigerant Sample.* A mixture of pure refrigerant and specified quantities of identified contaminants which are representative of field obtained used refrigerant samples and which constitute the mixture to be processed by the equipment under test.

3.6 *Motor Burnout* is the final result of hermetic insulation failure during which high temperatures and arc discharges produce large amounts of carbonaceous sludge, acid, water and other contaminants, and some deterioration of the refrigerant and oil. This can normally be detected by a characteristic burnt smell, and by an acid level in the oil exceeding 0.05 acid number [milligrams KOH per gram refrigerant].

3.7 *"Shall," "Should," "Recommended," or "It is Recommended."* "Shall," "should," "recommended," or "it is recommended" shall be interpreted as follows:

3.7.1 *Shall.* Where "shall" or "shall not" is used for a provision specified, that provision is mandatory if compliance with the standard is claimed.

3.7.2 *Should, Recommended, or It is Recommended* . "Should," "recommended," or "it is recommended" is used to indicate provisions which are not mandatory but which are desirable as good practice.

Section 4. General Equipment Requirements

4.1 The equipment manufacturer shall provide operating instructions, necessary maintenance procedures, and source information for replacement parts and repair.

4.2. The equipment shall reliably indicate when the filter/drier(s) needs replacement if this method is used.

4.3 The equipment shall either automatically purge non-condensables if the acceptable level is exceeded or alert the operator that the non-condensable level has been exceeded.

4.3.1 The equipment's refrigerant loss due to non-condensable purging shall not exceed 5% by weight of total recovered refrigerant. (See Section 9.4)

4.4 Internal hose assemblies shall not exceed a permeation rate of 12 pounds mass per square foot [5.8g/cm^2] of internal surface per year at a temperature of 120 °F [48.8 °C] for any designated refrigerant.

TABLE 1.—STANDARD CONTAMINATED REFRIGERANT SAMPLE

	R11	R12	R13	R22	R113	R114	R500	R502	R503
Moisture Content:									
PPM by Weight of Pure Refrigerant	100	80	30	200	100	85	200	200	30
Particulate Content:

	R11	R12	R13	R22	R113	R114	R500	R502	R503
Non Condensable Gases Air Content (% Volume)	N/A	3	3	3	N/A	3	3	3	3

[1] Particulate content shall consist of inert material and shall comply with particulate requirements in ASHRAE Standard 63.2, "Method of Testing the Filtration Capacity of Refrigerant Liquid Line Filters and Free Driers."
[2] Acid consists of 50% oleic and 40% hydrochloric acid on a total acid number basis.

4.5 The equipment shall be capable of operation to the specifications in ambient temperatures of 50 °F to 104 °F [10°C to 40°C].

4.5.1 Equipment specified to operate within a controlled temperature range will be evaluated only within that range.

4.6 *Exemptions:*

4.6.1 Equipment intended for a single professional operator and backed by chemical analysis shall be exempt from sections 4.1, 4.2, and 4.3 but not 4.3.1.

4.6.2 Equipment intended for recovery only shall be exempt from sections 4.2 and 4.3.

Section 5. Contaminated Refrigerants

5.1 The standard contaminated refrigerant sample shall have the contents as specified in Table 1

Section 6. Apparatus

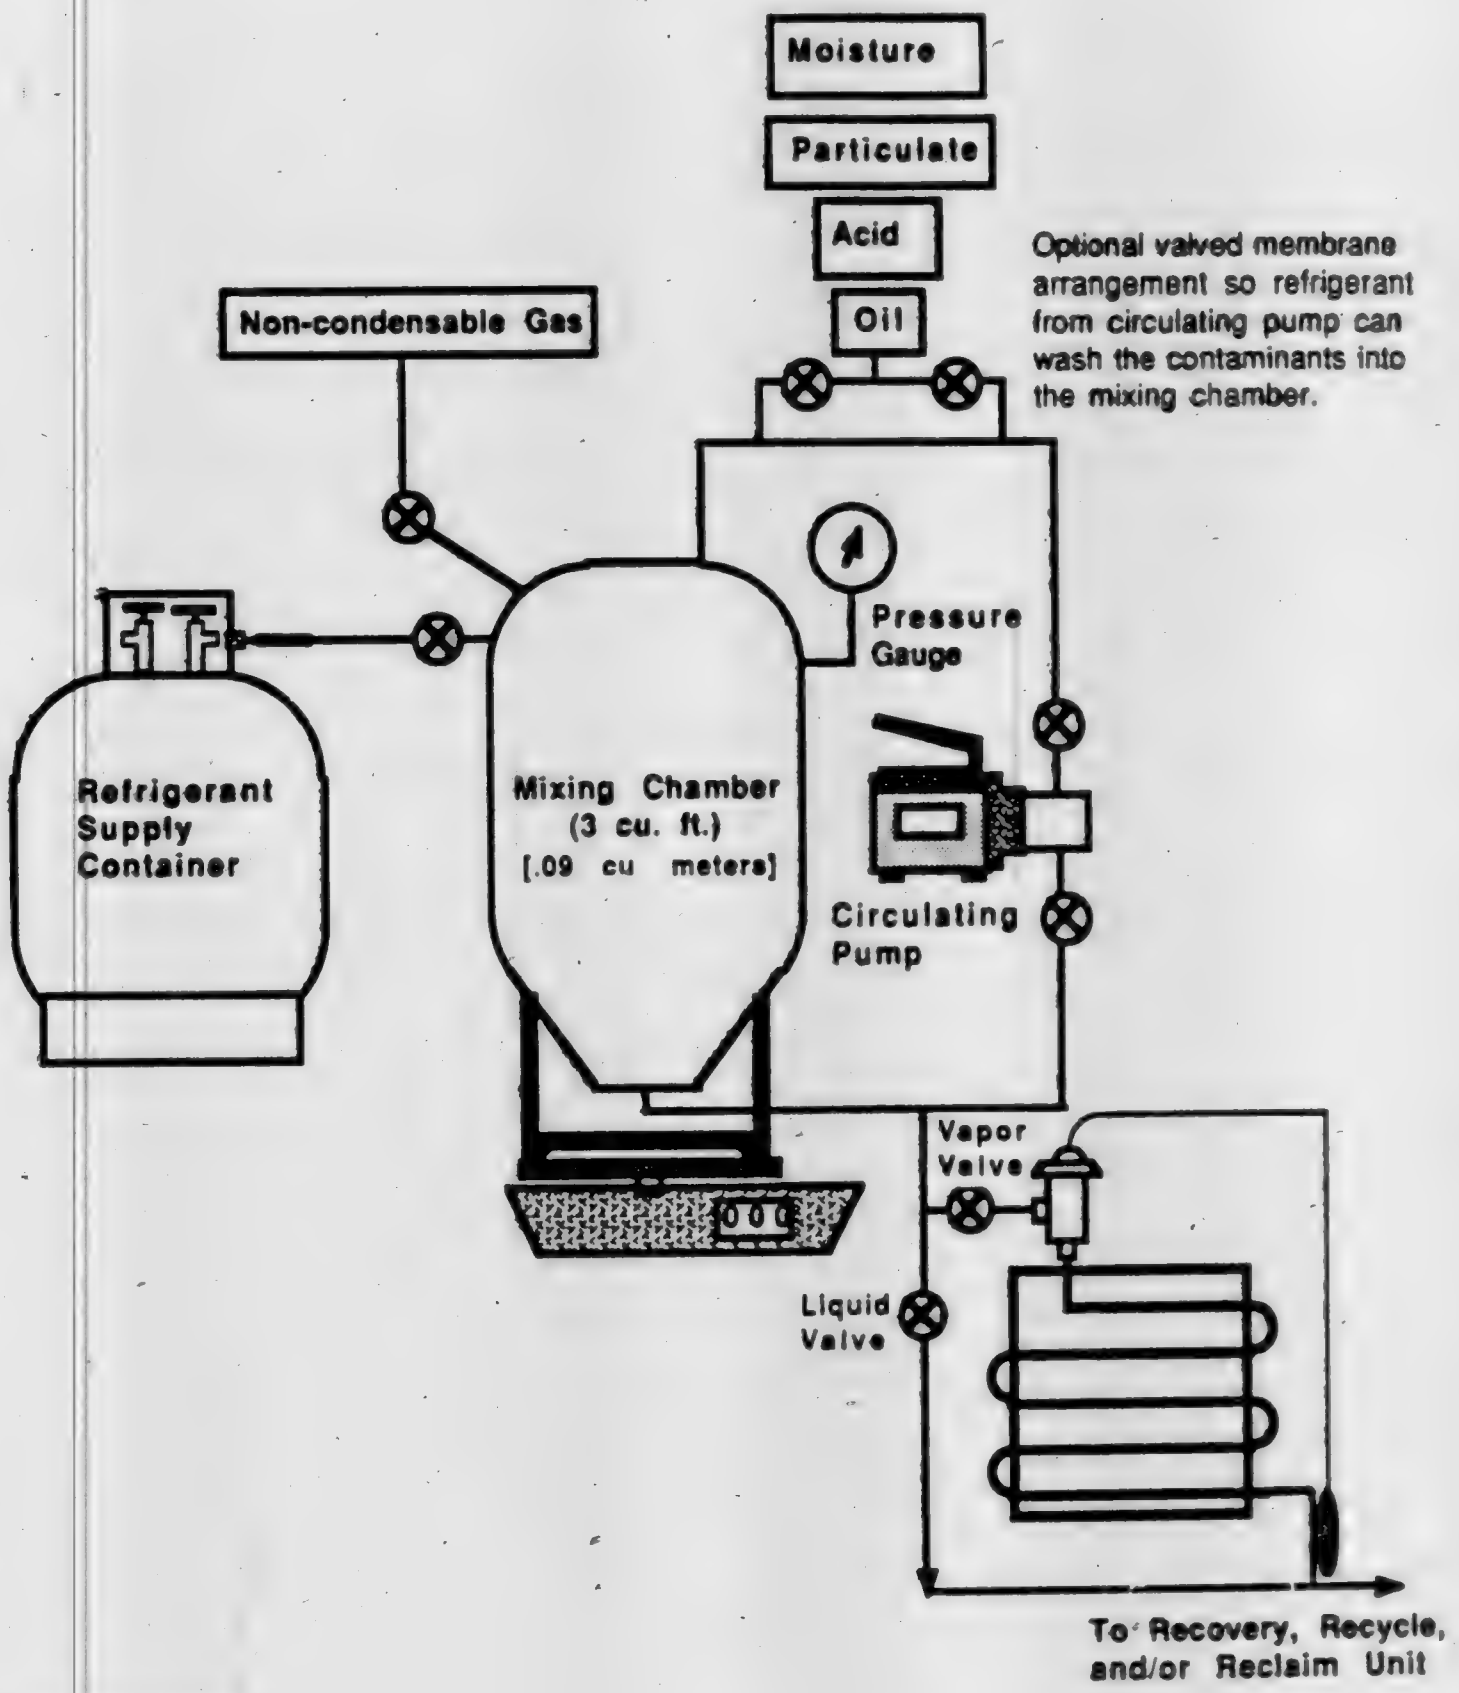
6.1 The apparatus as shown in Figure 1, consists of a 3 cubic ft. [0.085 m^3] mixing chamber with a conical-shaped bottom although a larger mixing chamber is permissible. The outlet at the bottom of the cone and all restrictions and valves for liquid and vapor refrigerant lines in the test apparatus shall be a minimum of 0.375 in. [9.5 mm] inside diameter or equivalent. The mixing chamber would contain various ports for receiving liquid refrigerant, oil, and contaminants as required. A recirculating line connected from the bottom outlet through a recirculating pump and then to a top vapor port would provide for stirring of the mixture. Isolation valves may be required for the pump.

6.2 For liquid refrigerant feed, the liquid valve would be opened. For vapor refrigerant feed, the vapor valve would be opened and refrigerant would pass through an evaporator coil. Flow would be controlled by a thermostatic expansion valve to create 5 F [2.8°C] superheat. The evaporator coil must either be sized large enough to handle the largest system or be sized for each system as required.

6.3 An alternative method for vapor refrigerant feed would be to pass through a boiler and then an automatic pressure regulating valve set at refrigerant saturation pressure at 75 °F ± 2 °F [23.9° C ± 1.1 °C].

BILLING CODE 6560-50-M

Figure 1
Liquid & Vapor Feed Apparatus



BILLING CODE 6560-50-C

Section 7. Performance Testing

7.1 Contaminants removal and performance testing shall be conducted at 75 °F ± 2 °F [23.9 °C ± 1.1°C].

7.1.1 Equipment shall be prepared for operation per the instruction manual.

7.1.2 The contaminated sample batch shall consist of not less than the sum of the amounts required to complete steps 7.1.2.2 and 7.1.2.3 below.

7.1.2.1 A liquid sample will be drawn from the mixing chamber prior to starting the test to assure quality control of the mixing process.

7.1.2.2 Vapor refrigerant feed testing, if elected, shall be processed first. After the equipment reaches stabilized conditions of condensing temperature and/or storage tank pressure, the vapor feed recovery rate shall be measured. One method is to start measuring the vapor flow rate when 85% of refrigerant remains in the mixing chamber and continue for a period of 2 minutes. If liquid feed is not elected, complete Step 7.1.2.3.1.

7.1.2.3 Liquid refrigerant feed testing, if elected, shall be processed. After the equipment reaches stabilized conditions, the liquid feed recovery rate shall be measured. One method would be to wait 1 minute after starting liquid feed and continue for a period of 2 minutes.

7.1.2.3.1 The liquid refrigerant feed test (vapor feed if vapor feed only is selected) shall continue until all the liquid is gone and the equipment shuts down per automatic means or operating instructions. The liquid (or vapor) valve of the apparatus shall be closed and the mixing chamber pressure recorded after 1 minute.

7.1.3 Recycle or reclaim as called for in the equipment operating instructions. Determine processing rate by appropriate means.

7.1.4 Repeat steps 7.1.2.1, 7.1.2.2 (alternately if both elected), and 7.1.3 until equipment indicator(s) show need to change filter(s).

7.1.4.1 For equipment with multiple pass recirculating filter system, change filter(s) and complete recycle or reclaim. Analyze previous batch and current batch after completion of recycle or reclaim.

7.1.4.2 For equipment with single pass filter system, analyze the current batch portion in the storage container.

7.1.5 Refrigerant loss due to the equipment's non-condensable gas purge shall be determined by appropriate means. (See Section 9.4)

7.1.6 Equipment intended for recovery only shall be exempt from Section 7.1.4.

Section 8. Sampling and Chemical Analysis Methods

8.1 The recommended referee test methods for the various contaminants are given in the following paragraphs. If alternate test methods are employed, the user must be able to demonstrate that they produce results equivalent to the specified referee method.

8.2 *Refrigerant Sampling.*

8.2.1 Special precautions should be taken to assure that representative samples are obtained for analysis. Sampling shall be done by trained laboratory personnel following accepted sampling procedures. The stainless steel test cylinder (approximately 30.5 cu. inches [500 ml] capacity with valves at each end) shall be prepared as follows for obtaining gas and liquid phase samples.

a. Clean test cylinder (with valves) with 0.16–0.67 oz [5–20 ml] portions of reagent grade 1.1.1—trichloroethane or suitable solvents.

b. Blow out test cylinder with dry nitrogen containing not more than 3 PPM of water.

c. With valves open, place test cylinder and connecting tubing in oven at approximately 230 F [110 °C] for one hour.

d. When heated, connect clean copper tubing to storage container and test cylinder. Connect immediately to an evacuation system and evacuate to less than 1 mm mercury [0.133 kPa] (1000 microns).

8.2.2 *Gas Phase Sample.* A gas phase sample shall be obtained for determining the non-condensables. The sample content shall be the minimum required for analysis. Since R 11 and R 113 have normal boiling points at or above room temperature, non-condensable determination is not required for these refrigerants.

8.2.3 *Liquid Phase Sample.* A liquid phase sample is required for all tests listed in this standard, except the test for non-condensables. Do not load the cylinder over 80 percent full at room temperature. This can be accomplished by weighing the empty cylinder and then the cylinder with refrigerant. The cylinder must not become completely full of liquid below 130 F [54.4 °C]. When the desired amount of refrigerant has been collected, close the valve(s) and disconnect the sample cylinder immediately.

8.2.3.1 Check the sample cylinder for leaks and record the gross weight.

8.3 *Water Content.*

8.3.1 A liquid refrigerant sample is required. The Karl Fischer Analytical Test Method may be used for determining the water content of refrigerant. This method is described in ASTM standard for "Water In Gases Using Karl Fischer Reagent" E700–79, reapproved 1984 (American Society for Testing Materials, Philadelphia, PA). This method can be used for refrigerants that are either a liquid or a gas at room temperature, including refrigerants R 11 and R 113. An alternate method, Quantitative Determination of Moisture by Karl Fischer Coulometer Titration, may be used. Refrigerants that are a gas at room temperatures with weighed amounts from 1.07 oz to 4.64 oz [30 to 130 grams], of liquid refrigerant shall be allowed to vaporize, and be introduced directly into the anolyte of a Karl Fischer Coulometer.

Refrigerants that are liquid at room temperature with weighed amounts from 1.07 oz to 4.64 oz [30 to 130 grams] of liquid are to be introduced directly into the anolyte of a Karl Fischer Coulometer. For all refrigerants the sample for water analysis shall be taken from the liquid phase of the container to be tested Proper operation of the analytical and instrumental method requires special equipment, Karl Fischer Reagents, solvents, and an experienced operator. The precision of the results is excellent if proper sampling and handling procedures are followed. Refrigerants containing a colored dye can be successfully analyzed for water using this method.

8.3.2 Water is a harmful contaminant in refrigerants because it causes freeze up, corrosion and promotes unfavorable chemical breakdown. Report the moisture level in parts per million by weight if sample is required.

8.4 *Chloride Ions.* The refrigerant shall be tested for chloride as an indication of the presence of hydrochloride or similar acids.

8.4.1 The test method shall be that described in the Federal Specification for "Fluorocarbon Refrigerants," BB–F–1421B, dated March 5, 1982, (U.S. General Services Administration) section 4.4.4 (silver nitrate reagent). This simple test will detect Cl^- and other halogens and requires only a 0.16 oz [5 ml] sample. The test will show noticeable turbidity at equivalent halogen levels of about 25 ppm by weight [milligram KOH per Kilogram].

8.4.2 The results of the test shall not exhibit any sign of turbidity. Report the results as "pass" or "fail."

8.5 *Acidity.*

8.5.1 The acidity test uses the titration principle to detect any compound that ionizes as an acid. The test requires about 0.220 lbs. [100 grams] to 0.265 lbs. [120 grams] sample and has a lower detection limit of 0.1 ppm [milligram KOH per Kilogram] by weight.

8.5.2 The test method shall be per Allied approved analytical procedure "Determination of Acidity in Genetron® and Genesolv® Fluorocarbons," *GP–GEN–2A (used by permission of Allied-Signal, Inc., Columbia Road and Park Avenue, P.O. Box 1139R, Morristown, New Jersey 07960).*

8.5.3 Report the acidity in ppm by weight [milligram KOH per Kilogram].

8.6 *High Boiling Residue.*

8.6.1 High boiling residue will be determined by measuring the residue after evaporation of a standard volume of refrigerant at a temperature 50 F [10.0°C], above the boiling point of the sample. A Goetz tube as specified in the Federal Specification for "Fluorocarbon Refrigerants," BB–F–1421B dated March 5, 1982 may be used. Oils and organic acids will be captured by this method.

8.6.2 The value for high boiling residue shall be expressed as a percentage by volume.

8.7 *Particulates/Solids.*

8.7.1 A liquid refrigerant sample is required. During the Boiling Range test, a measured amount of sample is evaporated from a Goetz bulb under temperature conditions. The particulates/solids shall be determined by visual examination of the empty Goetz bulb after the sample has evaporated completely. Presence of dirt, rust or other particulate contamination is reported as "fail."

8.7.2 For details of the above test method, refer to the E. I. du Pont de Nemours method for "Determination of Boiling Range, Residue, Particulates" F3200.037.01CW(P) (used by permission of Freon Products Division, E.I. du Pont de Nemours and Co., Inc.).

8.8 *Non-Condensables.*

8.8.1 A vapor refrigerant sample is required. Non-condensable gases consist primarily of air accumulated in the vapor phase of refrigerant containing tanks. The

solubility of air in the refrigerants liquid phase is extremely low and air is not significant as a liquid phase contaminant. The presence of non-condensable gases may reflect poor quality control in transferring refrigerants to storage tanks and cylinders.

8.8.2 Known volumes of refrigerant vapors are to be injected for separation and analysis by means of gas chromatograph. A Parapak Q column at 266 F [130°C] and a hot wire detector are to be used for the analysis.

8.8.2.1 The Federal Specification for "Fluorocarbon Refrigerants," BB–F–1421B, dated March 5, 1982, section 4.4.2 (perchloroethylene method) is an acceptable alternate test method.

8.8.3 Report the level of non-condensables as percent by volume.

Section 9. Performance Calculation and Rating

9.1 The liquid refrigerant recovery rate shall be expressed in lbs. per minute [k/m] and measured by weight change at the mixing chamber (see Figure 1) divided by elapsed time to an accuracy within .02 lbs/min. [0.008 k/m].

9.2 The vapor refrigerant recovery rate shall be expressed in lbs. per minute [k/m] and measured by weight change at the mixing chamber (see Figure 1) divided by elapsed time to an accuracy within .02 lbs/min. [0.008 k/m].

9.3 The recycling rate shall be expressed in lbs. per minute [k/m] of flow and shall be as per ASHRAE 41.7–84 "Procedure for Fluid Measurement of Gases" or ASHRAE 41.8–89 "Standard Method of Flow of Fluids—liquids." If no separate recycling loop is used, the rate shall be the higher of the vapor refrigerant recovery rate or the liquid refrigerant recovery rate.

9.4 Refrigerant loss due to non-condensable purging shall be less than 5%. This rating shall be expressed as passed if less than 5%.

This calculation will be based upon net loss of non-condensables and refrigerant due to the purge divided by the initial net content. The net loss shall be determined by weighing before and after the purge, by collecting the purged gases, or an equivalent method.

9.5 The vapor recovery efficiency shall be expressed in percent and shall be calculated as follows:

E=vapor recovery efficiency (percent)
Psat=refrigerant saturation pressure at 75 F (psia) [23.9 °C, kPa]
P=mixing chamber pressure (psia) [kPa] determined in 7.1.2.3.1
E=100. (Psat–P)/Psat

9.6 The contaminant levels remaining after testing shall be published as follows:

Moisture content, PPM by weight
Chloride ions, PPM by weight
Acidity, PPM by weight
High boiling residue, percentage by volume
Particulates/solid, visual examination
Non-condensables, % by volume

Section 10. Tolerances

10.1 Any machine tested shall produce contaminant levels not higher than the published ratings. The liquid refrigerant recovery rate, vapor refrigerant recovery rate, vapor recovery efficiency and recycle rate shall not be less than the published ratings.

Section 11. Product Labelling

11.1 Type of equipment: [Recovery, Recovery/Recycle, Recovery/Reclaim, Recycle, or Reclaim].

11.2 Designated refrigerants and the following as applicable for each:

11.2.1 Liquid refrigerant recovery rate
11.2.2 Vapor refrigerant recovery rate
11.2.3 Vapor recovery efficiency
11.2.4 Recycle rate

Section 12. Voluntary Conformance

12.1 *Conformance.* While conformance with this standard is voluntary, conformance shall not be claimed or implied for products or equipment within its Purpose (Section 1) and Scope (Section 2) unless such claims meet all of the requirements of the standard.

Appendix C to Subpart F—Method for Testing Recovery Devices for Use With Small Appliances

Refrigerators and Freezers

The following test procedure is utilized to evaluate the efficiency of equipment designed to recover CFC refrigerants from household refrigerators and freezers when service of those appliances requires entry into the sealed refrigeration system. This procedure is designed to calculate on a weight or mass basis the percentage of a known charge of CFC refrigerant removed and captured from a test stand refrigeration system and delivered to a container suitable for shipment to a CFC reclaimer. The test stand refrigeration system required for this procedure is constructed with standard equipment utilized in currently produced household refrigerator and freezer products. The procedure also accounts for compressor oils that might be added to the recovered refrigerant by the test stand compressor or any compressor used in the recovery system.

I. Test Stand

Test stands are constructed in accordance with the following standards.

1. Evaporator—5/16 in. outside dia. with 30 cu. in. volume
2. Condenser—¼ in. outside dia. with 20 cu. in. volume.
3. Suction line capillary heat exchanger—appropriate for compressor used.
4. High side case compressor which can operate with an approximate 9 oz. R 12 charge, or
5. Low side case compressor that can operate with an appropriate 6 oz. R 12 charge.

II. Test Conditions

Tests are to be conducted at 75 degrees F, plus or minus 2 degrees F (23.9 °C± 1.1 °C). Separate tests are conducted on both high side case compressor stands and low side case compressor stands. Separate tests are also conducted with the test stand compressor running during the recovery operation, and without the test stand compressor running during the recovery operation, to calculate the system's recovery efficiency under either condition.

These tests are to be performed using a representative model of all equipment used in the recovery system to deliver recovered refrigerant to a container suitable for shipment to a CFC reclaimer. The test stands are to be equipped with access valves located at the points where the recovery system vendor's operating instructions indicate that a piercing saddle valve should be connected to perform the recovery operation. Piercing saddle valves are not used in the test because of the numerous recovery operations that must be run on a test stand.

A series of ten (10) recovery operations are to be performed for each compressor scenario. There are four (4) compressor scenarios to be tested. These are a high side case compressor in working condition; a high side case compressor in nonworking condition; a low side case compressor in working condition; and a low side case compressor in nonworking condition. Recovery efficiencies calculated for the two working compressor scenarios are to be averaged to report a working compressor performance. The two nonworking compressor efficiencies are also to be averaged to report a nonworking compressor performance.

If large scale equipment is required in the system to deliver recovered CFC to a reclaimer (eg. carbon desorption equipment) and it is not possible to have that equipment evaluated under this procedure, the system's vendor shall obtain engineering data on the performance of that large scale equipment that will reasonably demonstrate the percentage CFC lost when processed by that equipment. That data will be supplied to any person required to evaluate the performance of those systems. The following procedure will also be modified as needed to determine the weight of R–12 recovered from a test stand and delivered to a container for shipment to the large process equipment for further processing, and to subtract any oil contamination included in that weight.

Weighing steps are conducted with precision and accuracy of plus or minus 0.1 gram.

The following are definitions of symbols used in the test procedure.

"TSO" means an original test stand weight.
"TSC" means a charged test stand weight.
"TSF" means a final test stand weight.
"SCO" means the original or empty weight of shipping containers.
"SCF" means the final or full weight of shipping containers.
"RSO" means the original weight of a recovery/transfer system.
"RSF" means the final weight of a recovery/transfer system.
"OPL" means the weight of oil purged from any recovery or transfer device.

III. Test Procedure

1. Evacuate the test stand to 20 microns vacuum for 24 hours.
2. Weigh the test stand (TSO)
3. If this is the first of the ten (10) recovery operations being performed for a compressor scenario, then weigh all devices containing oil (*i.e.* devices containing compressors) used in the recovery system to deliver recovered R–12 to a container suitable for shipment or delivery to a CFC reclaimer (RSO).
4. Weigh the final shipping containers (SCO). These must be the type of container

that will be used to ship or otherwise deliver recovered refrigerant to a CFC reclaimer. Weigh enough containers to hold refrigerant recovered during ten (10) recovery operations.

5. Charge the test stand with an appropriate R–12 charge (either 6 oz. or 9 oz.).

6. Run the test stand for four (4) hours with 100% run time.

7. Turn off the test stand for twelve (12) hours. During this period evaporate all condensation that has collected on the test stand during step 6.

8. Weigh the test stand (TSC).

9. Recover R–12 from the test stand and perform all operations needed to transfer the recovered refrigerant to one of the shipping containers weighed in step 4. All recovery and transfer operations are to be performed in accordance with the operating instructions provided by the system's vendor. The compressor in the test stand is to remain off or be turned on during the recovery operation depending on whether the test is for a nonworking or working compressor performance evaluation. If the system allows for multiple recovery operations to be performed before transferring recovered refrigerant to a shipping container, do not transfer recovered refrigerant to the shipping container until either the maximum number of recovery operations allowed have been performed or the last of the ten (10) recovery operations has been performed.

10. Perform any oil purge operation needed to properly maintain the devices used for recovery or transfer operations capturing the oil purged during the operation. Weigh the oil captured during the oil purge operation (OPL).

11. Evacuate the test stand to 20 microns vacuum for 24 hours.

12. Weigh the test stand (TSF).

13. Add compressor oil if needed to maintain the compressor in the test stand. (If oil is added, evacuate the test stand again to 20 microns for 24 hours.)

14. Return to step 2 unless ten (10) recovery operations have been performed.

15. Weigh all final shipping containers that received recovered refrigerant (SCF).

16. Weigh the equipment weighed in step three (3) above (RSF).

IV. Calculations

CFC Recoverable equals the summation of charged test stand weights minus original test stand weights.

$$\text{CFC Recoverable} = \sum_{i=1}^{10} (TSC_i - TSO_i)$$

CFC Recovered equals the final weight of shipping containers minus the initial weight of final shipping containers, minus the summation of (original test stand weights minus final test stand weights), plus final recovery system weight, minus original recovery system weight, plus the weight of any oil purged from recovery or transfer devices.

$$\text{CFC Recovered} = \sum_{i=1}^{n} (SCF_i - SCO_i) - \sum_{j=1}^{10} (TSO_j - TSF_j) + RSF - RSO + OPL$$

n=number of shipping containers used.

Recovery Efficiency equals CFC Recovered divided by CFC Recoverable times 100%.

$$\text{Recovery Efficiency} = \frac{\text{CFC Recovered}}{\text{CFC Recoverable}} \times 100\%$$

Where the recovery system utilizes multiple recovery operations (*e.g.*, additional CFC removal from a compressor after the compressor is returned to a service shop), tests must include all such recovery operations. Some recovery and transfer devices retain CFC refrigerant within the device at all times (*i.e.*, dissolved in the compressor oil of the recovery device). When devices of this nature are being evaluated by this test procedure, they should first have been used in enough recovery or transfer operations to make sure the device will not retain portions of the refrigerant handled by that device during the test procedure.

OMB Number XXXX-XXXX
Expiration Date XX/XX/XX

THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY (EPA) REFRIGERANT RECOVERY OR RECYCLING DEVICE ACQUISITION CERTIFICATION FORM

EPA regulations require establishments that service refrigeration or air conditioning equipment to certify [90 days after publication of the final rule] that they have acquired refrigerant recovery or recycling devices that meet EPA standards for such devices. To certify that you have acquired equipment, please complete this form according to the instructions and mail it to the appropriate EPA Regional Office. Both the instructions and mailing address can be found on the reverse side of this form.

PART 1: NAME, PHONE NUMBER, AND ADDRESS

Name of Establishment	Street
(Area Code) Telephone Number	City / State / Zip Code

PART 2: DEVICE IDENTIFICATION

Name of Device(s) Manufacturer	Model Number	Year	Serial Number (if any)
1.			
2.			
3.			
4.			
5.			
6.			
7.			

PART 3: SIGNATURE

I certify that the establishment named in Part 1 has acquired the refrigerant recovery or recycling device(s) listed in Part 2 and that the information given is true and correct.

Signature of Owner/Responsible Officer	Date	Name (Please Print)	Title

PART 4: PASSIVE DEVICE CERTIFICATION

I certify that the passive device(s) listed in Part 2 are intended only for use on equipment that contains less than one pound of refrigerant.

Signature of Owner/Responsible Officer	Date	Name (Please Print)	Title

Public reporting burden for this collection of information is estimated to vary from 20 to 60 minutes per response with an average of 40 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Chief, Information Policy Branch, EPA, 401 M St., S.W. (PM 223Y), Washington, DC 20460 and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA." DO NOT SEND THIS FORM TO THE ABOVE ADDRESSES. ONLY SEND COMMENTS TO THESE ADDRESSES.

BILLING CODE 6560-50-C

Instructions

Part 1: Please provide the name, address, and telephone number of the establishment where the refrigerant recovery or recycling device(s) is (are) located. Please complete one form for each location.

Part 2: For each recovery or recycling device acquired and intended to be used, please list the name of the manufacturer of the device, its model number, and (if applicable) its serial number. If more than 7 devices have been acquired, please fill out an additional form and attach it to this one.

Part 3: This form must be signed by either the owner of the establishment or another responsible officer. The person who signs is certifying that the establishment has acquired the equipment and that the information provided is true and correct.

Part 4: If one or more of the devices listed in part 2 is a passive device, the owner of the establishment or another responsible officer must also sign the statement in part 4. A passive device is defined as a device that relies solely on the compressor and/or the pressure of the refrigerant in the refrigeration or air conditioning equipment to remove the refrigerant into an external container. The person who signs is certifying that the device(s) is (are) intended for the recovery of refrigerant from refrigeration or air conditioning equipment that contains less than one pound of refrigerant.

Please send this form to the EPA Regional Office responsible for the state or territory in which the establishment is located.

Title 3—

The President

Proclamation 6513 of December 8, 1992

Human Rights Day, Bill of Rights Day, and Human Rights Week, 1992

By the President of the United States of America

A Proclamation

This week, as we commemorate the ratification of our Bill of Rights on December 15, 1791, we not only give thanks for our Nation's enduring legacy of liberty under law but also celebrate its role in promoting human rights around the world.

Our Bill of Rights guarantees, among other basic liberties, freedom of religion, speech, and the press. It affirms the right of the people to keep and bear arms; ensures that no person shall be deprived of life, liberty, or property without due process of law; and guarantees the right of citizens to be secure against unreasonable searches and seizure of their persons, houses, papers, and effects. The Bill of Rights also establishes fundamental rules of fairness in our Nation's judicial system, including the right to trial by jury, assistance of counsel, and freedom from cruel and unusual punishment. Finally, the Bill of Rights reserves to the States respectively, or to the people, those powers that are not delegated to the Federal Government by the Constitution.

Seventeen additional amendments have been added to our Constitution over the past 200 years, but the Bill of Rights has remained a shining symbol of our liberty—a standard against which we measure the legitimacy of American laws and institutions.

Over time, the Bill of Rights has proved to be a cornerstone as well: today we recognize that great document as the foundation of more recent charters of liberty, including the Universal Declaration of Human Rights, which was adopted by the General Assembly of the United Nations on December 10, 1948. Recognizing that respect for "the inherent dignity and . . . the equal and inalienable rights of all members of the human family is the foundation of freedom, justice, and peace in the world," signers of the Declaration affirmed that "everyone has the right to life, liberty, and the security of person." Signers likewise stated that "all are equal before the law and are entitled without any discrimination to equal protection of the law." They agreed to respect freedom of thought, conscience, and religion for all, without regard to race, nationality, gender, or belief, and declared that "everyone has the right to take part in the government of his country, directly or through freely chosen representatives." These principles were affirmed again in 1975, when the United States, Canada, and 33 European nations joined together in signing the Helsinki Final Act of the Conference on Security and Cooperation in Europe.

While we have made great progress toward the goals set forth at Helsinki and reaffirmed at subsequent CSCE meetings in Copenhagen, Geneva, and Moscow, we know that there is still much work to do in promoting the peaceful resolution of conflicts, the establishment of stable, democratic institutions of government, and universal compliance with international human rights agreements. When he proposed a Bill of Rights to our Constitution in 1789, James Madison sagely noted that such a document would strengthen democracy by preventing a tyranny of the majority, in which the will of a larger number of citizens might be levelled against the rights of the

few. The resurgence of ethnic violence and bitter nationalist rivalries has underscored the urgency of protecting the rights of minorities. As it has done consistently in the past, the United States calls on all signatories to the Helsinki Final Act and the Universal Declaration of Human Rights to fulfill their solemn commitment to protect the rights of individuals, without regard to race, nationality, or creed.

Recognizing that egregious human rights violations continue not only in regions encompassed within the CSCE but also in other regions of the world, the United States also denounces any attempts to dilute or distort human rights agreements through the claim of particular socioeconomic circumstances or religious and cultural traditions. Having fought so long for recognition of an international human rights standard, one rooted in fundamental standards of morality and justice, we will not condone that consensus being undermined by those who claim that their particular economic, social, or political contexts relieve them of their obligation to protect the rights of individuals. The upcoming World Conference on Human Rights, which is to be held in June 1993, will provide the United States with another opportunity to reaffirm the universality of human rights and the common duty of all governments to uphold them.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim December 10, 1992, as Human Rights Day and December 15, 1992, as Bill of Rights Day, and call on all Americans to observe the week beginning December 10, 1992, as Human Rights Week. I urge all Americans to observe this week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this eighth day of December, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

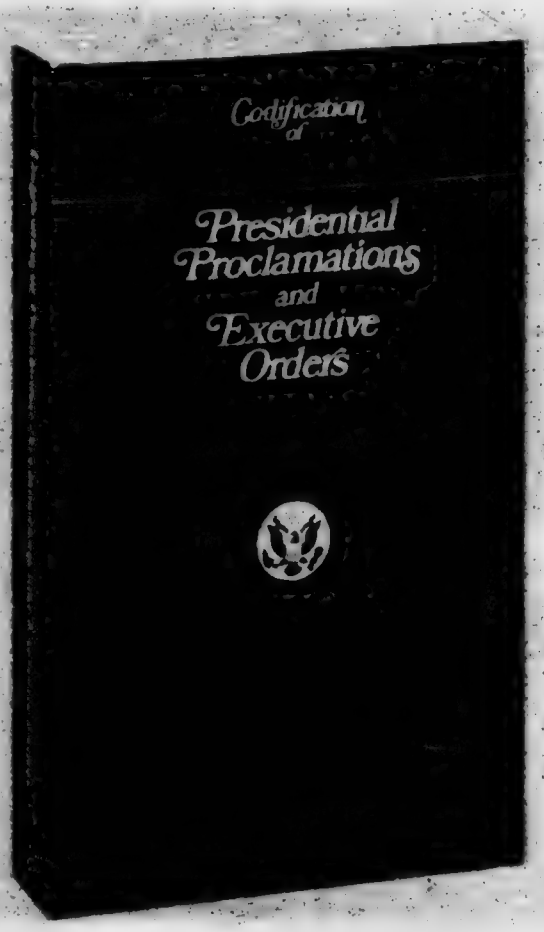
.... Order now ! . . . .



For those of you who must keep informed about **Presidential Proclamations and Executive Orders**, there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

FEDERAL REGISTER SUBSCRIBERS: IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION

After 6 years without an adjustment, it has become necessary to increase the price of the **Federal Register** in order to begin recovering the actual costs of providing this subscription service. Effective October 1, 1992, the price for the **Federal Register** will increase and be offered as follows:

(1) **FEDERAL REGISTER COMPLETE SERVICE**—Each business day you can continue to receive the daily **Federal Register**, plus the monthly **Federal Register Index** and **Code of Federal Regulations List of Sections Affected (LSA)**, all for **$415.00** per year.

(2) **FEDERAL REGISTER DAILY ONLY SERVICE**—With this subscription service, you will receive the **Federal Register** every business day for **$375.00** per year.

HOW WILL THIS AFFECT YOUR CURRENT SUBSCRIPTION?

You will receive your current complete **Federal Register** service for the length of time remaining in your subscription.

AT RENEWAL TIME

At renewal time, to keep this important subscription coming—you can continue to receive the complete **Federal Register** service by simply renewing for the entire package, or you can select and order only the parts that suit your needs·

- renew your entire **Federal Register Service** (complete service)

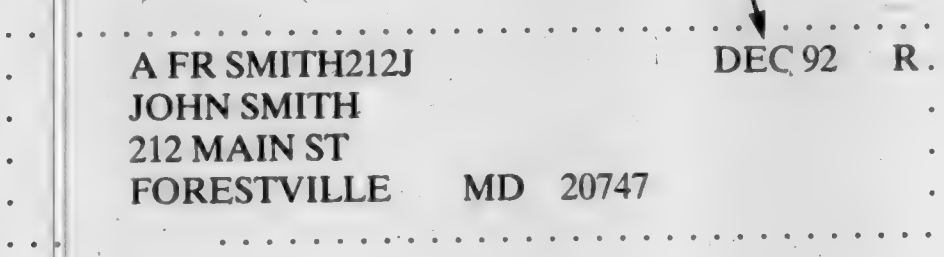
or select. . .

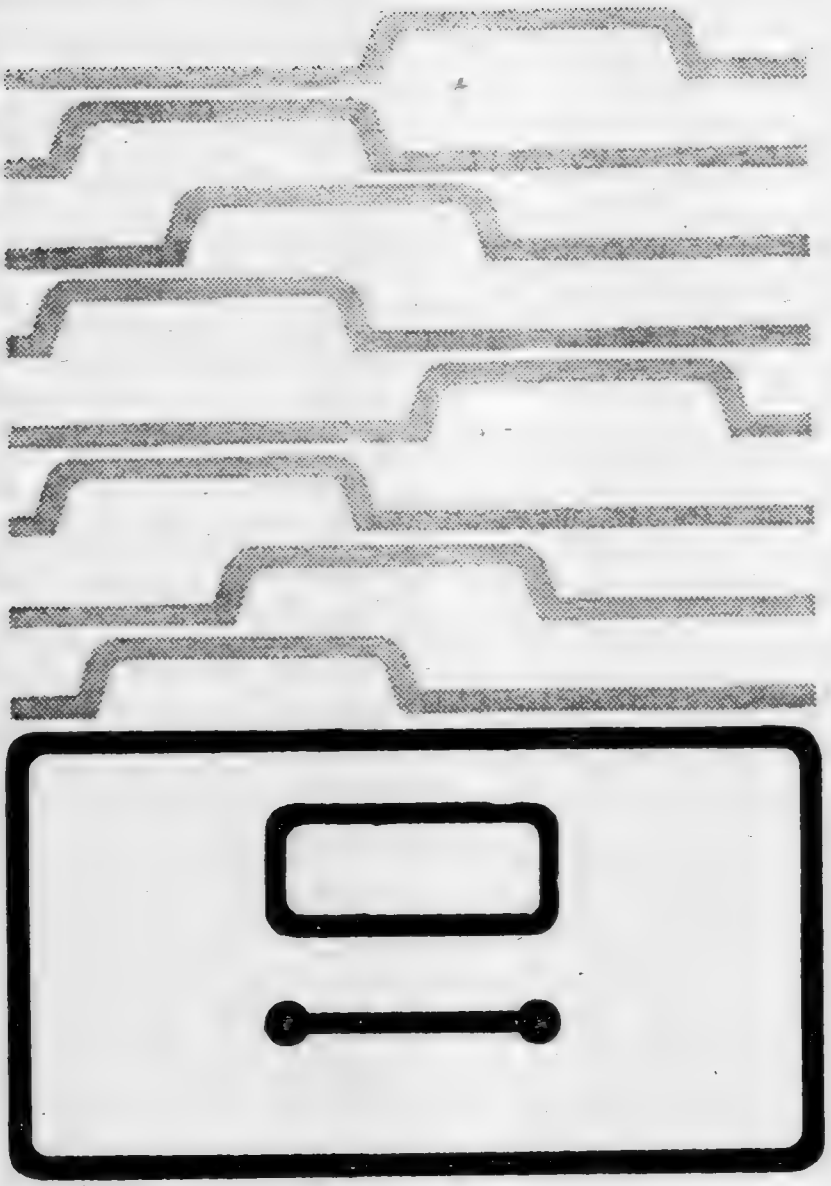
- the daily only **Federal Register** (basic service)
- and complement the basic service with either of the following supplements· the monthlv **Federal Register Index** or the monthly **LSA**

When your current subscription expires, you will receive a renewal notice to continue the complete **Federal Register** service At that time, you will also receive an order form for the daily **Federal Register** basic service, the **Federal Register Index**, and the **LSA**.

To know when to expect the renewal notice, check the top line of your subscription mailing label for the month and year of expiration as shown in this sample:

A renewal notice will be sent approximately 90 days before the end of this month.





Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1992

The GUIDE to record retention is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Friday
December 11, 1992

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Presidential Documents

Title 3—

The President

Proclamation 6514 of December 9, 1992

Religious Freedom Day, 1993

By the President of the United States of America

A Proclamation

We Americans have long cherished our identity as one Nation under God. To this day American law and institutions have been shaped by a view of man that recognizes the inherent rights and dignity of individuals. The Framers of our Government shared this view, and they never forgot the political and religious persecution that had forced their ancestors to flee Europe. Thus, it is not surprising that the first of all freedoms enumerated in our Bill of Rights is freedom of religion. The first amendment to our Constitution states that "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof."

As we reflect on our Constitution and Bill of Rights, we do well to acknowledge our debt to Thomas Jefferson and James Madison. These two men were instrumental in establishing the American tradition of religious liberty and tolerance. Thomas Jefferson articulated the idea of religious liberty in his 1777 draft Bill for Establishing Religious Freedom in Virginia. In that bill, he wrote:

> . . . all men shall be free to profess, and by argument to maintain, their opinion in matters of religion, and that the same shall in no wise . . . affect their civil capacities.

James Madison later introduced and championed this bill in the Virginia House of Delegates, where it passed in 1786. Following the Federal Constitutional Convention of 1787, James Madison led the way in drafting our Bill of Rights.

The religious freedom that James Madison and Thomas Jefferson helped to secure for us has been integral to the preservation and development of the United States. Over the years the exercise of our religious freedom has been instrumental in preserving the faith and the traditional values that are this Nation's greatest strengths. Moreover, the free exercise of religion goes hand in hand with the preservation of our other rights. As Thomas Jefferson noted, the first amendment "guard[s] in the same sentence, and under the same words, the freedom of religion, of speech, and of the press; insomuch as that whatever violates either throws down the sanctuary which covers the others." That sanctuary is the spirit of life, liberty, truth, and justice.

In that spirit, the United States has continued to champion religious liberty and tolerance around the world. We decry as reprehensible the persecution of ethnic and religious minorities, and we likewise condemn the resurgence of anti-Semitism and other forms of religious bigotry. The United States calls on all nations to respect the fundamental rights of individuals, in accordance with international human rights agreements and in recognition of the direct and inexorable relationship between freedom and justice and the achievement of lasting peace in the world.

The Congress, by House Joint Resolution 457, has designated January 16, 1993, as "Religious Freedom Day" and has requested the President to issue a proclamation in observance of this day.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim January 16, 1993, as Religious Freedom Day. I urge all Americans to observe this day with appropriate ceremonies and activities in their homes, schools, and places of worship as an expression of our gratitude for the blessings of liberty and as a sign of our resolve to protect and preserve them.

IN WITNESS WHEREOF, I have hereunto set my hand this ninth day of December, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

George Bush

Rules and Regulations

Federal Register
Vol. 57, No. 239
Friday, December 11, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 92-ASO-9]

Alteration of Control Zone, Orlando, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the Orlando, FL Control Zone by adding and deleting arrival area extensions. A VOR/DME standard instrument approach procedure (SIAP) has been developed to serve Runway 7 at the Orlando Executive Airport. The VOR Runway 13 SIAP has been cancelled. This action adds an arrival area extension west of the airport to provide additional controlled airspace for instrument flight rules (IFR) aircraft executing the VOR/DME Runway 7 SIAP. This action eliminates the existing Runway 13 arrival area extension northwest of the airport. The coordinates in the proposal were North American Datum 27; however, these coordinates have been updated to North American Datum 83.

EFFECTIVE DATE: 0901 U.T.C., February 4, 1993.

FOR FURTHER INFORMATION CONTACT: James G. Walters, Airspace Section, System Management Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On August 14, 1992, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to alter the Orlando, FL Control Zone (57 FR 36617). That notice proposed to add an arrival area extension west of the Orlando Executive Airport to provide controlled airspace for IFR aircraft executing a recently developed instrument approach procedure (SIAP) to Runway 7. That notice stated that when the VOR/DME Runway 7 SIAP was established, the Runway 13 VOR/DME SIAP would be cancelled. In the absence of an instrument approach procedure to Runway 13, the arrival area extension north of the airport would no longer be required and would be eliminated. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. The Aircraft Owners and Pilots Association (AOPA) objected to the proposed cancellation of the VOR Runway 13 SIAP. However, our analysis revealed the VOR Runway 13 SIAP is used primarily by visual flight rules (VFR) aircraft executing practice instrument approaches. The new VOR/DME SIAP to Runway 7 will continue to provide VFR aircraft with an opportunity to practice instrument approaches to lower minimums than presently afforded. This amendment is the same as that proposed in the notice. Control Zones are published in Section 71.171 of FAA Order 7400.7A dated November 2, and November 27, 1992, which is incorporated by reference in 14 CFR 71.1. The coordinates for this airspace docket are based on North American Datum 83. The Control Zone listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations alters the Orlando, FL Control Zone. This action adds an arrival area extension west of the Orlando Executive Airport to provide controlled airspace for IFR aircraft executing a recently developed VOR/DME SIAP to Runway 7. The existing VOR/DME SIAP to Runway 13 has been cancelled, thus eliminating the need for the existing arrival area extension north of the airport. This action eliminates the north arrival area extension.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control Zones, Incorporation by reference.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7A, Compilation of Regulations, dated November 2, 1992, and effective November 27, 1992, is amended as follows:

Section 71.171 Designation of Control Zones

* * * * *

ASO FL CZ Orlando, FL [Amended]

Orlando Executive Airport, FL (lat. 28°32'44" N, long. 81°19'58" W)
Orlando VORTAC (lat. 28°32'34" N, long. 81°20'06" W)

That airspace extending upward from the surface to and including 2,600 feet MSL within a 4-mile radius of Orlando Executive Airport and within 3.6 miles each side of the Orlando VORTAC 254° radial extending from the 4-mile radius to 8.1 miles west of the VORTAC; excluding that portion within the Orlando, FL Terminal Control Area (TCA).

Issued in East Point, Georgia, on October 8, 1992.

Don Cass,

Acting Manager, Air Traffic Division Southern Region.

[FR Doc. 92-29887 Filed 12-10-92; 8:45 am]
BILLING CODE 4910-13-M

14 CFR Part 97

[Docket No. 27060; Amdt. No. 1522]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference-approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS-420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description on each SIAP is contained in the appropriate FAA Form 8260 and the National Flight Data Center (FDC)/Permanent (P) Notices to Airmen (NOTAM) which are incorporated by reference in the amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviations Regulations (FAR). Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction of charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The Provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

The Rule

This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes SIAPs. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained in the content of the following FDC/P NOTAM for each SIAP. The SIAP information in some previously designated FDC/Temporary (FDC/T) NOTAMs is of such duration as to be permanent. With conversion to FDC/P NOTAMs, the respective FDC/T NOTAMs have been cancelled. The FDC/P NOTAMs for the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these chart changes to SIAPs by FDC/P NOTAMs, the TERPs criteria were applied to only these specific conditions existing at the affected airports.

This amendment to part 97 lists separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. All SIAP amendments in this rule have been previously issued by the FAA in a National Flight Data Center (FDC) Notice Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for all these SIAP amendments requires making them effective in less than 30 days.

Further, the SIAPs contained in this amendment are based on the criteria contained in the US Standard for Terminal Instrument Approach Procedures (TERPs). Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making these SIAPs effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, part 97 of the Federal Aviation Regulations (14 CFR part 97) is amended by establishing, amending, suspending, or revoking

Standard Instrument Approach Procedures, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. App. 1348, 1354(a), 1421 and 1510; 49 U.S.C. 106(g) (revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.49(b)(2).

2. Part 97 is amended to read as follows:

§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33 and 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

14 CFR Part 97

[Docket No. 27079; Amdt. No. 1521]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase

Individual SIAP copies may be obtained from:
1. FAA Public Inquiry Center (APA–200), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS–420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to part 97 of the Federal Aviation Regulations (14 CFR part 97) establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and § 97.20 of the Federal Aviation Regulations (FAR). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form documents is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to part 97 is effective upon publication of each separate SIAP as contained in the transmittal. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs are unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 1

Rule Amendments Concerning Delegated Authority of Commission Staff to Approve Contract Market Rule Proposals on Behalf of the Commission

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule amendments.

SUMMARY: The Commodity Futures Trading Commission is amending its Regulation to delegate to its staff broader authority to approve contract market rule proposals on behalf of the Commission. The regulation, as amended, provides designated Commission staff with the authority to approve on the Commisssion's behalf proposed rule amendments that relate to, but do not materially change, Exchange rules of certain specified types. The regulation further delegates authority to designated Commission staff to approve Exchange proposals submitted under Commission Regulation 5.2 to recommence trading in a dormant contract. The regulation, as amended also expands slightly several other existing areas of delegated authority.

EFFECTIVE DATE: January 11, 1993.

FOR FURTHER INFORMATION CONTACT: Elizabeth A. Patterson, Special Counsel, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION: Pursuant to section 5a(12) of the Commodity Exchange Act, 7 U.S.C. 7a(12), the Commission must approve all contract market rules that relate to contract terms and conditions. The Commission has delegated certain aspects of its rule approval authority to the Directors of its Divisions of Economic Analysis ("EA") and Trading and Markets ("T&M"). This delegated authority is set forth in existing Regulation 1.41b. Paragraph (a) of Regulation 1.41b currently permits the Directors of EA and T&M, or their delegees, to approve, with the concurrence of the General Counsel, contract market rules that relate to terms and conditions and that:

(1) Do not materially change the quantity, quality, or other delivery specifications, procedures or obligations under a contract designated for trading by the Commission * * *; or

(2) Reflect routine modifications that are expressly required or anticipated by the specific terms of a contract market rule * * *; or

(4) Are substantially identical to a rule of another contract market which has been approved previously by the Commission pursuant to section 5a(12) of the Act; or

(5) Are consistent with a specific, stated policy, or interpretation of the Commission.[1]

Prior to the promulgation of Regulation 1.41b, the Commission directly approved each contract market rule related to terms and conditions, no matter how minor the rule change. The Commission found this procedure to be unnecessarily inflexible. Accordingly, in 1983, the Commission adopted Regulation 1.41b, which initially delegated to the Division Directors the authority to approve rules falling into categories (1) and (2) of current Regulation 1.41b. 48 FR 49003 (October 24, 1983). Because the Commission had good experience with the use of this initial, limited delegated authority, in July of 1985, it extended the Directors' authority to encompass rule changes falling within categories (4) and (5) of the current regulation. The Commission's experience with this expanded delegation, too, has been positive. The delegation of authority had benefitted the exchanges through more expeditious review of those rule proposals that meet the requirements of the regulation.

The categories of rules permitted to be handled under delegated authority have proved to be fairly narrow, however, and sometimes have necessitated direct

[1] A fifth category, paragraph (3) of the rule, which related to option expirations under the Commission's option pilot program, was deleted in 1987, concurrent with termination of the pilot program. 52 FR 777 (January 9, 1987).

Commission action on minor and/or non-controversial rule proposals. For example, existing category (2) permits delegated authority treatment only for rule changes reflecting routine modifications that are expressly required or anticipated by the specific terms of a contract market rule. This language would require direct Commission approval of rule amendments anticipated by, but not explicitly provided for in, the terms of an exchange rule. Similarly, because the delegation of authority is limited to approval of rules related to contract terms and conditions, any rule change submitted pursuant to Regulation 1.41(b) that does not relate to contract terms and conditions must be sent to the Commission for its approval.[2]

After nearly a decade's experience with Regulation 1.41b, the Commission has come to believe that it is appropriate to expand its staff's delegated authority. The Commission believes that broadening the scope of Commission staff delegated authority will promote timely processing of exchange rule proposals.

Revised Paragraph (a)

Accordingly, the Commission is adopting a number of amendments to paragraph (a) of Regulation 1.41b. In particular, the Commission is deleting from paragraph (a) the phrase "terms and conditions" in order to permit certain rules that do not affect contract terms and conditions, but that are submitted by an exchange pursuant to Regulation 1.41(b), to be handled pursuant to delegated authority. Further, the Commission is revising certain of the delegated authority categories, as detailed below. Thus, under the amended paragraph, the Director of EA and the Director of T&M have delegated authority to approve, with the concurrence of the General Counsel, any contract market rule falling within one of the stated categories, whether or not it concerns contract terms and conditions.[3]

Revised Subparagraph (1)

The Commission has identified a number of rule types that generally do not fall within the existing Regulation 1.41b categories, but that the Commission believes would be appropriately handled under delegated authority. In order to expedite processing of such types of rules, the Commission is amending subparagraph (1) of paragraph (a) of Regulation 1.41b. Subparagraph (1) currently allows for delegated approval of certain rule changes that "do not materially change" certain contract terms and conditions. The Commission is now amending this subparagraph by applying the subparagraph (1) "materiality" test to additional types of rules. The revised regulation would encompass rules that relate to daily settlement prices, clearing position limits, procedures for contract market governance, procedures for transfer trades, trading hours, minimum price fluctuations, and maximum price limit and trading suspension provisions.[4] Thus, any rule of a type listed in revised subparagraph (1) could be approved by the Director of T&M or EA if it did not constitute a material change to the rule.

Revised Subparagraph (2)

As noted above, existing subparagraph (2) permits delegated authority treatment only for rule changes reflecting routine modifications expressly required or anticipated by the specific terms of a contract market rule. The Commission believes that the language of this subparagraph is unnecessarily narrow, so that, for example, the Commission is required to approve directly proposed rule amendments anticipated by, but not explicitly provided for in, the terms of an exchange rule. Accordingly, the Commission is deleting from subparagraph (2) the modifiers "expressly" and "specific" to permit a somewhat broader range of rule changes to be handled pursuant to this provision. The Commission also is deleting from the existing text the parenthetical examples, as the types of rule changes listed in the parenthetical could be handled pursuant to revised subparagraph (1) or the Commission's expedited procedures under paragraphs (k) and (l) of Commission Regulation 1.41.

Revised Subparagraph (4)

Subparagraph (4) currently permits delegated authority treatment for rules that are substantially identical to a rule of another contract market previously approved by the Commission. The Commission notes that the language of this subparagraph may be read quite narrowly. For example, existing subparagraph (4), read strictly, would not permit the use of this category for a rule that was in substance the same as, but contained no language identical to, another contract market rule. The existing language also may be read to foreclose delegated authority treatment for rules substantially identical to a previously-approved rule of the same contract market. The Commission did not intend that the provision be so narrowly read. In adopting subparagraph (4), the Commission stated that the category "includes rules submitted by various contract markets which may be similar because of Commission requirements or because of the similarity between certain contracts." 50 FR 30140. In order to make clearer the intended application of subparagraph (4), the Commission is amending the provision to encompass rules that are in substance the same as a rule of the same or another contract market previously approved by the Commission. The Commission believes that these revisions more accurately reflect its intentions in drafting the subparagraph.

New Paragraph (b)

In addition to the foregoing amendments to Regulation 1.41b, the Commission is creating a new paragraph (b) delegating to the Director of EA the authority to approve under the procedure set out in Commission Regulation 5.2, with the concurrence of the General Counsel, all proposals to list additional trading months or expirations or otherwise recommence trading in a contract that is dormant within the meaning of Commission Regulation 5.2.[5] The Commission's experience with Regulation 5.2 proposals to recommence trading in dormant contracts indicates that, in most instances, they are routine in nature. The proposals generally have no substantive effect on economic or

[2] On occasion, exchanges submit rules pursuant to Regulation 1.41(b) that do not affect contract terms and conditions, even though such rules do not require prior Commission approval and could therefore be handled under Regulation 1.41(c).

[3] Of course, the relevant Director would retain the option of sending to the Commission for its review any exchange rule proposal eligible for handling under delegated authority, but which the Director believed would more appropriately be considered by the Commission. (See existing paragraph (b) of Regulation 1.41b.) In addition, the Commission would retain the right to exercise directly the authority delegated to its staff under the revised regulation. (See existing paragraph (c) of Regulation 1.41b.)

[4] Not all of these rule types would be considered "terms and conditions" within the meaning of Regulation 1.41(a)(2). As noted above, the Commission is deleting the reference to "terms and conditions" in order to permit these and other types of rules that are not "terms and conditions" to be handled pursuant to delegated authority.

[5] Commission Regulation 5.2 defines a dormant contract as any commodity futures or option contract market (1) in which no trading has occurred in any futures or option expiration for a period of six complete calendar months or (2) which has been certified by a board of trade as a dormant contract market. Regulation 5.2 provides further that a contract market may not be considered dormant until the end of 60 calendar months following designation or Commission approval of a proposal to recommence trading pursuant to Commission Regulation 5.2.

other characteristics. Of course, if in connection with a proposal to recommence trading in a contract, an Exchange sought to alter substantially the economic characteristics of the contract, the proposal would be sent to the full Commission for its consideration.[6]

The Commission believes that broadening the scope of the Commission staff's delegated authority in this manner will avoid inefficient use of the Commission's time and resources. This revision also will allow for more timely processing of Exchange proposals to reactivate trading in dormant contracts.

Related Amendments

The revision of existing paragraph (a) and the creation of new paragraph (b) necessitate two additional amendments to Regulation 1.41b. First, the Commission is renumbering existing paragraphs (b) and (c) as paragraphs (c) and (d), respectively. Second, the Commission is amending new paragraph (c), pursuant to which the Division Directors retain the right to send any matter appropriate for handling under delegated authority to the Commission, to reflect the creation of new paragraph (b).

Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act ("RFA"), 5 U.S.C. 601 *et seq.*, requires that agencies, in adopting rules, consider their impact on small businesses. The rule amendments to Regulation 1.41b relate only to internal procedures of the Commission and will have no impact on small businesses. Therefore, the Chairman, on behalf of the Commission, hereby certifies, pursuant to 5 U.S.C. 605(b), that the action taken herein will not have a significant economic impact on a substantial number of small entities.

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1980 ("PRA") 44 U.S.C. 3501 *et seq.*, imposes certain requirements on Federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the Paperwork Reduction Act. The amendments to Regulation 1.41b do not involve a collection of information as defined by the PRA, 44 U.S.C. 3502(4).

[6] As with rule proposals handled under paragraph (a) of Regulation 1.41b, the Director of EA would retain the option of sending any Regulation 5.2 submission to the Commission.

C. Notice and Comment

Section 553(b) of the Administrative Procedure Act, 5 U.S.C. 553(b), requires in most instances that a notice of proposed rulemaking be published in the **Federal Register** and that opportunity for comment be provided when an agency promulgates new regulations. Section 553(b) sets forth an exception, however, for rules of agency organization, procedure, or practice. The Commission has determined that, because these amendments delegate the Commission's authority to approve certain proposed contract market rules, they relate to Commission procedure and, therefore, notice and comment is not required.

List of Subjects in 17 CFR Part 1

Commodity exchanges, Contract market rules, Delegated authority, Rule review procedures.

In consideration of the foregoing and pursuant to the authority contained in the Commodity Exchange Act and, in particular, sections 5a and 8a thereof, 7 U.S.C. 7a and 12a, the Commission hereby amends part 1 of chapter I of title 17 of the Code of Federal Regulations as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. The authority citation for part 1 continues to read as follows:

Authority: 7 U.S.C. 2, 2a, 4, 8, 6a, 6b, 6c, 6d, 6e, 6f, 6g, 6h, 6i, 6j, 6k, 6l, 6m, 6n, 6o, 7, 7a, 8, 9, 12, 12a, 12c, 13a, 13a–1, 19, 21, 23, and 24.

2. Regulation 1.41b is revised to read as follows:

§ 1.41b Delegation of authority to the Director of the Division of Trading and Markets and Director of the Division of Economic Analysis.

(a) The Commission hereby delegates, until the Commission orders otherwise, to the Director of the Division of Trading and Markets and the Director of the Division of Economic Analysis, with the concurrence of the General Counsel or his or her delegee, to be exercised by either of such Directors or by such other employee or employees of the Commission under the supervision of such Directors as may be designated from time to time by the Directors, the authority to approve, pursuant to section 5a(12) of the Act and § 1.41(b), contract market rules that:

(1) Relate to, but do not materially change, the quantity, quality, or other delivery specifications, procedures, or obligations for delivery, cash settlement, or exercise under a contract designated for trading by the Commission; daily settlement prices; clearing position limits; requirements or procedures for contract market governance; procedures for transfer trades; trading hours; minimum price fluctuations; and maximum price limit and trading suspension provisions;

(2) Reflect routine modifications that are required or anticipated by the terms of a contract market rule;

(3) [Reserved]

(4) Are in substance the same as a rule of the same or another contract market which has been approved previously by the Commission pursuant to section 5a(12) of the Act; or

(5) Are consistent with a specific, stated policy or interpretation of the Commission.

(b) The Commission hereby delegates, until the Commission orders otherwise, the Director of the Division of Economic Analysis, with the concurrence of the General Counsel or his or her delegee, to be exercised by such Director or by such other employee or employees of the Commission under the supervision of such Director as may be designated from time to time by the Director, the authority to approve, pursuant to sections 5a(12) of the Act and § 1.41(b), contract market proposals, submitted pursuant to § 5.2, to list additional trading months or expirations for, or to otherwise recommence trading in, a contract that is dormant within the meaning of § 5.2.

(c) The Director of the Division of Trading and Markets or the Director of the Division of Economic Analysis may submit to the Commission for its consideration any matter which has been delegated pursuant to paragraph (a) or (b) of this section.

(d) Nothing in this section shall be deemed to prohibit the Commission, at its election, from exercising the authority delegated to the Director of the Division of Trading and Markets and the Director of the Division of Economic Analysis under this section.

Issued in Washington, DC on December 7, 1992 by the Commission.

Jean A. Webb,

Secretary of the Commission.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 177

[T.D. 92–115]

Rulings concerning marking of Toy, Imitation, and Look-Alike Firearms

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Administrative ruling; General Notice.

SUMMARY: Notice is hereby given that Customs will no longer issue prospective ruling letters concerning the Department of Commerce's marking requirements applicable to toy, imitation, and look-alike firearms imported into the U.S., as decisions regarding this subject matter fall under the jurisdiction of the Department of Commerce.

EFFECTIVE DATE: December 11, 1992.

FOR FURTHER INFORMATION CONTACT: Timothy P. Trainer, Intellectual Property Rights Branch (202) 482–6960.

SUPPLEMENTARY INFORMATION:

Background

Section 4 of the Federal Energy Management Improvement Act of 1988 (Pub. L. 100–615, codified at 15 U.S.C. 5001), provides, in part, that it shall be unlawful for any person to manufacture, enter into commerce, ship, transport, or receive any toy, look-alike, or imitation firearm unless such firearm contains, or has affixed to it, a marking approved by the Secretary of Commerce. Thus, the Department of Commerce is the agency charged with promulgating certain marking requirements applicable to toy, imitation, and look-alike firearms. See, *Wagner Seed Company, Inc.*, v *Bush*, 946 F.2d 918 (D.C.C. 1991), *cert. denied*. Part 1150 of the Commerce and Foreign Trade Regulations (15 CFR part 1150) implements the Department of Commerce's marking requirements and exceptions under 15 U.S.C. 5001.

The U.S. Customs Service serves as the principle border enforcement agency of the U.S. Government regarding the entry of merchandise into the United States, with responsibilities including insuring that merchandise entered is properly marked as required by other government administrative agencies charged with marking responsibilities. However, this enforcement function does not include the issuance of prospective ruling letters concerning other agency's regulations, under the provisions of part 177, Customs Regulations (19 CFR part 177), which provides for the issuance of certain administrative rulings. Although some rulings have been issued in the past pursuant to importer's requests, it is Customs' position that the appropriate authority to interpret Commerce's regulations concerning acceptable markings on this merchandise is the Department of Commerce. Thus, although Customs responsibilities include preventing the entry into the United States of any imported toy, look-alike, or imitation firearm that is not marked in accordance with the Secretary of Commerce's marking requirements, Customs does not believe that its responsibilities include interpreting the meaning of the Department of Commerce's statutory authority to determine what constitutes acceptable marking regarding toy, imitation, and look-alike firearms.

Accordingly, since the Department of Commerce is the proper administrative agency to interpret its own regulations, Customs will no longer issue prospective rulings under part 177 of its regulations concerning the Department of Commerce's marking requirements applicable to imported toy, imitation, and look-alike firearms.

Approved: December 3, 1992.

Samuel H. Banks,

Assistant Commissioner Commercial Operations.

RIN 1545–AN92

Certain Publicly Traded Partnerships Treated as Corporations—Transition Provisions

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations describing when a publicly traded partnership adds a "substantial new line of business," thus forfeiting the partnership status preserved for "existing partnerships" by the transition rule applicable to section 7704 of the Internal Revenue Code (Code). Section 10211 of the Revenue Act of 1987 added section 7704 of the Code. These regulations provide the public with guidance needed to comply with the transition rules of section 7704.

EFFECTIVE DATE: These regulations are effective for taxable years beginning after December 31, 1991.

FOR FURTHER INFORMATION CONTACT: Ann Veninga at 202–622–3080 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On December 31, 1991, the Internal Revenue Service published in the **Federal Register** a notice of proposed rulemaking (56 FR 67557) amending the Income Tax Regulations (26 CFR parts 1 and 301) under section 7704 of the Internal Revenue Code (Code). These amendments were intended to implement section 7704 as added by section 10211 of the Revenue Act of 1987, Public Law No. 100–203, 101 Stat. 1330–382, 1330–403 *et seq.* (the 1987 Act). Section 7704 generally treats publicly traded partnerships as corporations for Federal tax purposes and is generally effective for taxable years beginning after December 31, 1987. Section 10211(c)(2) of the 1987 Act, however, exempts "existing partnerships" from the effect of section 7704 until partnership taxable years beginning after December 31, 1997.

Under section 10211(c)(2)(B) of the 1987 Act, a partnership otherwise qualifying as an existing partnership will cease to be an existing partnership as of the first day after December 17, 1987, on which there has been an addition of a "substantial new line of business" with respect to the partnership. Notice 88–75, 1988–2 C.B. 386, addressed this provision in part.

On December 31, 1991, the Internal Revenue Service issued a notice of proposed rulemaking that provides rules defining "existing partnership," "substantial," and "new line of business." Comments responding to the notice of proposed rulemaking were received, but a public hearing on the notice of proposed rulemaking was not requested and was not held. After analyzing the comments, the Service adopts the proposed regulations as revised by this Treasury decision. The Internal Revenue invites requests for rulings on the question of when a new activity is a "new line of business".

Explanation of Provisions

General Rules

The final regulations provide that the term "existing partnership" means any partnership if the partnership was a publicly traded partnership (within the meaning of section 7704(b)) on December 17, 1987, or a registration statement indicating that the partnership was to be a publicly traded partnership was filed with the Securities and Exchange Commission (SEC) with respect to the partnership on

or before December 17, 1987, or with respect to the partnership, an application was filed with a state regulatory commission on or before December 17, 1987, seeking permission to restructure a portion of a corporation as a publicly traded partnership.

The final regulations provide that a partnership will not qualify as an existing partnership after a new line of business is substantial. A new line of business is substantial as of the earlier of the taxable year in which the partnership derives more than 15 percent of its gross income from that line of business or the taxable year in which the partnership directly uses in that line of business more than 15 percent (by value) of its total assets. If a substantial new line of business is added during the taxable year (*e.g.*, by acquisition), the line of business is treated as substantial as of the date it is added; otherwise a substantial new line of business is treated as substantial as of the first day of the taxable year in which it becomes substantial.

The final regulations treat a new line of business as any business activity of the partnership not closely related to a pre-existing business of the partnership to the extent that the activity generates income other than qualifying income within the meaning of section 7704 and the regulations thereunder. A business activity is a pre-existing business of the partnership if the partnership was actively engaged in the activity on or before December 17, 1987, or if the partnership is actively engaged in the business activity that was specifically described as a proposed business activity of the partnership in a registration statement or amendment thereto filed on behalf of the partnership with the SEC on or before December 17, 1987.

Definition of Closely Related

The final regulations emphasize that facts and circumstances will determine whether a new business activity is closely related to a pre-existing business of the partnership. Some of the factors that establish that a new business activity is closely related to a pre-existing business of the partnership are similarities between the businesses' products, class of customers, location, operating assets, licensing authorities and inclusion under the same four-digit SIC Codes.

Comments suggested that the four-digit SIC Codes be used as a safe harbor for determining whether a business activity is a new line of business. Under this approach, any new activity by a pre-existing business that would fall within the same four-digit SIC Code of the pre-existing business could be presumptively considered an expansion of the prior business rather than a new line of business.

The final regulations do not adopt this suggestion because some four-digit SIC Codes contain businesses that do not appear to be closely related. On the other hand, a review of SIC Codes has identified certain four-digit SIC Codes in which all businesses do appear to be closely related. The Service intends to issue a revenue procedure providing that all businesses under certain four-digit SIC Codes will be considered closely related lines of business under the regulations. No safe harbor will exist for lines of business within SIC Codes not identified by the revenue procedure. The closely related standard for these businesses will be subject to the general facts and circumstances test.

Activities Conducted Through Other Entities

The proposed regulations state generally that an activity conducted by a corporation controlled by an existing partnership is not deemed to be an activity of the existing partnership for purposes of determining when an existing partnership has added a new line of business. However, such an activity will be deemed to be an activity of the existing partnership if more than 10 percent of the gross income that the existing partnership derives from the corporation during the taxable year is section 7704(d) of the Code qualifying income that is recharacterized as nonqualifying income under these regulations. Such income will be recharacterized as nonqualifying income if it is deductible by the controlled corporation.

Comments advise that the 10 percent test is overly restrictive because, in a particular year, an existing partnership might receive little or no dividend income from its subsidiary due to either the cash flow needs of the subsidiary or a lack of earnings and profits in the subsidiary. In such a case, the payment of even a nominal amount of interest by the subsidiary could cause an existing partnership to fail the 10 percent test.

In response to the problem of unanticipated shifts in dividend income, a facts and circumstances test will replace the 10 percent test for determining when an activity conducted by a corporation controlled by an existing partnership is deemed to be an activity of the existing partnership for purposes of determining when an existing partnership has added a new line of business. The 10 percent test, which first appeared as a safe harbor in Notice 88–75, 1988–2 C.B. 386, but was made a general rule in the proposed regulation, will again be a safe harbor.

The proposed regulations provide, as discussed above, that an existing partnership may be deemed engaged in the activities of a corporation controlled by the existing partnership under certain circumstances. Section 304(c) of the Code applies to determine whether an existing partnership controls a corporation. The stock attribution rules of section 318 are used in determining whether control exists within the meaning of section 304(c). These rules attribute ownership of stock from a partner to an existing partnership without regard to the percentage interest of the partner in the existing partnership. As a result, under the proposed regulations an existing partnership is deemed to be in control of every corporation in which any partner holds a 50 percent or greater interest.

Comments suggested that applying section 304(c) of the Code without modification is inappropriate because it applies to all partners of an existing partnership, no matter how small their interests in the partnership. An existing partnership may not be able to identify the names or the holdings of its minor partners and, therefore, might unwittingly trigger the provision.

In response to this suggestion, the final regulations adopt a *de minimis* rule that attributes stock ownership from a partner to an existing partnership only if the partner owns by value, directly or indirectly, five percent or more of the partnership interests of the existing partnership. The *de minimis* rule will not apply if a principal purpose of the arrangement is to avoid tax at the corporate level.

The proposed and final regulations state that an activity conducted by a partnership in which an existing partnership holds an interest (directly or through another partnership) will be considered an activity of the existing partnership.

The proposed and final regulations provide that section 7704(a) does not apply to existing partnerships if these partnerships meet the gross income requirements of paragraphs (c) (1) and (2) of section 7704.

Exceptions to the General Rule

The proposed and final regulations provide that in determining whether a partnership is an existing partnership for purposes of section 7704, the termination of the partnership under section 708(b)(1)(B) due to the sale or exchange of 50 percent or more of the total interests in partnership capital and profits, the issuance of additional

partnership units, and dropping a line of business are not events that in themselves terminate the status of existing partnerships.

Dates

These regulations are effective for taxable years beginning after December 31, 1991. Section 7704 and the rules under Notice 88–75 generally apply to taxable years beginning after December 31, 1987. No inference is intended concerning the interpretation of Section 10211(c)(2) of the 1987 Act prior to the effective date of these regulations. Taxpayers may rely on these regulations prior to the effective date.

Special Analyses

It has been determined that these final rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these regulations is Ann Veninga, Office of the Assistant Chief Counsel (Passthroughs and Special Industries), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participation in their development.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 301 are amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.7704–2 is added to read as follows:

§ 1.7704–2 Transition provisions.

(a) *Transition rule.*—(1) *Statutory dates.* Section 7704 generally applies to taxable years beginning after December 31, 1987. In the case of an existing partnership, however, section 7704 and the regulations thereunder apply to taxable years beginning after December 31, 1997.

(2) *Effective date of regulations.* These regulations are effective for taxable years beginning after December 31, 1991.

(b) *Existing partnership*—(1) *In general.* For purposes of § 1.7704–2, the term "existing partnership" means any partnership if—

(i) The partnership was a publicly traded partnership (within the meaning of section 7704(b)) on December 17, 1987;

(ii) A registration statement indicating that the partnership was to be a publicly traded partnership was filed with the Securities and Exchange Commission (SEC) with respect to the partnership on or before December 17, 1987; or

(iii) With respect to the partnership, an application was filed with a state regulatory commission on or before December 17, 1987, seeking permission to restructure a portion of a corporation as a publicly traded partnership.

(2) *Changed status of an existing partnership.* A partnership will not qualify as an existing partnership after a new line of business is substantial.

(c) *Substantial*—(1) *In general.* A new line of business is substantial as of the earlier of—

(i) The taxable year in which the partnership derives more than 15 percent of its gross income from that line of business; or

(ii) The taxable year in which the partnership directly uses in that line of business more than 15 percent (by value) of its total assets.

(2) *Timing rule.* If a substantial new line of business is added during the taxable year (*e.g.*, by acquisition), the line of business is treated as substantial as of the date it is added; otherwise a substantial new line of business is treated as substantial as of the first day of the taxable year in which it becomes substantial.

(d) *New line of business*—(1) *In general.* A new line of business is any business activity of the partnership not closely related to a pre-existing business of the partnership to the extent that the activity generates income other than "qualifying income" within the meaning of section 7704 and the regulations thereunder.

(2) *Pre-existing business.* A business activity is a pre-existing business of the partnership if—

(i) The partnership was actively engaged in the activity on or before December 17, 1987; or

(ii) The partnership is actively engaged in the business activity that was specifically described as a proposed business activity of the partnership in a registration statement or amendment thereto filed on behalf of the partnership with the SEC on or before December 17, 1987. For this purpose, a specific description does not include a general grant of authority to conduct any business.

(3) *Closely related.* All of the facts and circumstances will determine whether a new business activity is closely related to a pre-existing business of the partnership. The following factors, among others, will help to establish that a new business activity is closely related to a pre-existing business of the partnership and therefore is not a new line of business:

(i) The activity provides products or services very similar to the products or services provided by the pre-existing business.

(ii) The activity markets products and services to the same class of customers as that of the pre-existing business.

(iii) The activity is of a type that is normally conducted in the same business location as the pre-existing business.

(iv) The activity requires the use of similar operating assets as those used in the pre-existing business.

(v) The activity's economic success depends on the success of the pre-existing business.

(vi) The activity is of a type that would normally be treated as a unit with the pre-existing business in the business' accounting records.

(vii) If the activity and the pre-existing business are regulated or licensed, they are regulated or licensed

by the same or similar governmental authority.

(viii) The United States Bureau of the Census assigns the activity the same four-digit Industry Number Standard Identification Code (Industry SIC Code) as the pre-existing business. Such codes are set forth in the Executive Office of the President, Office of Management and Budget, Standard Industrial Classification Manual, prepared, and from time to time revised, by the Statistical Policy Division of the United States Office of Management and Budget. For example, if a partnership's pre-existing business is manufacturing steam turbines and then the partnership begins an activity manufacturing hydraulic turbines, both activities would be assigned the same Industry SIC Code, 3511—Steam, Gas, and Hydraulic Turbines, and Turbine Generator Set Units. In the case of a pre-existing business or activity that is listed under the Industry SIC Code, 9999—Nonclassifiable Establishments—or under a miscellaneous category (e.g., most Industry SIC Codes ending in a "9" are miscellaneous categories), the similarity of the SIC Codes is ignored as a factor in determining whether the activity is closely related to the pre-existing business. The dissimilarity of the SIC Codes is considered in determining whether the business activity is closely related to the pre-existing line of business.

(e) *Activities conducted through controlled corporations*—(1) *In general.* An activity conducted by a corporation controlled by an existing partnership may be treated as an activity of the existing partnership if the effect of the arrangement is to permit the partnership to engage in an activity the income from which is not subject to a corporate-level tax and which would be a new line of business if conducted directly by the partnership. This determination is based upon all facts and circumstances.

(2) *Safe harbor*—(i) *In general.* This paragraph (e)(2) provides a safe harbor for activities of a corporation controlled by an existing partnership. An activity conducted by a corporation controlled by an existing partnership is not deemed to be an activity of the partnership for purposes of determining whether an existing partnership has added a new line of business if no more than 10% of the gross income that the partnership derives from the corporation during the taxable year is section 7704(d) qualifying income that is recharacterized as nonqualifying income under paragraphs (e)(2) (ii) and (iii) of this section. The Internal Revenue Service will not presume that an activity conducted through a corporation controlled by an existing partnership is an activity of the partnership solely because the partnership fails to satisfy the requirements of this paragraph (e)(2)(i).

(ii) *Recharacterization of qualifying income.* Gross income received by a partnership from a controlled corporation that would be qualifying income under section 7704(d) is subject to recharacterization as nonqualifying income if the amount is deductible in computing the income of the controlled corporation.

(iii) *Extent of recharacterization.* The amount of income described in paragraph (e)(2)(ii) of this section that is recharacterized as nonqualifying income is—

(A) The amount described in paragraph (e)(2)(ii) of this section; multiplied by

(B) The controlled corporation's taxable income (determined without regard to deductions for amounts paid to the partnership) that would not be qualifying income within the meaning of section 7704(d) if earned directly by the partnership; divided by

(C) The controlled corporation's taxable income (determined without regard to deductions for amounts paid to the partnership).

(3) *Control.* For purposes of paragraphs (e) (1) and (2) of this section, control of a corporation is determined generally under the rules of section 304(c). However, the application of section 304(c) is modified to apply only to partners who own five percent or more by value (directly or indirectly) of the existing partnership unless a principal purpose of the arrangement is to avoid tax at the corporate level.

(4) *Example.* The following example illustrates the application of the this paragraph (e):

Example. (i) PTP, an existing partnership, acquired all the stock of X corporation on January 1, 1993. During PTP's 1993 taxable year it received $185,000 of dividends and $15,000 of interest from X. Determined without regard to interest paid to PTP, X's taxable income during that period was $500,000 none of which was "qualifying income" within the meaning of section 7704 and the regulations thereunder. In computing the income of X, the $15,000 of interest paid to PTP is deductible.

(ii) Under paragraph (e)(2)(ii) of section, all $15,000 of PTP's interest income was nonqualifying income ($15,000 x 500,000/500,000). Under paragraph (e)(2) of this section, however, the activities of X will not be considered to be activities of PTP for the 1993 taxable year because no more than 10 percent of the gross income that PTP derived from X would be treated as other than qualifying income (15,000/200,000=7.5%).

(f) *Activities conducted through tiered partnerships.* An activity conducted by a partnership in which an existing partnership holds an interest (directly or through another partnership) will be considered an activity of the existing partnership.

(g) *Exceptions*—(1) *Coordination with gross income requirements of section 7704(c)(2).* A partnership that is either an existing partnership as of December 31, 1997, or an existing partnership that ceases to qualify as an existing partnership is subject to section 7704 and the regulations thereunder. Section 7704(a) does not apply to these partnerships, however, if these partnerships meet the gross income requirements of paragraphs (c) (1) and (2) of section 7704. For purposes of applying section 7704(c) (1) and (2) to these partnerships, the only taxable years that must be tested are those beginning on and after the earlier of—

(i) January 1, 1998; or

(ii) The day on which the partnership ceases to qualify as an existing partnership because of the addition of a new line of business; or

(iii) The first day of the first taxable year in which a new line of business becomes substantial (if the new line of business becomes substantial after the year in which it is added).

(2) *Specific exceptions.* In determining whether a partnership is an existing partnership for purposes of section 7704, the following events do not in themselves terminate the status of existing partnerships—

(i) Termination of the partnership under section 708(b)(1)(B) due to the sale or exchange of 50 percent or more of the total interests in partnership capital and profits;

(ii) Issuance of additional partnership units; and

(iii) Dropping a line of business. This event, however, could affect an existing partnership's status indirectly. For example, dropping one line of business could change the composition of the partnership's gross income. The change in composition could make a new line of business "substantial," under paragraph (c) of this section, and terminate the partnership's status. See paragraph (b)(2) of this section.

(h) *Examples.* The following examples illustrate the application of this section:

Example 1. (i) On December 17, 1987, PTP, a calendar-year publicly traded partnership, owned and operated citrus groves. On March 1, 1993, PTP purchased a processing business involving frozen citrus products. In the partnership's 1993 taxable year, the partnership directly used in the processing business more than 15 percent (by value) of its total assets.

(ii) The citrus grove activities provide different products from the processing

activities, are marketed to customers different from the customers of the processing activities, require different types of operating assets, are not commonly conducted at the same location, are not commonly treated as a unit in accounting records, do not depend upon one another for economic success, and do not have the same Industry SIC Code. Under the facts and circumstances, the processing business is not closely related to the citrus grove operation and is a new line of business under paragraph (d)(1) of this section.

(iii) The assets of the partnership used in the new line of business are substantial under paragraph (c)(2) of this section. Because PTP added a substantial new line of business after December 17, 1987, paragraph (b)(2) of this section terminates PTP's status as an existing partnership on March 1, 1993.

Example 2. (i) On December 17, 1987, PTP, a calendar-year publicly traded partnership, owned and operated retirement centers that serve the elderly. Each center contains three sections—

(A) A residential section, which includes suites of rooms, dining facilities, lounges, and gamerooms;

(B) An assisted-living section, which provides laundry and housekeeping services, health monitoring, and emergency care; and

(C) A nursing section, which provides private and semiprivate rooms, dining facilities, examination and treatment rooms, drugs, medical equipment, and physical, speech, and occupational therapy.

(ii) The business activities of each section constitute pre-existing businesses of PTP under paragraph (d)(2) of this section, because PTP was actively engaged in the activities on or before December 17, 1987.

(iii) The nursing sections primarily furnish health care. They employ nurses and therapists, are subject to federal, state, and local licensing requirements, and may change certain costs to government programs like Medicare and Medicaid.

(iv) In 1993, PTP acquired new nursing homes that treat inpatient adults of all ages. The nursing homes provide private and semiprivate rooms, dining facilities, examination and treatment rooms, drugs, medical equipment, and physical, speech, and occupational therapy. The nursing homes primarily furnish health care. They employ nurses and therapists, are subject to federal, state, and local licensing requirements, and may charge certain costs to government programs like Medicare and Medicaid.

(v) PTP's new nursing homes and old nursing sections provide very similar services, market to very similar customers, use similar types of property and personnel, and are licensed by the same regulatory agencies. The nursing homes and old nursing sections have the same Industry SIC Code. Under these facts and circumstances, the new nursing homes are closely related to a pre-existing business of the partnership. Accordingly, under paragraph (d)(1) of this section, the acquisition of the new nursing homes is not the addition of a new line of business.

(vi) PTP was a publicly traded partnership on December 17 1987, and was an existing partnership under paragraph (b)(1)(i) of this section. Because PTP has added no substantial new line of business after December 17, 1987, paragraph (b)(2) of this section does not terminate PTP's status as an existing partnership.

Example 3. (i) On December 17, 1987, PTP, a calendar-year publicly traded partnership, owned and operated cable television systems in the northeastern United States. PTP's registration statement described as its proposed business activities the ownership and operation of cable television systems, any ancillary operations, and any business permitted by the laws of the state in which PTP was formed.

(ii) PTP's cable systems include cables strung along telephone lines, converter boxes in subscribers' homes, other types of cable equipment, satellite dishes that receive programs broadcast by various television networks, and channels that carry public service announcements of local interest. Subscribers pay the systems a fee for the right to receive both the local announcements and the network signals relayed through the cables. Those fees constitute PTP's primary revenue. The systems operate under franchise agreements negotiated with each municipality in which they do business.

(iii) On September 1, 1993, PTP purchased a television station in the northwestern United States. The station owns broadcasting facilities, satellite dishes that receive programs broadcast by the station's network, and a studio that produces programs of interest to the area that receives the station's broadcasts. Fees from advertisers constitute the station's primary revenue. The station operates under a license from the Federal Communications Commission.

(iv) In the partnership's 1993 taxable year, the station generated less than 15 percent of PTP's gross income and constituted less than 15 percent of its total assets (by value). In PTP's 1994 taxable year, the station generated more than 15 percent of PTP's gross income.

(v) The cable systems relay signals through cables to subscribers and earn revenue from subscriber fees; the station broadcasts signals to the general public and earns revenue by selling air time for commercials. Despite certain similarities, the two types of activities generally require different operating assets and earn income from different sources. They are regulated by different agencies. They are not commonly conducted at the same location and do not generally depend upon one another for their economic success. They have different Industry SIC Codes. Under the facts and circumstances, the television station activities are not closely related to PTP's pre-existing business, the cable system activities.

(vi) As of December 17, 1987, PTP did not own and operate any television station. PTP's registration statement specifically described as its proposed business activities only the ownership and operation of cable television systems and any ancillary operations. For purposes of paragraph (d)(2) of this section, a specific description does not include PTP's general authority to carry on any business permitted by the state of its formation. Therefore, the television station line of business was not specifically described as a proposed business activity of PTP in its registration statement. PTP's acquisition of the television station business activity constitutes a new line of business under paragraph (d)(1) of this section.

(vii) PTP was a publicly traded partnership on December 17, 1987, and was an existing partnership under paragraph (b)(1)(i) of this section. PTP added a new line of business in 1993, but that line of business was not substantial under paragraph (c) of this section, and thus PTP remained an existing partnership for its 1993 taxable year. In 1994, the new line of business became substantial because it generated more than 15 percent of PTP's gross income. Paragraph (b)(2) of this section therefore terminates PTP's existing partnership status as of January 1, 1994, the first day of the first taxable year beginning after December 31, 1987, in which PTP's new line of business became substantial.

PART 301—PROCEDURE AND ADMINISTRATION

Par. 3. The authority citation for part 301 continues to read in part:

Authority: 26 U.S.C. 7805 * * *

Par. 4. A new § 301.7704–2 is added to read as follows:

§ 301.7704–2 Transition provisions.

See the regulations under section 7704 contained in part 1 of this chapter for a definition of the "substantial new line of business" that an "existing" publicly traded partnership cannot enter without forfeiting its partnership status under the transition provisions applicable to section 7704.

Dated: October 21, 1992.

Michael P. Dolan,

Acting Commissioner of Internal Revenue.

Fred T. Goldberg, Jr.,

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD7–92–74]

Drawbridge Operation Regulations; Matlacha Pass, FL

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of Lee County, the bridge owner, the Coast Guard is changing the regulations of the SR78 drawbridge over Matlacha Pass, mile 6.0, between the mainland and Little Pine Island, Fort Myers, Lee County, Florida, by permitting the number of openings to be limited during certain periods.

EFFECTIVE DATE: January 25, 1993.

FOR FURTHER INFORMATION CONTACT: Ian MacCartney, Project Manager, Bridge Section, at (305) 536–4103.

SUPPLEMENTARY INFORMATION:

Drafting Information

The principal persons involved in drafting this document are Mr. Ian MacCartney, Project Manager, and Lieutenant J.M. Losego, Project Counsel.

Regulatory History

On August 31, 1992, the Coast Guard published a notice of proposed rulemaking entitled Drawbridge Operation Regulations in the **Federal Register** (57 FR 92–20749). The Coast Guard received one letter commenting on the proposal. A public hearing was not requested and one was not held.

Background and Purpose

This drawbridge presently opens on signal from 8 a.m. to 7 p.m. From 7 p.m. to 8 a.m., the draw need not be opened for the passage of vessels. Lee County has requested that the bridge open only on signal from 8 a.m. to 10 a.m. and from 3 p.m. to 7 p.m., Monday through Saturday and on Sundays, from 7 a.m. to 12 noon and from 3 p.m. to 7 p.m. The purpose of this proposal is to ease the financial burden on Lee county for a full time tender at the drawbridge. In view of the low number of openings of this drawbridge, the reduced periods of operation would still meet the reasonable needs of navigation.

Discussion of Comments and Changes

One letter was received from the National Marine Fisheries Service stating they had no objection to the proposed change in operating regulations.

Regulatory Evaluation

This proposal is not major under Executive Order 12291 and not significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this rule to be so minimal that a Regulatory Evaluation is unnecessary. We conclude this because the rule is written to accommodate the schedules of local commercial fishing vessels that normally transit the bridge.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). Since the proposed rule considers the needs of local commercial fishing vessels, the economic impact is expected to be minimal. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposal in accordance with the principles and criteria contained in Executive Order 12612, and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this rule and concluded that, under section 2.B.2.g.(5) of Commandant Instruction M16475.1B, promulgation of operating requirements or procedures for drawbridges is categorically excluded from further environmental documentation. A Categorical Exclusion Determination is available in the docket.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons set out in the preamble, the Coast Guard amends 33 CFR Part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 USC 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.303 is revised to read as follows:

§ 117.303 Matlacha Pass.

The draw of the SR78 bridge, mile 6.0 at Fort Myers, shall open on signal from 8 a.m. to 10 a.m. and from 3 p.m. to 7 p.m. Monday through Saturday. On Sundays the draw shall open on signal from 7 a.m. to 10 a.m. and from 3 p.m. to 7 p.m. At all other times, the draw need not be opened for the passage of vessels.

Dated: December 2, 1992.

W.P. Leahy,

Rear Admiral, U.S. Coast Guard Commander, Seventh Coast Guard District.

BILLING CODE 4910–14–M

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 7

Golden Gate National Recreation Area Designated Bicycle Routes

AGENCY: National Park Service, Interior.

ACTION: Final rule.

SUMMARY: This rulemaking designates certain routes within the undeveloped area of Golden Gate as open to bicycle use, and regulates bicycle use in these areas. This designation is necessary because bicycle use has been determined by the Superintendent to be a desirable recreational use of certain areas of the park and because such use is consistent with the protection of the park's natural, scenic and aesthetic values, safety considerations and management objectives and will not disturb wildlife or park resources.

EFFECTIVE DATE: January 11, 1993.

FOR FURTHER INFORMATION CONTACT: Gil Soper, Chief Ranger, Golden Gate National Recreation Area, San Francisco, CA 94123, Telephone: (415) 556–4283.

SUPPLEMENTARY INFORMATION:

Background

The purpose of these special regulations is to designate certain trails within Golden Gate as open for bicycle use, pursuant to 36 CFR 4.30. On April 2, 1987, the National Park Service published revised regulations in the **Federal Register** amending 36 CFR part 4 which, among other things, prohibits bicycle use except on park roads, in parking areas and on routes designated for bicycle use (52 FR 10670). These regulations, at 36 CFR 4.30, require that such designation be made only after "a written determination that such use is consistent with the protection of a park area's natural, scenic and aesthetic values, safety considerations and management objectives and will not disturb wildlife or park resources" (36 CFR 4.30(a)). The regulations further require that, except for routes designated in developed areas and special use zones, routes designated for bicycle use shall be promulgated as special regulations. The National Park Service proposed a rule in the **Federal**

Register on January 29, 1992 (57 FR 3392).

Prior to the development and publication of the proposed rules, extensive consultation was initiated with bicyclists, equestrians, hikers, and environmental groups. As a result, a "Marin Trail Use Designation Environmental Assessment," "Staff Report", and "Supplemental Environmental Assessment and Finding of No Significant Impact" were prepared to consider four alternatives for bicycle use of park trails. The result was the development of a "Trail Use Designation Plan" (Plan). In developing the Plan, the park held four public hearings over a three year period through the Golden Gate Advisory Commission, as well as three user group workshops and numerous consultations with interested groups and individuals, and considered over 700 written and verbal comments. The final Plan recommends that certain trails be designated for hiker use only; certain other trails for equestrian and hiker use; certain other trails for bicycle and hiker use; and certain trails for multiple use. Consideration was given to environmental factors, safety, visitor use patterns, management considerations, and special park values.

Based on these actions, 46.9 miles of park trails are currently designated for bicycle use. All have adequate width and visibility for passing, or can be improved and/or adequately maintained for bicycle use. The following listed trails or sections of trails are designated as open to bicycle use:

—Kirby Cove Road, between Conzelman Road and Kirby Cove Campground.
—Coastal/Slacker Road between McCullogh Road and Slacker Hill.
—Coastal Trail between Conzelman Road at McCullogh Road and the Fort Barry Rifle Range at Bunker Road.
—Coastal Trail between Rodeo Beach parking area and Hill 88.
—Coastal Trail between Tennessee Valley Trail and Coyote Ridge Trail.
—Coyote Ridge Trail between the Coastal Trail and Miwok Trail.
—Coyote Ridge Trail between Fox Trail and the Coastal Trail at the Hack Site.
—Coastal Trail between Coyote Ridge Trail at the Hack Site and Muir Beach.
—Miwok Trail between Rodeo Lagoon and Old Springs Trail.
—Old Springs Trail between Miwok Trail and Miwok Stable.
—Miwok Trail between Miwok Stable and Highway 1.
—Tennessee Valley Trail between Tennessee Beach and Tennessee Valley Road parking area.
—Bobcat Trail between Miwok Trail and Marincello Road.
—Alta Avenue between Wolf Back Ridge Road and Marin City.
—Hawk Camp Trail between Bobcat Trail and Hawk Camp.
—Rodeo Avenue between US Highway 101 and Alta Avenue.
—Marincello Road between Tennessee Valley Parking Area and Bobcat Trail.
—Haypress Road between Tennessee Valley Road and Haypress campground.
—Smith Road between Marinview and Miwok Trail.
—Bay Trail between Golden Gate Bridge and Sausalito.
—Oakwood Valley Road between Tennessee Valley Road and Oakwood Valley Pond. (Does not include Oakwood Valley Trail between Pond and Alta Avenue)
—Diaz Ridge Trail between Mt. Tamalpais State Park boundary and Highway 1 near Muir Beach.
—Deer Park Fire Road between Frank's Valley Road and Coastal Trail near Pan Toll (Major portion is in Mt. Tamalpais State Park.)
—Willow Camp Fire Road between Stinson Beach and Ridgecrest Boulevard. (Major Portion is in Mt. Tamalpais State Park.)
—Bolinas Ridge Trail between Bolinas-Fairfax Road and Sir Francis Drake Highway near Olema.
—McCurdy Trail between Highway 1 and Bolinas Ridge Trail.
—Randall Trail between Highway 1 and Bolinas Ridge Trail.
—Shafter Trail between Bolinas Ridge Trail and Shafter Bridge. (Portion is in Samuel P. Taylor State Park.)

The Trail Use Designation Plan requires the monitoring and management of these trails in such manner as to ensure that designation for bicycle use will not adversely impact other park users or the environment. An erosion assessment survey prepared in concert with the Plan will guide the reconstruction, maintenance and use of this trail system over the next several years.

Because the plan is dynamic and subject to change as trails maintenance and construction activities occur, specific trails or routes are not listed in the regulation text. Any additional trails other than those mentioned in this preamble may be designated by the Superintendent in writing after holding public meetings through the Golden Gate Advisory Commission, by marking on maps which will be available in the office of the Superintendent and other places convenient to the public, and through the posting of trails which are open to bicycle use. Further, the authority of the Superintendent to "impose public use limits, or close all or a portion" of a designated trail according to the criteria in 36 CFR 1.5 is not restricted by this final regulation.

The Superintendent has made a determination in writing that these routes proposed for designation as bicycle routes are consistent with the protection of Golden Gate's natural, scenic and aesthetic values, safety considerations and management objectives and will not disturb wildlife or park resources, as required in § 4.30(b) of title 36, Code of Federal Regulations.

Summary of Public Comments and Responses

During the sixty day public comment period provided with the proposed regulations, a total of 301 written comments were received, including 14 from organizations. In support of the regulation, were 147 letters, including 7 advocating stricter controls on bicycle use of park trails. Advocating greater access for bicycles on park trails, and not in support of the regulation were 154 letters, including 27 photocopied responses. A summary of these comments and responses follows.

General Comments

Summary of Comments in Favor of the Regulation

Approximately 49% (147) of the respondents expressed support of the proposed regulation. Of these, 40 commenters specifically identified themselves as hikers. Ten of these indicated that they were cyclists as well as hikers. Seven of the commenters identified themselves as equestrians. Seven letters (including 2 from organizations—The Marin Horse Council and the Tamalpais Conservation Club) indicated a strong preference for more strict limitations for bicycle use than the regulation provides, but voiced a willingness to accept the compromise. Four respondents complained that no bicycle-free loops were provided under the proposal and 2 letters advocated a total ban on bicycles on all park trails.

Thirty-five of the support letters specifically noted the inappropriateness of bicycles on single-track trails. Twenty complained that bicycles detracted from the quality of their park experience. Fourteen reported having had close calls or accidents with bicycles. Fifteen letters attributed observed erosion problems and creation of social trails to bicycles. Thirteen made a strong plea for strict enforcement of bicycle regulations.

Summary of Comments Opposed to the Regulation

Comments generally opposed to the regulation and supportive of more access for bicycles were received from 154 respondents. The main areas of concern are specifically addressed below:

Comment: Bicycles do not create any unacceptable impact to part resources. Approximately 13 letters asserted that bicyclists should have greater access to park trails than is proposed under the regulation because studies to date have not found that bicycles create more damage to park resources than other users.

Response: The decision to allow bicycles on 64% of Golden Gate's Marin trails acknowledges that their impact in most cases is acceptable or can be mitigated. Trail improvements to correct drainage and erosion problems are proposed to reduce the impact of bicycles in wet conditions and on trails with preexisting drainage and/or erosion problems. Golden Gate has included mitigation for continued bicycle use on problem trails in the Trail Use Designation Environmental documents, consisting of trail closures during wet conditions and an ongoing program of trail improvements to eliminate the underlying problems and improve trails where they are not in a condition appropriate for year round bicycle use. The decision to exclude bicycles from certain trails is based on a number of considerations, including the need for hikers and equestrians to have bicycle free trails.

Comment: The Bay Area Ridge Trail will be closed to bicycles under the proposed regulation. Sixteen letters included comments regarding the closure of segments of the Bay Area Ridge Trail to bicycle use.

Response: This issue was addressed in the Trail Use Designation EA/FONSI, which noted that although a single alignment is preferred for the Bay Area Ridge Trail, Ridge Trail guidelines acknowledge that there will be cases where different routes within a 1-mile corridor are designated for different users. All user groups will be accommodated on a Ridge Trail alignment through Golden Gate. In some cases it will be a shared multiuse trail, and in others it will consist of separate routes for bicyclists and/or equestrians. This approach is acceptable to the Bay Area Ridge Trail Council.

Comment: The environmental assessment didn't consider the impact of trail closures on bicycles.

Response: The closure of park trails to bicycles is the result of a federal regulation which required an evaluation of bicycle use and a written determination prior to allowing bicycle use of park trails. The Trail Use Designation Environmental Assessment, Staff Report and Supplemental Environmental Assessment/Finding of No Significant Impact did acknowledge that there would be fewer trails available to bicyclists under each alternative and discussed impacts which would occur. Specifically addressed were the loss of single track trail experience, the reduced trail mileage available to bicyclists, the loss of certain views and loop trails and the increased use of park roads and multiple use trails which remain open to bicycles. Trail mileage available to bicyclists is clearly identified in the documents. Allowing continued use of trails during the evaluation process was a good faith effort by the National Park Service to respond to bicyclists' concerns, and clearly did not promise long term use of these trails.

Comment: Golden Gate is a recreation area and should maximize recreational uses. Approximately 54 letters included comments regarding the responsibility of Golden Gate to provide for the recreational demands of its users. Emphasizing the term "recreation" in the park name and legislation, many of these commenters stressed that bicycle use should be provided to the maximum extent.

Response: Golden Gate is an important National Park resource with outstanding significance, and as such is managed as a unit of the National Park System according to 16 U.S.C. 1a–1. Its inclusion in the Central California Coast International Biosphere Reserve, the 12 federally listed endangered species of plants and animals present in the park and the numerous historic structures and landscapes confirm this significance. In 1991 there were more than 17 million visitors to Golden Gate. More than 4 million visitors were in the Marin portions of the park. Providing for the recreational needs of this number of different users requires a balancing of preservation and enjoyment just as in any unit of the National Park System. Many recreational uses are excluded from Golden Gate (for example off-road vehicles and R.V. camping), or restricted to particular locations where they do not have unacceptable impacts (hangliding and boardsailing). The 147 letters in support of the regulation or preferring more restrictive regulations demonstrates that some restrictions to bicycle use of park trails are needed to preserve the recreation experience of other users.

Comment: The impact of the closure of "social" trails was not considered. Four letters objected to the closure of social trails or undesignated routes to bicycle use.

Response: The Trail Use Designation Supplemental Environmental Assessment included a discussion of trails which are not part of the designated trail system. This document noted that the process or evaluating trails for bicycle use has been limited to the existing designated trail system, with few exceptions. Other trails are either abandoned roads or social trails (trails which are casually developed by users as shortcuts or detours). Undesignated trails are not signed, mapped, or maintained for use. Golden Gate has an ongoing program to close undesignated trails through signing, barriers and restoration of vegetation. These trails are closed to all users. Allowing social trails to proliferate and become permanent features of the landscape would result in a permanent loss of park resources.

Comment: No scientific or factual studies were used in the trail designation process. Seventeen letters criticized the process for not including scientific studies on which to base decisions.

Response: Throughout the process of evaluating the trails for bicycle use, the park staff has been in a dialogue with other land managers and organized bicycle groups. Existing literature and pertinent studies were solicited and utilized to assist in decision making. Existing studies of the social and environmental impact of bicycles, and alternative management techniques were consulted in making the designations. A trail data base for Golden Gate was compiled in 1987, and an Erosion Rehabilitation Plan was completed by the National Park Service in 1990 to determine impacts of use and corrective measures required to accommodate year round trail use. The adopted mitigation measures incorporated information from these studies, including a commitment to improved and modified trail maintenance and construction to accommodate bicycles and to education efforts to reduce conflicts between trail users.

Comment: Additional trails should be designated for bicycles. Several letters advocated adding key trails for bicycle use, most citing the following trails: New Coastal/SCA Trail, Wolf Ridge Trail, Green Gulch Trail and Oakwood Valley Trail.

Response: These trails are discussed in greater detail in the Marin Trail Use Designation Environmental Assessment,

Staff Report and Supplemental Environmental Assessment and Finding of No Significant Impact. Of the 73.1 miles of trail considered in this process, only 26.8 will be off-limits to bicycles. A summary of the considerations for each of the above-mentioned trails is included here.

New Coastal/SCA: This link includes 1.8 miles of narrow trail crossing steep hillsides. Trail width varies from 18–36". The steep hillside above and below the trail, the narrowness of the trail, and the presence of poison oak in places make passing difficult. Several switchbacks on the New Coastal Trail are difficult to safely negotiate with a bicycle. The New Coastal Trail was constructed in 1989 following an environmental document which included a condition that it would be for hikers only, in order to minimize width and impact of the construction. The trail crosses through endangered species habitat, containing the host plant for the endangered Mission Blue butterfly. Both are found along the trail. Due to trampling of the host plant for this endangered species along these trails, they have been closed since January, 1991. A condition of their reopening, which resulted from formal consultation with U.S. Fish and Wildlife Service Endangered Species Office, is that horses and bicyclists be excluded, to eliminate the potential for off trail travel and trampling of vegetation. The SCA Trail was constructed in 1986, and was intended for hikers only due to its narrow width. These trails provide a bicycle-free alternative for hikers and avoid potential conflicts of multiple use on narrow trails.

Oakwood Valley Trail: (0.3 mile) This segment is extremely steep, requiring a series of stair step retaining structures which the average cyclist cannot negotiate. Trail tread is narrow and wet in places and subject to erosion which would be aggravated by bicycle use. The narrow box canyon which this trail traverses offers few options for trail improvements to accommodate bicyclists. This segment provides a bicycle-free experience for hikers.

Wolf Ridge Trail: (0.7 mile) This trail is steep and narrow in places, especially where native vegetation has grown over the former road bed on which the trail was constructed. Trail widening is not recommended due to the impact on the adjacent native plant community. This trail is part of the only bicycle free loop for hikers in the Marin Headlands.

Green Gulch Trail: (2 miles) The lower portion of this trail is on private property. The owner of the property does not agree to bicycle access on the present alignment due to safety and privacy concerns. Park staff is working with the land owner to reroute the trail to avoid conflicts and allow for future bicycle access. As presently designated, this trail provides the only bicycle free alternative for equestrians and hikers between Coyote Ridge and Muir Beach. Alternative access for cyclists in this area is provided on two other trails.

Comment: Cyclists are the largest user group. Sixty of the respondents opined that cyclists represent the most numerous user group in the park and that the planning process was deficient in the lack of a user survey to confirm their contention.

Response: NPS staff have acknowledged the high and increasing numbers of cyclists in the park. The regulation as written represents a balanced response to all users, offering a significant opportunity to cyclists while respecting the documented need for separation from cyclists expressed by hikers and equestrians, especially on narrow trails, regardless of whether bicyclists equal or surpass other trail users in number.

Comment: The variety and quality of cyclists' experience will be diminished as a result of the proposed regulation. Many respondents writing in opposition to the regulation commented specifically on its negative effect on the bicycling experience in the area. Fifteen letters mentioned the importance of the "single-track experience" and its loss as a result of prohibiting bicycle use on the 1.8 mile stretch of the SCA/New Coastal Trail. Supplemental material attached to the formal response to the regulation by the Bicycle Trail Council of Marin included descriptions of this special aspect of mountain biking.

Response: Compared with the present unrestricted bicycle use of the park, the proposed regulation will certainly diminish the options of cyclists accustomed to this freedom. However, with access to over 64% of the park's designated trail system, experiences that will remain available to cyclists are numerous and varied. With the exception of the SCA/New Coastal trail, few distinct "places" in the park will be rendered inaccessible to bicyclists. As the most significant stretch of single-track trail in the park, the SCA/New Coastal segment clearly represents a major functional and aesthetic loss to cyclists. Although an alternate route providing through access in the Headlands will still be available, its use requires riding one mile of paved road. Loss of this route as well as several others of lesser importance also eliminates several popular loop rides, a fact also noted by fifteen respondents.

The Bicycle Trails Council of Marin recently defined single track trails as those not shared with management vehicles. Single track trails also include "foot paths" which can be as narrow as 18". Non-cyclists feel strongly that the narrow trails cannot safely accommodate bicycles. However, the desire of cyclists to use trails not shared with management vehicles is a legitimate one which is accommodated in the current regulation. There are more than 2 miles of trail designated for bicycle use which are not management roads. These include the Old Springs Trail (1.1 miles), a segment of the Miwok Trail north of Tennessee Valley (0.8 mile) and a portion of the Coastal Trail which bypasses a slide (0.3 mile). These trails are either wide enough presently to accommodate multiple use, or will be improved to accommodate such use. Other wider trails not needed for management use will be "downgraded" to provide a more aesthetic trail experience, while providing a width adequate for multiple use. Small scale trail maintenance machinery will allow for the maintenance of these trails at a narrower width.

Eleven respondents complained that the regulation would limit their access to ridge tops in the park. This comment refers primarily to the SCA trail but would also apply to a 0.6 mile stretch of the Wolf Ridge Trail, and a portion of the Miwok Trail. The majority of park trails that traverse ridgetops would be open to bicycles under the proposed regulation.

Comment: The proposed regulation will increase congestion on park trails. Twenty-three respondents complained that restricting bicyclists to certain trails would increase congestion on these routes.

Response: We agree that this will be a result of the proposed regulation. However, compared to the bicycle traffic on trails that occurs as a result of the increasing popularity of mountain bike riding, this is not expected to be significant. According to statistics compiled by the Bicycle Institute of America, mountain bike riders have increased nationwide from 200,000 in 1983 to 20 million in 1991. A 25% increase in mountain bike riders was estimated between 1991 and 1992 alone. Although there is no evidence to suggest that resulting bicycle traffic loads on park trails will have unacceptable impacts, other management actions may be necessary in the future to mitigate against multi-user conflicts.

Comment: Bicycles/bicyclists do not create conflicts or safety problems on park trails. Many respondents

expressing opposition to the regulation firmly denied that bicycles pose any user conflicts or safety problems on park trails. Apparently drawing from their own experiences and behavior as considerate and responsible riders, these individuals point out that there are no documented safety problems, that hikers and equestrians consistently react to them in a cordial manner.

Response: Notwithstanding the responsible user, bicycles are often perceived by other users as a disruptive influence on park trails. Although most of the few reported bicycle accidents in the park involve only single individuals, letters and reports from hikers and equestrians tell of many close calls and confrontational and unsettling experiences. The amount of bicycle-free trails provided under the regulation seems a modest and reasonable response to these concerns.

Comment: Allowing all trails to remain open to bicycles will reduce safety problems that result from use of roads open to motor vehicles. The Bicycle Trails Council of Marin and several other individuals raised this issue, maintaining that closure of trails to bicycles would require bicycles to use roads shared with motor vehicles and create a potential safety problem.

Response: Most accidents involving bicycles result in injury to the cyclist only, and do not generally affect other users. Since 1985 there have been 46 reported bicycle accidents on Marin Headlands public roads, and 52 on trails. Although most of the road accidents occurred on Conzelman Road, a route which provides access to Marin Headlands trails for bicycles, very few of these accidents were identified on the segment of road that leads to the nearest multiuse trail. This segment was recently widened to provide a safer shoulder to accommodate bicycles in the uphill direction. Many bicyclists on this segment of road have traveled over busy city streets, the Golden Gate Bridge, or other public roads to reach this point. An additional 1 mile of paved road travel is required before entering the trail system, as a result of the closure of the New Coastal Trail to bicycles. This narrow trail has been closed to all users since January 1991 with no detectable increase in bicycle accidents as a result.

Comment: Bicycling is a historic use of park trails that has been occurring for 20 years. Several commenters, including the Bicycle Trails Council of Marin, maintained that cycling has been a use of Golden Gate trails for 20 years, and as a "historic" use of the park should not be restricted.

Response: Golden Gate was established in 1972. There is no data to accurately account for the increasing numbers of bicycles on the park's trails and a response relies primarily on observations of park staff and other trail users. Bicycling on park trails in any noticeable numbers is a fairly recent occurrence. Although mountain bikes were invented in Marin County and used on State and National Park trails in this area for many years, mountain bikes were first mass produced in 1982–83. Prior to 1985, bicycles were rarely seen on park trails, with the exception of those that are paved. Since 1985, the number of bicycles observed on park trails has increased dramatically, with the increased availability and popularity of mountain bikes. This final regulation is a reasonable management action for bicycle and other trail uses.

Comment: The National Park Service can't enforce the regulation. Several commenters maintained that it will not be possible for the NPS to enforce the regulation.

Response: The regulation is fully enforceable. Just as with other rules, regulations and laws that are enforced by the National Park Service, a procedure will be developed to identify personnel and equipment as well as strategies on when, where and how the enforcement will be carried out. We are confident that the large majority of the users will abide by these regulations as they do with others.

Comment: Use other techniques to manage mountain bike use of the trails (education, uphill only, alternative days, better trail maintenance, temporary closures, permit system.)

Response: Golden Gate has adopted or plans to test some of these techniques. Interpretive/educational signs, maps and brochures are being developed to encourage user cooperation, safety and trail etiquette. Problem trails will be temporarily closed during wet conditions. Two new trail maintenance crews have been established to rehabilitate and better maintain trails. Allowing bicycles in the uphill-only direction is being considered for one trail. Other management techniques were considered in the Marin Trail Use Designation Environmental Assessment, but received little public support or would add substantially to the administrative responsibilities of staff without reducing the enforcement workload. This final regulation does not prohibit the use of these or other management tools.

Comment: Lights should be required only when needed. Two commenters objected to the requirement for a positive light source on bicycles, and to the requirement that it be visible from a certain distance.

Response: The requirement for lighting is only "during periods of low visibility, or while traveling through a tunnel, or between sunset and sunrise . . .". A bicycle falls under the vehicle code for light requirements which applies on NPS lands. This requirement is included in 36 CFR 4.30(d)(2) for which the Superintendent has no discretion.

Comment: Use unsafe operation rather than speed limits. Three commenters maintained that at times 15 mph is too fast for a given situation, and 5 mph can be too slow to safely ride.

Response: These are maximum limits. The regulation gives clear direction to the user regarding the maximum allowed speeds but does not relieve him/her from the responsibility for operating at lower speeds if conditions require. It also does not restrict the officer from issuing citations for unsafe operation.

Comment: The possession restriction is unfair because it keeps bicyclists from riding to picnic spots or overlooks. Five commenters objected to the restriction on possession of bicycles on trails closed to bicycle use.

Response: This restriction applies to "routes" and is intended to prevent bicyclists from using trails closed to bikes by carrying or walking their bikes on these trails. It does not restrict bicyclists from picnicking along trails open to them or from enjoying overlooks on trails open to bicycles.

Section Analysis

This final rule adds a new paragraph (c) to the existing regulations at 36 CFR 7.97, "Designated bicycle routes", specific to the use of bicycles. This new paragraph permits the use of bicycles in accordance with existing regulations at 36 CFR 4.30 and specifies specific regulations for bicycle use on designated routes in non-developed areas of Golden Gate National Recreation Area.

Paragraph (c)(1) designates, pursuant to 36 CFR 4.30(b), certain routes as open to bicycle use. These routes may include former military and ranch roads, and existing fire management roads as mentioned in the proposed rule. Such designated routes shall be identified by the posting of signs and by the identification on maps made available to the public.

Paragraph (c)(2) identifies maximum speed limits for bicycles on designated routes. These trails are not for the exclusive use of bicyclists, and are open to hikers and, in some areas, to horses.

Speed limits will assist in preventing conflicts with these users.

Paragraph (c)(3) prohibits the possession of a bicycle in all non-developed areas not designated as open to bicycle use. This prohibition is to discourage the pushing or carrying of bicycles into non-designated areas, thus facilitating the fair enforcement of these proposed regulations. This paragraph also requires the use of an activated white headlight between sunset and sunrise instead of only a white reflector, which is currently prescribed by section 4.30(d). Forward reflectors alone would not be safe on trails in non-developed areas where there is a lack of activated lights that make reflectors useful.

Drafting Information

The workgroup that developed this rule making is composed of Gil Soper, Chief Ranger Activities; Doug Nadeau, Chief, Resource Management and Planning; and Nancy Hornor, Environmental Specialist of Golden Gate National Recreation Area.

Paperwork Reduction Act

This rulemaking does not contain information collection requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

Compliance With Other Laws

The Department of the Interior has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effort on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq*).

In compliance with the National Environmental Policy Act (NEPA) an Environmental Assessment was prepared to review the impacts of this action. A Finding of No Significant Impact was signed on May 14, 1991.

In accordance with section 7 of the Endangered Species Act of 1973 formal consultation with the U.S. Fish and Wildlife Service was initiated for trails where use was impacting endangered species habitat. Bicycle use is not proposed for these trails.

The NPS has reviewed this rule as directed by Executive Order 12630, "Government Actions and Interference with Constitutionally Protected Property Rights", to determine if this rule has "policies that have taking implications." The NPS has determined that this rule does not have takings implications because the regulations apply only to park lands, and open certain lands to bicycle users.

List of Subjects in 36 CFR Part 7

National parks, Reporting and recordkeeping requirements.

In consideration of the foregoing, 36 CFR chapter I is amended as follows:

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SYSTEM

1. The authority citation for part 7 continues to read as follows:

Authority: 16 U.S.C. 1, 3, 9a, 460bb–3, 462(k); Sec. 7.96 also issued under D.C. Code 8–137 (1981) and D.C. Code 40–721 (1981).

2. Section 7.97 is amended by adding paragraph (c) to read as follows:

§ 7.97 Golden Gate National Recreation Area.

* * * * *

(c) *Designated bicycle routes.* The use of a bicycle is permitted according to § 4.30 of this chapter and, in non-developed areas, as follows:

(1) Bicycle use is permitted on routes which have been designated by the Superintendent as bicycle routes by the posting of signs, and as designated on maps which are available in the office of the superintendent and other places convenient to the public.

(2) Bicycle speed limits are as follows:

(i) 15 miles per hour: Upon all designated routes in Golden Gate National Recreation Area.

(ii) 5 miles per hour: On blind curves and when passing other trail users.

(3) The following are prohibited:

(i) The possession of a bicycle on routes not designated as open to bicycle use.

(ii) Operating a bicycle on designated bicycle routes between sunset and sunrise without exhibiting on the bicycle or on the operator an activated white light that is visible from a distance of at least 500 feet to the front and with a red light or reflector visible from at least 200 feet to the rear.

Dated: November 13, 1992.

Jennifer A. Salisbury,

Acting Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310–70–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 406

[BPD–767–F]

Medicare Program; Technical Corrections to Hospital Insurance Eligibility and Entitlement Regulations

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This rule redesignates several sections of 42 CFR part 406, Hospital Insurance Eligibility and Entitlement. These redesignations were inadvertently omitted from amendments published on August 12, 1991, at 56 FR 38078.

EFFECTIVE DATE: These amendments are effective as of December 11, 1992.

FOR FURTHER INFORMATION CONTACT: Luisa V. Iglesias, (202) 690–6383.

SUPPLEMENTARY INFORMATION: On August 12, 1991, we published amendments to part 406 of the HCFA regulations. We amended the table of contents to redesignate several sections but failed to make the corresponding changes in the text. This rule corrects those omissions and makes the section numbers in the test consistent with the table of contents published on August 12, 1991. It also revises the table of contents to reflect changes that were included in the August 12 publication but do not appear in the October 1991 edition of the Code of Federal Regulations (CFR).

I. Information Collection Requirements

This rule contains no information collection requirements that are subject to review by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 381 et seq.)

II. Waiver of Proposed Rulemaking

This final rule makes purely technical corrections that preclude confusion but have no effect on the substance of the amended sections. Accordingly, we find that there is good cause to waive notice and opportunity for public comment as unnecessary. For the same reason, we waive the usual 30-day delay in the effective date.

III. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 requires us to prepare and publish a regulatory impact analysis for any rule that is likely to have an annual impact of $100 million or more, cause a major increase in costs

or prices, or meet other thresholds specified in section 1(b) of the order.

We have determined that a regulatory impact analysis is not required for this rule because it will have no economic impact.

B. Regulatory Flexibility Analysis

Consistent with the Regulatory Flexibility Act (RFA) and section 1102(b) of the Social Security Act, we prepare a regulatory flexibility analysis for each rule, unless the Secretary certifies that the particular rule will not have a significant economic impact on a substantial number of small entities, or a significant impact on the operation of a substantial number of small rural hospitals.

We have not prepared a regulatory flexibility analysis because we have determined, and the Secretary certifies, that these rules will not have a significant economic impact on a substantial number of small entities or a significant impact on the operation of a substantial number of small rural hospitals.

List of Subjects in 42 CFR Part 406

Health facilities, Kidney diseases, Medicare.

42 CFR part 406 is amended as set forth below:

PART 406—[AMENDED]

A. The authority citation for part 406 continues to read as follows:

Authority: Secs. 202(t), 202(u), 226, 226A, 1102, 1818, and 1871 of the Social Security Act (42 U.S.C. 402(t), 402(u), 426, 426–1, 1302, 1395i–2, and 1395hh) and 3103 of Pub. L. 89–97 (42 U.S.C. 426a) unless otherwise noted.

B. The text of part 406 is amended as set forth below:

§ 406.24 [Redesignated as § 406.34]

1. Section 406.24 is redesignated as § 406.34.

§ 406.30 [Redesignated as § 406.50]

2. Section 406.30 is redesignated as § 406.50 in subpart D.

§ 406.31 [Redesignated as § 406.52]

3. Section 406.31 is redesignated as § 406.52 in subpart D.

§ 406.32 [Transferred and amended]

4. Section 406.32 is transferred to subpart C and paragraph (c) is amended to revise "§§ 406.23 and 406.24" to read "§§ 406.33 and 406.34".

§ 406.34 [Amended]

5. In redesignated § 406.34, in paragraph (a)(1), "§ 406.23(a) or (b)" is revised to read "§ 406.33 (a) or (b)", and in paragraph (b)(1), "§ 406.23(a)" is revised to read "§ 406.33(a)".

§ 406.38 [Transferred]

6. Section 406.38 is transferred to subpart C.

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance.)

Dated: September 24, 1992.

William Toby, Jr.,

Acting Deputy Administrator, Health Care Financing Administration.

Approved: October 9, 1992.

Louis W. Sullivan,

Secretary.

BILLING CODE 6712–01–M

DEPARTMENT OF VETERANS AFFAIRS

48 CFR Parts 803 and 852

RIN 2900–AF68

VA Acquisition Regulation: Improper Business Practices and Personal Conflicts of Interest

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) is converting the proposed rule published in the **Federal Register** on August 20, 1992, at 57 FR 37759 to a final rule without further changes. The proposed rule established a requirement for the posting of the VA Inspector General (IG) Waste, Fraud, and Abuse Hotline poster in contractor facilities. Additionally, the coverage pertaining to the Procurement Integrity Act was deleted to eliminate coverage that is redundant or in conflict with coverage contained in the Federal Acquisition Regulation.

EFFECTIVE DATE: December 11, 1992.

FOR FURTHER INFORMATION CONTACT: Sherry Patton, Acquisition Policy Division (95A), Office of Acquisition and Materiel Management, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233–5001.

SUPPLEMENTARY INFORMATION:

I. Background

These revisions will require contractors to display the VA Inspector General (IG) Hotline Poster and encourage contractors to establish internal reporting mechanisms or programs that will encourage their employees to report instances of fraud or mismanagement. The requirement will apply to contractors who do not have a system already established for reporting improper business practices.

As a result of the changes enacted in the Office of Federal Procurement Policy Act (41 U.S.C. 423), as amended by section 814 of the FY 90/91 National Defense Authorization Act, Public Law 101–189, VA regulatory coverage pertaining to Procurement Integrity Act is redundant and in conflict with the coverage contained in the Federal Acquisition Regulation. VA regulatory coverage has been removed to eliminate the contradictory and redundant guidance. No comments were received from the public.

II. Executive Order 12291

Pursuant to the memorandum from the Director, Office of Management and Budget, to the Administrator, Office of Information and Regulatory Affairs, dated December 13, 1984, this rule is exempt from sections 3 and 4 of Executive Order 12291.

III. Regulatory Flexibility Act (RFA)

This final rule does not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601(2).

IV. Paperwork Reduction Act

The Paperwork Reduction Act does not apply to these final regulations.

List of Subjects in 48 CFR Parts 803 and 852

Government procurement.

Approved: November 30, 1992.

Anthony J. Principi,

Acting Secretary of Veterans Affairs.

Proposed Rule Adopted as Final Rule Without Change

Accordingly, the proposed rule amending 48 CFR parts 803 and 852, which was published at 57 FR 37759 on August 20, 1992, is adopted as a final rule without change.

For the reasons set forth in the preamble, 48 CFR parts 803 and 852 are amended as set forth below:

PART 803—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

1. The authority citation for part 803 is revised to read as follows:

Authority: 38 U.S.C. 501 and 40 U.S.C. 486(c).

803.104 [Removed]

2. Section 803.104 is removed.

3. Subpart 803.70, consisting of sections 803.7000, 803.7001, and 803.7002, is added to read as follows:

Subpart 803.70—Contractor Responsibility to Avoid Improper Business Practices

803.7000 Policy.

It is the Department of Veterans Affairs (VA) policy to contract with companies that conduct business with the highest degree of integrity and honesty. To demonstrate this commitment to integrity and honesty, contractors should have standards of conduct and internal control systems that are designed to promote such standards, to facilitate the timely discovery and disclosure of improper conduct in connection with Government contracts, and to assure that corrective measures are promptly instituted and carried out. For example, a contractor's system of management controls should provide for—

(a) A written code of business ethics and standards of conduct and an ethics training program for all employees;

(b) A mechanism, such as a hotline, by which employees may report suspected instances of improper conduct, and instructions that encourage employees to make such reports;

(c) Disciplinary action for improper conduct;

(d) Periodic reviews of company business practices, procedures, policies, and internal controls for compliance with standards of conduct and the special requirements of Government contracting;

(e) Internal and/or external audits as appropriate;

(f) Timely reporting to appropriate Government officials of any suspected or possible violations of law in connection with Government contracts or any other irregularities in connection with such contracts; and

(g) Full cooperation with any Government agencies responsible for either investigation or corrective actions.

803.7001 Display of VA hotline poster.

Contractors who are awarded a VA contract of—

(a) $500,000 or more for supplies or services, or

(b) $3 million or more for construction, and who have not established an internal reporting mechanism and program, as described in 803.7000(b), shall be required to display prominently in common work areas within business segments performing work under VA contracts, the VA hotline poster prepared by the VA Office of Inspector General.

803.7002 Contract clause.

The contracting officer shall insert the clause at 852.203–71, Display of VA hotline poster, in solicitations and contracts expected to equal or exceed the dollar thresholds established in 803.7001.

PART 852—[AMENDED]

4. The authority citation for part 852 is revised to read as follows:

Authority: 38 U.S.C. 501 and 40 U.S.C. 486(c).

5. Section 852.203–71 is added to read as follows:

852.203–71 Display of VA hotline poster.

As prescribed in 803.7002, insert the following clause:

Display of VA Hotline Poster

(a) Except as provided in paragraph (c) below, the Contractor shall display prominently in common work areas within business segments performing work under VA contracts, VA Hotline posters prepared by the VA Office of the Inspector General.

(b) VA Hotline posters may be obtained from the VA Office of Inspector General (53E), P.O. Box 34647, Washington, DC 20043–4647.

(c) The Contractor need not comply with paragraph (a) above, if the Contractor has established a mechanism, such as a hotline, by which employees may report suspected instances of improper conduct, and instructions that encourage employees to make such reports.

(End of Clause)

[NASA FAR Supplement Directive 89–12]

Acquisition Regulation; Miscellaneous Amendments to NASA FAR Supplement

AGENCY: Office of Procurement, Procurement Policy Division, NASA.

ACTION: Final rule.

SUMMARY: This document amends the NASA Federal Acquisition Regulation Supplement (NFS) to reflect a number of miscellaneous changes dealing with NASA internal or administrative matters. The major changes involve: (1) Synopsis of Unsolicited Proposals; (2)

Phase III, SBIR Contracting; (3) Validity of Corporate Sureties, Treasury Circular 570; (4) Submission of Reports of Work by NASA Contractors; (5) Bonds and Bond-Related Forms—Nonconstruction Contractors; (6) Procurement Under the Training Act; (7) Acquisition of Federal Information Processing Resources; (8) Providing Government Facilities to Contractors; (9) Clarification of Draft RFP Policy; and (10) Revision of Clause at 1852.204–70, Report on NASA Subcontracts.

EFFECTIVE DATE: November 30, 1992.

FOR FURTHER INFORMATION CONTACT: Thomas J. Whelan, Deputy Director, Procurement Policy Division (Code HP), Office of Procurement, NASA Headquarters, Washington, DC 20546, Telephone: (202) 358–0475.

SUPPLEMENTARY INFORMATION:

Availability of NASA FAR Supplement

The NASA FAR Supplement, of which this rule is a part, is available in its entirety on a subscription basis from the Superintendent of Documents, Government Printing Office, Washington, DC 20402. Cite GPO Subscription Stock Number 933–003–00000–1. It is not distributed to the public, either in whole or in part, directly by NASA.

Impact

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The regulations herein are in the exempted category. NASA certifies that this regulation will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The regulation imposes no new burdens on the public within the ambit of the Paperwork Reduction Act, as implemented at 5 CFR part 1320, nor does it significantly alter any reporting or recordkeeping requirements currently approved under OMB control number 2700–0042.

List of Subjects in 48 CFR Parts 1801, 1804, 1805, 1806, 1807, 1809, 1815, 1817, 1827, 1828, 1833, 1835, 1837, 1839, 1842, 1845, 1849, 1852, 1853, and 1870

Government procurement.

Don G. Bush,

Assistant Administration for Procurement.

1. The authority citation for 48 CFR parts 1801, 1804, 1805, 1806, 1807, 1809, 1815, 1817, 1827, 1828, 1833, 1835, 1837, 1839, 1842, 1845, 1849, 1852, 1853, and 1870 continues to read as follows:

Authority: 42 U.S.C. 2473(c)(1).

PART 1801—FEDERAL ACQUISITION REGULATIONS SYSTEM

2. Part 1801 is amended as set forth below:

§ 1801.104–370 [Amended]

a. In section 1801.104–370, paragraph (e) and paragraph (f), the telephone number "453–1000" is revised to read "358–0000."

1801.370 [Amended]

b. In section 1801.370, paragraph (a)(1)(ii), the name "Nelson" is removed and the name "LaBeau" is added in its place in both occurrences.

c. In section 1801.370, paragraph (b), Consolidated Contact List, the name "LaBeau" is added and the name "Nelson" is removed.

PART 1804—ADMINISTRATIVE MATTERS

3. Part 1804 is amended as set forth below:

1804.170 [Amended]

a. In section 1804.170, paragraph (b), the citation "1832.705–270(b)" is revised to read "1831.205–70."

1804.202 [Amended]

b. In section 1804.202, paragraph (a), the zip code "21090" is revised to read "21090–2934."

1804.671–4 [Amended]

c. Section 1804.671–4, paragraph (ss) is revised to read as follows:

* * * * *

(ss) Item 40—SBIR award (1 position). Enter Code "N" (no) if the contract action is not in support of the Small Business Innovation Research (SBIR) Program (Pub. L. 97–219). Enter Code "1" if the contract action is related to a Phase I contract in support of the program. Enter Code "2" if the contract action is related to a Phase II contract in support of the program. Enter Code "3" for Phase III SBIR contracts.

* * * * *

1804.671–6 [Amended]

d. In section 1804.671–6, paragraph (d) is revised to read as follows:

* * * * *

(d) All NASA funded Phase I and Phase II awards under the Small Business Innovation Research (SBIR) Program shall be coded with PPC "HS". All Phase III SBIR awards and SBIR awards funded by Agencies other than NASA shall be coded with PPC "GF".

* * * * *

1804.671–7 [Amended]

e. In the introductory text of section 1804.671–7, the phrase "(located at the end of this subpart)" is added following the phrase "Table 180–4–1" and before the phrase "is the PPC matrix."

PART 1805—PUBLICIZING CONTRACT ACTIONS

4. Section 1805.202 is revised to read as follows:

§ 1805.202 Exceptions.

The phrase "proprietary information," as used at FAR 5.202(a)(8), means information (data) that constitutes a trade secret and/or information that is commercial or financial and confidential or privileged.

PART 1806—COMPETITION REQUIREMENTS

5. Section 1806.203 is added to read as follows:

§ 1806.203 Contracting under the SBIR program.

No separate justification or determination and finding is required under this part to limit competition to eligible contractors in connection with procurement conducted under any of the three phases of the Small Business Innovation Research (SBIR) program (see 15 U.S.C. 638(e)(4)).

PART 1807—ACQUISITION PLANNING

6. Part 1807 is amended as set forth below:

§ 1807.103 [Amended]

a. Section 1807.103, paragraphs (a)(1)(ii) (C) thru (G) are redesignated as (a)(1)(ii) (D) thru (H). Paragraph (a)(1)(i)(B) is redesignated as new paragraph (a)(1)(ii)(C) and a new paragraph (a)(1)(i)(B) is added and reserved.

b. Section 1807.103, paragraphs (b)(1)(ii)(B) (*3*) thru (*7*) are redesignated as (b)(1)(ii)(B) (*4*) thru (*8*). Paragraph (b)(1)(ii)(A)(*2*) is redesignated as new paragraph (b)(1)(ii)(B)(*3*) and a new paragraph (b)(1)(ii)(A)(*2*) is added and reserved.

§ 1807.7102 [Amended]

c. Section 1807.7102, paragraphs (b)(2) (iii) thru (vii) are redesignated as paragraphs (b)(2) (iv) thru (viii). Paragraph (b)(1)(ii) is redesignated as new paragraph (b)(2)(iii) and a new paragraph (b)(1)(ii) is added and reserved.

PART 1809—CONTRACTOR QUALIFICATIONS

7. Part 1809 is amended as set forth below:

a. Sections 1809.105 and 1809.105–1 are added to read as follows:

1809.105 Procedures.

1809.105–1 Obtaining information.

When a performance or payment security requirement is included in the solicitation and the offeror proposes a corporate surety, the contracting officer shall satisfy the requirements of FAR 28.202 by obtaining the most current information from the Department of Treasury *Circular 570 Bulletin Board*, FTS (202) 874–7214. Use communications software specifications:

Baud rate: 2400
Parity: None
No. of Data Bits: 8
No. of Stop Bits: 1
Duplex: Full

1809.507 [Amended]

b. Section 1809.507, is redesignated as section 1809.506.

c. In the newly redesignated section 1809.506, paragraph (a), the citation "FAR 9.507(a)" is revised to read "FAR 9.507–2(a)."

d. In the newly redesignated section 1809.506, paragraph (b), the citation "FAR 9.507 (c)(4)" is revised to read "FAR 9.506(c)."

1809.508–2 [Amended]

e. In section 1809.508–2, the citation "FAR 9.508" is revised to read "FAR 9.507–2."

PART 1815—CONTRACTING BY NEGOTIATION

1815.507 [Removed]

8. Section 1815.507 is removed in its entirety.

PART 1817—SPECIAL CONTRACTING METHODS

9. Part 1817 is amended as set forth below:

1817.7002–2 [Amended]

a. In section 1817.7002–2, "Block 9" is revised to read "Block 7."

1817.7002–3 [Amended]

b. In section 1817.7002–3, "Block 11" is revised to read "Block 9."

PART 1827—PATENTS, DATA, AND COPYRIGHTS

10. Part 1827 is amended as set forth below:

1827.406 [Amended]

a. In section 1827.406, paragraph (b)(1)(v) is revised to read as follows:

* * * * *

(v) Submission. The required numbers of copies of the reports specified in subdivisions (i) through (iii) shall, as defined in the clause at 1852.235–70, be submitted to the contracting officer technical representative (COTR) of the contract in the absence of other instructions from the requesting activity. In addition, a reproducible copy and a printed, or reproduced, copy of the reports shall be sent to the NASA Center for AeroSpace Information (CASI), Attn: Accessioning Department, 800 Elkridge Landing Road, Linthicum Heights, MD 21090–2934.

* * * * *

1827.409 [Amended]

b. In section 1827.409, paragraph (i) is added to read as follows:

* * * * *

(i) In accordance with 1827.406(b)(1)(v), the contracting officer shall insert the clause 1852.235–70, Center for AeroSpace Information (November 1992), in all research and development contracts and in cost-reimbursement supply contracts involving research and development work which require the delivery of reports or data to CASI.

PART 1828—BONDS AND INSURANCE

11.–12. Part 1828 is amended as set forth below:

a. Section 1828.106–1 is revised to read as follows:

1828.106–1 Bonds and bond related forms.

When the contracting officer determines that performance or payment bonds are required from construction subcontractors under any non-construction contract (see 1828.102–1), the bonds shall be provided on SF 25, Performance Bond, and SF 25A, Payment Bond. These forms shall be modified to name the NASA prime contractor as well as the United States of America as obligees.

b. Subpart 1828.2 is added to read as follows:

Subpart 1828.2 Sureties

1828.202 Acceptability of corporate sureties.

When the solicitation requires the submission of a performance or payment security and the offeror proposes a corporate surety, verification procedures required by FAR 28.202 shall be supplemented by following the procedures in 1809.105–1, Obtaining information.

PART 1831—CONTRACT COST PRINCIPLES AND PROCEDURES

1831.205–70 [Amended]

12. In section 1831.205–70, the word "Incur-rence" is revised to read "Incurrence."

PART 1833—PROTESTS, DISPUTES, AND APPEALS

1833.214 [Amended]

13. Section 1833.214 is redesignated as section 1833.215.

PART 1835—RESEARCH AND DEVELOPMENT CONTRACTING

14. Part 1835 is amended as set forth below:

1835.003–70 [Amended]

a. In section 1835.003–70, the section heading "Scientific and Technical Information Service" is revised to read "Center for AeroSpace Information."

b. In the last sentence of section 1835.003–70, "Scientific and Technical Information Service" is revised to read "Center for AeroSpace Information."

1835.070 [Amended]

c. In section 1835.070, paragraph (a), "Scientific and Technical Information Service" is revised to read "Center for AeroSpace Information."

PART 1837—SERVICE CONTRACTING

15. Subpart 1837.70 is added to read as follows:

Subpart 1837.70—Procurement of Training

Sec.
1837.7000 Scope of part.
1837.7001 General.
1837.7001–1 Purpose.
1837.7001–2 Training Act of 1958.
1837.7001–3 Competition in Contracting Act (CICA) of 1984.
1837.7001–4 Procedures.

Subpart 1837.70—Procurement of Training

1837.7000 Scope of part.

This part contains NASA-unique regulations, which have no clearly identifiable FAR counterpart, on the procurement of training.

1837.7001 General.

1837.7001–1 Purpose.

This subpart provides policy guidance on the appropriate balance between the use of CICA and the Training Act for the procurement of NASA's training requirements.

1837.7001–2 Training Act of 1958.

The Training Act of 1958 (5 U.S.C. 4101 et seq.) may be used for training

of NASA employees by, in, or through non-Government off-the-shelf training courses which are available to the public. These include established university catalog courses or commercial course offerings that are offered to the general public at catalog or market prices.

1837.7001–3 Competition in Contracting Act (CICA) of 1984.

The procurement of a new training course that must be developed to fulfill a specific NASA need should be conducted in accordance with CICA under the applicable provisions of the Federal Acquisition Regulation (FAR) and the NASA FAR Supplement (NFS).

1837.7001–4 Procedures.

(a) Installation training and procurement offices are encouraged to collaborate in selecting the type of instrument (see FAR and NFS parts 13 and 16) which is most efficient in effective procurement of training.

(b) Installations should develop internal procedures in consonance with the guidance contained herein.

PART 1839—ACQUISITION OF FEDERAL INFORMATION PROCESSING RESOURCES

16. Subpart 1839 is revised to read as follows:

Subpart 1839.70—NASA Procedures

Sec.
1839.7000 Scope of subpart.
1839.7001 Policy.
1839.7002 Applicability.
1839.7003 APRs from installations.
1839.7003–1 Responsibility.
1839.7003–2 FIRMR applicability and procurement authority certification.
1839.7003–3 GSA nonmandatory MAS contracts.
1839.7003–4 APR format.
1839.7003–5 APR submission.
1839.7003–6 DPA amendments.
1839.7004 FIP Resources Decision Document.
1839.7005 Coordination.
1839.7006 DPA transmittal.
1839.7007 Numbering provisions and clauses.

Subpart 1839.70—NASA Procedures

1839.7000 Scope of subpart.

This subpart prescribes the internal NASA procedures to be used by installations in obtaining General Services Administration (GSA) authorization to contract for Federal information processing (FIP) resources.

1839.7001 Policy.

(a) NASA policies and procedures on the acquisition of FIP resources are prescribed in NASA Handbook (NHB) 2410.1E, NASA Information Resources Management Handbook. See NFS 1804.470 regarding NASA policy on automated information security.

(b) The Designated Senior Official (DSO), the Associate Administrator for Management Systems and Facilities (Code J), has responsibility and accountability for interpreting, applying, and overseeing the implementation of the Federal Information Resources Management Regulations (FIRMR) within NASA. The DSO, with the concurrence of the Assistant Administrator for Procurement (Code H) and cognizant Institutional Program Office (IPO), has the responsibility for submitting agency procurement requests (APRs) to GSA to obtain delegations of procurement authority (DPAs) for FIP resources.

1839.7002 Applicability.

This subpart is applicable to all procurements of FIP resources.

1839.7003 APRs from installations.

1839.7003–1 Responsibility.

The acquisition of FIP resources is a shared responsibility of the requiring activity, the procurement officer, and the information resources management (IRM) organization.

(a) The installation's procurement officer is responsible for ensuring that the following actions are taken:

(1) Required documentation is uniquely identifiable, complete, adequate, severable, and readily available in files controlled by the contracting office.

(2) Timely submission of non-Trail Boss APRs to the cognizant IPO in accordance with 1839.7003–5.

(3) Initiating an APR for a revised DPA if events invalidate the existing DPA or require additional or modified authorization from GSA in accordance with 1839.7003–6.

(b) The contracting officer is responsible for the following actions:

(1) Determining FIRMR applicability in accordance with 1839.7003–2;

(2) Determining whether an APR should be initiated in accordance with 1839.7003–2;

(3) Ensuring that installation prescribed approvals have been obtained to allow initiation of the acquisition; and

(4) Conducting the acquisition in compliance with the DPA. This includes ensuring that solicitations are released, and contracts are executed and performed, consistent with the DPA.

(c) The Senior Installation IRM Official (SIIO) is responsible for submitting APRs to the cognizant IPO for acquisitions under the Trail Boss Program.

1839.7003–2 FIRMR applicability and procurement authority certification.

The contracting officer shall:

(a) Review the requirements and determine how the requirements will be satisfied, if FIP resources will be involved, and the categories and values of the FIP resources to be acquired or used. Each category of FIP resources (FIP equipment, FIP software, FIP services, FIP support services, and FIP related supplies) must be individually identified as accurately as possible (see FIRMR 201–4.001). FIP maintenance is considered a subset of FIP support services.

(b) Determine if the agency has authority to acquire the FIP resources by virtue of a specific agency or regulatory delegation, or if a specific acquisition delegation must be obtained. This requires comparing the requirements and individual FIP resources to the criteria and thresholds specified in FIRMR 201–20.305. NASA may contract for FIP resources without obtaining a specific acquisition delegation when the dollar value of any single category of FIP resources, including all optional quantities and periods over the life of the contract, does not exceed $2.5 million; except that the dollar value for a specific make and model specification or for requirements available from only one responsible source may not exceed $250,000.

(1) The term "FIP System" is not a separate category of FIP resources for purposes of making these determinations. If a FIP system is being acquired, its component resource categories (for example, FIP equipment, software, and so on) must be individually valued and compared to the appropriate thresholds to make the determination.

(2) If the dollar value of any individual type of FIP resource included in the basic contract, and in all modifications and optional quantities and periods over the life of the contract, exceeds the applicable dollar threshold for the regulatory or agency delegation authority, then a specific DPA is required and an APR must be prepared.

(3) If no category of FIP resources being acquired exceeds the dollar threshold, an APR is not required.

(4) FIP related supplies have an unlimited regulatory authority, without any dollar limitation, but a specific acquisition delegation may still be required for the acquisition if other categories of FIP resources are acquired which exceed the applicable thresholds.

(5) Assessments and determinations for acquisitions greater than $50,000 will be documented in the contract file with the following certification format:

(Format)

FIRMR Applicability and Procurement Authority Certification

Procurement Title: _____
Procurement Request Number: _____

The acquisition requirements have been reviewed and an assessment of the resources to be delivered or used in satisfying these requirements has been made. These resources have been characterized as either FIP or non-FIP resources. Based on FIRMR 201–1.002, including FIRMR bulletin A–1 and NHB 2410.1E, I determine that the subject procurement is_____/is not_____ subject to the FIRMR.

[Note: If the contract will involve information technologies determined to be not subject to the FIRMR (see FIRMR 201–1.002–2), explain the rationale in a separate attachment.]

If the acquisition is subject to the FIRMR, I certify that the thresholds in NFS 1839.7003–2(b) have been reviewed and that this procurement does_____/does not _____require a specific acquisition Delegation of Procurement Authority.

FIP Resources:

Equipment $ _____
Software _____
Services _____
Support Services _____
Related Supplies _____
Total FIP Resources $ _____
Non-FIP Resources $ _____
(Include incidental and embedded FIP Resources)
Total of All Resources $ _____
Contracting Officer: _____
Concurrence (if required) _____
(SIIO if $25 million or more)
(SIIO or designee if less than $25 million and required by installation procedures)

_____Attachment: Rationale for Non-Applicability of FIRMR to FIP Resources.

(End of format)

(6) The contracting officer shall provide an information copy of the FIRMR Applicability and Procurement Authority Certification through the cognizant IPO to Code JT for acquisitions $25 million or more.

(7) Assessments and determinations for acquisitions $50,000 or less will be documented in the contract file in accordance with local procedures.

(c) Although the contracting officer has authority to make decisions concerning the applicability of the FIRMR to NASA solicitations and contracts or modifications, in the event of a disagreement within the Installation as to the applicability of the FIRMR to a NASA solicitation or contract or modification, the SIIO has the authority to make final decisions.

1839.7003–3 GSA nonmandatory MAS contracts.

(a) Use of GSA nonmandatory multiple award schedule (MAS) contracts is a competitive procedure relative to FAR Part 6 when:

(1) The contracting officer has complied with FIRMR 201–39.803–3(a)(2) to consider a reasonable number of nonmandatory MAS contractors that can satisfy the functional requirements;

(2) The contracting officer has fully complied with FIRMR 201–39.803–3(b) regarding responses to any required synopsis; and

(3) The contract file is adequately documented that the delivery order placed to the selected nonmandatory MAS contractor represents the lowest overall cost to the Government.

(b) If the procedures in paragraph (a) are followed, even though the resultant order may be issued for a specific manufacturer's product by name and model number, this is not a procurement for a specific make or model requiring a Justification For Other Than Full and Open Competition (JOFOC); the exception in FIRMR 201–39.601–2 applies.

(c) Generally a "reasonable number" means consideration of at least two compliant nonmandatory MAS contractors. Prudence would suggest considering three or more compliant nonmandatory MAS contractors.

(d) A specification that attempts to describe salient characteristics is not in itself conclusive evidence of a full and open competitive environment. The decisive factor is whether a product other than a specific make or model can satisfy the requirements expressed in such a specification. For example, if the salient characteristics were repeated off of or were derived directly from a product specification, a new product release issuance, or similar data sheet of a specific make or model or brand name, the requirements are probably not described in other than specific make or model specifications. Salient characteristics so derived are likely to be product-specific performance characteristics or proprietary design specifications. This specification, although it includes salient functional or performance characteristics, does not provide for full and open competition.

(e) Use the $2 million threshold for obtaining a DPA when use of a GSA nonmandatory MAS contract is a competitive procedure relative to FAR part 6. Use the $200,000 threshold when use of a GSA nonmandatory MAS contract is a noncompetitive procedure relative to FAR part 6.

(f) A brand name specification is a specific make or model specification and if an acquisition requires a contractor to comply with either such specifications, the acquisition must be justified and approved in accordance with FAR 6.303 and 6.304.

1839.7003–4 APR format.

(a) FIRMR 201–20.305–3 requires NASA to prepare APRs as indicated by instructions in the FIRMR Bulletin series. APRs under the Trail Boss Program will be submitted in the format provided in FIRMR Bulletin C–7, entitled "Trail Boss Program," as modified by Enclosure C–5A of NHB 2410.1E. APRs for all other FIP resources, will be submitted in the format provided in FIRMR Bulletin C–5, entitled "Instructions for Preparing an Agency Procurement Request (APR)," as modified by Enclosure C–4B of NHB 2410.1E. Installations will augment these APRs with the following additional information:

(1) Include in "FIP Resources to be acquired" the maximum contract value that includes (i) all contract options and (ii) maximum quantities under indefinite-delivery types of contracts.

(2) Describe the non-FIP resources in APRs for requirements that include non-FIP resources.

(3) Include the APR attachments required by FIRMR Bulletin C–5 and a copy of the JOFOC, if applicable.

(4) Include, as required, the documentation listed in FIRMR Bulletin C–5, paragraph 7, Regulatory Compliance; the FIP Resources Decision Document (FRDD); and the procurement plan or minutes of the acquisition strategy meeting (ASM). (If Headquarters approval of the procurement plan or minutes of the ASM is not required, indicate in the APR transmittal letter the date installation approval was given and do not include the document in the APR transmission.)

(5) Identify the NASA point of contact for GSA.

(b) The following matrix is provided to help in deciding if a document is required by the APR under Regulatory Compliance:

Type of requirement	Documentation items										
	1	2	3	4	5	6	7	8	9	10	11
FIP equipment	R	R	A	S	P	P	P	C	C	C	T
FIP software	R	R	A	S	P	P	P	C	C	C	T
FIP services	R	R	A	S	P	N	P	C	C	C	T

Type of requirement	Documentation items										
	1	2	3	4	5	6	7	8	9	10	11
FIP support services	R	R	N	N	P	N	P	N	N	N	T
FIP related supplies	R	R	N	N	P	P	P	N	N	N	T

Documentation Items Legend

1. Requirements analysis (FRDD part 2).
2. Analysis of alternatives (FRDD part 3).
3. Determination to support hardware compatibility-limited requirements.
4. Conversion study (FRDD part 3).
5. Certified data to support a requirement available from only one responsible source (the JOFOC).
6. Certified data to support use of a specific make and model specification (the JOFOC).
7. Description of planned actions necessary to foster competition for subsequent acquisitions (the JOFOC).
8. Justification for more than one agency to provide switching facilities or services at building locations (FIRMR 201–20.305–1(a)(1)(i)).
9. Exception to the use of the FTS2000 mandatory network services (FIRMR 201–20.305–1(a)(1)(ii) and 201–24.101–1(b)).
10. Exception to the use of GSA mandatory local telecommunications services (FIRMR 201–20.305–1(a)(1)(ii) and 201–24.102(c)).
11. Trail Boss Charter and Statement of Qualification.

R=Required.
A=Required if there are compatibility limited requirements.
N=Not required.
P=Required unless full and open competition.
C=Required if telecommunications exceptions are sought.
S=Required if a conversion study must be performed for equipment, software, or services.
T=Required for a Trail Boss Acquisition.

1839.7003–5 APR submission.

(a) For non-Trail Boss acquisitions, the contracting officer shall forward the original of the APR submittal (the APR and all required documentation) to the cognizant IPO, with a transmittal letter (see NHB 2410.1E, Enclosure C–4A) signed by the procurement officer. Include a 3½" diskette, formatted for use on a DOS 3.3, or higher compatible, personal computer, that contains a WordPerfect 5.0 or 5.1 format of the APR.

(1) The transmittal letter should indicate the approval status of the JOFOC, and either when the procurement plan was approved or when the ASM was conducted and the minutes approved. The SIIO or designee will concur on the transmittal letter.

(2) The cognizant IPOs for this purpose are: The Office of Space Flight (Attn: Code MV) for Johnson Space Center, Kennedy Space Center, Marshall Space Flight Center, Stennis Space Center, and the Space Station Freedom Program Office; the Office of Aeronautics and Space Technology (Attn: Code RI) for Ames Research Center, Langley Research Center, and Lewis Research Center; and the Office of Space Science and Applications (Attn: Code SP) for Goddard Space Flight Center. For Headquarters acquisitions the Director, Headquarters Acquisition Division (Code HW), shall submit APR's directly to the Office of Management Systems and Facilities (Attn: Code JT) after concurrence by the SIIO in Code J.

(3) Concurrently, the contracting officer shall provide copies of the APR submission, including the transmittal letter, the APR, and all required documentation, to the Assistant Administrator for Procurement (Attn: Code HS) and the Associate Administrator for Management Systems and Facilities (Attn: Code JT).

(4) APR's should be submitted as soon as, but not before, the FRDD and other documentation (waivers, JOFOCs, procurement plans, or ASM minutes, as appropriate) have been completed and approved in final form within the Agency.

(b) For acquisitions under the Trail Boss Program, the SIIO shall forward the original of the APR submittal (the APR and all required documentation) to the cognizant IPO, with a diskette of the APR as specified in paragraph (a) of this section. The IPO is responsible for preparing the transmittal letter (see NHB 2410.1E, Enclosure C–4C) and forwarding the APR to Code JTD.

(c) Following receipt of the original APR from the IPO, Code JTD will further augment the APR to include the APR control number and the agency-authorized signature.

(d) The Chief, IRM Policy and Acquisition Management Office (Code JTD) signs APRs, including amendments, of less than $10 million; the Director, IRM Division (Code JT) signs APRs between $10 million and $100 million; and the Associate Administrator for Management Systems and Facilities (Code J) signs APRs $100 million or greater and all APRs for Trail Boss delegations. Code JTD is responsible for transmitting APRs to GSA.

(e) Allow a minimum of seven weeks for processing the APR and obtaining the DPA.

1839.7003–6 DPA amendments.

(a) The maximum possible cumulative dollar value of the contract(s) entered into by authority of a DPA may not exceed the value of the DPA granted by GSA. A DPA is granted on the basis of information contained in the APR. An amendment to a DPA must be obtained whenever any material change is expected from the basis on which the DPA was granted. This applies to any specific acquisition DPA, including a Trail Boss DPA. An APR shall be used to accomplish this.

(b) Amendments to a previously submitted or approved specific acquisition DPA should follow the same procedures and employ the same format as that required by the current FIRMR and NFS part 1839. For such an APR, provide only that information necessary to update the original APR and only such other information as needed to support the amendment. Explain why the amendment is necessary The existing documentation supporting the acquisition should be reviewed and certified by the procurement officer as to its timeliness. If this documentation is either not current or affected by the amendment, the documentation shall be revised. If an original document was submitted or requested by Headquarters or GSA, its revision shall be resubmitted with the APR.

(c) The following are reasons for submitting an APR to seek an amended DPA:

(1) Any substantial change in acquisition strategy.

(2) Slippages in the solicitation schedule that exceed 12 months and affect specifically the dates to release the solicitation, to receive bids or proposals, to complete the evaluations and select, and to make an award. Slippages less than 12 months should be identified to GSA during routine status reporting.

(3) Changes affecting the non-FIP resources that occur during the solicitation period or contract term if those changes will affect the FIP resources to such an extent that the DPA will require modification.

(4) Any increase in the total FIP resources, exceeding the delegated authority. This includes any in-scope changes that cause the total contract value to exceed the APR estimate upon which the DPA was granted, and also includes all new work modifications.

(d) Contracting officers should inform Code JTD of any expected decreases greater than 25 percent in the total FIP resources to be acquired on a DPA. Code JTD will determine whether GSA should be informed of such decreases.

1839.7004 FIP Resources Decision Document.

When NHB 2410.1E provides for approval of a FIP Resources Decision Document (FRDD) at the local level, the approved FRDD, including its enclosures and attachments, must be an enclosure to the APR. Unless the FRDD has previously been sent to Headquarters, the FRDD is submitted to Headquarters along with the APR.

1839.7005 Coordination.

(a) APRs are subject to comparison with acquisition plans and general review by Code HS, Code JTD, and the cognizant IPO before submission to GSA.

(b) Communications with GSA regarding APRs shall be through Code JTD, unless that office directs otherwise. Installations should refer any direct inquiries from GSA, with the exception of acquisitions under the Trail Boss Program, without comment, to Code JTD.

(c) NASA will not normally make presentations to GSA regarding APRs unless requested by GSA. Any exceptions are subject to coordination by Code HS, Code JTD, and the cognizant IPO.

1839.7006 DPA transmittal.

(a) GSA delegates its procurement authority to the DSO. The DSO must explicitly redelegate specific acquisition DPAs to the contracting organization, before the contracting officer has authority to either issue solicitations or obligate NASA. Delegation of regulatory and specific agency procurement authority will be handled in accordance with the Associate Administrator for Management Systems and Facilities (Code J) procedures.

(b) GSA's delegations of specific acquisition authority to NASA, with the exception of acquisitions under the Trail Boss Program, are transmitted to Code J or designee (Code JTD), and are redelegated to the appropriate procurement officer by transmitting the approved APR and the signed DPA with a cover letter containing additional instructions and guidance. A copy of this entire package shall be retained in the contract file.

(c) GSA's delegations of specific acquisition authority to NASA, for acquisitions under the Trail Boss Program, are transmitted to the Trail Boss, and are redelegated to the appropriate procurement officer by transmitting the approved APR and the signed DPA with a cover letter containing additional instructions and guidance. A copy of this entire package shall be retained in the contract file.

(d) DPAs may be contingent upon the contracting officer submitting supplementary information.

(1) Post delegation review activities that may be required include:

(i) Solicitation evaluation;

(ii) Semi-annual progress report;

(iii) Post-bid briefing;

(iv) Pre-award briefing;

(v) Report of contract information;

(vi) Annual review of contract status; and

(vii) Annual review of the complete information system.

(2) Pre-award and post-award reports, when required, shall be forwarded to Code JT, through the SIIO to the Senior Program IBM Official (SPIO), within 30 days of contract award or contract modification. Code JT will review the reports and obtain Code HS concurrence prior to submission to GSA.

(e) Pre-award and post-award reports include 6-Month Status Reports and Contract Award Reports.

(1) GSA requires a 6-Month Status Report on all specific acquisition DPA's for which a contract or modification has not been awarded. The contracting officer shall submit status reports to Code JT not later than May 15 and November 15 of each year. The contents of these reports are specified in the DPA.

(2) GSA requires a Contract Award Report within 30 days after award of a contract or modification issued pursuant to a specific acquisition DPA. The contracting officer shall submit Contract Award Reports to Code JT not later than 25 days after the award of a contract or modification. These reports include:

(i) the contract or modification number;

(ii) contract or modification award date; contracting officer's name and telephone number;

(iii) anticipated contract life (number of months or years);

(iv) estimated contract dollar value of each FIP resource category to be acquired under the contract during the life of the contract;

(v) start and completion dates for the following acquisition phases: Determination of Need and Requirements Analysis, Analysis of Alternatives, Solicitation Preparation and Issuance, Proposal Evaluation and Award.

(f) Code JTD requires an Annual Status Report on all extant contracts with specific acquisition DPA's. The contracting officer shall submit an Annual Status Report to Code JT not later than November 15 of each year. If a DPA was received, or a Contract Award Report filed during the reporting period, report only the status between the receipt of the DPA or submission of the Contract Award Report through the end of the reporting period. Subsequent Annual Status Reports shall be submitted throughout the life of the contract until contract closeout.

(1) The Annual Status Report includes:

(i) the contract number:

(ii) date the contract was terminated or completed;

(iii) information on the progress made in accomplishing mission program objectives and whether they are being achieved within projected milestones or schedule and costs—address objectives, milestones or schedule, and costs established in the baseline (see paragraph (f)(2) of this section) for the information system initiative;

(iv) information on whether it is necessary to make changes to baseline, program directives, program milestones and schedule, and program costs—address specific changes and the reasons for making the changes;

(v) a signed and dated copy of the revised baseline for the information system initiative to include the total dollar value of FIP resources acquired under the contract covered by this DPA.

(2) Baseline information required in the Annual Status Report includes:

(i) Baseline Date—"as of" date when the baseline is defined.

(ii) Brief Description—the name and brief description of complete major information system initiative and appropriate mission program(s).

(iii) Program Objectives—brief description of mission program objectives that depend on successful implementation of major information system initiative, in terms of specific benefits or improvements to mission effectiveness and service delivery.

(iv) Program Milestones/Schedule—brief description of major milestones and schedule for acquisition, operation, maintenance of complete major information system initiative for accomplishing program objectives. Milestone/schedule should be organized by life-cycle phases (Definition/ Analysis, Design, Development, Operation/ Maintenance) and within phases by fiscal year quarter.

(v) Program Costs—projected in-house and contract costs for complete major information system initiative through Operation/Maintenance, presented by fiscal year quarter. Actual costs for quarters ending before baseline date. Dollar value, by contract, of FIP resources sought under contract(s) covered by requested or related DPA supporting the information system initiative.

(vi) Agency Official's Signature—signature of agency official responsible for major information system initiative.

(3) In the event a baseline is not required by the DPA, use the APR and FRDD.

(g) Questions from either GSA or the installation regarding the DPA shall be referred to Code JTD.

1839.7007 Numbering provisions and clauses.

When adherence to the FIRMR results in the use of provisions or clauses not prescribed in the FAR or NFS, use the FIRMR number and FIRMR provision or clause title.

PART 1842—CONTRACT ADMINISTRATION

1842.202–70 [Amended]

17. In section 1842.202–70, paragraph (a)(6)(iii), the word "it" is revised to read "if."

PART 1845—GOVERNMENT PROPERTY

18. Part 1845 is amended as set forth below:

a. Section 1845.302–1, paragraph (a), is revised to read as follows:

1845.302–1 Policy.

(a) The procurement officer is designated to make determinations required under FAR 45.302–1(a)(4) on authorizing the use of Government facilities.

* * * * *

b. Section 1845.302–73 is added to read as follows:

1845.302–73 Determination and findings.

(a) Procedure. Determination and findings (D&F) required under FAR 45.302–1(a)(4) shall be prepared by the contracting officer and approved by the procurement officer. Prior to approval of the D&F by the procurement officer, concurrence must be obtained from the Director of Administration or equivalent, to ensure that the requiring activity and the installation supply and equipment management officer agree to the use of the Government facilities by the contractor. D&Fs shall address individual types of facilities to be provided to the contractor. Reference to specific variations in quantities of items to be provided should be included in the D&F if additional requirements are anticipated. A separate D&F is required before adding new types of items or significant changes in quantity. A separate D&F is also required before adding any new work to the contract that requires additional Government facilities.

(b) Format. A sample format follows:

(Format)

National Aeronautics and Space Administration, Washington, DC 20546

Determination and Findings

Decision To Provide Government Facilities

On the basis of the following findings and determinations, Government-owned facilities may be provided to [*insert the name of the contractor*] pursuant to the authority of FAR 45.302–1(a)(4).

Findings

1. The *[insert the name of the contracting activity]* and the contractor (have entered)/(proposed to enter) into Contract No. *[insert the contract number]*. (Include the following information: Type of contract, contract value, and a brief description of the scope of work performed under the contract.)

2. (Justify that Government facilities are needed for performance under the contract. The justification shall demonstrate either (i) that the contract cannot be fulfilled by any other means, or (ii) that it is in the public interest to provide the facilities. It is imperative that the justification be fully substantiated by evidence.)

3. (If the contract effort cannot be fulfilled by any other means, indicate why the contractor cannot provide the facilities. For example, due to financial constraints, the contractor has certified inability to acquire the facilities; or, even though the contractor is willing and financially able to acquire these facilities for its own account, the contractor has stated that time will not permit making arrangements to obtain timely delivery to meet NASA requirements. If timely delivery is the problem, state when the contractor will replace the Government facilities with contractor-owned facilities. Address leadtime, validate the contractor's claims, and state that private financing was sought and either not available or not advantageous to the Government. If private financing was not advantageous to the Government, provide justification. Indicate other alternatives considered and reasons for rejection.)

4. (Give a general description of the types of facilities to be provided and indicate the variation in quantities of items based on functional requirements. Explain how these facilities pertain to the scope of work to be completed. State that the contract cannot be accomplished without the specified facility items being provided. Include an estimate of the value of the facilities and a statement that no facilities items under $10,000 unit cost will be provided unless the contractor is a nonprofit, on-site, or the facilities are only available from the Government.)

5. (Indicate whether the property will be accountable under this contract or a separate facilities contract.)

Determination

For the reasons set forth above, it is hereby determined that the Government-owned facilities identified herein will be provided to the contractor.

Procurement Officer

Date

(End of format)

PART 1849—TERMINATION OF CONTRACTS

1849.110 [Amended]

19. In section 1849.110, the section heading "Negotiation memorandum" is revised to read "Settlement negotiation memorandum."

PART 1852—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

20. Part 1852 is amended as set forth below:

1852.204–70 [Amended]

a. In the title of the clause, the date "AUG 1992" is revised to read "NOV 1992."

b. In paragraph (c) of the clause, the phrase "for performing this contract," is revised to read "for performing this contract (including facility leases),".

c. Section 1852.235–70 is revised to read as follows:

1852.235–70 Center for AeroSpace Information.

As prescribed in 1827.409(i) and 1835.070(a), insert the following clause:

Center for Aerospace Information (November 1992)

(a) The Contractor should register with and avail itself of the services provided by the NASA Center for AeroSpace Information (CASI) for the conduct of research or research and development required under this contract. CASI provides a variety of services and products as a central NASA repository of research information which may enhance contract performance. The address is set out in paragraph (d) of this clause.

(b) Should the CASI information or service requested by the Contractor be unavailable or not in the exact form necessary by the Contractor, neither

CASI nor NASA is obligated to search for or change the format of the information. A failure to furnish information shall not entitle the Contractor to an equitable adjustment under the terms and conditions of this contract.

(c) When the contract otherwise requires the submission of monthly progress, quarterly progress, or final reports, as defined at 1827.406(b), the last page of such reports shall be a completed Standard Form (SF) 298, Report Documentation Page.

(d) When the contract requires the delivery of reports or data to CASI, a reproducible copy and a printed or reproduced copy of such reports or data shall be concurrently submitted to: Center for AeroSpace Information (CASI), Attn: Accessioning Department, 800 Elkridge Landing Road, Linthicum Heights, MD 21090–2934.

(End of clause)

PART 1853—FORMS

1853.204–70 [Amended]

22. The section heading for section 1853.204–70 is revised to read "Section 1853.204–70 General (NASA Forms 507, 507A, 507B, 507G, 507M, 533M, 533P, 533Q, 667, 1098, 1356, 1611, 1612, 1651 and DD Form 1593).

PART 1870—NASA SUPPLEMENTARY REGULATIONS

23. In section 1870.303, Appendix I, Chapter 4, paragraph 401, 2.f. is revised to read as follows:

1870.303 Source Evaluation Board Procedures.

* * * * *

f. A draft RFP is an effective method of obtaining industry comment on our requirements and engendering industry goodwill. A draft RFP should be used whenever it is expected to be beneficial. The draft RFP should be complete and include all applicable sections, including Sections L and M. Where appropriate, the Statement of Work or specifications may be released in advanced of the draft RFP;

BILLING CODE 7510–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration (NOAA)

50 CFR Part 675

[Docket No. 911172–2021]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Closure.

SUMMARY: NMFS is closing directed fishing for pollock by vessels using non-pelagic trawl gear in the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary because the 1992 secondary bycatch allowance of Pacific halibut for the pollock/Atka mackerel/"other species" fishery in the BSAI has been caught.

EFFECTIVE DATES: Effective 12 noon, Alaska local time (A.l.t.), December 8, 1992, through 12 midnight, A.l.t., December 31, 1992.

FOR FURTHER INFORMATION CONTACT: Andrew N. Smoker, Resource Management Specialist, NMFS, 907–586–7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the BSAI exclusive economic zone is managed by the Secretary of Commerce according to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 675.

The 1992 secondary bycatch allowance of Pacific halibut to the pollock/Atka mackerel/"other species" fishery, which is defined at § 675.21(b)(4)(vi), was set at 1,692 metric tons (57 FR 43926, September 23, 1992).

The Regional Director, Alaska Region, NMFS, has determined, in accordance with § 675.21(c)(1)(iv), that U.S. fishing vessels have caught the 1992 secondary bycatch allowance of Pacific halibut for the pollock/Atka mackerel/"other species" fishery. Therefore, NMFS is closing directed fishing for pollock by trawl vessels using non-pelagic trawl gear in the BSAI from 12 noon, A.l.t., December 8, 1992, until 12 midnight, A.l.t., December 31, 1992. Non-pelagic trawl gear is any trawl other than a pelagic trawl as defined in 50 CFR 675.2.

Directed fishing standards for applicable gear types may be found in the regulations at § 675.20(h).

Classification

This action is taken under 50 CFR 675.21, and complies with E.O. 12291.

List of Subjects in 50 CFR Part 675

Fisheries, Reporting and recordkeeping requirements.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 8, 1992.

Richard H. Schaefer,

Director of Office of Fisheries, Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Proposed Rules

Federal Register
Vol. 57, No. 239
Friday, December 11, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Chapter I

NRC Program for Elimination of Requirements Marginal to Safety; Public Workshop

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Rescheduling of Public Workshop.

SUMMARY: On November 24, 1992, a notice was published (57 FR 55156) announcing a public workshop on January 26–27, 1993 for the NRC Program for Elimination of Requirements Marginal to Safety. This workshop is being rescheduled to expand the scope and include other aspects of the staff plans to improve the efficiency of the regulatory process. A notice providing further details will be published in the near future.

DATES: The rescheduled dates of the public workshop will be published in the near future.

ADDRESSES: The location of the public workshop will be published in the near future.

FOR FURTHER INFORMATION CONTACT: Dr. Moni Dey, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Phone (301) 492–3730.

Dated at Rockville, Maryland, this 4th day of December 1992.

For the Nuclear Regulatory Commission.

Warren Minners,

Director, Division of Safety Issue Resolution, Office of Nuclear Regulatory Research.

[FR Doc. 92–30127 Filed 12–10–92; 8:45 am]
BILLING CODE 7590–01–M

10 CFR Part 20

Radiological Criteria for Decommissioning of NRC-Licensed Facilities; Workshops

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of workshops.

SUMMARY: The Nuclear Regulatory Commission (NRC) is preparing to initiate an enhanced participatory rulemaking on establishing the radiological criteria for the decommissioning of NRC-licensed facilities. The Commission intends to enhance the participation of affected interests in the rulemaking by soliciting commentary from these interests on the rulemaking issues before the staff develops the draft proposed rule. The Commission plans to conduct a series of workshops to solicit commentary from affected interests on the fundamental approaches and issues that must be addressed in establishing the radiological criteria for decommissioning. The workshops will be held in various locations throughout the United States beginning in January, 1993 and will be open to the public.

DATES: The schedule for the workshops is as follows:

January 27 and 28, 1993—Chicago, IL
February 23 and 24, 1993—San Francisco, CA
March 12 and 13, 1993—Boston, MA
March 23 and 24, 1993—Dallas, TX
April 13 and 14, 1993—Philadelphia, PA
April 29 and 30, 1993—Atlanta, GA
May 6 and 7, 1993—Washington, DC (National Workshop)

As discussed later in this notice, the workshop discussions will focus on the issues and approaches identified in a Rulemaking Issues Paper prepared by the NRC staff. The Commission will accept written comments on the Rulemaking Issues Paper from the public, as well as from workshop participants. Written comments should be submitted by May 28, 1993.

ADDRESSES: Send written comments on the Rulemaking Issues Paper to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Attn: Docketing and Service Branch. Hand deliver comments to 11555 Rockville Pike, Rockville, Maryland between 7:45 a.m. and 4:15 p.m. on Federal workdays. The Rulemaking Issues Paper is available from Francis X. Cameron (See **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Francis X. Cameron, Special Counsel for Public Liaison and Waste Management, Office of the General Counsel, Washington, DC 20555, Telephone: 301–504–1642.

SUPPLEMENTARY INFORMATION:

Background

The NRC has the statutory responsibility for protection of health and safety related to the use of source, byproduct, and special nuclear material under the Atomic Energy Act. The NRC believes that one portion of this responsibility is to ensure the safe and timely decommissioning of nuclear facilities which it licenses and to provide guidance to licensees on how to plan for and prepare their sites for decommissioning. Once licensed activities have ceased, licensees are required to decommission their facilities so that their licenses may be terminated. This requires that the radioactivity in land, groundwater, buildings, and equipment resulting from the licensed operation be reduced to levels that allow the property to be released for unrestricted use. Licensees must then demonstrate that all facilities have been properly decontaminated and that radioactive material has been transferred to authorized recipients. Confirmatory surveys are conducted by NRC, where appropriate, to verify that sites meet NRC radiological criteria for decommissioning.

The types of nuclear fuel cycle facilities that will require decommissioning include nuclear power plants; non-power (research and test) reactors; fuel fabrication plants, uranium hexafluoride production plants, and independent spent fuel storage installations. In addition there are currently about 24,000 materials licensees. About one third of these are NRC licensees, while the remainder are licensed by Agreement States acting under the authority of the Atomic Energy Act, section 274. These licensees include universities, medical institutions, radioactive source manufacturers, and companies that use radioisotopes for industrial purposes. About 50% of NRC's 7,500 materials licensees use either sealed radioactive sources or small amounts of short-lived radioactive materials. Decommissioning of these facilities should be relatively simple because there is usually little or no residual radioactive contamination. Of the remaining 50%, a small number (e.g. radioactive source manufacturers, radiopharmaceutical producers, and

radioactive ore processors) conduct operations that could produce substantial radioactive contamination in portions of the facility. These facilities, like the fuel cycle facilities identified above, must be decontaminated before they can be safely released for unrestricted use.

Several hundred NRC and Agreement State licenses are terminated each year. The majority of these licenses involve limited operations, produce little or no radioactive contamination, and do not present complex decommissioning problems or potential risks to public health or the environment from residual contamination. However, as the nuclear industry matures, it is expected that more and more of the larger nuclear facilities that have been operating for a number of years will reach the end of their useful lives and be decommissioned. Therefore, both the number and complexity of facilities that will require decommissioning is expected to increase.

The Commission believes that there is a need to incorporate into its regulations radiological criteria for termination of licenses and release of land and structures for unrestricted use. The intent of this action would be to provide a clear and consistent regulatory basis for determining the extent to which lands and structures must be decontaminated before a site can be decommissioned. The Commission believes that inclusion of criteria in the regulations would result in more efficient and consistent licensing actions related to the numerous and frequently complex site decontamination and decommissioning activities anticipated in the future. A rulemaking effort would also provide an opportunity to reassess the basis for the residual contamination levels contained in existing guidance in light of changes in basic radiation protection standards and decommissioning experience obtained during the past 15 years.

The new criteria would apply to the decommissioning of power reactors, non-power reactors, fuel reprocessing plants, fuel fabrication plants, uranium hexafluoride production plants, independent spent fuel storage installations, and materials licenses. The criteria would apply to nuclear facilities that operate through their normal lifetime, as well as to those that may be shut down prematurely. The proposed criteria would not apply to uranium (other than source material) mines and mill tailings, high-level waste repositories, or low-level waste disposal facilities.

Until the new criteria are in place, the Commission intends to proceed with the decommissioning of nuclear facilities on a site-specific basis as the need arises considering existing criteria. Case and activity-specific risk decisions will continue to be made as necessary during the pendency of this process.

The Enhanced Participatory Rulemaking

The Commission believes it is desirable to provide for early and comprehensive input from affected interests on important public health and safety issues, such as the development of radiological criteria for decommissioning. Accordingly, the Commission is initiating an enhanced participatory rulemaking to establish these criteria. The objective of the rulemaking is to enhance the participation of affected interests in the rulemaking by soliciting commentary from these interests on the rulemaking issues before the NRC staff develops the draft proposed rule. The NRC staff will consider this commentary in the development of the draft proposed rule, as well as document how these comments were considered in arriving at a regulatory approach. The Commission believes that this will be an effective method for illuminating the decisionmaking process on complex and controversial public health and safety issues. This approach will ensure that the important issues have been identified; will assist in identifying potential information gaps or implementation problems; and will facilitate the development of potential solutions to address the concerns that affected interests may have in regard to the rulemaking.

The early involvement of affected interests in the development of the draft proposed rule will be accomplished through a series of workshops. A workshop format was selected because it will provide representatives of the affected interests with an opportunity to discuss the rulemaking issues with one another and to question one another about their respective positions and concerns. Although the workshops are intended to foster a clearer understanding of the positions and concerns of the affected interests, as well as to identify areas of agreement and disagreement, it is not the intent of the workshop process to attempt to develop a consensus agreement on the rulemaking issues. In addition to the commentary from the workshop participants, the workshops will be open to the public and the public will be provided with the opportunity to comment on the rulemaking issues and the workshop discussions at discrete intervals during the workshops.

The normal process for conducting Commission rulemakings is NRC staff development of a draft proposed rule for Commission review and approval, publication of the proposed rule for public comment, consideration of the comments by the NRC staff, and preparation of a draft final rule for Commission approval. In the enhanced participatory rulemaking, not only will comments be solicited before the NRC staff prepares a draft proposed rule, but the mechanism for soliciting these early comments will also provide an opportunity for the affected interests and the NRC staff to discuss the issues with each other, rather than relying on the traditional one-to-one written correspondence with the NRC staff. After Commission review and approval of the draft proposed rule that is developed using the workshop commentary, the general process of issuing the proposed rule for public comment, NRC staff evaluation of comments, and preparation of a draft final rule for Commission approval, will occur.

Participants

In order to have a manageable discussion among the workshop participants, the number of participants in each workshop must be limited. Based on discussions with experts on workshop facilitation, the NRC staff believes that the optimum size of the workshop group is fifteen to twenty participants. Due to differing levels of interest in each region, the actual number of participants in any one workshop, as well as the number of participants that represent a particular interest in any one workshop, may vary. Invitations to attend the workshops will be extended by the NRC staff using several selection criteria. First, to ensure that the Commission has the benefit of the spectrum of viewpoints on the issues, the NRC staff is attempting to achieve the participation of the full range of interests that may be affected by the rulemaking. The NRC staff has identified several general interests that will be used to select specific workshop participants—state governments, local governments, tribal governments, Federal agencies, citizens groups, nuclear utilities, fuel cycle facilities, and non-fuel cycle facilities. In addition to these interests, the staff also plans to invite representatives from the contracting industry that performs decommissioning work and representatives from professional societies, such as the Health Physics Society and the American Nuclear Society. The NRC anticipates that most of the participants will be

representatives of organizations. However, it is also possible that there may be a few participants who, because of their expertise and influence, will participate without any organizational affiliation.

The second selection criterion is the ability of the participant to knowledgeably discuss the full range of rulemaking issues. The NRC staff wishes to ensure that the workshops will elicit informed discussions of options and approaches, and the rationale for those options and approaches, rather than simple statements of opinion. The NRC staff's identification of potential participants has been based on an evaluation of such factors as the extent of a potential participant's experience with a broad range of radiation protection issues and types of nuclear facilities, specific experience with the decommissioning issue, and the extent of a potential participant's substantive comment and participation on previous Commission regulatory or licensing actions.

The third criterion emphasizes participation from organizations within the region encompassed by the workshop. As much as practicable, those organizations that primarily operate within the region, as opposed to regional units of national organizations, will have priority in terms of participating in the corresponding regional workshops. Organizations with a national standing will be part of the "national" workshop to be held in Washington, DC.

Wherever possible, the NRC staff plans to arrange the participation of individual organizations in the workshops through national organizations such as the Organization of Agreement States, and the Conference of Radiation Control Program Directors (CRCPD). There will also be some flexibility to later include organizations who were not originally identified in the staff survey of potential participants. In order to provide the public with information on the types of organizations that may eventually participate in the workshops, the Commission has provided the following summary:

- State governments. The Organization of Agreement States and the CRCPD are willing to coordinate the participation of individual states in the regional workshops. The NRC staff has also notified the National Governor's Association, the Western Governors Association, the National Conference of State Legislatures, and the National Association of Attorneys General of the upcoming workshops.
- Local governments. The NRC staff has contacted the National Association of Counties and the county associations in each state to identify potential local government participants.
- Tribal governments. The NRC staff has contacted three national tribal organizations—Native Americans for a Clean Environment, the National Congress of American Indians, and the Council of Energy Resource Tribes—in regard to the participation of tribal Governments in the regional workshops.
- Citizens groups. The NRC staff has contacted several citizens groups at the national level in regard to their general interest in participating in the national workshop. The groups contacted include the Sierra Club, the Natural Resources Defense Council, the Nuclear Information Resource Service, Public Citizen, U.S. Public Interest Research Group, the League of Women Voters, the National Aububon Society, the Union of Concerned Scientists, and Physicians for Social Responsibility.

In regard to local and regional citizens groups, the NRC staff has had extensive discussions with the NRC regional personnel, state radiation protection control officials, and others, on potential citizen group participation at the regional level. Based on these discussions, the NRC staff has contacted a number of citizens groups about their potential interest in the enhanced participatory rulemaking.

- Nuclear utilities. The Nuclear Management and Resources Council (NUMARC) will coordinate the participation of utilities in the workshops.
- Fuel cycle facilities. The United States Council on Energy Awareness (USCEA) and the Fuel Cycle Facilities Forum will coordinate the participation of fuel cycle companies in the workshops.
- Non-fuel cycle facilities. The NRC staff has contacted a number of organizations in this category about potential participation in the workshops, including regional radioisotope users groups. The USCEA Committee on Radionuclides and Radiopharmaceuticals assisted in coordinating the participation of the members of these and other non-fuel cycle entities in the workshops. Participants will be drawn from radiopharmaceutical manufacturers, biomedical research radionuclide manufacturers, the medical profession, sealed source manufacturers, and the university research community.
- Decommissioning contractors. In order to ensure that information on decommissioning costs and methods are presented in the workshops, the NRC staff has contacted several of the companies that perform decommissioning work in regard to workshop participation.
- Federal agencies. The NRC staff has contacted several Federal agencies about participation in the workshops. The Environmental Protection Agency (EPA), because of its expertise and responsibilities, will not only participate in the workshops, but also has been consulted by the NRC staff on the development of the Rulemaking Issues Paper and will be consulted in the evaluation of the workshop comments. EPA has been very supportive of the Commission's enhanced participatory rulemaking and has already provided the NRC staff with assistance on this effort. EPA will be fully involved in the workshops and in providing comments to the NRC staff on the rulemaking issues. It is anticipated that the EPA will also later use the workshop commentary in the development of its regulatory approach for decommissioning. The Commission believes that this consultative approach with EPA will be an efficient way to utilize Federal resources in developing an effective and consistent federal approach to decommissioning standards.

The NRC staff has also had several discussions with the Department of Energy (DOE) about the enhanced participatory rulemaking process and potential DOE participation in the workshops. DOE has indicated a preliminary interest in participating in the national workshop. Although the Commission's decommissioning standards will generally not be directly applicable to DOE facilities, DOE possesses substantial expertise in the decommissioning area that will be a useful source of information in the national workshop. It should be noted that under the Formerly Utilized Site Remedial Action Program (FUSRAP), and in some other circumstances, DOE may take title to a licensee's or former licensee's site for cleanup and long term care, including monitoring. The NRC staff has also discussed the new rulemaking initiative with several other Federal agencies and interagency coordinating committees. The NRC staff anticipates that Federal agency participation will occur in the national workshop.

- Professional societies. The NRC staff has contacted the Health Physics Society, the American Nuclear Society, and other professional societies in regard to their potential interest in participating in the national workshop.

Workshop Location, Schedule, and Format

The Commission intends to conduct the workshops on a regional basis. Although, there will be one national workshop in Washington, DC, for organizations with a national focus, the rest of the workshops will be held at various locations throughout the United States. The national workshop is not intended to be a summary of the other workshops, and the NRC staff does not intend to give any greater weight to comments made during that workshop than to any other workshop. The regional framework will allow the Commission to hear from as many knowledgeable organizations at the local level as possible. These local organizations will bring a unique perspective to the discussion of the rulemaking issues, and the regional workshops will also give the NRC an opportunity to interact with organizations with which it has not previously had the opportunity to do so.

The existing NRC regional framework was used to select the workshop locations, with slight adjustments made to accommodate areas with a heightened interest in decommissioning activities, as well as to maximize participation in the workshops. Notification of the specific meeting locations in each of the cities that have been selected as a workshop site will be announced through publication in the **Federal Register** and letters to individual participants.

To assure that each workshop addresses the issues in a consistent manner, the workshops will have a common pre-defined scope and agenda focused on the Rulemaking Issues Paper discussed below. However, the workshop format will be sufficiently flexible to allow for the introduction of any additional issues that the participants may want to raise. At each workshop, the NRC staff will begin each discussion period with a brief overview of the rulemaking issues to be discussed and the remainder of the workshop will be devoted to a discussion of the issues by the participants. The workshop commentary will be transcribed and made available to participants and to the public.

Personnel from The Keystone Center, a nonprofit organization located in Keystone, Colorado, will serve as neutral facilitators for each workshop. The facilitators will chair the workshop sessions and ensure the participants are given an opportunity to express their viewpoints, assist participants in articulating their interests, ensure that participants are given the opportunity to question each other about their respective viewpoints, and assist in keeping the discussion moving at a pace that will allow all major issue areas to be addressed.

Rulemaking Issues Paper

The NRC staff has prepared a Rulemaking Issues Paper to be used as a focal point for the workshop discussions. This paper, which will be distributed to participants in advance of the workshop, sets forth in neutral terms the issues that must be addressed in the rulemaking, as well as background information on the nature and extent of the problem to be addressed. In framing the issues and approaches discussed in the Rulemaking Issues Paper, the NRC staff has attempted to anticipate the variety of views that exist on these approaches and issues. The paper will provide assistance to the participants as they prepare for the workshops, suggest the workshop agenda, and establish the level of technical discussion that can be expected at the workshops. The workshop discussions are intended to be used by the staff in developing the draft proposed rule. Prior to the workshops, no staff positions will be taken on the rulemaking approaches and issues identified in the Rulemaking Issues Paper. As noted earlier, to the extent the Rulemaking Issues Paper fails to identify a pertinent issue, this may be corrected at the workshop sessions.

The discussion of issues is divided into two parts. First are two primary issues dealing with: (1) The objectives for developing radiological criteria; and (2) application of practicality considerations. The objectives constitute the fundamental approach to the establishment of the radiological criteria, and the NRC staff has identified four distinct possibilities including: (1) Risk Limits, which is the establishment of limiting values about which the risks to the public are deemed unacceptable, but allows for criteria to be set below the limit using practicality considerations; (2) Risk Goals, where a goal is selected and practicality considerations are used to establish criteria as close to the goal as practical; (3) Best Effort, where the technology for decontamination considered to be the best available is applied; and (4) Return to Preexisting Background, where the decontamination would continue until the radiological conditions were the same as existed prior to the licensed activities.

Following the primary issues are several secondary issues that are related to the discussions of the primary issues, but which the NRC staff believe warrant separate presentations and discussions. These secondary issues include the time frame for dose calculation, the individuals or groups to be protected, the use of separate criteria for specific exposure pathways such as groundwater, the treatment of radon, and the treatment of previously buried materials.

The Rulemaking Issues Paper will be provided to each potential workshop participant. Additional copies will be available to members of the public in attendance at the workshop. Copies will also be available from the NRC staff contact identified above. In addition to the comments on the Rulemaking Issues Paper provided to the workshops, the Commission is also receptive to the submittal of written comments on the rulemaking issues, as noted under the heading "**DATES**".

Dated at Rockville, MD, this 2nd day of December, 1992.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

10 CFR Part 54

Standard Design Certification Rulemaking Procedures; Notice of Availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

SUMMARY: The Nuclear Regulatory Commission (NRC) is making available to the public a paper, SECY 92-381 (November 10, 1992), prepared by the Office of the General Counsel (OGC) which provides final recommendations to the Commission on design certification rulemaking procedures for the initial design certification rulemaking.

ADDRESSES: Requests for copies of SECY 92-381 should be sent to Geary S. Mizuno, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of SECY 92-381 may be examined, along with comments received on the draft OGC paper (SECY-92-170), and the transcript of a July 20, 1992 workshop on design certification procedures, at the NRC Public Document Room at 2120 L Street, NW, (Lower Level), Washington, DC between the hours of 7:45 a.m. and 5:15 p.m. on Federal workdays.

FOR FURTHER INFORMATION CONTACT: Geary S. Mizuno, Office of the General Counsel, U.S. Nuclear Regulatory

Commission, Washington, DC 20555, telephone: (301) 504–1639.

SUPPLEMENTARY INFORMATION: Under 10 CFR part 52, designs for nuclear power plants are to be certified through rulemaking, in which the public has an opportunity to submit written comments on the proposed design certification rule, as required by the Administrative Procedure Act (APA). However, part 52 goes beyond the requirements of the APA by providing the public an opportunity to request a hearing before an Atomic Safety and Licensing Board (Licensing Board) in the design certification rulemaking. Although hearings in NRC rulemakings are not unprecedented, *e.g.*, the rulemaking associated with proposed adoption of the Generic Environmental Statement on Mixed Oxide Fuel (GESMO), they have been extremely rare and *sui generis*, and therefore provide no compelling precedent on what procedures should be followed here.

To assist the Commission in preparing for the first design certification rulemaking proceeding, OGC prepared a draft paper, SECY 92–170 (May 8, 1992) which identified and analyzed issues relevant to establishing procedures to govern design certification rulemaking. SECY 92–170 was made public by the Commission (57 FR 24394; June 9, 1992), and a Commission meeting on the paper was held on June 1, 1992. Thereafter, in SECY 92–185 (May 19, 1992), OGC proposed holding a public workshop for the purpose of facilitating public discussion on the issues raised in SECY 92–170, and to obtain the comments of the public on those issues. Notice of the workshop was published in the **Federal Register** (57 FR 24394; June 9, 1992). A 30-day period following the workshop was provided for the public to submit written comments on SECY 92–170. The workshop was held on July 20, 1992. A transcript was kept of the workshop proceedings and placed in the Public Document Room. Approximately 46 persons outside of the NRC attended the workshop; an additional 8 persons requested copies of the SECY paper and workshop materials, but did not attend. Eleven written comments were received following the workshop.

After consideration of the panel discussions at the public workshop and the written comments received after the workshop, OGC has prepared SECY 92–381 which identifies and analyzes the issues relevant to design certification rulemaking procedures, and provides final recommendations to the Commission. Five principal issues on design certification rulemaking procedures were identified in SECY–92–170. SECY 92–381 now provides final recommendations on each of these issues, as described below.

The first issue is the scope of the Atomic Safety and Licensing Board's responsibilities in a design certification rulemaking hearing. OGC recommended preliminarily that the Licensing Board act as "limited magistrate" to compile a record on controverted issues and certify the record to the Commission for resolution. After consideration of written public comments and the discussions at the public workshop, OGC now recommends an approach similar to that of a "full magistrate." Under this approach, the Licensing Board would have the option of, but not be required to, prepare recommendations on controverted hearing issues.

The second issue is whether the Commission should apply *ex parte* and/or separation of function limitations to the Commission (and Licensing Board, as applicable) in the design certification rulemaking proceeding. OGC recommended preliminarily that where hearings are held in design certification rulemakings, that the Commission apply limited separation of functions. This would allow the Commission to obtain the advice and assistance of the staff members who participated in the review of the design certification application and any hearing, but that such communications would occur in a public process, *e.g.*, preparation of SECY papers in response to Commission SRMs, and public meetings between the Commission and the staff. In the absence of a hearing, the Commission could obtain the advice and assistance of the staff the same as in any ordinary rulemaking. In SECY 92–381, OGC continues to recommend this approach. OGC also recommends in SECY 92–381 that regardless of whether hearing requests are received, that *ex parte* limitations be followed from the time that an NPR is published, so that all Staff and Commission communications with persons outside the NRC on all substantive rulemaking matters (not just controverted issues) be docketed.

Third, SECY 92–170 discussed whether a threshold should be adopted by the Commission for a hearing request submitted by an interested member of the public in a design certification. OGC recommended preliminarily that a person requesting an informal hearing be required to: (a) Submit written comments in the written comment period; (b) submit the written presentations proposed to be included in the informal hearing; and (c) demonstrate that they, or persons they intend to retain to represent them in the informal hearing, have the qualifications to contribute significantly to the development of the hearing record on the controverted issues. OGC now recommends in SECY 92–381 that a person requesting an informal hearing need only: (a) Submit the written presentations proposed to be included in the informal hearing; and (b) demonstrate that they, or persons they intend to retain to represent them in the informal hearing, have the qualifications to contribute significantly to the development of the hearing record on the controverted issues. OGC no longer recommends the proposed third requirement for submission of written comments, since it is largely duplicative of the requirements to submit the written presentations. OGC also recommends that the Commission make clear that a person need not meet the test of an "expert witness" in order to satisfy the qualifications requirement. Rather, the person must demonstrate that, because of knowledge, experience, education or training, he or she can contribute significantly to the development of the record on the controverted issue.

The structure and timing of the hearing, including the time for filing informal hearing requests and requests for additional procedures, is the fourth area requiring Commission guidance. OGC recommended preliminarily that informal hearing requests be filed concurrently with the time for submitting written comments, which OGC preliminarily recommends be set normally at 90 days. If the Commission grants the informal hearing requests, OGC recommended preliminarily that parties be provided the opportunity to make oral presentations before the Licensing Board, and that the Licensing Board be permitted to ask questions at the oral hearing without any special finding by the Licensing Board. Requests for additional procedures or full formal hearings under 10 CFR part 2, subpart G, would normally be submitted at the time the outlines of the oral presentations are due, which OGC preliminarily recommended should be filed 30 days before the oral hearing. Thereafter, a special showing would have to be made for an untimely request for additional hearing procedures or a full formal hearing. As a result of additional consideration following the public comments, OGC now recommends that a 120-day period be provided for submitting written comments and requests for informal hearings. OGC also has changed its recommendation with respect to the

timing of requests for additional procedures or full formal hearing. OGC now recommends that parties should file their requests for additional procedures or a formal hearing at the conclusion of the oral phase of the hearing, with the exception of requests for discovery. Discovery requests would be filed with the Licensing Board within 15 days of the Commission's grant of an informal hearing. The Licensing Board would refer meritorious request to the Commission for final determination.

Finally, the use of, and access to, proprietary information in the design certification rulemaking was discussed in SECY 92–170. OGC recommended preliminarily that both "Tier 1" and "Tier 2" design certification information should not contain any proprietary information. In addition, OGC recommended preliminarily that access to proprietary information be provided following docketing of the design certification application, and that non-disclosure agreements be used in order to obtain access to proprietary information from the NRC's public document room (PDR). In SECY 92–381 OGC now proposes two alternatives for addressing the incorporation of proprietary information into a design certification rulemaking. The first alternative is that all important design information in Tiers 1 and 2 be non-proprietary, although proprietary information could be referenced as a basis for both tiers. The second alternative is to seek a formal opinion from the Office of the Federal Register on incorporation by reference of proprietary information into Tier 2. With respect to public access to proprietary information, OGC proposes three alternatives for Commission consideration. The first alternative would require potential commenters and parties in design certification hearing to seek access to proprietary information directly from the design certification applicant. Disputes over access would be resolved by the Commission or the Licensing Board, as appropriate. Access to proprietary information would await the initiation of the formal rulemaking proceeding (publication of an NPR). Access would be provided to all persons who would sign a non-disclosure statement. The second alternative would be the same as the first, except that the persons seeking access would have to provide an affidavit explaining why access to proprietary information is necessary to provide comments and shows that the person has the necessary expertise to use the information and contribute significantly to the rulemaking record. The final alternative would grant access only to parties in any rulemaking hearing which the commission authorizes. Access would be granted only to parties who can show that the proprietary information is relevant to the issues at the hearing, the non-proprietary information is insufficient to adequately address the issues in the hearing, and that the party seeking access has the necessary expertise to use the information and contribute significantly to the rulemaking record.

The Commission is making SECY 92–381 available to the public to enhance public awareness of the design certification rulemaking process. The Commission will establish the procedures to be followed in the first design certification rulemaking proceeding (excepted to be for the General Electric (GE) Advanced Boiling Water Reactor (ABWR)) in the notice of proposed rulemaking for that design certification.

Dated at Rockville, MD this 7th day of December, 1992.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590–01–M

FEDERAL HOUSING FINANCE BOARD

12 CFR Parts 932 and 933

[No. 92–741]

Members of the Banks

AGENCY: Federal Housing Finance Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Housing Finance Board (Finance Board) proposes to revise in its entirety its current regulations concerning membership in the Federal Home Loan Bank System (FHLBank System) in response to changes made to the Federal Home Loan Bank Act (Bank Act) by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). The proposed membership regulation clarifies membership eligibility requirements and procedures for applicants for membership in the FHLBank System. In addition, it clarifies access to noncredit services provided by the FHLBanks. The Finance Board also proposes to include in the revised regulations several sections of its existing regulations concerning the transfer of Federal Home Loan Bank (FHLBank) stock in consolidations and reorganizations of member institutions.

DATES: Comments must be submitted to the Finance Board by February 9, 1993.

ADDRESSES: Send comments to: Federal Housing Finance Board, Executive Secretary, 1777 F Street, NW., Washington, DC 20006. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Sharon B. Like, (202) 408–2930, Attorney-Advisor, Jon E. Boustany, (202) 408–2932, Attorney-Advisor, or Bruce W. McDougal, (202) 408–2505, Attorney-Advisor, Office of Legal and External Affairs, or Amy R. Maxwell, (202) 408–2882, Assistant Director, District Banks Directorate, Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006.

SUPPLEMENTARY INFORMATION:

I. Statutory and Regulatory Background

A. Pre-FIRREA Membership Procedures

Prior to the enactment of FIRREA (Pub. L. 101–73, 103 Stat. 183 (Aug. 9, 1989)), the FHLBank System was regulated by the former Federal Home Loan Bank Board (Bank Board). Because of the multiple roles of the Bank Board, the review and approval of FHLBank membership applications for Federally and state chartered savings associations was done simultaneously with the review and approval of applications for deposit insurance and applications for Federal charters. As a condition to obtaining deposit insurance from the Federal Savings and Loan Insurance Corporation (FSLIC) (now the Savings Association Insurance Fund (SAIF)), Federally and state chartered savings associations were required to become members of the FHLBank System. In addition, all Federally chartered savings associations were and are required to be members of the FHLBank System. Consequently, the former Bank Board concurrently approved an applicant's membership in the FHLBank System at the time it approved its FSLIC deposit insurance, and in the case of applicants for a Federal charter, its charter.

Insurance companies and state chartered savings banks insured by the Federal Deposit Insurance Corporation (FDIC) also were eligible but not required to join the FHLBank System. In contrast to FLSIC-insured savings associations, these voluntary members were subject to a different application process. The Bank Board delegated the authority to approve membership applications of eligible voluntary members to the Principal Supervisory Agents (PSAs) of the Bank Board, who were generally the FHLBank Presidents. See 12 U.S.C. 1437 (1989); see also 12 CFR 523.3–3 and 541.18 (1989). This

practice continued until the enactment of FIRREA.

B. Changes Made To Bank Act By FIRREA

FIRREA made several changes to the Bank Act, which resulted in changes to FHLBank membership rules and procedures. Section 702(a) of FIRREA created the Finance Board and transferred from the former Bank Board to the Finance Board the responsibility for the supervision and regulation of the twelve FHLBanks. 12 U.S.C. 1422a(a) (Supp. I 1989). The Bank Board's authority to charter Federal savings associations was transferred to the Office of Thrift Supervision (OTS). The Bank Board's authority to administer deposit insurance for savings associations was transferred to the FDIC.

Section 702 of FIRREA also amended the Bank Act to limit the Finance Board's ability to delegate its authority to the FHLBanks. *Id.* at 1422b. Specifically, section 2B(b)(1) of the Bank Act provides, in pertinent part, that in no event shall the Board delegate any function to any employee, administrative unit of any FHLBank, or joint office of the FHLBank System. The prohibition does not apply to the delegation of ministerial functions including issuing consolidated obligations pursuant to 12 U.S.C. 1431(b).

Accordingly, the Finance Board may delegate only ministerial, as opposed to discretionary, functions to the FHLBanks. A ministerial function of an agency is an action based on mandatory directives that leave no room for discretionary decisions. See *Berkovitz* v. *United States*, 486 U.S. 531 (1988). Since the current process of reviewing membership applications involves discretionary decisions by a reviewer, all membership applications since the enactment of FIRREA have been subject to approval by the Finance Board.

FIRREA also made significant changes to the membership eligibility criteria in section 4 of the Bank Act. 12 U.S.C. 1424. First, FIRREA permitted commercial banks and credit unions to become members for the first time. *Id.* at 1424(a). This change was in recognition of the fact that such institutions have demonstrated substantial commitment to providing credit for the purchase or construction of residential housing. See 135 Cong. Rec. S. 10206 (daily ed. Aug. 4, 1989) (statement of Sen. Riegle).

Second, FIRREA added the requirement that an insured depository institution have at least 10 percent of its total assets in residential mortgage loans in order to be eligible to become a member of an FHLBank. 12 U.S.C. 1424(a)(2)(A) (Supp. I 1989) (the "10 percent" requirement). This requirement was added to ensure that only applicants that demonstrate a significant commitment to residential mortgage lending acquire access to FHLBank System benefits. Joint Explanatory Statement of the Committee of Conference, H.R. Conf. Rep. No. 222, 101st Cong., 1st Sess. 424–25 (1989) (FIRREA Conference Report).

Section 2B(a)(1) of the Bank Act empowers the Finance Board, *inter alia*, to promulgate and enforce such regulations and orders as are necessary from time to time to carry out the provisions of the Bank Act, including regulations on membership in the FHLBank System. 12 U.S.C. 1422b(a)(1) (Supp. I 1989). The Finance Board's current regulations on membership in the FHLBank System were originally promulgated by the former Bank Board at 12 CFR part 523. The Finance Board, pursuant to its authority in section 2B(a)(1) to administer the Bank Act, adopted and redesignated the former Bank Board's membership regulations at 12 CFR part 933. See 54 FR 36757 (Sept. 5, 1989). However, these regulations were designed to administer membership eligibility requirements that were contained in the Bank Act prior to FIRREA.

In order to address the significant changes that FIRREA has made to the membership eligibility criteria in the Bank Act, the Finance Board is proposing to revise its membership regulations in their entirety.

II. Analysis of Proposed Rulemaking

A. Membership Application Approval Process

Section 933.2 of the proposed rule sets forth the review and approval process for applications for membership in an FHLBank. Under § 933.2(d) of the proposed rule, membership in the FHLBank System would continue to be automatic for those members which are Federally chartered savings associations. Section 5(f) of the Home Owners' Loan Act (HOLA) makes membership in the FHLBank System automatic for all Federal savings associations or Federal savings banks upon receiving their Federal charters. 12 U.S.C. 1464(f) (Supp. I 1989). The Finance Board believes that the factors considered by the OTS when reviewing an application for a Federal charter are the same factors which would be considered by the Finance Board, and therefore that it is not necessary to require these institutions to file an additional application for membership with the Finance Board. Thus, upon receipt of its Federal charter, a Federal savings association or Federal savings bank would automatically become a member of the FHLBank of the district in which its principal place of business is located. No application for membership must be filed. In addition, under proposed §§ 933.2(d) and 933.7(b), such institutions would have 30 calendar days from receipt of their Federal charters to purchase stock in that FHLBank.

Under § 933.2(e) of the proposed rule, a member that converts to a different charter would automatically become a member on the effective date of such conversion, if the resulting institution continues to be an insured depository institution. (For a more detailed discussion of § 933.2(e), see the discussion below regarding Sasser amendment and Oakar amendment transactions).

Under proposed § 933.2(a), all other institutions seeking membership in an FHLBank are required to submit application forms to the FHLBank which satisfy Finance Board requirements. Under proposed § 933.2(b), the application is then sent to the Finance Board for approval.

Under § 933.4 of the proposed rule, a limited portion of the applications for membership may be approved by the board of directors of a FHLBank if all of the conditions set forth in policy guidelines established by the Finance Board are met. The board of directors of an FHLBank may further delegate the authority to approve applications to the President or other senior officers of the FHLBank.

B. Membership Eligibility Requirements

Section 4(a)(1) of the Bank Act, as amended, defines the types of financial institutions eligible to become members of the FHLBank System to include any building and loan association, savings and loan association, cooperative bank, homestead association, insurance company, savings bank, or any insured depository institution. 12 U.S.C. 1424(a)(1) (Supp. I 1989). An eligible institution must meet the membership criteria of section 4 of the Bank Act in order to become a member of the FHLBank System. *Id.* at 1424. There are two separate sets of membership requirements in section 4 of the Bank Act which institutions must meet in order to become members of the FHLBank System. These are discussed in turn below.

The criteria set forth in section 4(a)(1) of the Bank Act apply to all applicants for membership in the FHLBank System. Section 4(a)(2) of the Bank Act

provides that the criteria set forth therein apply to "insured depository institutions." The Finance Board has supervisory authority over the FHLBanks, as well as the duty to ensure that the FHLBanks operate in a financially safe and sound manner, and carry out their housing finance mission consistent with safety and soundness. See 12 U.S.C. 1422a(a)(3), 1422b(a)(1) (as amended). The Finance Board has determined that, pursuant to such authority, the section 4(a)(2) criteria shall, as a matter of policy, apply to insurance company applicants as well as insured depository institutions. The reasons for this determination, as well as requests for comments on specific issues it raises, are discussed more fully in C. below.

1. Section 4(a)(1). General Membership Requirements

Under the section 4(a)(1) membership requirements, an institution shall be eligible for FHLBank membership if:

(A) The institution is duly organized under the laws of any state or of the United States;

(B) The institution is subject to inspection and regulation under the banking laws, or under similar laws, of the state or of the United States; and

(C) The institution *makes* such *home mortgage loans* as, in the judgment of the Board, are *long-term* loans (the "makes" test).

12 U.S.C. 1424(a)(1) (A) through (C) (Supp. I 1989) (emphasis added).

While the requirements of paragraphs (A) and (B) are straightforward, there are three separate components of the "makes" test that must be defined (*i.e.*, "home mortgage loans," "long-term," and "makes"). The proposed rule expounds on each of these components.

a. Definition of home mortgage loans. A "home mortgage loan" is defined in the Bank Act as a loan made by a member upon the security of a home mortgage. *Id.* at 1422(5). A "home mortgage" is defined generally as a mortgage upon real estate upon which is located one or more homes or other dwelling units, all of which may be defined by the Board, and shall include, in addition to first mortgages, such classes of first liens as are commonly given to secure advances on real estate. *Id.* at 1422(6).

Based on the above statutory definitions, it is reasonable to conclude that a "home mortgage loan" is essentially a loan secured by a first mortgage on real property with one or more structures designed primarily for residential use. See also 75 Cong. Rec. 12609 (1932) (remarks of Rep. Hancock, stating that the term is defined to mean a first mortgage on residential real estate housing).

The Finance Board proposes in § 933.1(j) to define the term "home mortgage loan" as:

(1)(i) A loan, whether or not fully amortizing, which is secured by a mortgage, a deed of trust or other security agreement, or an interest in such a loan, which creates a first lien on one of the following interests in domestic real property:

(A) One-to-four family property or multifamily property, in fee simple;

(B) A leasehold on one-to-four family or multifamily property under a lease not less than 99 years which is renewable or under a lease having a period of not less than 50 years to run from the date the mortgage was executed;

(ii) The term home mortgage loan shall not include a loan secured by nonresidential real property, or combination business or farm property;

(2) A mortgage pass-through security which represents an undivided ownership interest in:

(i) loans, all of which loans at the time of issuance of the security meet the requirements of paragraph (j)(1) of this section; or

(ii) securities which represent an undivided ownership interest in loans, all of which loans at the time of issuance of the security meet the requirements of paragraph (j)(1) of this section; or

(3) Any loans which the Board in its discretion otherwise determines are home mortgage loans.

One-to-Four Family Property

Current Finance Board practice is to include loans secured by first mortgages on one-to-four family property as satisfying the statutory definition of "home mortgage loan" because they are traditional home loans secured by real estate upon which is located one or more dwelling units. The Finance Board proposes in § 933.1(r) to define the term "one-to-four family property" similarly to the definition found in the FDIC Report of Condition and Income (Call Report), with several exceptions. The term is defined specifically as follows:

(1) Real property containing one-to-four dwelling units, or real property containing more than four dwelling units if each unit is separated from the other units by dividing walls that extend from ground to roof, including row houses, townhouses or similar types of property;

(2) Manufactured housing if (i) applicable state law defines the purchase or holding of manufactured housing as the purchase or holding of real property, and (ii) the loan to purchase the manufactured housing is secured by that manufactured housing and such security interest is evidenced by a mortgage or other lien on real property;

(3) Individual condominium dwelling units or interests in individual cooperative housing dwelling units that are part of a condominium or cooperative building without regard to the number of total dwelling units therein; or

(4) Real property containing one-to-four dwelling units with commercial units combined, provided the property is primarily residential.

A "dwelling unit" is defined in proposed § 933.1(h) as a single, unified combination of rooms designed for residential use by one household. This proposed definition is intended to incorporate a single-family home, a residence in a building containing one-to-four units, and a residence in a multifamily building of five or more units.

Inclusion of manufactured housing loans secured by real estate under state law within the proposed definition of "home mortgage loan" would continue current Finance Board practice of including such loans as satisfying the "makes" test. A "manufactured housing loan" is defined in proposed § 933.1(n) by reference to the definition in the Manufactured Home Construction and Safety Standards Act, 42 U.S.C. 5402(b). (See also 12 CFR 545.45.) The legislative history of FIRREA supports the inclusion of manufactured housing loans as satisfying the "makes" test where state law treats the collateral as real property. Specifically, the FIRREA Conference Report states that all references to housing in FIRREA are intended to include manufactured housing, but not temporary shelters such as recreational vehicles or campers which are designed to be moved frequently. See FIRREA Conference Report at 437.

As under the Call Report, loans secured by one-to-four family property would not include land development loans, which are loans secured by real estate made to finance land improvements preparatory to erecting structures, such as laying sewers, water pipes, etc. The proposed definition of "home mortgage loan" also does not include property securing "residential construction loans" (see proposed § 933.1(i)). Since land development and construction loans are generally not secured by property upon which is located one or more homes or dwelling units (which is required by the statutory definition of "home mortgage loan"), they are not included in the proposed definition of "home mortgage loan." In addition, these loans generally have terms to maturity of five years or less and, therefore, would not be "long-term," as required under the "makes" test. (See discussion of "long-term" below.)

The proposed definition of "one-to-four family property" varies from the Call Report definition in several

respects. First, the definition excludes vacant lots (or unimproved property) in established one-to-four family sections or in areas set aside primarily for one-to-four dwelling units. This would be a continuation of current Finance Board practice to exclude loans on unimproved property from satisfying the "makes" test because the statutory definition of "home mortgage loans" requires that the loans be secured by real estate upon which is located one or more dwelling units.

Second, unlike the Call Report definition, the proposed definition results in the exclusion of loans secured by junior liens on one-to-four family property (such as home equity loans) from satisfying the "makes" test. This is because the statutory definition of "home mortgage loans" requires that they be secured by first mortgages or liens. This would continue the current Finance Board practice of excluding such loans under the "makes" test.

Multifamily Property

Current Finance Board practice is to exclude loans secured by first mortgages on multifamily property from satisfying the "makes" requirement because they are not traditional one-to-four family loans. In contrast to one-to-four family properties, multifamily properties may be purchased for investment purposes, rather than for use as primary residences. In addition, multifamily properties may have a mixed use, *e.g.*, part residential, and part commercial.

However, the statutory definition of "home mortgage loans" can be interpreted to include multifamily loans that are secured by a first mortgage on real estate. The Finance Board believes that it is appropriate to expand the type of loans that meet the "makes" test to include this type of multifamily lending. This interpretation is consistent with the housing finance mission of the FHLBanks.

Accordingly, the Finance Board proposes in § 933.1(j) to include loans secured by a first mortgage on multifamily property within the definition of "home mortgage loan," and to define the term "multifamily property" in § 933.1(p) in a manner similar to the Call Report. "Multifamily property" is defined specifically as follows:

(1) Real property containing five or more dwelling units;

(2) Real property containing five or more dwelling units with commercial units combined, provided the property is primarily residential.

For the reasons discussed above, this definition follows the Call Report and current Finance Board practice and does not include land development loans, certain residential construction loans, and loans secured by vacant lots.

Mortgage Pass-Through Securities

As the term is used in proposed § 933.1(j)(2), a mortgage pass-through security represents an undivided ownership interest in one or more loans or in securities representing interests in loans. The holder of a mortgage pass-through security receives a *pro rata* share of the interest and principal repayments from the underlying pool of mortgage loans or mortgage-backed securities.

For purposes of the "makes" test, the Finance Board currently treats mortgage pass-through securities as if they were the mortgage loans underlying the securities. The Finance Board proposes to continue this approach. Therefore, "home mortgage loan" is defined in proposed § 933.1(j)(2) to include mortgage pass-through securities which represent an undivided ownership interest in one or more loans or securities representing an undivided ownership interest in loans, all of which loans independently satisfy the definition of "home mortgage loan" (*i.e.*, first mortgage loans, etc.) at the time of issuance of the security.

Collateralized mortgage obligations (CMOs) and other mortgage debt securities technically do not represent an ownership interest in the underlying pool of mortgage loans. Instead, they represent a debt obligation that is secured by the underlying mortgage loans. Although an argument can be made that mortgage debt securities should be included as home mortgage loans, because the secondary mortgage market generally does not make distinctions between mortgage pass-through securities and mortgage debt, the Finance Board has concluded that, for purposes of this proposed rule, a security must represent an ownership interest in home mortgage loans in order to satisfy the "makes" test. However, as discussed in 2.a. below, mortgage debt securities will continue to satisfy the "10 percent" requirement.

It should be noted that, if mortgage debt securities were included in the definition of home mortgage loans, members' minimum stock purchase requirements would be increased. This is because the stock purchase requirement is based on the member's "aggregate unpaid loan principal," which is defined in section 6(b)(4) of the Bank Act as home mortgage loans, home-purchase contracts, and similar obligations. 12 U.S.C. 1426(b)(4) (Supp. I 1989).

Other Loans

The proposed definition of "home mortgage loan" in § 933.1(j) also would include any loans which the Finance Board in its discretion otherwise determines are home mortgage loans. For example, the Finance Board could use this provision to determine on a case-by-case basis that other types of loans and new loan products can be used to satisfy the "makes" test.

The proposed definition of "home mortgage loan" follows current Finance Board practice in generally excluding loans secured by "nonresidential real property" (see proposed § 933.1(q)). The proposed rule defines "nonresidential real property" generally to include properties such as business and industrial properties, churches, dormitories, hotels, "homes" for the elderly, golf courses, hospitals, nursing homes and farm property not containing dwelling units. These categories of property are typically nonresidential in nature and generally are treated as nonresidential by the Federal banking agencies for financial reporting purposes. However, the proposed definition provides the Finance Board the discretion to determine, on a case-by-case basis, that specific properties are more residential than nonresidential in nature and that loans secured by a first mortgage on such properties should therefore be treated as "home mortgage loans" for purposes of satisfying the "makes" test.

In addition, the proposed definition generally excludes loans secured by real property that is not only used for residential purposes, but also for business or farm purposes and which is not considered primarily residential (combination business or farm property) (see proposed § 933.1(f)). Such property is predominantly commercial or agricultural in nature and generally is treated as such by the Federal banking agencies for financial reporting purposes. However, as discussed above, the proposed definition of "home mortgage loan" provides the Finance Board the discretion to determine, on a case-by-case basis, that specific combination loans are more residential than nonresidential in nature, and therefore may be treated as "home mortgage loans" under the "makes" test.

b. Long-term requirement. Section 4(a)(1)(C) of the Bank Act requires that an applicant for membership in the FHLBank System make such home mortgage loans as, in the judgment of the Board, are long-term loans. 12 U.S.C. 1424(a)(1)(C) (Supp. I 1989). At the time of enactment of the Bank Act, home mortgage loans generally consisted of

non-amortizing straight-line mortgage loans, which required repayment of the total outstanding principal at the end of the maturity period, usually three to five years. See 75 Cong. Rec. 12608 (June 10, 1932 (remarks of Rep. Hancock); see also 75 Cong. Rec. 12605 (June 10, 1932) (remarks of Rep. Overton) and 75 Cong. Rec. 14644 (July 6, 1932) (remarks of Sen. Copeland). The legislative history of the Bank Act indicates that Congress intended to create an alternative to such short-term non-amortized credit. *Id.* At the same time, in drafting this provision, Congress gave the Finance Board discretion in defining "long-term."

In defining "long-term," the Finance Board has weighed the legislative history against the reality of the marketplace today. The Finance Board proposes to define a "long-term home mortgage loan" in § 933.1(m) as a home mortgage loan with a term to maturity of greater than five years. Many financial institutions currently offer mortgage loans with maturities of three to 10 years, in lieu of or in addition to the traditional 15- or 30-year mortgage loan, in response to the demands and preferences of the institutions' customers. Most of these loans are balloon payment loans with maturities ranging from three to 10 years and payments amortized over 15, 25, or 30 years. Since they have reduced interest sensitivity and risk, these loans can be funded less expensively than a fully amortizing 30-year loan. Consequently, the loan often can be offered to customers at lower rates than the fully amortizing variety. The lower interest rate and the reduced principal payment resulting from a 30-year amortization schedule often enable customers to finance the purchase of homes in circumstances where fully amortizing 15- or 30-year loans are unsuitable to their needs. From the institution's standpoint, 5-, 7-, or 10-year non-fully amortizing loans present no incremental interest rate or funding risk, if they are properly funded.

Moreover, given the fact that most residential mortgage loans are refinanced (or repaid through the sale of the residence) in fewer than 10 years from origination, these types of loans actually reflect the realities of most customers' habits and actions. For borrowers who plan to stay in their homes fewer than 10 years, balloon payment loans may provide a lower-cost, fixed-rate alternative to a 15- or 30-year fixed-rate mortgage loan. These circumstances account in large part for the growing availability of these types of loans at financial institutions.

In view of the foregoing, inclusion of home mortgage loans with maturities of greater than five years among the categories of loans which qualify an institution for FHLBank membership recognizes marketplace realities, and further helps promote the availability of affordable home financing to customers consistent with the FHLBank System's basic mission. Home mortgage loans with maturities of five years or less, regardless of whether the loans fully amortize, generally represent too short a maturity to meet the intent and purpose of the Bank Act based on the legislative history of the Bank Act as discussed above. Finally, the greater-than-five-year standard for "long-term" also would be consistent with the definition of "long-term advance" set forth in the Finance Board's community support regulation, 12 CFR 936.1(n), 56 FR 58639 (Nov. 21, 1991), and § 935.1 of the Finance Board's proposed advances regulation, 57 FR 45338 (October 1, 1992).

Proposed § 933.1(m) defines a "long-term home mortgage loan" as "a home mortgage loan with a term to maturity of greater than five years, or any other home mortgage loan which the Board in its discretion determines is a long-term loan." The Finance Board may determine on a case-by-case basis in taking action on membership applications that certain loans with an original maturity of five years or less meet the "long-term" standard. For example, a mortgage with a term to maturity of five years or less that permits refinancing without requalification may be considered "long-term" despite being of shorter duration than otherwise permitted. This flexibility is built into the proposed rule in order to permit the Finance Board to respond to innovations in mortgage financing without requiring changes to the rule.

The proposed rule does not distinguish between fully amortizing loans and loans that are not fully amortizing. Changes in the mortgage marketplace over the past 60 years have greatly reduced the concerns which existed concerning mortgage loans which are not fully amortizing. In 1932, when the Bank Act was originally enacted, there was considerable concern regarding a borrower's ability to refinance a balloon payment. Today, mortgage financing is more readily obtainable, particularly if the borrower has over five years to secure that refinancing.

Therefore, the Finance Board proposes including within the definition of "long-term home mortgage loan" any home mortgage loan with a term to maturity of greater than five years, regardless of whether the loan is non-amortizing, not fully amortizing, or fully amortizing.

C. *Definition of "makes".* The Bank Act provides that an institution is eligible for FHLBank membership if it makes such home mortgage loans as, in the judgment of the Board, are long-term loans. 12 U.S.C. 1424(a)(1)(C) (Supp. I 1989). This provision is implemented in § 933.3(a)(3) of the proposed rule.

Both the Finance Board and its predecessor, the Bank Board, have interpreted "makes" to include both originating and purchasing qualifying loans, as well as mortgage-backed securities backed by qualifying loans. See Opin. Gen. Couns., Bank Board (Jan. 25, 1988). The Finance Board proposes to continue using this definition of "makes".

The proposed rule includes the assets of an institution's consolidated subsidiaries in the calculation of the "makes" test. This permits applicants that have chosen to use subsidiaries to originate or purchase home mortgage loans or mortgage-backed securities to include those assets in meeting the requirements for membership. The proposed rule defines a "consolidated subsidiary" in § 933.1(g) as a subsidiary of a member whose assets and liabilities are consolidated with those of the member for purposes of reports filed with the member's appropriate Federal banking agency. This definition is intended to reduce or eliminate the need for accounting adjustments on the part of the applicant or FHLBank staff, since it is based on the consolidation standards used by the applicant's appropriate Federal banking agency.

2. Section 4(a)(2). Membership Requirements

Section 933.3(a) (4) through (6) of the proposed rule implements the membership requirements set forth in section 4(a)(2) of the Bank Act. 12 U.S.C. 1424(a)(2). As noted above and discussed more fully below, the Finance Board proposes to apply these requirements to insurance company applicants as well as insured depository institutions. The proposed rule lists the requirements as follows:

(A) The institution has at least 10 percent of its total assets in residential mortgage loans;

(B) The institution's financial condition is such that advances may be safely made to such institution; and

(C) The character of the institution's management and its home-financing policy are consistent with sound and economical home financing.

The proposed rule defines "residential mortgage loans" as used in

the 10 percent requirement. See proposed § 933.1(s). In addition, the proposed rule allows an applicant to include the assets of its consolidated subsidiaries when calculating the 10 percent requirement, as is permitted in calculating home mortgage loans under the "makes" test.

a. *Residential mortgage loans.* The term "residential mortgage loans" is not defined in the Bank Act or current Finance Board regulations. However, the legislative history of FIRREA, which added the 10 percent requirement, provides some guidance on the types of loans Congress intended to include within the 10 percent requirement.

The legislative history of FIRREA indicates that the 10 percent requirement is a product of a compromise between the Senate and the House of Representatives. The compromise reduced the threshold percentage requirement from 60 percent of assets in "Qualified Thrift Investments" (QTIs) under the "Qualified Thrift Lender" (QTL) test in section 10(m) of the HOLA, 12 U.S.C. 1467a(m), to 10 percent of assets in "residential mortgage loans." It is thus reasonable to look, in part, for guidance at the types of loans (*i.e.*, QTIs) that qualify for the QTL test under the QTL regulation implementing section 10(m), 12 CFR part 563 (56 FR 31061 (July 9, 1991)), in determining the types of loans that satisfy the 10 percent requirement.

In contrast to the "makes" test, which requires that institutions make "long-term" home mortgage loans, section 4(a)(2)(A) of the Bank Act has no similar long-term requirement for residential mortgage loans. Therefore, there is no statutory requirement that the years to maturity and the amortization period for residential mortgage loans be defined for the 10 percent requirement.

One-to-Four Family, Multifamily, and Funded Residential Construction Loans

Explicit language in the legislative history indicates that 1–4 family, multifamily and funded residential construction loans are includable as "residential mortgage loans" for purposes of the 10 percent requirement. See FIRREA Conference Report at 428. Current Finance Board practice is to include such loans as satisfying the 10 percent requirement.

The Finance Board proposes to continue including such loans by defining the term "residential mortgage loans" in proposed § 933.1(s) to include: (1) Home mortgage loans (as defined in proposed § 933.1(j)); and (2) funded residential construction loans (as defined in proposed § 933.1(i)). See discussion above. As discussed earlier, "home mortgage loans" would be defined generally to include loans secured by first mortgages on one-to-four family property and multifamily property. A "funded residential construction loan" is defined in proposed § 933.1(i) as the portion disbursed to the borrower of a loan secured by real property made to finance the on-site construction of one-to-four or multifamily dwelling units.

Consistent with the proposed "makes" test and current Finance Board practice, land development loans which finance land improvements preparatory to erecting structures would not be includable under the 10 percent requirement. This is because, unlike residential construction loans, it is uncertain that the activities financed by land development loans will result in residential housing construction.

The proposed "residential mortgage loans" definition follows the proposed "makes" test and current Finance Board practice in excluding loans secured by nonresidential property (see proposed § 933.1(q)). While certain of these loans (*e.g.*, nursing homes, churches, schools, hospitals) are included in the limited category of QTIs subject to percentage restrictions under the QTL regulation, the Finance Board proposes to follow the Federal banking agencies which generally treat such loans for financial reporting purposes as nonresidential in nature. See 12 CFR 563.51(f)(vi) (D) and (E). However, as discussed above, the proposed definition provides the Finance Board with the discretion to determine, on a case-by-case basis, that specific loans may be more residential than nonresidential in nature, and therefore should be treated as "residential mortgage loans" for purposes of satisfying the 10 percent requirement.

The proposed definition of "residential mortgage loans" generally excludes combination business or farm property (see proposed § 933.1(f)), since this type of property is predominantly commercial or agricultural in nature and generally is treated as such by Federal banking agencies for financial reporting purposes, and excludes loans on vacant property. However, the Finance Board has the discretion to determine, on a case-by-case basis, that specific combination loans are more residential than nonresidential in nature, and therefore may be treated as "residential mortgage loans" under the 10 percent requirement.

Manufactured Housing Loans Not Secured by Real Estate

Although manufactured housing loans not secured by real estate may be treated by Federal banking agencies as consumer loans for some purposes, they are residential in nature, as residents often live in such housing on a full-time, permanent basis. Accordingly, the Finance Board proposes to include such loans in the proposed definition of "residential mortgage loans" as satisfying the 10 percent requirement. This would be a change from the current Finance Board practice of excluding such loans from satisfying the 10 percent requirement. Manufactured housing loans secured by real estate under state law are included in the definition of "home mortgage loans" and, therefore, also could be used to meet the 10 percent requirement.

Loans Secured by Junior Liens

Current Finance Board practice is to include loans secured by junior liens on one-to-four family or multifamily property in calculating the 10 percent requirement. These loans are secured by residential real property, and in contrast to the "makes" test, need not be secured by first mortgages or liens in order to be used to meet the 10 percent requirement. In addition, home equity loans are specifically included in the unlimited category of QTIs not subject to percentage restrictions under the QTL test. See 12 U.S.C. 1467a(m)(4)(C)(ii)(II); 12 CFR 563.51(f)(1)(ii). Loans secured by junior liens also appear to be included in the unlimited category of QTIs under the QTL regulation. See 12 CFR 563.51(f)(1)(i). Accordingly, the Finance Board proposes to continue including loans secured by junior liens on one-to-four family or multifamily property as satisfying the 10 percent requirement, by defining the term "residential mortgage loans" in § 933.1(s) to include these loans.

Residential Loans in Process

Residential loans in process are mortgage loan commitments under which the proceeds have not yet been disbursed to the borrower. For example, construction loans where the funds are not released until specific conditions are met are loans in process. *See* Thrift Financial Report, Schedule SC–280. Current Finance Board practice is to exclude residential loans in process from satisfying the 10 percent requirement. The proposed definition of "residential mortgage loans" continues this practice of excluding residential loans in process.

Consumer Loans

Consumer loans (*i.e.*, loans for personal, family, household or educational purposes) are included in the limited category of QTIs subject to

percentage restrictions under the QTL regulation. See 12 CFR 563.51(f)(1)(vi)(F). However, such loans are treated as nonresidential loans by the Federal banking agencies for financial reporting purposes. Current Finance Board practice is to exclude such loans from satisfying the 10 percent requirement.

The proposed definition of "residential mortgage loans" continues the Finance Board practice of excluding consumer loans, notwithstanding their QTL treatment, because of their nonresidential nature. As discussed above, however, manufactured housing loans would be included under the 10 percent requirement because of their residential purpose.

Mortgage-Backed Securities

As discussed above, there is a reasonable basis for looking at QTIs in determining what loans qualify as "residential mortgage loans" under the 10 percent requirement. QTIs include securities backed by or representing an interest in mortgages on domestic residential housing or manufactured housing. 12 U.S.C. 1467a(m)(4)(C)(ii)(III); 12 CFR 563.51(f)(1)(iii). Based on the QTI definition, the Finance Board proposes to include within the definition of "residential mortgage loans" not only mortgage pass-through securities, which also are included in the definition of "home mortgage loans" for purposes of the "makes" requirement, but mortgage debt securities as well.

Mortgage debt securities can consist of collateralized mortgage obligations (CMO), mortgage-backed bonds; stripped instruments such as interest-onlys trips (I/O) or principal-only strips (P/O), or CMO residuals. This list of securities is meant to be illustrative and not exhaustive of the types of investments which qualify as mortgage debt securities in the continually evolving secondary mortgage market. The proposed rule requires that mortgage pass-through and mortgage debt securities be entirely backed by assets which meet the definition of "residential mortgage loans" (*i.e.*, home mortgage loans, etc.) at the time of issuance of the security, in order to satisfy the definition of "residential mortgage loans" under the 10 percent requirement.

As discussed above under the "makes" test, CMOs and other mortgage debt securities do not represent an equity interest in the underlying mortgage loans. Under the proposed rule, the mortgage loans collateralizing a CMO could be counted as a "residential mortgage loan" by the institution issuing a CMO and the CMO could be counted as a "residential mortgage loan" by a different institution that owns the CMO for purposes of meeting the 10 percent requirement. In essence, the same mortgage assets could be used twice to meet the 10 percent requirement. The Finance Board is concerned about permitting these assets to be double counted, and specifically requests comment on whether CMOs and other mortgage debt securities should be included in the definition of "residential mortgage loans" under the 10 percent requirement.

Home Mortgage Loans Secured by Leaseholds

The definition of "residential mortgage loan" in proposed § 933.1(s) also includes home mortgage loans secured by leasehold interests, as defined in proposed § 933.1(j), except that the period of the lease term may be of any duration. These loans are included because they are residential in nature, and the duration of the lease term does not impact on the residential nature of such loans.

Other Loans

The proposed definition of "residential mortgage loan" in § 933.1(s) also includes any other loans which the Finance Board in its discretion otherwise determines are residential mortgage loans. The Finance Board could use this provision to determine on a case-by-case basis when it is reviewing and taking action on applications that other types of loans and new loan products satisfy the 10 percent requirement.

b. Financial condition. Section 4(a)(2)(B) of the Bank Act requires that, in order to be eligible for FHLBank membership, an insured depository institution's financial condition must be such that advances may be safely made to it. 12 U.S.C. 1424(a)(2)(B). Section 933.3(a)(5) of the proposed rule implements this requirement.

c. Character of management and home-financing policy. The Bank Act requires that the character of an insured depository institution's management and its home-financing policy be consistent with sound and economical home financing in order to be eligible for FHLBank membership. 12 U.S.C. 1424(a)(2)(C). Section 933.3(a)(6) of the proposed rule implements this requirement.

The Finance Board believes that an institution's commitment to and record of performance in meeting the credit needs of its entire community, including low- and moderate-income residents and neighborhoods, is an integral part of a sound home-financing policy. Currently, the Finance Board reviews Community Reinvestment Act (CRA) ratings of commercial bank and thrift applicants to evaluate their compliance with the home-financing policy requirement. The Finance Board specifically requests comment on the use of CRA ratings, or some other test or tests, for purposes of satisfying this requirement.

Currently, insurance company and credit union applicants are asked to provide evidence of their housing- and community-related activities for purposes of compliance with the home-financing policy requirement. Insurance companies and credit unions are not subject to the CRA and therefore do not receive such ratings. Thus, a comparable or alternative test is necessary to evaluate compliance of such applicants with this requirement. The Finance Board specifically requests comment on appropriate methods to determine compliance by such applications with the home-financing policy requirement.

C. Membership Eligibility Requirements for Insurance Companies

As noted earlier, section 4(a)(1) of the Bank Act, as amended, defines the types of financial institutions eligible to become members of the FHLBank System as follows: any building and loan association, savings and loan association, cooperative bank, homestead association, insurance company, savings bank, or any insured depository institution. 12 U.S.C. 1424(a)(1) (Supp. I 1989). Insurance companies have been eligible to become members of the FHLbank System since the original enactment of the Bank Act in 1932. See 47 Stat. 726 (July 22, 1932).

Insurance company applications for membership currently are considered by the Finance Board on a case-by-case basis. The following section discusses the various statutory eligibility criteria applicable to insurance companies, and raises specific issues for which the Finance Board seeks public comment in determining what standards should apply to insurance companies.

1. Section 4(a)(1). Membership Requirements

In order to be eligible to become a FHLBank member, an insurance company applicant must meet the membership requirements set forth in subparagraphs (A) through (C) of paragraph 4(a)(1) of the Bank Act, 12 U.S.C. 1424(a)(1)(A)–(C), and proposed § 933.3(a) (1) through (3). These requirements are discussed further below.

a. The institution is duly organized under the laws of any State or of the United States. 12 U.S.C. 1424(a)(1)(A). This requirement is straightforward and presumably would be satisfied by all insurance company applicants. *See* proposed § 933.3(a)(1).

b. The institution is subject to inspection and regulation under the banking laws, or under similar laws, of any state or of the United States. 12 U.S.C. 1424(a)(1)(B). See proposed § 933.3(a)(2). All insurance companies are subject to inspection and regulation by state insurance departments in their state of incorporation, as well as by the states in which they are licensed to do business. State insurance laws are similar to Federal banking laws in that they require regulatory monitoring of compliance with minimum capital and reserve requirements, financial condition, asset valuation and compliance with various consumer related requirements. However, some states may require more rigorous inspection and regulation of insurance companies than other states, and some states may not conduct inspections of insurance companies at all or may not conduct on-site inspections. The Finance Board specifically requests comment on whether the degree of inspection and regulation imposed by a particular state should be a factor in determining whether an insurance company applicant satisfies the "inspection and regulation" requirement.

c. The institution makes such home mortgage loans as, in the judgment of the Finance Board, are long-term loans. Id. at 1424(a)(1)(C). Insurance company applicants would be subject to the same requirements under the "makes" test as are applicable to other depository institution applicants. *See* proposed § 933.3(a)(3). In other words, the types of loans and investments previously discussed which meet the definitions of "long-term" and "home mortgage loans" under proposed § 933.1 also would count towards satisfaction of the "makes" test for insurance company applicants. Thus, insurance company applicants could use mortage pass-through securities backed by qualifying long-term home mortgage loans (see definition of "home mortgage loan" in proposed § 933.1(j)), to meet the "makes" test. This would be a continuation of the Finance Board's current practice of including mortgage-backed securities towards satisfaction of the "makes" test. It would also permit an insurance company to become a member even if it did not originate mortgage loans.

2. Section 4(a)(2). Membership Requirements

Section 4(a)(2) of the Bank Act also establishes membership eligibility requirements, including the 10 percent requirement, which are applicable to an insured depository institution that is not a member on January 1, 1989. See 12 U.S.C. 1424(a)(2). The Finance Board proposes to apply all of these eligibility requirements to all applicants for membership, including insurance company applicants. See proposed § 933.3(a) (4) through (6).

The argument could be made that because an insurance company is not an "insured depository institution," as defined in section 2(12) of the Bank Act, see *id.* at 1422(12), it is not subject to the section 4(a)(2) requirements. Language in the legislative history of FIRREA (which added the 10 percent requirement) also suggests that Congress intended that the 10 percent requirement, (and possibly all of the second set of membership criteria in section 4(a)(2)), apply to insured depository institutions such as commercial banks and credit unions. See Joint Explanatory Statement of the Committee of Conference, H.R. Conf. Rep. 222, 101st Cong., 1st Sess. 424–25 (1989); 135 Cong. Rec. S. 10206 (daily ed. Aug. 4, 1989) (statement of Sen. Riegle).

However, while section 4(a)(2) of the Bank Act refers to insured depository institutions, it does not provide that only such institutions are subject to the membership eligibility requirements set forth in that section. Under the Bank Act, the Finance Board's primary duty is to ensure that the FHLBanks operate in a financially safe and sound manner. In addition, to the extent consistent with its primary duty, the Finance Board is responsible for, *inter alia*, supervising the FHLBanks, and ensuring that the FHLBanks carry out their housing finance mission. See 12 U.S.C. 1422a(a)(3), 1422b(a)(1) (as amended). Pursuant to these general powers, the Finance Board may determine, as a matter of policy, that some or all of the section 4(a)(2) membership eligibility requirements should apply to insurance company applicants. In addition, prior to the FIRREA amendment to the Bank Act, the financial condition, character of management and home-financing policy requirements were applicable to insurance companies, see 47 Stat. 726 (July 22, 1932), and it is not clear why such requirements should not continue to apply to insurance companies.

The Finance Board specifically requests comment on whether, as a threshold matter, any or all of the section 4(a)(2) eligibility requirements should not apply to insurance company applicants. In this regard, the Finance Board also requests comment on whether other provisions of the Bank Act applicable to approved FHLBank members, such as the requirement that long-term advances be used only for residential housing finance, the collateral requirements for advances, the QTL restrictions, or the community support requirements, sufficiently promote the FHLBanks' housing finance mission and safe and sound operation so as to justify not applying any or all of the section 4(a)(2) membership eligibility requirements to insurance company applicants. See 12 U.S.C. 1430(a), (e), (g). Each of the membership eligibility requirements set forth in section 4(a)(2) is discussed further below.

a. The institution has at least 10 percent of its total assets in residential mortgage loans. See id. at 1424(a)(2)(A). See proposed § 933.3(a)(4). The types of "residential mortgage loans" under proposed § 933.1(s) which would satisfy the test for insurance company applicants.

The Finance Board is aware that some large insurance companies may not be able to meet the 10 percent requirement because they are not primarily residential mortgage lenders. However, even though the insurance company fails the 10 percent requirement, it could be one of the largest mortgage originators in the state. In other words, the dollar amount of residential assets could be large, but when compared to the total assets of the company, such residential assets could constitute less than 10 percent of total assets. The Finance Board specifically requests comment on whether a different test that achieves the same objectives as the 10 percent requirement should apply to insurance company applicants, and if so, what that test should be.

b. The institution's financial condition is such that advances may be safely made to such institution. See 12 U.S.C. 1424(a)(2)(B). See proposed § 933.3(a)(5). Because each state examines and regulates insurance companies according to its own regulatory, examination, accounting and compliance standards, there is no single objective measurement of insurance company financial condition that can be applied to all insurance companies nationwide. For example, insurance companies do not receive CAMEL or MACRO ratings.

The Finance Board is in the process of gathering information on how various state insurance departments examine and rate the financial condition of

insurance companies. This information will be used to assist the Finance Board in establishing a standard or standards that the Finance Board can apply consistently to all insurance company applicants in determining whether the insurance company's financial condition is such that advances may be safely made to it. The Finance Board specifically requests comment on what standard or standards should be established under this membership eligibility requirement.

c. The character of the institution's management and its home-financing policy are consistent with sound and economical home financing. See 12 U.S.C. 1424(a)(2)(C). See proposed § 933.3(a)(6). A depository institution applicant's management can be evaluated, in part, by reviewing the management component of the CAMEL or MACRO rating in its regulatory examination. Insurance companies do not receive such ratings.

The Finance Board is in the process of gathering additional information on how various state insurance departments examine and rate the character of management of insurance companies. This information will assist the Finance Board in establishing a standard or standards that the Finance Board will apply consistently to all insurance company applicants in determining whether the character of the insurance company's management is consistent with sound and economical home financing.

As discussed more fully above, insurance companies do not receive CRA ratings which could otherwise be used to evaluate the companies' home-financing policies. Therefore, a comparable or alternative test is necessary to evaluate compliance of insurance company applicants with the home-financing policy requirement. The Finance Board specifically requests comment on appropriate methods to determine compliance by such applicants with the home-financing policy requirement.

d. One-year grace period. See 12 U.S.C. 1424(a)(2). Section 933.3(b) of the proposed rule applies to a member that has recently commenced business operations. Such a member is given one year from the date of commencing its initial business operations to meet the 10 percent requirement, as required by section 4(a)(2) of the Bank Act. Although section 4(a)(2) of the Bank Act by its terms applies to insured depository institutions, the Finance Board proposes to apply this section to insurance company members as well. The Finance Board specifically requests comment on this proposal.

D. Membership at Principal Place of Business

Under section 4(b) of the Bank Act, institutions eligible to become members may become members only of the FHLBank of the district in which their "principal place of business" is located, or of a FHLBank in an adjoining district if demanded by convenience and with the approval of the Finance Board. See 12 U.S.C. 1424(b) (Supp. I 1989). This requirement is implemented in § 933.5(a) of the proposed rule.

The Bank Act does not define the term "principal place of business." Section 933.5 of the Finance Board's existing regulations defines the term generally as the state in which the institution maintains its "principal office." See 12 CFR 933.5 (1992). The term "principal office" is not defined anywhere in the Finance Board's existing regulations that were transferred from the Bank Board. However, the Finance Board's regulations do define "principal place of business" as the state in which the member maintains its home office established as such in conformity with the laws under which the member is organized. See 12 CFR 931.24. This is essentially the same as the definition of "principal office" which was in the former Bank Board's regulations at the time the Bank Board's regulations were transferred to the Finance Board. See 12 CFR 561.7 (1989). The Finance Board has decided to continue to use this definition. Accordingly, proposed § 933.5(b) provides that unless otherwise designated, an institution's principal place of business will continue to be the state in which the institution maintains its home office established as such in conformity with the laws under which the institution is organized.

The proposed rule also makes changes to the ability of a member to transfer its membership to a different FHLBank district. Prior to FIRREA, the PSAs of the FHLBanks had the authority to apply certain regulatory criteria in order to ascertain whether or not a member's charter accurately reflected its true principal place of business. See 12 CFR 523.3–2(c) (1989). The review was aimed at assuring the accessibility, validity and reliability of supervisory information.

The proposed rule eliminates the use of supervisory considerations in determining which FHLBank district is the district of the member's "principal place of business" because, after FIRREA, the FHLBanks no longer supervise their members. Under § 933.5(c) of the proposed rule, a member or an applicant for membership may request in writing that a state other than the state in which it maintains its home office be designated as its principal place of business. The board of directors of the Bank in the district where the institution maintains its home office shall designate within 90 days of receipt of such written request a state other than the state where the institution maintains its home office as the institution's principal place of business, provided all of the following factors are satisfied:

(1) At least 80 percent of the institution's accounting books, records or ledgers are maintained, located, or held in such state;

(2) A majority of meetings of the institution's board of directors and constituent committees are conducted in such state; and

(3) A majority of the institution's five highest paid officers have their place of employment located in such state.

However, under § 933.5(d) of the proposed rule, no designation done pursuant to § 933.5(c) may take effect until the FHLBank districts involved reach agreement on an orderly method of transfer of membership. If the FHLBanks fail to reach an agreement, the Finance Board determines the conditions of the transfer.

Under proposed § 933.5(f), if the board of directors of a FHLBank fails to make the designation requested by the member or applicant pursuant to proposed § 933.5(c), then the member or applicant can request in writing that the Finance Board make the designation.

The Finance Board specifically requests comment on whether the provisions on determination of principal place of business should allow members greater flexibility to move their membership to a different FHLBank district. The Finance Board recognizes that some members do business nationwide. It is therefore interested in comments as to how restrictive it should be in permitting transfers between FHLBank districts. What would be the advantages and disadvantages in having a less restrictive or more restrictive rule? What impact, if any, would a rule permitting members greater flexibility to transfer membership have on the FHLBank System?

E. Stock Requirements

1. Minimum Stock Purchase

Section 6(b) of the Bank Act requires all members to purchase FHLBank stock equal to one percent of the member's "aggregate unpaid loan principal," but not less than $500. 12 U.S.C. 1426(b) (Supp. I 1989). The term "aggregate

unpaid loan principal" is defined in proposed § 933.1(b) as the aggregate unpaid principal of a subscriber's or member's home mortgage loans, home purchase contracts, and similar obligations. See 12 U.S.C. 1426(b)(4) (Supp. I 1989). The term "home mortgage loan" is defined in proposed § 933.1(j). See 12 U.S.C. 1422(5) (Supp. I 1989). In order to ensure that the FHLBanks are applying the definition uniformly, the Finance Board will issue guidelines to the FHLBanks setting forth the method to be used in making these calculations. The Finance Board intends to phase in the uniform guidelines over a period of time in order to mitigate any burden on the FHLBanks as they adjust their capital levels to comply with the new uniform guidelines.

Unlike insured depository institutions, insurance companies do not have standardized financial reporting forms which could be used to calculate their minimum stock purchase requirements. The Finance Board specifically requests comment on how the stock purchase requirement should be calculated for insurance companies.

In addition, section 10(e)(3) of the Bank Act requires each member to purchase FHLBank stock as if at least 30 percent of its assets were home mortgage loans. *Id.* at 1430(e)(3). If an institution's portfolio of home mortgage loans falls below 30 percent of its total assets, section 10(e)(3) requires it to compute its minimum stock purchase as if it has 30 percent of its total assets in home mortgage loans. Thus, a member is required to maintain FHLBank stock equal to at least one percent of 30 percent of its total assets.

Section 933.7(a) of the proposed rule implements the minimum stock purchase requirements in sections 6(b) and 10(e)(3) of the Bank Act. The stock requirements under these sections are mandatory minimum levels of stock a member must hold under the Bank Act.

2. Timing of Stock Purchase

Section 6(c) of the Bank Act establishes the point in the application process at which an applicant for membership in the FHLBank System is required to pay for its minimum stock purchase. 12 U.S.C. 1426(c) (Supp. I 1989). Section 6(c) provides generally, in pertinent part, that stock subscriptions shall be paid for at the time of application therefore, or, at the election of the subscriber, in installments, but not less than one-fourth of the total amount payable shall be paid at the time of filing application, and a further sum of not less than one-fourth of such total shall have been paid at the end of each succeeding period of four months. *Id.*

Section 933.7 of the Finance Board's existing regulations interprets section 6(c) to require an applicant to subscribe for stock when it submits an application for membership. 12 CFR 933.7 (1992). However, the regulation creates confusion as to when an applicant actually becomes a member. Section 2(4) of the Bank Act defines the term "member" as any institution which has subscribed for the stock of a FHLBank. 12 U.S.C. 1422(4) (Supp. I 1989). Thus, if an applicant subscribes for stock at the time it submits its application for membership with a FHLBank, the applicant meets the definition of a "member" under the Bank Act before the application has been approved.

Section 933.7(b) of the proposed rule, in conjunction with the proposed definition of "member" in § 933.1(o), provides that an applicant need not pay for stock until its application for membership in a FHLBank has been approved. Upon approval, the applicant has 30 calendar days in which to pay its minimum stock purchase. In the alternative, the applicant (at its election) may pay for the stock in installments. The first one-quarter installment must be paid within 30 calendar days, and a further sum of not less than one-fourth of the total amount payable shall be paid at the end of each succeeding period of four months until the total is paid. If the applicant fails to pay for its minimum stock purchase or its first quarterly installment within 30 calendar days of its approval for membership, the approval shall be rescinded and the applicant will be required to submit a new application for membership. The applicant may apply in writing to the Finance Board for an extension of time within which to purchase its minimum stock requirement. The Finance Board may approve such request not to exceed 30 days upon evidence of good cause. The stock purchase requirements for "Sasser amendment" and "Oakar amendment" transactions are discussed in paragraph 5, below.

An applicant may withdraw from consideration for membership at any point up until it purchases stock in a FHLBank. An applicant approved for membership becomes a member at the time it pays for its minimum stock requirement or pays for the first installment of its minimum stock requirement. Further, since the institution is deemed a member once it has purchased its first installment, it is entitled to the privileges of membership including the ability to obtain advances from its FHLBank. However, the institution's borrowing capacity would be limited by the advances-to-capital stock requirements in sections 10(c) and 10(e) of the Bank Act. See 12 U.S.C. 1430(c) and 1430(e). If it then fails to pay the remaining installments due on its minimum stock requirement, the Finance Board would have the discretion to remove the institution from membership pursuant to § 933.14 of the proposed rule.

3. Adjustments in Holdings

Section 933.9 of the proposed rule repeats the requirements of § 933.9 of the Finance Board's existing regulations regarding adjustments in minimum stock holdings, but also amends it to clarify that a FHLBank shall calculate a member's minimum stock holdings annually, using calendar year-end financial data provided by the member to the Bank each year, in accordance with proposed § 933.18(d).

4. Stock Holdings After the Consolidation of Members

a. Institutions in same district. The proposed rule redesignates § 932.5 of the Finance Board's existing regulations (12 CFR 932.5 (1992)) as paragraph (a) of § 933.11 of the proposed rule. Section 932.5 of the Finance Board's existing regulations governs the treatment of FHLBank stock in a consolidation of two or more members located in the same FHLBank district into one institution operating under the charter of one of the consolidating institutions. See 12 CFR 932.5 (1992). Under proposed § 933.11(a), the stock of the disappearing institution(s) may be redeemed as long as the consolidated institution holds the minimum amount of stock required under proposed § 933.7(a), based on the total assets and borrowings of the consolidated institution.

b. Institutions in different districts. The proposed rule adds new § 933.11(b), which governs the treatment of FHLBank stock in a consolidation of two member institutions located in different FHLBank districts into one institution operating under the charter of one of the consolidating institutions (interdistrict consolidation). In an interdistrict consolidation, the disappearing institution's membership terminates upon cancellation of its charter, except when more than 80 percent of the assets of the consolidated institution are derived from the disappearing institution. In such cases, the disappearing institution's membership shall continue and the membership of the other institution shall be terminated upon consummation of the consolidation. Although the consolidated institution would be a

member of a different FHLBank district, it could be required to hold the FHLBank stock of the FHLBank of which it is no longer a member for as long as that FHLBank requires that the stock be held as collateral securing any indebtedness to the FHLBank. Such indebtedness would be liquidated in an orderly manner as determined by the FHLBank. Upon the completion of such liquidation, the FHLBank shall redeem the stock in a manner prescribed in § 933.16 of this proposed rule and the consolidated institution would be paid for the redeemed stock.

The consolidated institution would be entitled to receive dividends on the stock of the FHLBank of which it is no longer a member, since holders of FHLBank stock share in dividend distributions without preference. See 12 U.S.C. 1426(g) (Supp. I 1989). However, the consolidated institution would not be allowed to vote such shares in an election of directors of the FHLBank, since the consolidated institution is not a member of that FHLBank. See 12 U.S.C. 1424(b) (Supp. I 1989). Further, the consolidated institution may not include the stock of the FHLBank of which it is no longer a member in its calculation of the number of votes it is allowed to cast in an election of directors of the FHLBank in which it is a member, since such stock represents an ownership interest in a different corporate entity. See *id.* at 1427(b).

5. Charter Conversion and Reorganization Transactions

The so-called "Sasser amendment" authorizes an SAIF-insured savings association to convert to a commercial bank or state chartered savings bank, but requires that the deposits of the resulting institution remain insured by the SAIF. 12 U.S.C. 1815(d)(2)(G) (1989) (Sasser amendment transactions). The insurance of these deposits may not be transferred from the SAIF to the Bank Insurance Fund (BIF) until after August 9, 1994. 12 U.S.C. 1815(d)(2)(A)(ii) (1989).

The so-called "Oakar amendment" authorizes a commercial bank or BIF-insured savings bank to merge with, consolidate with, or acquire the assets of, an SAIF-insured savings association. See Federal Deposit Insurance Corporation Improvement Act (FDICIA), Public Law 102–242, section 501, 105 Stat. 2236 (Dec. 19, 1991) (Oakar amendment transactions). The Oakar amendment institution must continue to pay premiums to SAIF on the deposits attributable to the former savings association unless the deposits are transferred to the BIF. As with Sasser amendment transactions, this cannot be done until after August 9, 1994.

The OTS currently conditions its approval of Sasser amendment and Oakar amendment transactions by requiring the resulting institution to retain the association's stock in the FHLBank System for as long as SAIF premiums are being assessed on the deposits transferred from the association, in accordance with the requirements of the Finance Board.[1] This condition has given rise to considerable legal and operational confusion in the FHLBank System as to the appropriate treatment of such institutions for purposes of FHLBank membership and stock holding requirements. The proposed rule establishes the rules for retention of such stock in Sasser amendment and Oakar amendment transactions.

a. Sasser amendment transactions. The proposed rule amends existing § 932.6 of the Finance Board's regulations and redesignates it as § 933.2(e). This redesignated section addresses the treatment (for purposes of membership and stock holding requirements) of a savings association member that has converted to another charter.

Under § 933.2(e) of the proposed rule, when a member savings association converts to a new charter and continues to be an insured depository institution, the resulting institution shall automatically become a member on the effective date of such conversion. See 12 U.S.C. 1815(d)(2)(A)(ii) (Supp. I 1989). This is because the newly chartered institution is identical to the former institution except for its form of charter. No application for membership thus would be required.

However, after converting its charter to that of a commercial bank or state savings bank, the institution may withdraw from membership in its FHLBank because it is not required by law to be a FHLBank member. While section 6(e) of the Bank Act prohibits Federal savings associations from withdrawing from FHLBank membership, there is no such statutory authority to prohibit commercial banks or state savings banks from withdrawing from membership. See 12 U.S.C. 1426(e) (Supp. I 1989). As with any other institution exiting the FHLBank System, the Sasser amendment institution must file with the Finance Board and its FHLBank a written notice six months before it withdraws. It would not be permitted to reacquire membership in any FHLBank for a period of 10 years. See 12 U.S.C. 1426(e) and (h) (Supp. I 1989), and proposed § 933.13(a).

Once the Sasser amendment institution terminates its membership in the FHLBank System, it may not continue to hold FHLBank stock since, under the Bank Act, only member institutions may own FHLBank stock. In such cases, the Sasser amendment institution would be required to repay all outstanding advances and its capital stock in the FHLBank would be redeemed. *See id.* at 1426(e). Such liquidation of advances and redemption of stock would be administered in accordance with § 933.16 of this proposed rule.

b. Oakar amendment transactions. The proposed rule amends existing § 932.4 of the Finance Board's regulations and redesignates it as § 933.12. This redesignated section addresses the membership and stock holding requirements of institutions that acquire members in an Oakar amendment transaction.

Under § 933.12 of the proposed rule, when an institution that is not a FHLBank member acquires FHLBank stock as a result of acquiring the assets of a member, the acquiring institution may not continue to hold the FHLBank stock unless it becomes a member of the FHLBank System. Under the proposed rule, the acquiring institution would have 60 calendar days after the effective date of the reorganization to notify the FHLBank that it intends to apply for membership. If such notification is given, and as long as an application is filed within 60 calendar days of such notification, the FHLBank may permit the acquiring institution to continue to hold any outstanding FHLBank advances and the FHLBank stock owned by the disappearing institution pending a determination on the membership application. If the acquiring institution fails to apply for FHLBank membership, or if its application is denied, it would be required to repay all outstanding advances to the FHLBank. Such advances shall be liquidated in an orderly manner as determined by the FHLBank. As the advances are liquidated, the FHLBank may redeem outstanding FHLBank stock on a *pro rata* basis. However, the institution's stock holdings shall not be reduced to an amount less than that required by sections 10(c) and 10(e) of the Bank Act,

[1] On August 18, 1992, the OTS issued a proposed rule which sets forth new procedures for Sasser amendment and Oakar amendment transactions when the resulting institution is not a savings association. See 57 F.R. 37112 (Aug. 18, 1992). Under OTS's proposed rule, the OTS would no longer issue orders approving such transactions. Instead, the resulting institution would be required simply to submit a notice to the OTS in the form of either a letter describing material information regarding the transaction, or a copy of a filing made with its primary regulator.

until all outstanding indebtedness to the FHLBank has been liquidated. 12 U.S.C. 1430(c), (e) (Supp. I 1989). Upon completion of such liquidation, the acquiring institution's FHLBank stock shall be redeemed in the manner prescribed in § 933.16 of this proposed rule. The acquiring institution would be entitled to receive dividends on outstanding stock acquired in the transaction, but would not be allowed to cast votes on such stock in an election of directors of the disappearing institution's FHLBank, unless the acquiring institution is approved for membership.

Unlike resulting institutions in Sasser amendment transactions, acquiring institutions in Oakar amendment transactions cannot automatically become members of the FHLBank System because they may not meet the FHLBank membership eligibility criteria. Under proposed § 933.12(c), in order to be a member of the FHLBank System (and, thus, to be able to hold stock in a FHLBank), an Oakar amendment institution must apply for membership in accordance with the requirements of § 933.2 of the proposed rule. The Oakar amendment institution shall become a member upon approval of its application for membership.

The Oakar amendment institution shall maintain the minimum amount of stock required under § 933.7(a) of the proposed rule, based on its total assets and borrowings after the reorganization. If the amount of stock acquired by the Oakar amendment institution is less than the amount required under § 933.7(a) of the proposed rule, the deficient amount of stock must be purchased within 30 calendar days of membership approval. At the election of the Oakar amendment institution, the deficient amount of stock may be purchased in installments. Not less than one-fourth of the total deficient amount payable must be paid within 30 calendar days of membership approval, and a further sum of not less than one-fourth of such total is paid at the end of each succeeding period of four months until the total is paid. The Oakar amendment institution may apply in writing to the Finance Board for an extension of time within which to purchase the deficient amount of stock. The Finance Board may approve such request not to exceed 30 days upon evidence of good cause.

The acquiring institution would not be subject to the 10-year moratorium on reacquiring FHLBank membership set forth in § 933.17 of this proposed rule if it applies for membership and is not approved or if it chooses not to become a FHLBank member. This is because the institution simply acquired FHLBank stock in a merger transaction and was never itself a member of the FHLBank System. *See* 12 U.S.C. 1426(h) (Supp. I 1989).

F. Withdrawal and Removal From Membership

1. Procedure for Withdrawal

The proposed rule redesignates § 933.32 of the Finance Board's existing regulation on voluntary withdrawal from membership as § 933.13. The proposed rule also revises that section to provide that a member that is eligible under applicable law to withdraw from FHLBank membership must provide the Finance Board and its FHLBank at least six months written notice of its intention to terminate its membership in conformance with section 6(e) of the Bank Act. 12 U.S.C. 1426(e) (Supp. I 1989). The proposed rule continues to allow a member to cancel its notice of withdrawal by providing to both the Finance Board and its FHLBank a written cancellation notice before the effective date to the withdrawal. After such cancellation of its notice of withdrawal, a member would need to provide an additional full six months written notice if it subsequently decides to withdraw.

2. Procedure for Removal

The proposed rule redesignates § 933.33 of the Finance Board's existing regulation on removal of institutions for membership as § 933.14. The proposed rule continues to set forth the statutory grounds contained in section 6(e) of the Bank Act, 12 U.S.C. 1426(e), for removing a member from membership, and adds an additional ground in proposed § 933.14(b)(4) pursuant to the Finance Board's general supervisory powers over the FHLBanks. A member may be removed from membership in a FHLBank if any of the following grounds exists:

(1) Failure to comply with any provision of the Bank Act or any Finance Board regulation;

(2) Insolvency (assets less than liabilities);

(3) Its management or home-financing policies are inconsistent with sound and economical home financing or the purposes of the Bank Act; or

(4) Any other condition of the member's operations that the Finance Board believes would jeopardize the safety and soundness of the FHLBank.

Under proposed § 933.14(a), if a FHLBank believes that any of these grounds exists for removing a member, it may submit a written request to the Finance Board recommending removal of such member and stating the grounds for such removal. If the Finance Board believes, upon recommendation of a FHLBank or otherwise, that any of the grounds for removal exists, and it determines that membership should be withdrawn, it must give the member at least 30 calendar days written notice of its intention to terminate the member's membership. Such notice shall state the grounds for removal and the time and place for a hearing on such removal action.

Section 933.33 of the Finance Board's existing regulations on removal from membership references the OTS' adjudicatory procedures for hearings (12 CFR part 509). The reference to the OTS' adjudicatory procedures was placed originally in § 933.33 (formerly 12 CFR 523.31 (1989)) by the former Bank Board. Section 933.14 of the proposed rule does not reference the OTS' adjudicatory procedures. Instead, the proposed rule states that hearings on removal of members from the FHLBank System shall be conducted in accordance with procedures established by the Finance Board.

3. Automatic Termination of Membership for Institutions Placed in Receivership

Section 933.15 of the proposed rule provides for the automatic termination of membership for institutions placed in receivership. The receiver may be required to maintain FHLBank stock for as long as the FHLBank requires as collateral securing any outstanding indebtedness to the FHLBank. Such indebtedness shall be liquidated in an orderly manner as determined by the FHLBank. As such indebtedness is liquidated, the FHLBank shall redeem the stock held by the receiver in the manner prescribed in § 933.16 of this proposed rule. The receiver shall be entitled to receive dividends on outstanding FHLBank stock of the institution placed in receivership in accordance with section 6(g) of the Act, 12 U.S.C. 1426(g), and § 932.3 of the Finance Board's regulations. The receiver may not cast votes on the FHLBank stock of the institution placed in receivership in an election of directors of such institution's Banks.

4. Orderly Liquidation of Advances and Redemption of Stock

The proposed rule adds § 933.16 to implement the requirements in section 6(e) of the Bank Act concerning the orderly liquidation of advances and subsequent redemption of FHLBank stock upon termination of an institution's membership in the FHLBank System. See 12 U.S.C. 1426(e)

(Supp. I 1989). Under the proposed rule, if an institution owes no outstanding indebtedness to its FHLBank upon termination of membership, the FHLBank is permitted to immediately redeem the institution's FHLBank stock. Further, proposed § 933.16 requires that the indebtedness of such institution to the FHLBank be liquidated in an orderly manner as determined by the FHLBank. Under § 933.16(a) of this proposed rule, such liquidation may be done with a *pro rata* redemption of outstanding FHLBank stock. However, the institution's stock holdings shall not be reduced to an amount less than that required by sections 10(c) and (10(e) of the Bank Act, until all outstanding indebtedness to the FHLBank has been liquidated. 12 U.S.C. 1430(c), (e) (Supp. I 1989). Upon completion of such liquidation, the institution's remaining FHLBank stock would be redeemed. The institution would receive a sum equal to the original amount it paid for such FHLBank stock. However, if at any time the Finance Board finds that the paid-in capital of a FHLBank is or is likely to be impaired as a result of losses in or depreciation of the assets held by the FHLBank, the FHLBank shall on the order of the Finance Board withhold from the amount to be paid in retirement of the stock a *pro rata* share of the amount of such impairment as determined by the Finance Board.

5. Acquisition of Membership After Expiration of Period of Withdrawal

Section 6(h) of the Bank Act provides that an institution which withdraws from membership may acquire membership in any FHLBank only after the expiration of a period of 10 years thereafter. 12 U.S.C. 1426(h) (Supp. I 1989). There are two statutory exceptions to the moratorium on reacquiring membership: where such withdrawal is a consequence of a transfer of membership on a non-interrupted basis between Banks or in connection with obtaining a charter as a Federal saving association. *Id.* The proposed rule adds § 933.17 to implement this 10-year moratorium on reacquiring membership.

Under proposed § 933.7(b)(3), an applicant newly approved for membership that fails to purchase its minimum stock requirement or first quarterly installment thereof within the required 30-day period, is not a "member" as defined in proposed § 933.1(o). The institution therefore is not subject to the 10-year moratorium on reentry in the FHLBank System for withdrawals of "members" from the FHLBank System.

G. FHLBank Access to Information

The proposed rule revises §§ 933.18 and 933.22 of the Finance Board's existing regulations on reports and examinations to implement the changes made to section 22(b) of the Bank Act by FIRREA. Both sections, as revised, are combined as § 933.18 of the proposed rule. Specifically, proposed § 933.18 implements section 22(b) of the Bank Act, which requires as a condition precedent to FHLBank membership that a member be deemed:

(1) To consent to such examinations as the FHLBank or the Finance Board may require for purposes of FHLBank membership;

(2) To agree that reports of examinations by local, state, or Federal agencies or institutions may be furnished by such authorities to the FHLBank or the Finance Board upon request; and

(3) To agree to give the FHLBank or the Federal agency, upon request, such information as they may need to compile and publish cost of funds indices and to publish other reports or statistical summaries pertaining to the activities of FHLBank members.

12 U.S.C. 1442(b) (Supp. I 1989).

In addition, § 933.18(d) of the proposed rule requires members to provide their FHLBank with their calendar year-end financial data each year, to allow the FHLBank to calculate the member's minimum stock purchase requirement. Section 933.18(e) of the proposed rule requires members to provide their FHLBank with a copy of the Call Report, Thrift Financial Report, or other appropriate reports of operation and condition within 20 calendar days of filing with the member's appropriate Federal banking agency. This will allow the FHLBank to monitor the member's credit quality and financial condition.

H. Institutions Eligible To Make Application To Become Members

In 1980, Congress expanded the scope of the FHLBanks' non-credit services through the enactment of the Depository Institutions Deregulation and Monetary Control Act of 1980 (DIDMCA). *See* Pub. L. 96–221, 94 Stat. 132 (March 31, 1980). Specifically, section 311 of DIDMCA added section 11(e)(2) of the Bank Act to permit the FHLBanks, subject to such rules and regulations (including definitions of terms used in this paragraph) as the Finance Board may prescribe, to provide correspondent services to members and institutions which are eligible to make application to become members pursuant to section 4 of the Bank Act. 12 U.S.C. 1431(e)(2) (Supp. I 1989). The "eligible to make application" language is not defined anywhere in the Bank Act. However, section 11(e)(2) of the Bank Act contains explicit language which grants the Finance Board considerable discretion to define the terms used in that section, including the "eligible to make application" language.

Accordingly, the Finance Board proposes in § 933.1(k) to define "institutions which are eligible to make application to become members" for purposes of contracting for FHLBank correspondent services as "any building and loan association, savings and loan association, cooperative bank, homestead association, insurance company, savings bank or any insured depository institution, regardless of whether the institution applies for or would be approved for membership." Under this definition, a non-member need not satisfy the membership eligibility criteria in section 4, namely the 10 percent requirement, but simply must come within one of the categories of institutions listed in section 4(a) as eligible to become a member of the FHLBank System.

In determining how to interpret the phrase "eligible to make application," the Finance Board looked at similar language in other sections of the Bank Act for guidance. For example, sections 4(a) (1) and (2), which list the membership eligibility criteria, use the language "eligible to become a member" and "may become a member," respectively, in delineating the criteria an applicant must meet in order to be eligible for FHLBank membership. 12 U.S.C. 1424(a) (1) and (2) (Supp. I 1989). Furthermore, section 6(f) provides generally that an FHLBank may permit the disposal of stock to another member, or to an institution eligible to become a member, but only to enable such an institution to become a member. *Id.* at 1426(f).

There is a clear distinction between "eligible to make application" in section 11(e)(2) and "eligible to become a member." The "eligible to make application" language suggests some lesser standard than actually being eligible to become a member.

The legislative history of section 11(e)(2) also supports the proposed definition of "institutions which are eligible to make application." In addition to granting the FHLBanks check processing and clearing powers, Congress granted similar authority in section 312 of the DIDMCA to the National Credit Union Administration's (NCUA's) Central Liquidation Facility to process checks and drafts for its member credit unions. Although sections 311 and 312 follow each other in the DIDMCA and confer similar powers, there is one significant difference between the two sections. Section 311

authorizes the FHLBanks to offer correspondent services to members and "institutions which are eligible to make application to become members." In contrast, section 312 confers on the NCUA's Central Liquidation Facility the authority to offer correspondent services to credit unions and other entities that are eligible to become a member of the Central Liquidation Facility. This is the only substantive difference between the two statutory provisions. To interpret these phrases in exactly the same manner would ignore the "to make application" language contained in section 311.

Further, the "eligible to make application" language is used in another context in the DIDMCA. Section 103 of the DIDMCA amended section 19(b) of the Federal Reserve Act and thereby expanded the types of institutions which are required to hold reserves against deposits. Reserves must be maintained against deposits held by financial institutions that meet the Federal Reserve Act's definition of "depository institution." Section 103 of the DIDMCA amended section 19(b) of the Federal Reserve Act to define the term "depository institution" as any insured bank, mutual savings bank, savings bank, credit union, savings and loan association, or any institution "eligible to make application" to become any of the foregoing. 94 Stat. 133, current version at 12 U.S.C. 461. The DIDMCA Conference Report states that the purpose of this language is to make reserve requirements applicable to all depository institutions. Joint Explanatory Statement of Congress, H.R. Rep. No. 842, 96th Cong., 2d Sess. 69 (1980).

On several occasions, the Board of Governors of the Federal Reserve System (Federal Reserve Board) has interpreted the "eligible to make application" language to apply the reserve requirements very broadly to any institution that is eligible to make application for deposit insurance, whether or not the institution meets the requirements for deposit insurance. See Board Ruling and Staff Opinions Interpreting Regulation D, Opinions 2–310, 2–310.1, 2–301.13, and 2–310.14, 3 Fed. Banking L. Rep. (CCH) ¶ 30,499G. In each case, the analysis focused on whether the institution is permitted under its chartering authority to apply for deposit insurance. Although several conditions must be met in order to actually obtain deposit insurance (*e.g.*, valid incorporation, an acceptable management staff, sound financial condition), the Federal Reserve Board did not consider such conditions when determining whether an institution is eligible to make application for deposit insurance and, thus, subject to reserve requirements under section 19(b).

In view of the foregoing, the Finance Board has concluded that for purposes of contracting for FHLBank correspondent services, the phrase "institutions which are eligible to make application to become members" in section 11(e)(2) of the Bank Act should be interpreted to mean all institutions listed in section 4(a) of the Bank Act, regardless of whether or not they have satisfied or would satisfy all of the requirements to actually obtain FHLBank membership.

III. Solicitation of Comments

The Finance Board solicits comments on all aspects of this proposed rule. The Finance Board is providing a 60-day comment period.

Regulatory Flexibility Act

The proposed rule largely implements statutory requirements applicable to institutions applying for membership in the FHLBank System, regardless of their size. The Finance Board is not at liberty to make adjustments to those statutory requirements to accommodate small entities. The proposed rule would not impose any new recordkeeping requirements and requires only minimal additional reporting at minimal cost for institutions applying for FHLBank membership. The proposed rule allows applicants for membership for the most part to demonstrate that they satisfy the requirements of the proposed rule by providing copies of reports already generated for other purposes. The Finance Board has not imposed any additional regulatory requirements that will have a disproportionate impact on small entities.

For these reasons, it is certified, pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 605(b)), that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The information collection requirements contained in this proposed rule have been submitted to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act of 1980, 44 U.S.C. chapter 35. The title, description of need and use, and the respondent description for the information collection requirements are discussed in the SUPPLEMENTARY INFORMATION.

Any comments on the proposed information collection should be sent to Gary Waxman, Paperwork Reduction Project, OMB, room 3208, New Executive Office Building, Washington, DC 20503.

In accordance with 5 CFR 1320.15 and 1320.21, the following table discloses the estimated annual reporting burden for each collection of information in the proposed rule:

ESTIMATED ANNUAL REPORTING BURDEN

Description of information collected	Average number of respondents	×	Average number of responses per respondent	=	Total average responses	×	Average hours per response	=	Total average hours
1. Membership application	900		1		900		13.0		11,700.0
2. Stock calculation	3,300		1		3,300		0.6		1,980.0
3. Membership withdrawal	6		1		6		0.6		3.6
4. Principal place of business	6		1		6		3.5		21.0
Totals	4,212		1		4,212		*3.3		13,704.6

*Weighted average hours per response.

List of Subjects

12 CFR Part 932

Conflict of interests, Federal home loan banks.

12 CFR Part 933

Federal home loan banks, reporting and recordkeeping requirements.

Accordingly, the Federal Housing Finance Board hereby proposes to amend title 12, chapter IX, subchapter B of the Code of Federal Regulations, as follows:

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

PART 932—ORGANIZATION OF THE BANKS
